

PSY406_Quizzes_From Assessments

“A Special Thanks to **OxyGen**”

1. Experts have storehouses of all kinds of knowledge EXCEPT: (Conditional Knowledge; **Experimental Knowledge**; Declarative Knowledge; Procedural Knowledge)
2. Students can become experts in their relevant field by adopting all of the following characteristics EXCEPT: (Organize information in a wholesome mannerBuild storehouse of knowledge; Pay attention to details; **Discard the missing information**)
3. All of the followings are the characteristics of Expert students EXCEPT: (Concentration; Attention; **Affection**; Motivation)
4. Knowledge of facts, figures and words is known as: (Procedural Knowledge; **Declarative Knowledge**)
5. All of the following learning strategies can make a student as an Expert student EXCEPT: (**Skipping classes**; Highlighting the material; Making summaries; Taking notes)
6. _____ Knowledge refers to the knowledge of how to perform a specific skill or task. (Declarative; Conditional; Experimental; **Procedural**)
7. _____ is very essential to become an expert student. (**Motivation**; Affection)
8. Experts pay attention to smaller specific details and then they can move towards the larger whole to understand the central principle. (**True**)
9. Experts organize information in a way which help them in the process of problem solving. (**True**)
10. Teachers should not provide extra information to their students other than their course curriculum. (**False**)
11. Which of the following is NOT involved in which previous learning may hinder the present learning? (Functional fixedness; **Response procedure**)

12. Ali is a skilled surgeon. After successfully completing the appendix operation, he is now engaged to investigate different issues of stomach. Which of the following transfer of learning has been used by him? (High Road Transfer; Low Road Transfer)
13. _____ is the inability of person or a learner to use tools and objects in a new way. (Functional fixedness; Response set)
14. Amna taught to the playgroup students. She learnt many teaching techniques for playgroup kids. Now she teaches her own kids without putting much effort. Amna has used : (Low Road Transfer; High Road Transfer)
15. If a child gives the same response of getting frightened while talking with his teacher like in the previous class, he may experience: (Response set; Functional fixedness)
16. A student learns to solve polynomial equations in a class and then uses that knowledge to solve physics principles. It is an example of : (Motor Learning; Verbal Learning; Transfer of learning; Non-Verbal Learning)
17. _____ refers to practicing newly acquired skills beyond the point of initial mastery. (Over learning; Response procedure; Functional fixedness; Response set)
18. Transfer of learning in which the previous learning is transferred to a new situation with much effort is known as: (Low Road Transfer; High Road Transfer)
19. Learning of driving a bicycle will facilitate in learning to drive a motor bike. (True)
20. Learning to speak English would be helpful in learning to drive a truck. (False)
21. According to Albert Bandura, all the following factors facilitate and operative in social learning EXCEPT: (Retaining information; Paying attention; Producing behaviors; Being unmotivated)
22. Azaan learns to swim by swimming. He has used: (Enactive Learning; Observational Learning; Vicarious Learning; Social Learning)
23. Which of the following type of learning refers to the learning by doing? (Observational Learning; Social Learning; Enactive Learning; Vicarious Learning)
24. Constructivist view talks about two forms of constructivism : (Emotional and Cognitive constructivism; Psychological and Social constructivism)

