M@L!K Hafeez

EDU301

Mid-Term Past Papers

Q. No. 1):-

What is informal education?

Answer:-

The education which is not given in proper schools is called informal education. If we see, Buddha, Pythagoras, Jesus christ, Prophet Muhammad (S.A.W) and karl marx. They all did it in informal organizations.

Q. No. 2):-

Discuss teaching as a social, political and ethical activity?

Answer:-

AS social activity:-

Man is social animal because it lives with other people, it socializes with other people. It is necessary for its existance and emotional strength to stay with other human beings. When we say that teaching is a social activity, it means that teaching can't be done in isolation. At

Scanned with CamScanner

needs people with whom teaching can be done. So it is essentially a Social activity.

AS a political Activity :-

If we say that teaching is a political activity then teacher needs to have some perception and teacher need to discuss those ideas with students. Actually both of them should work together for a Social change. Because political ideas are important not only in the sense of politics, politics means a set of ideas. Teacher must share ideas with the students so that they can work for a change in society.

AS ethical Activity:-

It is a duty of a teacher to fulfill his responsibilities ethically. Ethics include that teacher need to be committed to their Profession, they need to be honest and dedicated. If teachers are not exhibiting the above then they are not taking it as an ethical activity.

Scanned with CamScanner

Q.No.3):-

What about Metaphors on teaching?

Answer:-

There are different metaphors of teaching, actually what we think about teaching is our metaphor. The metaphor is something that tells that how you take teaching?

We think that teacher.

i) is a source of light
ii) is like a tree.
iii) is a gardener.

Q.No.4):-

What is formal education?

Answer:-

A formal education comprises of a basic education that a person receives at school.

Q.No.5):-

Is teaching an art or science?

Answer:-

Art:-

Idea of "Teaching is an Art" was developed by William James in

Scanned with CamScanner

1891. So, an artist is able to create things. If we say that teaching is an art then we are expecting that teacher needs to be very imaginative, innovative, teacher must have the skills that an artist posses.

Science:-

Science is an organized body of knowledge. Organized body of knowledge means that it is very systematic. It has some research underpinnings and theoretical underpinnings. Research and science go side by side. The claim that teaching is a science; it shows that there is research in teaching.

Q.No.6:-

What is apprentice ship model?

Answer:-

It is also a way of learning. A person who wants to learn a skill spends a certain period of time with a skillful person. In this way the person who doesn't have skills learn those skills.

Scanned with CamScanner

Q.No.7):-

What is reflective practice?

Answer:-

Reflective practice is very important for a teacher. Being a professional, I need to raise standard of my profession and reflective practice is definitely one of the standards of teaching profession.

Reflection is of two types

i) Reflection in action

ii) Reflection on action.

Q.No.8):-

What is observational learning?

Answer:-

observational learning is something that we learn by observing others. There are number of people who learn things by just observing other people.

Q.No.9):-

What is inhibitory effect?

Answer:-

When you learn something, and observe others, you think that it is

Scanned with CamScanner

not right. So you left that thing. This is not a new learning. It is what you learn by observing others. To unlearn something that was learnt.

Q. No. 10):-

What is disinhibitory effect?

Answer:-

Disinhibitory effect take place when you think that whatever you have learnt is right and you can carry on with it. That is not a new learning.

Q. No. 11):-

How are there modeling process?

Answer:-

There are 4 important modeling processes and ~~research~~ research has established these modeling processes.

i) Attention
ii) Retention
iii) Production
iv) Motivation

Scanned with CamScanner

Q.No.12):-

What is ZPD?

Answer:-

The gap between actual and potential level of child is zone of proximal development (ZPD). Vygotsky is very famous for this concept of his theory.

Q.No.13):-

What is actual and potential level?

Answer:-

Actual level is the initial level of child's learning and potential level is the level where a child can stand. The potential level is usually one step ahead the actual level. If the student is at actual level, he has the potential to come up to the potential level. The important role here is of teacher. If a teacher helps the student, he/she can reach to the potential level easily.

Scanned with CamScanner

Q.No.14):-

How would developmental perspective effect on decision-making?

