

❑ In this course, you will learn everything about organizational Practices ranging from Employee's perspective to organizational strategies in an organization.

- ❑ IT related Issues (Computer misuse, Hacking, Risk Management, Cyber Ethics, Social Networking)

☐ Human Resource Management

☐ Intellectual Property Rights

☐ Computer Misuse & Criminal Law

- ❑ Information Security Practices,

- ❑ Moral Social & Ethical Issues Associated with Internet

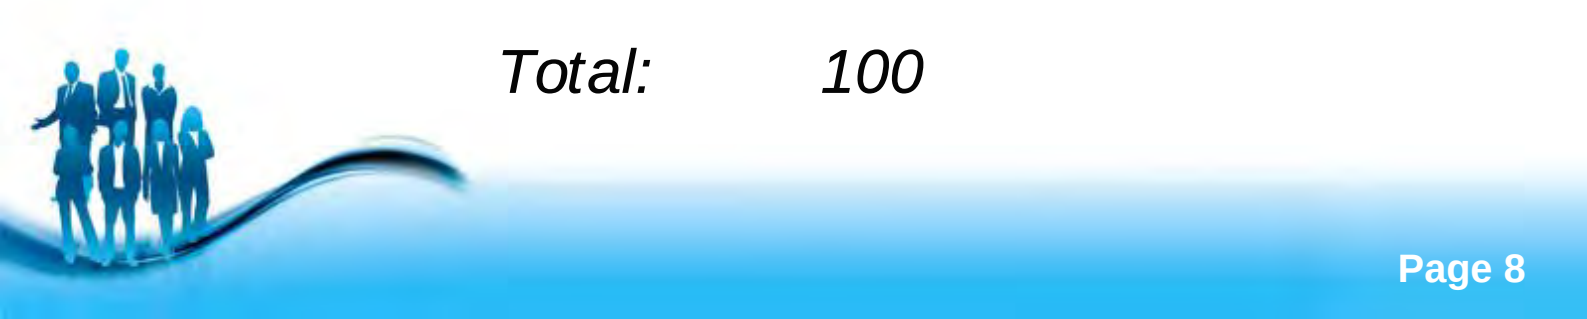

Edition

By *Frank Bott*

☐ Final Term

Total: *100*

of education and training that prepare members of the profession with the particular knowledge and skills necessary to perform their specific role within that profession.

maintained, upgraded and replaced.

❑ But these are not ENOUGH.

trade unions and their organization; an understanding of the engineer's responsibility to the profession, to the community and to the environment

It's possible to break all three, simultaneously!

☐ Offer a compliment when it's deserved

ethical?

Define socially acceptable behaviors.

disseminate, and enforce policies.

☐ Liability

☐ Software risks

☐ Conflicts of interest

☐ Unauthorized access to computer systems

☐ IEEE Code of Ethics: Products

3. PRODUCT - Software engineers shall ensure that their products and related modifications meet the highest professional

☐ IEEE Code of Ethics: Peers

6. PROFESSION - Software engineers shall advance the integrity and reputation of the profession consistent with the

- ☐ Support colleagues

- ☐ Pursue lifelong learning

☐ Give proper credit for intellectual property.

☐ Respect the privacy of others.

☐ Honor confidentiality.

☐ Honor contracts, agreements, and assigned responsibilities.

☐ Improve public understanding of computing and its consequences.

☐ Access computing and communication resources only when authorized to do so.

- ❑ Articulate and support policies that protect the dignity of users and others affected by a computing system.
- ❑ Create opportunities for members of the organization to learn the principles and limitations of computer systems.

Co-worker had given him source listings of their current work.

He also has an early version of commercial software developed at another company

☐ How does the Code of Ethics help us understand this case?

Could he then write his own program and still have an

obligation to give credit?

☐ **Yes:** He should have acknowledged credit in documentation.

But using software is definitely a violation of code.

☐ Aisha feels strongly that system should be much more secure.

☐ She has tried to explain the risk.

☐ **What should Aisha so? Should she refuse to build the system as they request?**

assigned responsibilities.

- ❑ We don't have Aisha's contract, but she may have to choose between her contract and her obligation to honor privacy and security.

are to be displayed ahead of nonwhites

- ❑ Further states that names of male applicants are to be displayed ahead of female applicants**

- 
- ❑ If client answers that they plan to use information to favor white males, then: Computer professional should refuse to build the system as proposed.