25. _____ type of learning refers to learn by observing others. (Enactive Learning; Verbal Learning; Social Learning; **Vicarious Learning**)
26. Which of the following form of constructivism is associated with social interaction and cultural context of the learner? (**Social constructivism**; Psychological constructivism; Cognitive constructivism; Emotional constructivism)
27. _____ put forward the views that our beliefs, our self-perception and other cognitive factors influence our learning. (Ivan Pavlov; Sigmund Freud; B.F. Skinner; **Albert Bandura**)
28. Social Learning Theory was proposed by _____. (Sigmund Freud; B.F. Skinner; **Albert Bandura**; Ivan Pavlov)
29. For whom, knowledge has the aspect of acquisition and performance? (Sigmund Freud; B.F. Skinner; Ivan Pavlov; Albert Bandura)
30. According to Sigmund Freud, we learn by observing others. (**False**)
31. All of the followings can be adopted by a teacher to facilitate learning EXCEPT: (He reinforces the desirable behavior; He shows enthusiasm; He points out the good role models; **He punishes his students**)
32. Aliya learns of how to use the utensils and cooks the food from her mother. She has used: (Catharsis; **Modeling**)
33. Which of the following emphasizes the active role of learner in learning process? (**Constructivism**; Introspectionism)
34. Azaan learns of how to tie shoes from his mother. He has used: (Catharsis; **Modeling**)
35. Who proposed the concept of modeling? (Sigmund Freud; Ivan Pavlov; **Albert Bandura**; Skinner)
36. Atika teaches Psychology course to her students very enthusiastically. Her students also shows interest in the said course likewise. Her students use: (**Modeling**; Catharsis)
37. Afifa teaches mathematical sums to her students. One of her students named Azaan teaches the sums to other students in the same manner. Afifa has used: (Main Effect; **Ripple Effect**)
38. In modeling, we learn by observing the role models. (**True**)
39. In schools, low achiever students can improve their performance by imitating the performance of high achiever students. (**True**)
40. Learning takes place in the entire school area other than the classroom. (**True**)

41. All of the followings are the instructional techniques EXCEPT: (Instructional Conversation; Problem Based Learning; **Cognitive Therapy**; Inquiry Learning)
42. Which of the following dialogue is between a teacher and a pupil which promotes learning? (Cognitive Apprenticeship; Inquiry Learning; Problem Based Learning; **Instructional Conversation**)
43. Which of the following form of learning consists of solutions to any problem with no right answer? (Inquiry Learning; Instructional Learning; Cognitive Apprenticeship; **Problem Based Learning**)
44. If a teacher presents a puzzling situation to a student and asks him to solve it, he is more likely to engage in: (Instructional Learning; **Inquiry Learning**; Problem Based Learning; Cognitive Apprenticeship)
45. A pupil learns to stitch from the tailor, he is more likely to use: (Inquiry Learning; **Cognitive Apprenticeship**; Problem Based Learning; Instructional Conversation)
46. Clinical Psychology student learns from his placement supervisor of how to take the case history from the client. (Problem Based Learning; Inquiry Learning; Instructional Conversation; **Cognitive Apprenticeship**)
47. Instructional conversation refers to a dialogue between a teacher and a pupil which promotes learning. **(True)**
48. It is the responsibility of a teacher to identify the shy students in the classroom and engage them with instructional based conversation. **(True)**
49. Instructional based conversation consists of learning that is not confined to classroom only. **(True)**
50. Instructional based learning methods include inquiry learning and problem based learning. **(True)**
51. Azaan completes his homework in time as his teacher gives star on his workbook. It is an example of: (Intrinsic Motivation; **Extrinsic Motivation**)
52. Which of the following approach emphasizes on an individual's thinking to attain goals? (Behavioral Approach; Psycho-analytical Approach; **Cognitive Approach**; Humanistic Approach)
53. Teachers usually use the stars, candies and awarding cups to motivate their students. They use_____. (Humanistic Approach to motivation; Psycho-analytical Approach to motivation; **Behavioral Approach to motivation**; Cognitive Approach to motivation)

54. Which of the following approach to motivation has the hierarchy of needs? (Cognitive Approach; **Humanistic Approach**; Psycho-analytical Approach; Behavioral Approach)
55. Ali likes to read novel due to his own interests rather than winning a reward. It is an example of: (Extrinsic Motivation; **Intrinsic Motivation**)
56. People usually indulge themselves into hobbies as they are pleasurable for them. This phenomenon is termed as: (**Intrinsic Motivation**; Extrinsic Motivation)
57. All of the followings are the point of views that appear as explanations about main motivating factors EXCEPT: (Cognitive Approach; Behavioral Approach; **Psycho-analytical Approach**; Humanistic Approach)
58. Students are motivated by internal and external factors. (**True**)
59. Intrinsic motivation and extrinsic motivation are the two kinds of motivation. (**True**)
60. Motivation energizes a person towards a goal. (**True**)
61. Goal setting improves the performance of students due to all of the reasons EXCEPT: (It increases persistence; It helps in developing new strategies of effort; **It does not direct attention**; It mobilizes effort)
62. _____ refers to a person's belief about himself. (Self-esteem; **Self-concept**; Self-reliance; Self-efficacy)
63. All of the followings are the characteristics of goals EXCEPT: (Clearly defined goals; Attainable goals; Reasonable goals; **General goals**)
64. Goal setting does not improve teaching. (**True**)
65. Vague and general goals are one of the characteristics of goals. (**False**)
66. Clearly defined goals are one of the characteristics of goals. (**True**)
67. Due to learned helplessness, students have low motivation in learning new things. (**True**)
68. Learned helplessness cause negative emotions of despair, hopelessness, pessimism etc. (**True**)
69. If a teacher guides student to write one sentence for one hundred times within 15 minutes then it would be a reasonable goal. (**False**)
70. Students with moderately challenging goals are more motivated as compared to students with highly challenging goals. (**True**)