Answer:

If we take decisions in class according to developmental perspective and notices the theories of Piaget and Vygotsky we will conclude

Piaget's theory:

A child learns by himself. He plays with things, get into different experiences and as a result he learns. Piaget's perspective is stage-wise.

Vygotsky's theory:-

Vygotsky also says that a child construct his own knowledge. But according to him, Social context is very important. He says that it is not a linear process that a child must learn stay-wise.

Q.No.15):-

How can Behavioural perspective effect on decision making?

Answer:-

Behavioural perspective means that

Scanned with CamScanner

students may get any change in their behaviour. The new concept you are going to teach to a student must be measurable and can be seen from his behavior that the certain concept has been taught.

Q. No. 16):-

What is cognitive perspective in Decision making?

Answer:-

Cognitive perspective is to develop student's academic and thinking skills from a novice level to a more expert level. Cognitive perspective can be related to ZPD but in that and adult's presence is important In cognitive perspective, presence on adult is not necessary but complexity of task is important.

Q. No. 17):-

What is Active learning? (VIP)

Answer:-

Active learning is where human mind is actively involved in

Scanned with CamScanner

conducting meaning of the experience. When a teacher teaching in a class, this is not active learning unless there is no questioning in the class. A good teacher is the one who engages the students in active learning.

Q.No.16):-

What is lecturing?

Answer:-

Lecturing is also known as declarative knowledge. This is the knowledge that is declared in books, research papers, newspapers or you acquired that knowledge from your elders / teachers.

There are two parts in this knowledge facts and concepts.

Facts are something that you memorize.

concepts are Newton's law, rules of grammer, writing patterns and we say that these are also part of our declarative knowledge.

Scanned with CamScanner

Q. No. 19):-

What is direct instruction?

Answer:-

Direct instruction is also called procedural knowledge. This knowledge is a step ahead from that declarative knowledge. In which you acquired the knowledge but still you need to know its procedures as well.

Q. No. 20):-

What is cooperative groups?

Answer:-

Cooperative groups are also known as Metacognition or metacognitive knowledge.

According to wikipedia "Metacognition is cognition about cognition".

e.g. a child does not know the concept of evaporation, but he learns that what he should do to learn concept of evaporation. That is metacognition. If you can transfer your learning in a new situation. So

Scanned with CamScanner

this is called transferable skill.

Q.No.21):-

There are how many types of knowledge?

Answer:-

There are 3 types of knowledge.

i) declarative knowledge
ii) Procedural knowledge
iii) Metacognitive knowledge.

Q.No.22):-

What is educational equity?

Answer:-

Equity means that all students are treated equally well and that all school resources are shared equally. So, equity does not mean treating people equally by snubbing or scolding them. But it means that we must treat them well.

Q.No.23):-

How many kinds of diversity?

Answer:-

There are 3 main kinds of diversity which are.

Scanned with CamScanner

i) Socioeconomic diversity
ii) Physical diversity
iii) Ability diversity.

Q. No. 24):-

write names of categories of exceptionality?

Answer:-

There are 6 categories of exceptionality.

i) Intellectual
ii) Communicative
iii) Sensory
iv) Behavioral
v) Physical
vi) multiple

Q. No. 25):-

What is bilingual and immerson model?

Answer:-

Bilingual:-

Bilingual means that if you are teaching them English and they know urdu language, then you need to use both urdu and English language in class.

Immerson Model:-

Research says that bilingual mood may be ineffective for young

Scanned with CamScanner

children. So another model was presented. This is known as immersion model. It means that you immerse the students in the new situation of language.

Q. No. 26):-

What is Dyslexia?

Answer:-

The term Dyslexia is used while explaining multiple diversity among people. But this term is not explained clearly. Dyslexia means: Problems with reading, writing, spelling, symbols and numbers, because brain misinterprets what it see (visual) and hears (auditory). Dyslexia does not affect the intelligence of a person.

Q. No. 27):-

Which key terms are used in planning?

Answer:-

There are 4 key terms used in planning. which are

i) Goals. ii) objectives

iii) Instructional objectives iv) Strategy

Scanned with CamScanner

Q.No.28):-

There are how many domains of learning?

