

Lesson 27: Scientific Look At Mental Disorders

Summary

This lesson traces the history of mental illness perception.

- **Ancient Views:** Mental illness was attributed to the **soul** (a person within a person) or **evil spirits**. The soul escaped during sleep (dreams).
- **Ancient Treatments: Trepanning** (drilling a hole in the skull) was used by Egyptians to let evil spirits escape.
- **Middle Ages (13th-15th C):** Mentally ill were often viewed as **witches/wizards** or possessed by devils. Treatment involved torture, burning, chains, and hand-cuffs.
- **18th Century Transitions:** The **French Revolution** and **Industrial Revolution** caused mass migration to cities, leading to overcrowding, unemployment, and crime.
- **Asylums:** Institutions were established in Paris, Lyons, Bristol, and Norwich. The goal was to "discipline" and "cure" inmates through **work**. Criminals and mentally ill were kept together.
- **Scapegoating:** Mentally ill people were blamed for social problems arising from industrialization.
- **Scientific Outlook:** By the mid-18th century, mental illness began to be regarded as **nervous disease**, marking the start of a scientific approach.