71. All of the following factors are related to students' motivation EXCEPT: (Concise tasks; Vague tasks; Structured tasks; Specific tasks)
72. When a student undertakes any task and fulfills its requirements then a teacher should not recognize his efforts. (False)
73. Lack of objectivity during the evaluation process of students may motivate students. (False)
74. Teachers must not be judgmental while evaluating the performance of students. (True)
75. Teachers must have to grasp attention of students by making the lectures more interesting. (True)
76. Research has shown that grouping of students has a great influence on students' motivation. (True)
77. If students have positive interaction with each other during the learning process then their motivational level will be enhanced. (True)
78. Autonomy is one of the motivational factors in learning process of students. (True)
79. If the task is clear and goals are specific, then students are more motivated towards learning. (True)
80. If a teacher does not specify the learning goals then students are less motivated towards learning. (True)
81. Time management related to classroom is due to all these factors EXCEPT: (Allocated Time; Time on Task; Variable Time; Engaged Time)
82. _____ refers to the time period specifically spent in active learning. (Engaged Time; Allocated Time)
83. According to research undertaken by Weinstein and Mignano, students spend only _____ hours of their total school time on academic learning time. (700; 1000; 900; 300)
84. When a learner spends time on learning a specific task at hand, it is known as: (Time on Task; Engaged Time)
85. Class discipline is one of the essential parts for better learning environment. (True)
86. If a teacher does not practice the rules equally to all students then it will bring disruption in class management. (True)
87. Students must be given extra time to settle down in the classroom. (True)

88. Clearly stating procedures and rules are one of the important ingredients of class management and better learning. (True)
89. Disruptive environment in classroom may facilitate learning. (False)
90. Classroom management refers to maintain a positive and productive learning environment. (True)
91. All of the followings are the important factors to increase the action zone of students EXCEPT: (Stay at one place in the classroom; Direct questions to all students; Vary seating of students from time to time; Establish eye contact with all students)
92. Students who are front benchers are usually the: (Active students; Passive students)
93. Which of the following area is known as an area of student teacher interaction? (Action Zone; Active Zone; Proximal Zone; Peripheral Zone)
94. When a teacher is aware of whatever happening in the classroom, it is known as: (Overlapping; Interacting; Withiness; Engaging)
95. Dissected frogs are placed in the bio laboratory. It is an example of: (Interest areas; Personal territories)
96. Traditional classroom is divided into: (Both of the above; None of the above; Interest areas; Personal territories)
97. Students who are back benchers are usually the: (Passive students; Active students)
98. Physical arrangement is one of the most important factors which influences learning. (True)
99. Personal territories do not allow students to interact with other students in the class. (False)
100. If a teacher asks direct questions to all students then student-teacher interaction increases. (True)
101. All of the followings are the advantages of lesson planning EXCEPT: (Planning clearly sets objectives; Planning sets standards for students; Planning clearly sets goals for students; Planning increases uncertainty)
102. In order to plan a lesson in an appropriate manner, teachers must have a knowledge of the subject. (True)
103. Lesson planning clearly sets goals for students. (True)