Answer:-

There are 3 domains of learning.

i) Cognitive domain
ii) Affective domain
iii) Physchomotor domain

Q.No.29):-

How many Levels of Bloom's Taxanomy? of cognitive domain?

Answer:-

There are 6 Level of Bloom's Taxanomy.

(i) Knowledge Level (ii) Comprehension Level
(iii) Application Level (iv) Analysis Level
(v) Synthesis Level (vi) Evaluation Level.

Knowledge is the first level of Bloom's taxanomy of cognitive domain then comprehension and Application. These three are categorized as lower level of learning.

The next three levels ie analysis, synthesis and Evaluation are categorized as higher level of learning.

Scanned with CamScanner

Q.No.30):-

What is Knowledge Level in Bloom's Taxonomy?

Answer:

According to Bloom, this is the lowest level of learning. In schools we mostly focus on testing of this level.

(i) It is about recalling of information.

(ii) It is about knowledge of data, events and places.

(iii) Knowledge of major ideas.

(iv) Mastery of subject matter.

Q.No.31):-

What is comprehension Level in Bloom's Taxonomy?

This is the level of understanding and in this level we expect from the students to use their own words. Eg. the translation from Urdu to English or English to Urdu also comes in the comprehension level because we can check the understanding of the students.

Scanned with CamScanner

Questions in Comprehension Level :-

(i) Describe two nation theory?

(ii) State the difference b/w human eye and camera?

(iii) What are function of plant, root and stem?

(iv) What did Goldilock do, when she went to bear's house?

Q. No. 32):-

What is Analysis level in Bloom's taxanomy?

Answer:-

Analysis Level questions are higher-order questions that requires students to think critically and in depth. Several answers are possible to an analysis-question. Analysis-questions expect from students to identify reasons, reach conclusions and analyze conclusions.

Questions in Analysis Level:-

(i) Why do we need balanced diet?

(ii) What factor did influence Quaid-e-Azam to formulate fourteen points?

(iii) Vaccination saves body against varial diseases. How?

(iv) Human beings are polluting air. How?

Scanned with CamScanner

Q.No.33):-

What is synthesis Level in Bloom's taxonomy?

Answer:-

Important thing in Synthesis level is that students solve problems, Predict future happenings and at the same time they create certain things. It has a distinction with analysis Level that analysis Level says to set apart the things and in Synthesis Level, things are put together.

Questions in synthesis level:-

(i) write an appropriate title for text?

(ii) How can government solve a problem of narcotics?

(iii) How can we remove energy crisis in Pakistan?

(iv) Summarize the story including its main idea?

Q.No.34):-

What is Evaluation Level in Bloom's taxonomy?

Answer:-

In Analysis level we give conclusion

Scanned with CamScanner

and then students have to analyze the conclusion. But Evaluation level is different here is an opinion on which you are going to generate a discussion on opinions or on the basis of arguments.

Questions in Evaluation Level:-

(i) Discuss that we are not good citizens?

(ii) Prove that Smoking is harmful?

(iii) Which PM of Pakistan was most successful? why?

Q.No.35):-

What is Psychomotor domain?

Answer:-

Psychomotor domain is the domain where your body movements are involved. There is learning also. if we are drawing a painting or writing something, our muscles are involved in it.

Q.No.36):-

How many Level's of Simpson's Psychomotor domain?

Answer:-

There are 7 Hierarchical

Scanned with CamScanner

Levels of Simpson's Psychomotor domain which are

(i) Perception (ii) Set
(iii) Guided Response (iv) Mechanism
(v) Complex over response
(vi) Adaption (vii) origination

Q.No.37):-

How many levels of Bloom's and krathwohl's taxonomy? (Affective domain)

Answer:-

There are 5 Level of Bloom's and krathwohl's taxonomy.

(i) Receiving
(ii) Responding
(iii) Valuing
(iv) organization
(v) characterization.

Q.No.38):-

What is performance objective? write its elements?

Answer:-

"objectives are intent of teaching."

"The Purpose of objective is to communicate the exact intent of lesson."

Scanned with CamScanner

"Performance objectives are precise statements of what you expect students to do."

"Precise statement means an exact statement which tells the teacher, what students will be able to do.

