Key Area	Concept / Tip
Purpose of Speech	To inform, persuade, or entertain
Types of Speech	Informative, Persuasive, Ceremonial
Steps of Preparation	Select topic Analyze audience Research Organize Rehearse
Audience Analysis	Age, interest, education, needs, attitudes
Speech Structure	Introduction Body Conclusion
Introduction	Attention grabber, thesis, credibility, preview
Body	2–4 main points, organized logically (chronological, topical, cause-effect)
Conclusion	Summarize Restate thesis Strong close/call to action
Delivery Styles	Manuscript, Memorized, Impromptu, Extemporaneous
Visual Aids	Support message visually: charts, slides, props
Vocal Variety	Pitch, tone, volume, pace changes
Body Language	Eye contact, facial expressions, posture, gestures
Speech Anxiety	Common fear Controlled by practice, breathing, positive thinking
Transitions	Words/phrases that connect parts of the speech
Call to Action	Ending that asks audience to do something

Lesson 20: Handling Questions & Answers –

Definition

- Business presentations include verbal feedback (questions, comments, objections).
- Handling Q&A well boosts credibility and audience trust.

4 Steps to Handle Q&A Effectively

1. Anticipating
    - o Predict possible questions in advance.
    - o Sources:
        - Previous experiences

- Common concerns (Time, Cost, Impact)
- Planning insights
- Input from experienced associates

2. Answering
   - Write answers to all anticipated questions.
   - Prepare:
     - Summary answer (short version)
     - Expanded answer (detailed version)
   - Answers must match audience needs and reinforce key message.
3. Revising
   - Modify content to answer common questions before they're asked.
   - Use rhetorical questions to integrate likely objections.
   - Do NOT revise content if:
     - It breaks message flow
     - Time is short
     - It raises unnecessary controversy
4. Rehearsing
   - Simulate Q&A with associates.
   - Helps build confidence and identify weak or vague answers.

Types of Verbal Feedback

- Conceptual Thinkers:
  - Ask big-picture questions (e.g. long-term impact).
- Concrete Thinkers:
  - Ask detail-based questions (e.g. cost per unit).

When to Invite Questions

Before the Presentation

- Involve audience by asking: “What are your concerns?”

- Use flip chart to note down their points.

During the Presentation

- Only in interactive settings (e.g. training sessions).
- Invite feedback after key points, not randomly.
- Use transition statements to resume smoothly.
- Risk: May interrupt flow or start debate—must be controlled.

End of the Presentation

- Most formal and safest method.
- Inform audience at the start that Q&A will follow.
- Use open-ended question: “What questions do you have?”
- Pause for 30 seconds to let audience think.
- If no response, volunteer a question yourself.
- Never end presentation with Q&A

Conclude with a story, summary, or key message.

Handling Difficult Situations

- If audience debates, stop it respectfully:

“Both points are valid; let’s move to the next section.”

- Maintain control, calm tone, and confidence.

Lesson 21: Responding to Questions & Answers

Purpose & Importance of Q/A Session

- Builds clarity and understanding
- Engages audience and shows respect
- Highlights interest and concerns of audience
- Strengthens credibility of speaker

Effective Response Techniques

- Listen carefully before replying
- Stay calm and composed even during tough questions
- Focus on the question – don’t stray off-topic

Affirmation Techniques

- Appreciate questions: “That’s a good point”, “Thanks for asking”

- Builds trust and encourages interaction

Clarifying a Question

- Ask for clarification if question is unclear
- Say: “Can you please elaborate?” instead of guessing

Bridging Strategy

- Redirect difficult/off-topic questions back to your core message
- Politely link audience concern with your main point

Rephrasing Questions

- Restate the question in your own words
- Helps confirm understanding and control the tone

Handling Hostile or Difficult Questions

- Don’t argue; remain neutral and respectful
- Acknowledge concern and respond factually
- If unsure, admit and offer to follow up later

Time Management

- Don’t let one question dominate the session
- Politely move on to other participants