104. Teachers must ensure to maintain discipline in the classroom. (True)
105. Teachers should not show respect to students' concerns. (False)
106. Lesson planning reduces uncertainty. (True)
107. Over planning of a lesson must be avoided. (True)
108. Amna asks her student to learn the table of seven. Which of the following objective has been used by her? (Behavioral Objective; Instructional Objective; Emotional Objective; Cognitive Objective)
109. Instructional objectives are one the main objectives of : (Academic learning; Instrumental learning; Motor learning; Verbal learning)
110. All of the followings are different ways of learning EXCEPT: (Gossiping; Group Discussion; Seat Work; Home Work)
111. All of the followings are the objectives of academic learning EXCEPT: (What improvements are expected in physical appearances?; What improvements are expected in the thinking of the people who are taught?; What is to be taught?; What improvements are expected in the behaviour of the people who are taught?)
112. _____ objectives refer to the improvements in thinking of the students after having received the instructional objectives. (Cognitive; Behavioral)
113. Azaan provides demonstration by drawing a triangle on the piece of paper with the help of a pencil. It is an example of : (Emotional Objective; Behavioral Objective; Cognitive Objective; Instructional Objective)
114. Group discussion is a conversation in which students pose and answer their own questions. (True)
115. One of the goals of academic learning is improvement in behavior of students. (True)
116. According to two step approach, instructional objectives must be stated in general and specific terms. (True)
117. All of the followings are the qualities of knowledgeable teacher EXCEPT: (Makes a clear presentation; Recognizes the students' confusion; Tackles the students' questions; Shows the reluctant behavior)
118. If a teacher allows open forum for the students to ask questions then he/she is considered as _____ attitude of a teacher. (Warmth; Reluctant; Confused; Cold)

119. In _____, planning for teaching and imparting knowledge is shared and negotiated. (Piagetian Approach; **Constructivist Approach**; Behavioral Approach; Information processing Approach)
120. All of the followings are the qualities of an effective teacher EXCEPT: (Clarity of thought of the teacher; Knowledge of the teacher; Warmth attitude of the teacher; **Cold behavior of the teacher**)
121. _____ is a concept that is related to training, skills, knowledge and interaction between students and teacher. (Effective Therapist; **Effective Teacher**; Effective Player; Effective Conselor)
122. If a teacher knows about the subject matter in its all aspects , it is known as. (Warmth of the teacher; Clarity of thought of the teacher; **Knowledge of the teacher**; Cold behavior of the teacher)
123. Research shows that those teachers who make clear presentations and give clear explanations tend to be more effective in imparting knowledge as compared to other teachers. (**True**)
124. The cold attitude of the teacher for his students is one of the effective qualities of a teacher. (**False**)
125. The warmth attitude of the teacher for his students is one of the effective qualities of a teacher. (**True**)
126. If a teachers is aware of the students' confusion and intends to remove it, then he is known as an effective teacher. (**True**)
127. _____ is a method based upon making students understand and think deeply about what they read. (**Reciprocal Teaching**; Distance based Teaching)
128. Conceptual change is a method that has been found to be effective in learning _____. (Language; **Science**; Mathematics; Persian)
129. All of the followings are the steps involved in reciprocal teaching EXCEPT: (Asks questions from the students; Summarizes the taught content to students; Clarifies the complex areas; **Does not predict about next lesson**)
130. _____ change refers in helping students to understand rather than simply memorizing concepts. (Conditional; **Conceptual**; Experimental; Instrumental)
131. When a teacher emphasizes on the correct pronunciation of a word, he emphasizes on _____. (**Sound based teaching**; Meaning based teaching)