Performance objectives have 3 elements.

(i) Performance
(ii) Condition
(iii) Criterion measure.

Q. No. 39):-

What is curriculum Alignment?

Answer:-

Whenever we are going to write performance objectives, they must to be aligned with the curriculum. If your purpose of education is that the students should empowered citizens. So, the entire objective that you will construct, affective domain will be very important. It is important for broader curriculum to identify educational experiences.

Scanned with CamScanner

Q.No.40):-

What is planning?

Answer:-

Planning is essentially a nested process with horizontal and vertical dimensions. If a teacher is going to teach in the class without planning a lesson, then he is not a part of process of teaching. As a result, he cannot teach appropriately in the class.

Horizontal dimension of planning:-

In horizontal level planning includes selection of activities, resources, assessment and homeworks.

Vertical dimension of planning:-

In vertical level, it includes link between standards, benchmarks, learning outcomes and instructional objectives.

Q.No.41):-

How many components of good planning?

Answer:-

There are two components

Scanned with CamScanner

of Good Planning.

(i) Holistic vision

(ii) Detailed implementation.

Holistic vision comes from curriculum planning while detailed implementation comes from lesson planning.

Q.No.42):-

What do you know about Benchmarks for grade 1 and 2?

Answer:-

Students recognize words and sentences as meaningful units of expression and paragraph as graphical units of expression. The important thing in this benchmark is that the student is able to know the difference between a sentence and a paragraph.

Q.No.43):-

How for a teacher necessary to know the motivation level of student?

Answer:-

A teacher needs to know the

Scanned with CamScanner

motivation Level of students as they need to know their entry level skills. When you are going to teach in a class with Lesson planning, you are not only to cover the syllabus/content. You have to teach them some possesses and you need to plan some activities as well. So if you don't know the motivational level of students then you will not be able to know plan appropriate learning activities for them.

Q.No.44):

What is unit planning? write its importance?

Answer:-

Unit planning is part of our planning framework. Most of times, teachers divide their overall content into some manageable instructional unit and Teachers divid the whole content into blocks of the same type. So these blocks are called unit plans.

Scanned with CamScanner

importance of unit planning:-

Unit planning is important because we need to know the reasons for dividing the whole thing into components. Most of times, teachers' complaint for shortage of time. This problem can be solved by making the detailed unit plans.

Q.No.45):-

Write components of unit plan?

Answer:-

There are 8 components of unit plan.

(i) Subject/topic (ii) Rationale
(iii) Instructional objectives (iv) Content
(v) Processes (vi) Resources
(vii) Learning activities (viii) Evaluation.

Q.No.46):-

What is lesson plan?

Answer:-

A systematic design for the development, implementation and evalution of instruction is called lesson plan. It is basically "a technical for delivering actual instruction."

Scanned with CamScanner

Q.No.47):-

What is IEP? write its characteristics?

Answer:

Individual education plans is basically an extended adaptation of a lesson plan. The focus in IEP will be on the needs of the learns rather on the content to be taught. Teacher can write simple lesson plans bc they are not extended or in much detail. But IEP are written in extended form.

characteristics of IEP:-

(i) Individualized and child centered
(ii) Inclusive
(iii) Holistic
(iv) Collaborative
(v) Accessible.

Q.No.48):-

What are the post lesson activities?

Answer:-

Post lesson activities are

(i) Evaluating lesson plans
(ii) Evaluating unit plans
(iii) Record keeping

Scanned with CamScanner

Q.No.49):-

What is evaluation of Teaching?

Answer:

There are certain questions that need to be raised and answered while evaluating teaching. These are

(i) Did i achieve my objective?
(ii) Did i build lessons on student's responses?
(iii) Did i communicate clearly with students?
(iv) Did i keep eye contact with student?
(v) Did i give feedback to pupils constructively?
(vi) Did i manage time and resources effectively?

Q.No.50):-

What is sequencing?

Answer:-

The art of developing logical plan for instructional activities is called sequencing. Such plan consists of interlink steps. The step are in progression.

Q.No.51):-

What are the principles of sequencing?