Using Examples in Answers

- Use relatable examples for better understanding
- Makes answers more practical and clear

Maintaining Eye Contact

- Don’t only look at the questioner – engage the whole audience

Dealing with Talkative Questioners

- Summarize their point quickly and transition smoothly
- Keep control without being rude

Summarizing Key Points

- At the end of Q/A session, briefly repeat main ideas
- Reinforces learning and structure

Ending the Session Gracefully

- Use phrases like “Let’s take one last question”
- Thank the audience for their participation

Lesson 22: Significance of the Setting – Eye-Glance Notes

Why Setting Matters

- Psychological Impact: Bright, quiet, fresh room = positive mood; dark, noisy = discomfort.
- Perceptual Message: Room "says" something about the speaker, message, and organization.
- Speaker Focus: Bad setting distracts speaker; good setting supports delivery.
- Comfort & Persuasion: People accept new ideas more easily in a relaxed environment.

Audience Comfort

- Must See, Hear, Sit, Focus Clearly
- Avoid squinting, stretching, noise, or hard chairs.
- Comfortable setting = better response.

Room Setup Considerations

- Audience Size: Plan extra seats if needed.
- Composition: Status may affect seating order.
- Workspace: Needed for handouts, notes.
- Interaction: Seating should allow group discussion if required.
- Duration: Longer events = better chairs.
- Visibility: All must see the speaker and visuals.
- Tables: For equipment, registration, etc.
- Aisles: For safe movement and disability access.
- Open Space: For breaks near the room; allows mingling.

Seating Arrangements

Type	Use/Benefit
Theater Style	Large group, limited comfort, rows without tables
Semi-Circle	Encourages shared reactions; everyone sees each other
Classroom	Tables + rows; useful for training & notes

T-Formation	Small group discussion; focused and flexible
Modified T	Group of 4 activities; adds variety
U-Formation	Visual access to everyone; relational and interactive
Boardroom	Best for 10–15 people; decisions, discussions
V-Formation	Staggered angle improves visibility and interest

Environmental Factors

Factor	Key Point
Lighting	Natural daylight > fluorescent. Avoid dim or glaring lights.
Temperature	Cool (68–70°F). Adjust for large groups.
Air Quality	No musty or food smells; fresh air boosts mood.
Sound	Only speaker's voice should be heard. Avoid background noises.

Quick Tips for Presenters

- Choose rooms with adjustable controls.
- Avoid dark, cramped, or noisy locations.
- Position head table lengthwise for ease and clarity.
- Always test visibility and sound beforehand.

Lesson 23: Visual Aids

EYE-GLANCE NOTES – LESSON 23: VISUAL AIDS

Key Element	Important Points (Quick Recall)
Purpose of Visual Aids	Gain attention, explain complex ideas, emphasize points, enhance memory, variety, lasting impact.
When to Use	Large/small audience, technical content, training sessions, interactive or passive environments.

Factors to Consider	Audience size, room lighting, budget, equipment, time, presenter style, audience participation.
Types of Visual Aids	1. Computer-Based Presentations 2. Video 3. 35mm Slides

Computer-Based Presentations

- Benefits: Multimedia, real-time data, editable, portable projectors, cost-effective, professional.
- Limitations: Needs technical skill, expensive equipment, dark room required.
- Tips: Backup files, test equipment, use laser pointer, don’t overuse effects.

Video

- Benefits: Shows motion, sound, good for remote learning, engaging, easy duplication.
- Limitations: Expensive, passive viewing, discourages participation.
- Tips: Keep short (5–10 min), ask focus questions, test room conditions, ensure enough screens.

35mm Slides

- Benefits: High-quality still images, duplicable, remote control use, portable projector.
- Limitations: Dark room needed, low interaction, hard note-taking.
- Tips: Order slides properly, mark for orientation, use black slides for pauses, face audience.

Extra Quick Tips

- Match visual aid with content and audience type.
- Use black slide or pause to shift from visual to verbal discussion.
- Engagement is key – don't let visuals replace the speaker.