132. When a teacher teaches the mathematics to students, he must focus on: (Reflection; Promoting the independent ways; All of the above; Reviewing)
133. Amna always predicts to students about what will come in the next lesson, she uses one of the strategies of reciprocal teaching. (True)
134. Asma uses examples and diagrams to make more clarification of the taught content to students, she uses one of the strategies of reciprocal teaching. (True)
135. According to psychologists, an effective teacher should adopt the both approaches i.e., meaning based teaching and sound based teaching. (True)
136. In mathematical areas, teachers should emphasize on meaning and sound of words. (False)
137. All of the following factors play an important role in self-regulation EXCEPT: (Will Power; Bullying; Motivation; Knowledge)
138. All of the following factors are related to creativity EXCEPT: (Restricted family environment; Person's background; Personality type; Motivation)
139. All of the followings are the characteristics of divergent thinking EXCEPT: (Fluency; Originality; Rigidity; Flexibility)
140. All of the following factors play an important role in teaching self-regulation to students EXCEPT: (Observing self-regulated models; Discouragement from teachers; Direct teaching; Discipline)
141. _____ is defined as the ability to produce original and appropriate work. (Creativity; Reasoning; Thinking; Learning)
142. _____ is related to reward for future time as a result of learning. (Knowledge; Will power; Motivation; Family influence)
143. _____ is the process we use to activate and sustain our thoughts, behaviors and emotions in order to reach our goals. (Self-esteem; Self-efficacy; Self-confidence; Self-regulation)
144. Will power is an important determinant of self-regulation. (True)
145. Parents who encourage self-regulated behavior bring forth self-regulation in children. (True)
146. If an individual knows about oneself then he can self-regulate himself in a better way. (True)

147. _____ is the ability to process emotional information accurately and efficiently. (Emotional Intelligence; Performance Intelligence; Social Intelligence; Academic Intelligence)
148. _____ emotions means recognizing emotions. (Perceiving; Managing; Integrating; Understanding)
149. An individual with high emotional intelligence has all of the following abilities EXCEPT: (Managing emotions; Perceiving emotions; Integrating emotions; Misunderstanding emotions)
150. Which of the following is the most important variable of emotional intelligence in case of negative emotions? (Managing emotions; Understanding emotions; Integrating emotions; Perceiving emotions)
151. Who has popularized the idea of emotional intelligence? (David Goleman; Ivan Pavlov; Albert Bandura; Sigmund Freud)
152. All of the following reactions of an individual are involved in management of emotions EXCEPT: (Controls one's impulses; Shows persistence in doing right things; Focuses on certain goals; Gets immediate gratification of one's wishes)
153. Social learning is related to listening. (True)
154. EQ is an abbreviation of Emotional Quotient. (True)
155. Individuals who delay immediate satisfaction of impulses show high level of emotional management. (True)
156. When an individual recognizes his emotions then he can integrate his emotions. (True)
157. Which of following refers to build positive qualities in students? (Arts Education; Informal Education; Character Education; Formal Education)
158. All of the followings are the ways adopted by teachers to resolve conflicts in students EXCEPT: (Punish the students; Make students to work jointly; Allow students to generate options to resolve the issue; Enable students to exchange their interests)
159. All of the followings are the indirect means to build tolerance and compassion in children EXCEPT: (Reciprocal Questioning; Jigsaw; Scripted Cooperation; Conflicting environment)
160. Absence of compassion and toleration include all of the following factors EXCEPT: (Violence depicted in the media; Emotional intelligence of students; Lack of supervision in schools; Easy access to weapons)

161. Character education includes all of the following positive qualities EXCEPT: (Wisdom; Kindness; Honesty; Greed)
162. _____ involves a small group of three/four students asking each other relevant questions about the lesson, thus learning and cooperating at the same time. (Logical Arguments; Scripted Cooperation; Reciprocal Questioning; Jigsaw)
163. Violent media and violent video games are the two important factors of cultivating violence in children. (True)
164. Violence depicted in the video games is one of the key factors that may lead to absence of compassion and toleration in students. (True)
165. Self-discipline is one of the positive qualities in character building of students. (True)
166. Scripted Cooperation is one of the indirect means to build tolerance and compassion in students. (True)
167. _____ is the most frequent value. (Mode; Standard Deviation; Median; Mean)
168. _____ is the middle value in an ordered data set. (Mean; Mode; Median; Standard Deviation)
169. _____ is the sum of all values divided by the total number of values. (Median; Mode; Standard Deviation; Mean)
170. _____ indicates how well a student performs in comparison to the students of a specific group. (Percentile Rank; Median; Standard Score; Mean)
171. _____ is a measure of how dispersed the data is in relation to the mean. (Standard Deviation; Median; Mean; Mode)
172. The measure of central tendency is: (Standard Deviation; The mean; The range; The raw score)
173. Standardized tests are used by the educational psychologists for evaluation purposes. (True)
174. Stanine score ranges from one to nine. (True)
175. Z- score is the standard score with a mean of 50 and a standard deviation of 10. (False)
176. Standard Deviation is a measure of central tendency. (False)