Answer:-

Principles of sequencing are

Scanned with CamScanner

(i) Teacher needs to start lesson with simple steps.
(ii) Use concrete examples.
(iii) Add complexity to the lesson.
(iv) Introduce abstractions.

Q. No. 52):-

What is knowledge form?

Answer:-

Knowledge may be simply divided into two forms: one is content and the other is process.

Content is the information, you want your student to learn.

Processes are the motor and thinking skills you want your student to learn

Q. No. 53):-

what is generalization?

Answer:-

A generalization is an inferential statement that expresses a relationship between two or more concepts. It applies more than one event and has predictive and explanatory value.

Scanned with CamScanner

Q.No.54):-

What are facts?

Answer:-

(i) Singular in occurrence
(ii) occur or exists in present time.
(iii) Does not help in predicting other facts.
(iv) It is acquired solely through observations.

Examples:-

(i) Islamabad is capital of Pakistan.
(ii) Today sun set is 6 P.m.

Q.No.55):-

What is concept?

Answer:-

Concepts are category words which enable us to group many individuals objects or ideas under a common label.

For example chair, desk, mammal, verb, bird, noun, mountain, friendship, democracy, love etc.

All concepts have five essential components: Name, definition, characteristics, example and place in hierarchy.

Scanned with CamScanner

Q. No 56):-

What is IPT? discuss the role of working memory in IPT?

Answer:-

Nothing is learnt unless it is in long term memory. Working memory is our conscious memory. we have short term and log term memory. Between Both of them there is working memory.

Working memory is our conscious memory. we do not know much about working memory and how it operates. This theory says that every learning should be the part of long term memory. Automation is the ultimate learning. Short term learning is named as sensory register in information processing theory.

Q. No. 57):-

What is Elaboration?

Answer:-

It is form of Rehearsal but different from maintenance Rehearsal. Elaboration means adding on. It

Scanned with CamScanner

requires conscious and deliberate thought during which we relate the new information with something already known and understood.

Q.No.58):-

What is presentation?

Answer:-

presentation is a teaching method where a teacher presents concepts and procedures. This method is used when we are expecting from the students to learn concepts and procedures.

Q.No.59):-

What is advanced organizer model?

Answer:-

Advance graphic organizer has 3 major components or attributes.

(i) Advance organizer is statement of those elements that the learner will be required to master in lesson.

(ii) Advance organizer presents "big picture" to establish relationship between different concepts.

Scanned with CamScanner

(iii) Advance organizer model is based upon deductive learning.

Q.No.60):-

What is divergent and convergent thinking?

Answer:-

Divergent thinking:-

It is more creative. It is outside the box thinking. For creativity divergent thinking is very important. we do not think in fixed manner. Right hemisphere is responsible for this type of thinking.

convergent thinking:-

convergent thinking is more focused. For example we have different facts and ideas and we carried out some results of them or logically converge them. This type of thinking is done by Left Hemisphere.

Q.No.61):-

What is Multi Methodology?

Answer:

Multi means many and

Scanned with CamScanner

methodology means collection of different methods.

It provides instructionally rich classroom by making use of a variety of teaching methods and technique like.

(i) Project learning
(ii) Inquiry / student research
(iii) Lecture
(iv) Demonstrations
(v) Videos.

Q.No.62):- write elements of planning?

Answer:-

(i) Topic
(ii) Grade Level
(iii) Goal
(iv) Instructional objectives.
(v) Cognitive level check
(vi) Student chracteristics
(vii) Resources
(viii) Assignments or Homeworks
(ix) Assessment
(x) Additional learning needs
(xi) Time Alloted.

Scanned with CamScanner

Q.No.63):-

What is complexity of task?

Answer:-

Complexity of task is very important because if you want to improve child thinking level skills then you give them complex task.

To achieve higher thinking skills teacher should give him complex task.

Q.No.64):-

How many styles of learning?

Answer:-

There are three learning styles

(i) Auditory

(ii) visual

(iii) Tactile

children with Auditory learning styles enjoys lectures and discussions.

Q.No.65):-

what is short term memory?

Answer:-

short term learning is

Scanned with CamScanner

named as Sensory register in information processing theory.

Short term memory its has capacity for holding but not manipulating a small amount of information in mind in active, readily available for short period of time.