Eye-Glance Notes – Lesson 24: Visual Aids (Part 2)

Visual Aid	Audience Size	Key Benefits	Main Limitations	Helpful Tips
Overhead	Up to	Full presenter	Requires	Keep spare bulb &

Transparencies	100	control Face audience Highlight, reveal points	projector Must stay near it May seem outdated	glove Use projectable markers Don't face screen
Whiteboards	Up to 30	Great for spontaneous info Bright colors	Informal Turning back loses audience	Write large & clear Use for group planning, not main speech aid
Handouts	Any size	Supplement info Helps absent attendees Eliminates note-taking	Distracts if given early May cause loss of control Can be noisy	Give before/ during/after based on purpose Keep it clear and concise

General Guidelines (Quick Recap)

- Visuals support the message – not replace it.
- Always face the audience, not your visual aid.
- Use 18+ font size, clear & simple fonts.
- Practice using visuals before presenting.
- Prepare backup plans (e.g., spare projector bulb).
- Avoid overloading slides; 1 idea per slide.
- Use graphs/charts for stats instead of plain numbers.
- Don't distribute handouts or items during your speech.

Concept	Key Points
Group Meeting Types	Informal, Formal
Group Formation Stages	Forming Storming Norming Performing
Problem Solving Phases	Orientation Conflict Emergence Solution
Group Meeting Purposes	Informational, Suggested Solutions, Problem Solving

Standard Agenda Steps	ID Analyze Criteria Generate Evaluate Implement
Leadership Styles	Authoritarian, Democratic, Laissez-faire
Planning Meetings	Purpose Participants Agenda Announce Venue
Participant Roles	Organizer, Clarifier, Energizer, Idea Creator, Tester, Conciliator, Helper
Group Communication Roles	Task roles, Maintenance roles, Individual roles

EYE-GLANCE NOTES 26 (1-PAGE QUICK REVISION)

6 C's of Effective Writing

- Courtesy – Be polite and respectful.
- Correctness – Use correct grammar and facts.
- Conciseness – Say more in fewer words.
- Clarity – Keep it simple and easy to understand.
- Concreteness – Give specific details.
- Completeness – Include all necessary information.

You-Attitude

- Focus on reader's benefit.
- Replace "I/we" with "you".
- Avoid blaming language.
- Show empathy and concern.

Courtesy Guidelines

- Avoid harsh words (e.g., "as we told you…").
- Use kind and soft tone.
- Give meaningful apologies.
- Respond promptly to messages.
- Show respect, even when denying a request.

Bias-Free Language

- Avoid gender bias: Use "chairperson" instead of "chairman".

- Avoid age bias: Don't mention age unless relevant.
- Avoid racial/ethnic bias: Don't label by race.
- Avoid disability bias: Say "person with disability" not "disabled person".

Positive vs. Negative Wording

- Negative: "You did not qualify."
- Positive: "You may qualify next time."
- Avoid words like: "unfortunately", "can't", "sorry".
- Emphasize what can be done.

Eye-Glance Notes 27(Super Quick Review)

- Correctness = Language + Data Accuracy + Grammar + Spelling
- Use Formal for reports | Informal for emails
- Conciseness = No extra words, No fluff
- Clarity = Familiar + Concrete Words + Clear Sentences
- Avoid: wordiness, long intros, pompous words
- Sentence = One Main Idea (Unity)
- Short = Easy to Read (17–20 words)
- Emphasis = Start/End, Repetition, Format (bold, caps)

Eye-Glance Notes 28

- Concrete = Specific + Active Voice + Vivid Words
- Avoid: vague terms like "good," "fast," "large"
- Do: "He scored 3.9 GPA," "She types 80 WPM"
- Active voice = clearer, stronger
- Use passive only when doer is unknown or to be polite
- Complete = All answers + 5Ws & H
- Always double-check message completeness before sending
- Incomplete = Confusion, extra cost, delay, loss