177. All of the followings are the measurements of reliability EXCEPT: (Alternate form reliability; Convergent validity; Test-retest reliability; Split-half reliability)
178. All of the followings are the qualities of a good test EXCEPT: (Absence of bias in the test; Reliability; Validity; Content Contamination)
179. _____ tests are used to identify the specific learning problems. (Diagnostic; Achievement)
180. All of the followings are the types of standardized tests EXCEPT: (Diagnostic; Aptitude; Achievement; Mathematics)
181. When a measuring device measures what it is supposed to measure is referred as: (Absence of bias in the test; Reliability; Utility; Validity)
182. Experts use all of the following ways to measure the validity of the test EXCEPT: (Content validity; Construct validity; Criterion validity; Test-retest reliability)
183. _____ refers to the consistency in scores. (Validity; Reliability; Utility; Absence of bias in the test)
184. Test-retest reliability is a form to measure the reliability. (True)
185. Achievement test is a type of standardized test. (True)
186. Alternate form reliability is type to measure the validity. (False)
187. A _____ is a systematic collection of work often including work in progress, revisions, student self-analyses and reflections on what the student has learnt. (Portfolio; Baseline chart)
188. Students with low self-esteem cannot perform well in the exam. (True)
189. Those students who are familiar with the subject matter and have tackled similar materials in preparation tend to perform better in exam than others. (True)
190. If a student is familiar with similar questions that are given in the exam then a student can perform well in the exam. (True)
191. Research shows that those students who have an extensive experience in taking standardized tests cannot perform better in test than others. (False)
192. Which is NOT the benefit of testing for students according to the research? (It encourages forgetfulness; It encourages retention; None of these; It promote learning)
193. Subjectivity in scoring is a problem arising in which type of questions? (Subjective Type Questions; Objective Type Questions)

194. Objective type questions for testing students should be made in the following terms: (Negative terms; Positive terms)
195. Objective type tests Does NOT include the following types of questions: (Essay Type Questions; True/False; Matching Exercise; Multiple Choice Questions)
196. A good test may have: (Objective type questions; Subjective type questions; Combination of objective and subjective type questions; None of these)
197. There are FIVE broad categories of tests developed for students. (False)
198. For objective type test construction students should be tested for their guessing skills. (False)
199. Cumulative testing refers to the fact when testing involves presently learned material and previously learnt material. (True)
200. Anonymity of the examinee guarantees impartiality in marking on the part of the teacher. (True)
201. In essay type exam, time factor is crucial. (True)
202. Experts recommend different ways of improving academic achievement of students EXCEPT: (Make the grades as meaningful as possible.; Avoid high praise for work of students that strictly confirm to text book answers.; Create a balance between oral and written feedback.; Give the students a fair chance especially in the beginning of a course to be successful.)
203. Feedback should contain general comments on errors committed by the student. (False)
204. Teachers must aware about the purpose of assessment. (True)
205. When a teacher assesses his students, he must know what students have learnt. (True)
206. Application of knowledge is one of the main parts of assessment. (True)
207. Feedback MUST NOT be provided in written comments. (False)
208. Fear of failure affects students' motivation. (True)
209. Experts recommend that while conveying results, the teachers should follow all of the following steps EXCEPT: (Plan ahead for such communication; Begin communication on a negative note; Listen to parents/guardians carefully; Plan and carryout follow-up contacts)

210. _____ refers to the fact when a teacher assesses his students in relation to one another. (Norm referenced grading; Domain referenced grading)
211. _____ refers to a general tendency on the part of a teacher to assign marks on a test to a student based upon the teacher's impression of the student rather than his actual performance on a test. (Demand Characteristics; Halo Effect)
212. Grading on the curve is a variation of domain referenced grading. (True)
213. Grading on the curve is a variation of norm referenced grading that compares a student's score on a test with the average group or class score. (True)
214. Norm referenced grading refers to the fact when a teacher assesses his students in relation to one another. (True)