Q.No.66):-

Give Some points about conceptual learning of teacher?

Answer:-

Most of teacher focus on missing knowledge of students instead of conceptual change. conceptual change is very important. we must provide the students with concepts because it is deep learning.

Teacher growth is conceptual change

Growth = Knowledge + experience + Reflection.

Q.No.67)

what is planning evaluation?

Answer:

Less planning Leads to less learning"

planning = content + Method.

Scanned with CamScanner

Q.No.68):-

Difference b/w Bloom's Taxonomy and Taylor theory?

Answer:-

Bloom's taxonomy is set of three models used to classify educational learning objectives into levels of complexity and specify. It is about thinking, learning and understanding.

Taylor model is prototype of curriculum development in scientific approach. He wrote down his ideas in book basic principle of curriculum and instruction for his students to give them idea about principles for making curriculum.

Q.No.69):-

What is inductive and deductive reasoning?

Answer:-

Inductive Reasoning:-

It is method of reasoning in which the premises are viewed as supplying some evidence

Scanned with CamScanner

for the truth of conclusion.
eg human beings are mortal.
we say All men are mortal and
then say hafeez is mortal
because he is man. So it
is inductive reasoning because
we move specific to general.

Deductive Reasoning:-

It is reasoning
in which reasoning moves from
generalized principles that are
known to be true and
specific conclusion.

eg we say all men are mortal
and then say Ahmad is man, So
he is mortal. This deductive reasoning,
because we start with general and
goes to specific.

Q. No. 70):-

What is important model
for curriculum planning?

Answer:-

There is a wide range
of curriculum planning and development
Models, including Taylor's model

Scanned with CamScanner

and olivia model. They have different approaches to teaching and learning.

Q. No. 71):-

Application level of Bloom's Taxonomy?

Answer:-

Application refers to ability to use learned material in new and concrete situations. This may include such thing as rules, methods, concepts, principle laws and theories.

Prepared by M@l!k Hafeez and Ayat Malik
دعاؤں میں ضرور یاد رکھئے گا۔

Scanned with CamScanner

Q4. What are instructional Aims for lesson Planning?

Answer

instructional Aims is student-oriented instructional Aims are broad Aim is what teacher want to Achieve in a lesson or course. Aims are concerned with purpose.

Q5. Which Methods are used for efective teaching regarding with Sequencing?

Answer

For effective teaching Sequencing is very important. Teachers Needs to Sequencing their learning objectives. As a teacher you are supposed to make lesson plans and unit plans. While Making these plans we have to sequence objectives. eg if you want to teach Children

Scanned by CamScanner

Essay writting, then we need to know if children know how to write a paragraph. Sentence formation is prequisite for paragraph writing and for sentence formation vocabulry is prerequisite.

Whenever we are sequencing, we need to know what a prerequisite for a particular terminal objective is?

S.

Q#1. What is peer learning?

Answer. There is a concept of peer learning

Children learn from their peers. they Actually learn more from their peers (other students) than they learn in School by their teachers. This is type of learning in which Students interact with other Students to Attain educational goals.

Q#2. What is scientific Method?

Answer. The Scientific Method is a tool that helps scientists

Scanned by CamScanner

Scanned with CamScanner

and the rest of us to solve problems and determine answers the Questions in logical format.

MCQs "Galileo" is "father of Scientific Method"

Q#3. Kind of projects?

Answer. (1)- Exploratory projects.
(2)- Research projects.
(3)- Product focused projects.

Problems faced in product focused projects are :-

in product focused i.e At the end of the project, we ultimately get a product and that is a product which may be used by some people But Actualy, the projects are not limited to product.

(1) Adventure projects may last for weeks.
(2) Making a classroom cookbook.
These are produd focused.

Q#4, Cooperative learning?

Answer.

It is Model which requires student cooperation and interdependence

Scanned by CamScanner

Scanned with CamScanner

in its task, goal and reward structure. It is characterized by cooperative task, goal and reward structured.

(1)- Students works in team.
(2)- Teams are Made up of high, Average and low Achieving Students.

"Cooperative learning is Method of instruction that has students working together in groups, usually with the goal of completing specific task. This Method can help students to develop leadership skills and Ability to work as a team.