C. Eye-Glance Notes 29 (Revision Sheet)

- 5 Stages: Planning Organizing Drafting Editing Proofreading
- Purpose: Inform, Persuade, Respond
- Know your Reader: Age, Job, Location, Education
- Choose Ideas via Brainstorming or Response Analysis
- Structure: Outline Order Paragraphs

- Edit Re-edit Proofread
- Good planning = Effective message

Eye-Glance Notes 30

- Organizing = Outlining + Ordering

Direct = Main point first

Indirect = Reason Conclusion

Benefits of Organizing:

– Clarity

– Saves time

– Emphasizes important points

Review outline for:

– Parallelism

– Logical flow

– Related ideas grouped

Element	Key Point
Drafting Stage	Write first version of message
Opening Paragraph	Clear, reader-focused, positive
Ending Paragraph	Call to action, appreciation, be specific
Persuasive Opening	Grab attention
Disappointing News	Use buffer first
Body Composition	Main points + supporting ideas

Editing	Check logic, clarity, sequence
Proofreading	Fix typos, numbers, spelling, structure
Avoid in Openings	Negative tone, unnecessary info
Avoid in Endings	Repetition of bad news

- EYE-GLANCE NOTES 31 (Quick Revision)

32 Essential Elements of a Business Letter – Notes

Part	Simple Function / Purpose
Letterhead	Shows sender's identity (company name, logo, address).
Date	Tells when the letter was written.
Inside Address	Gives complete details of the receiver (name, title, address).
Salutation	A formal greeting like "Dear Sir/Madam".
Body	The main message, reason for writing.
Close	A polite ending phrase (e.g., Yours sincerely).
Signature Area	Contains sender's name, title, and handwritten signature.

Sometimes-Used or Optional Elements – Notes

Part	Simple Function / Purpose
Attention Line	Used to direct the letter to a specific person/ title.
Subject	One-line summary of the topic.
Reference Initials	Shows who typed the letter (e.g., aa/jk).
Enclosure	Lists attached documents (e.g., CV, invoice).
CC (Carbon Copy)	Names of others who will also receive the letter.
Postscript (P.S.)	Extra note after the signature – not formal.
Mailing Notation	Shows delivery method (e.g., Registered Mail).
Addressee Notation	Restricts readers (e.g., "Confidential" or "Personal").

Key Exam Tip:

- Essential parts must always be present in business letters.
- Optional parts are used only when needed based on purpose or delivery style.

eye-Glance 33Revision Notes

- 3 parts of a direct-request letter: Opening – Body – Closing
- Use direct tone but stay polite
- Avoid saying "Thank you in advance"
- Use question form wisely (with or without "?")
- Make reader's job easy by being clear and specific
- Request about people: Focus only on job-relevant questions
- Be fact-based and confidential

34 EYE-GLANCE NOTES:

Term	Meaning/Use
Direct-request	Ask for specific info directly (clear opening, body, close)
Indirect-inquiry	Request general info without specific questions

Claim letter	Complaint letter with polite tone and clear request
Order letter	Letter used to order items (details + shipping + payment)
You-attitude	Polite, recipient-focused language
Confidentiality	Respect privacy of info (especially references)

35 ,36EYE-GLANCE NOTES (Quick Revision)

Key Concept	Quick Point
Goodwill Message	Builds positive relations, appreciation, sympathy, congratulations
5S of Goodwill	Selfless, Specific, Sincere, Spontaneous, Short
Types of Goodwill Letters	Thank-you, Sympathy, Congratulations, Appreciation, Condolence
Tone of Goodwill Letters	Warm, Friendly, Positive, Personal
Invitation Letters	Invite someone to participate in an event, meeting, seminar
Types of Invitation Letters	Formal (business events), Informal (weddings, birthdays)
Structure of Invitation Letter	Opening (purpose), Body (details), Closing (RSVP, contact info)
RSVP	French: Répondez S'il Vous Plaît = Please respond
Forward-Looking Statement	Indicates future intentions (e.g., “We look forward to your participation”)
Key Format Elements	Date, Salutation, Subject, Body, Closing, Signature