☐ **The company widely advertises the package.**

☐ When the product is shipped, it includes a disclaimer of responsibility for errors resulting from the use of the program.

returns and were penalized by Rev Canada.

they have to pay penalties for mistakes which result from the program.

- ❑ By law companies can make disclaimers only when they are in “good conscience” (Disclaimer does not meet legal test

- 
- Making into a body (*Corpus*)

- Organization should be given a legal existence, through a process known as *incorporation*.

- 
- Public or Private Companies (Companies Act 1985 and 1989)

☐ Inflexible in Normal Commercial World

■ Movement of key Personnel

■ Too risky

❑ Charities, Professional Bodies

❑ (Unlimited Companies)

☐ 1992 Act allows single member

□ If debts > assets shareholder loses shares

c. Shareholders Agreement

- Liability of members is limited

☐ Authorised Share value

- Nominal Share Value and Number

- Can govern way voting is done

☐ Company Secretary

☐ Could be Director

product is sold (e.g. through advertising) and with deciding how the range of products sold by the company should develop.

4. Finance and Administration: To pay bills, to look after its funds, All central services.

□ The tools of their trade are bar charts, activity networks, critical path analysis, and so on.

prepared to handle serious problems which arise anywhere in the organization

☐ Long term Planning

☐ Conclusions

software for clients who demand work of high quality.

- ❑ Syniad's head office is in London. Other offices are in Manchester, Delft, Netherland.

■ The personnel reports to him.

management or presentational skills, which are the responsibility of the personnel function).

(Centralized policies and procedures are widely used but they have usually been developed within one part of the company and have been adopted by general consent.

centralization and decentralization has little meaning.

Centralized policies and procedures are widely used but they have usually been developed within one part of the company and have been adopted by general consent.

☐ Proper plans for training and career development were made and regularly reviewed;

☐ Employees were aware of the company's opinion of their performance.

- 
1. *Cost & Revenue*
 2. *Project Costing*
 3. *Sales*

3. *Fixed Price Project Estimation*

calculated as a percentage of the total revenue.

□ In practice, this system does not work well.

2 The reports are used for assessing and monitoring the current

position.

the likely start date.

those problems which are inhibiting it from attaining these

goals.

as a private company and its future must, inevitably, be very different from its past.

- ❑ There will be a need to have some money with which to start the venture.

stationery to travelling expenses

- an assessment of the size of the market and the competition
- a prediction of the financial performance of the company

many people it expects to employ, and on government policy at the time.

❑ In most cases, security is required for the loan

service the predicted volume of sales with the budgeted staff levels; and the salesmen are confident that they can produce the predicted sales

overdraft but interest is only payable on the amount actually
owed

management is particularly appropriate for software work

enterprise.

also are building blocks for the medium- and long-term

corporate requirements

flexibility, responsibility, discipline, identification with the
company and, crucially, work-rate.

projects. Performance appraisal is central in HRM strategies

and yet rise to the top tier of elite architects . These

architects are not company directors despite their seniority

well and has no idea what's actually happening at the grass roots level. By the time they find out, it's too late

work

have to start again and teach them the methods and tricks
we work with.

and suppliers of articles and substances for use at work

☐ Plagiarism

- Designs

- Copyrights protecting computer programs

☐ the know-how which goes into the development of the product may be protected as confidential information

widespread piracy of software products

patent is deemed to be in the public domain and can be used by anyone

- there must be an actual or anticipated unauthorized use or disclosure of the information

erode the commercial advantage of the patentee. If they can prove that the subject matter of the patent has been used or disclosed before, they can invalidate the patent

excluded class

makes something else do something.

- ❑ Copyright owners face the specter of unlimited piracy through uncontrolled copying with the advent of internet

copyright:

- copy the work
- issue copies to the public

❑ The rights apply equally to published and to unpublished

works

- Error correction

- Databases

copyright subsisted in the work, then the plaintiff is not
entitled to damages against the defendant

- failing to put a quotation in quotation marks

- Ways of terminating the contract and the consequences

- Appropriate ways to terminate the contract-notice required

resolving

the

matter.
