Question:

The horizontal range of a projectile is maximum if angle of projection is…….

Options:

A. 30 degrees

B. 45 degrees

C. 60 degrees

D. 15 degrees

Question:

If 10ft/s is the velocity of the projection, then the maximum horizontal range is ……

Options:

A. 10/32

B. 100*32

C. 100/32

D. 10*32

Question:

If a parabola is represented by {\left({y - k} \right)^2} = - 4a\left({x - h} \right), what is the direction of its opening?

Options:

A. Leftward

B. Upward

C. Rightward

D. Downward

Question:

If a particle is projected making a certain angle with horizontal into air with a certain velocity or dropped from a moving plane then it is called a …….

Options:

A. hyperbola

B. projectile

C. cirlce

D. straight line

Question:

In the following equation {(x - h)^2} = - 4a(y - k), the graph of parabola opens:

Options:

A. Right

B. Up

C. Left

D. Down

Question:

Direction of momentum is direction of object's-----.

Options:

A. velocity

B. frictional force

C. mass

D. acceleration

Question:

Which factor is essential for accurately hitting a distant target with a projectile?

Options:

A. Increasing the size of the projectile

B. Reducing the gravitational pull

C. Firing at a specific angle to account for the curved path

D. Firing in a straight line toward the target

Question:

If 20 0 and v 0 are the angle and velocity of projection respectively, then the horizontal range of the projectile is ……

Options:

A. (v 0) 2 /g

B. (v 0)g

C. (v 0) 2 g

D. (v 0) / g

Question:

If S is the system of particles which is in equilibrium, then the sum of all forces on the system S is-------.

Options:

A. undefined

B. very large

C. none of these

D. zero

Question:

The vertex of a parabola represents which of the following in projectile motion?

Options:

A. The maximum height

B. The distance between initial and final position

C. The initial position

D. The final position

Question:

If 45 0 and 30 are the angle and velocity of projection respectively, then the time taken to attain the maximum height of the projectile is ……

Options:

A. {{{30}}}{{\sqrt 2 g}}

B. {{{30}}}{{\sqrt 2 }}

C. \frac{{{30}}}{{\sqrt 2 g}}

D. \frac{{{30}}}{{\sqrt 2 }}

Question:

The maximum horizontal range of a projectile is 100ft, the velocity of the projection is-----.

Options:

A. 4.6ft/sec

B. 56.57ft/sec

C. 5.6ft/sec

D. 3.6ft/sec

Question:

The Planet will describe an ellipse, a parabola or a hyperbola according as total energy per unit mass is -------

Options:

A. zero, negative or positive

B. Any of these

C. positive, negative or zero

D. negative, zero or positive

Question:

PREPARED BY VU SQUAD 0313-7248280
LMS AND PROJECTS HANDLER EXPERT

Kepler's _____ Law states that each planet describes an ellipse with the sun at one focus

Options:

A. third

B. second

C. none of these

D. first

Question:

The central force is ---------- if it is directed towards the centre.

Options:

A. none of these

B. repulsive

C. not attractive

D. attractive

Question:

Orbit of a particle moving under a central force is necessarily _____

Options:

A. a straight line

B. a space curve

C. none of these

D. a plane curve

PREPARED BY VU SQUAD 0313-7248280
LMS AND PROJECTS HANDLER EXPERT

Question:

In a conservative field, the total energy of a particle through the motion

Options:

A. none of these

B. remains constant

C. varies rapidly

D. does not remain constant

Question:

If 45 0 and 20 are the angle and velocity of projection respectively, then the time of flight of the projectile is ……

Options:

A. {{20\sqrt 2 }}

B. \frac{{20\sqrt 2 }}{g}

C. {{20\sqrt 2 }}{g}

D. 20g

Question:

A force acting on a particle is said to be _____ if its line of action always passes through a fixed point

Options:

A. central force

B. friction

C. none of these

PREPARED BY VU SQUAD 0313-7248280
LMS AND PROJECTS HANDLER EXPERT

D. applied force

Question:

The central force is ---------- if it is directed away from the centre.

Options:

A. repulsive

B. not attractive

C. none of these

D. attractive