38,39 Eye-Glance Notes (Quick Revision)

- Goal: Deliver bad news politely.
- Approach: Direct (low impact) | Indirect (emotional cases)
- Tone: Firm + Respectful + Positive
- Structure: Buffer Reason Refusal Positive Close

- Do: Use "you" attitude, positive language, offer help
- Don’t: Accuse, apologize, overuse policy, start harshly
- Buffer Types: Praise, Agreement, Appreciation, Fairness
- Tip: Suggest alternatives or future consideration
- Remember: Emotions matter—write with empathy!
- Lesson 40: Eye-Glance Notes – Writing Persuasive Messages
-
- PLANNING PERSUASIVE MESSAGES
- Goal: To change minds or motivate action
- Persuasive messages are longer, detailed & strategically planned
- a. Analyze Purpose
- Be sure your purpose is clear, necessary & suitable for written communication
- Your goal: Make people try something new or change behavior
- b. Analyze Audience
- Ask: Who are they? What do they want? How might they resist?
- Use:
- Demographics = Age, income, occupation
- Psychographics = Attitude, lifestyle, personality
- Consider culture: Different styles work in different countries
- c. Establish Credibility
- Use facts, expert opinions, and sincerity
- Build trust through honesty, expertise & shared values
- d. Maintain High Ethics
- Persuade without tricking or misleading
- Give truthful info so the audience can choose freely
-
- DEVELOPING PERSUASIVE MESSAGES
- a. Grab Reader’s Attention
- Start with a personalized, you-focused, relevant sentence

- Use no exaggeration—build common ground
- b. Build Reader's Interest
- Continue your opening idea
- Link benefits directly to their needs
- c. Increase Desire
- Show how the change helps them
- Use evidence and reduce doubts
- d. Motivate Action
- Tell them what to do and how it benefits them
- Make action easy and clear
-
- KEY STRATEGIES FOR PERSUASION
- 1 Frame Your Arguments (AIDA Structure)
- AIDA = Attention – Interest – Desire – Action

Phase	Purpose
Attention	Get reader hooked with a relatable opening
Interest	Continue theme and show relevance
Desire	Add proof and show benefits
Action	Tell what to do, remind benefits, make it easy

-
- 2 Balance Emotional & Logical Appeals
- Emotional Appeal:
- Based on feelings, words like freedom, comfort, prestige
- Subtle, not manipulative
- Logical Appeal:

- Based on reasoning
- Analogy: Compare two similar things
- Induction: Specific General
- Deduction: General Specific
- Support with facts, stats, and real examples
-
- 3 Reinforce Your Position
- Use:
- Semantics (powerful words with emotional meaning)
- Metaphors, stories, examples, anecdotes
- Simple language
- Moderation (don't push too hard)
- Win-win tone (benefit both sides)
-
- 4 Deal with Resistance
- Anticipate objections: "What if?" questions
- Let others suggest solutions (participation = support)
- Show both pros & cons
- Be ready to compromise, avoid hard-sell
- Avoid:
- Hasty generalizations
- Attacking opponent
- False causes
- Oversimplifying issues
-
- KEY TERMS TO REMEMBER
- AIDA: Attention, Interest, Desire, Action
- Demographics vs Psychographics
- Semantics: Power of emotional word choice
- Ethical persuasion: Honest, informative, respectful

- ## 42 Eye-Glance Notes

Topic	Quick Point
Sales Letter Format	Attention Interest Desire Action (AIDA)
Memo Format	To, From, Date, Subject
Collection Appeals	Fairness, Credit, Pride, Fear
Progress Report Parts	Intro, Done, Progress, Delays, Remaining Work
Justification Report	Purpose Outcome Plan Pros/Cons Conclusion

- 43,44,45
- Résumé Purpose: Get interviews, not jobs.
- Interview Tip: Research Practice Confidence.
- EQ Traits: Self-control, empathy, motivation.
- Speech Structure: Intro Body Conclusion.
- Active Listening: Avoid biases, ask questions.