P=6- Q#1. What is Life Skill?

Answer.

Life skills equip students to thrive in the classroom and in the world beyond. The 21 century life skills are flexibility, initiative, social skills productivity and leadership.

Scanned by CamScanner

Scanned with CamScanner

Q#2. Difference between instructional design VS curriculum Development ?

Answer

Curriculum Development and instructional design are related Some people will clarify terms by saying that curriculum development is "what student will learn" While Instructional design is "How student will learn it".

Curriculum Development is central to teaching Quality.

Scanned with CamScanner

Q#4. Which competency is important for teacher?

Answer.

Content knowledge is very important competency of teacher.

Q#5. What is IEP?

Answer.

Individual Education plans is basically an extended Adaption of a lesson plan.
The focus is on the needs of the learners rather on content to be taught.

7. Q#1. Quality of Good Teachers?

Answer.

(1)- Expert in Communication Skills -
(2)- Superior Listening Skills.
(3)- Deep knowledge for subject.
(4)- Caring Relationship with Students.
(5)- Friendliness etc.

Q#2. What is Kinesthetic learning?

Answer. is Also called Tactile learning is learning style in which learning

Scanned by CamScanner

Scanned with CamScanner

take place by the Student carying out a physical Activity rather than listening to lecture or watching. Also known as "do-ers".

Q#3. How Growth and Self Respect are Factor of Motivation?

Answer:-

Motivational Factors are called Personal Growth, recogonization Responsibility and Self Respect.

Motivation is very important for personel Growth.

Motivation can drive to change

Motivation can increase self Respect

Scanned with CamScanner

learn those skills-

Q#5. Bloom six Stratgies to reviding the Students-

Answer-

1- Recalling key Names of Pakistan Movement.
2- Defining Nouns.
3- Defining Solubility.
4- Telling Counting 1-20
5- No 7 continents.
6- Newton 3rd law of Motion.

Q# Short Term planning?

Answer-

The process of setting smaller, intermidiate milestones to Achieve within closer time frames when moving towards an important overall goal.

Q#1.

Pg 9 What is learning Analysis?

Answer. Learning Analysis is the measurement, collection analysis and reporting of data About

Scanned by CamScanner

Scanned with CamScanner

learners and their contexts for purposes of understanding and optimizing learning.

Q* – Formative check in lesson planning?

Answer.

It is the unit of lesson planning.

Formative check refers to wide variety of Methods that teachers use to conduct in process evaluations of students.

Scanned with CamScanner

Q#- How can we Access Communication Skills?

Answer.

(1)- Make Communication priority.
(2)- Simplify And Stay on Message.
(3)- Take time to Respond.
(4)- Maintain eye contact.

Q# Prophets way of learning?

Answer.

Their way of teaching is informal.

Q# Types of contents?

Answer.

Content is the information, you want your Student to learn.

(1)- Facts.
(2)- Concepts.
(3)- Generalization

Scanned by CamScanner

Scanned with CamScanner

Q# Benchmark And Standards in Curriculum?

Answer.

Curriculum Standard is what a student is expected to know at certain stages of their education. It is Not Measurable

~~Benchmarking is Testing~~ involves identifying areas for improvement

Benchmarking is Measurable Standards are set of learning.

Scanned by CamScanner

Q#- Categories of Exceptionality?

Answer.

(1)- Intellectual

(2)- Communicative.

(3)- Sensory

(4)- Behavioral.

(5)- Physical

(6)- Multiple.

Scanned with CamScanner

Q4. Steps involved in preparing teacher unit Plan;

Answer

(1)- Subject/ Topic
2)- Rationale
3)- instructional objectives
(4)- Content
(5)- Process
(6)- Resources
7)- Learning Activities
(8)- Evaluation

Q4. What are enabling skills?

Answer. Enabling skill are those which are required to Achieve a certain goal e.g your terminal objective is by end of year. Enabling skills is the students should know how to write An Essay.

(ii)- independent Enabling skills are those which are pre-requisite Actualy They are not dependent on Anything e.g in English you're teaching students writing so writing sentence is indepedent enabling skill.
