

ZOO 507 midterm m.c.q

- 1) Endotherm produces their own body heat through _____ mechanism. **Internal**
- 2) Hibernating animal possess _____ **low metabolic rate**
- 3) Human eye can detect electromagnetic radiations of wavelength range _____ **380-760nm**
- 4) _____ is used ecological indicators to evaluate natural biodiversity. **Species composition**
- 5) Tropical rainforest are the regions of species of _____ **more than 50%**
- 6) The completion within the species _____ **Intraspecific**
- 7) Foliose is an example of _____ **Lichens**
- 8) _____ is a kind of association in which one organism called parasite lives on the expense of host. **Parasitism**
- 9) Some animals protect themselves by using prominent _____ coloration
- 10) Grassland biome is an example of _____ **terrestrial biome**
- 11) Sulfur circulates in _____ **Sulfur cycle**
- 12) Chemically interactive nitrogen gas makes up _____ of the volume of atmosphere. **78%**
- 13) El-nino effect which occurs every _____ **2-7 years**
- 14) A protective layer in the atmosphere that protects the life on earth from harmful effects of UV radiation from sun is _____ **ozone layer**
- 15) Physical location of a gene _____ **locus**
- 16) Use or defense of a resource by one individual that reduce the availability of resources to other individuals. **Competition**
- 17) The term ecosystem coined by Tansley in _____ **1935**
- 18) Abiotic components includes _____ **Temperature**
- 19) A community is made up of many _____ Interact in an area. **Population**
- 20) The ecological niche is an important concept of _____ structure. **Community**
- 21) Cockroaches are present on earth since _____ **350 million years**
- 22) Invasive species is also called _____ **Alien species**
- 23) A certain range of value within tolerance range is called the range of _____ **Optimum**
- 24) _____ is a process that starts an ecological food web. **Photosynthesis**
- 25) Spiders and insects are _____ **(Secondary consumer)**
- 26) Example of key stone species _____ **(bees, butterflies, hummingbirds, bats, alligator, wolf, leopard and lion.)**
- 27) Food making processes called _____ **(Photosynthesis)**
- 28) Invasive species are also called _____ **(Alien Species)**
- 29) Percentage of nitrogen in environment _____ **(78%)**
- 30) Hibernation is occurring in large animal called _____ **(Winter Sleep)**
- 31) Ozone is denoted as _____ **(03)**
- 32) Mycorrhiza is association between _____ **(Fungus & plant)**
- 33) Living and non Living things includes _____ **(Ecosystem)**
- 34) Non Renewable sources such as aluminum and _____. **(Copper)**
- 35) Community of different _____ interact each other. **(Population)**
- 36) Organisms are divided into _____ types. **(3)**
- 37) Viola tricolor live in _____ environment **(Grasslands, wastelands and mainly on acidic or neutral soils. It is also found on the banks and in the alluviums).**
- 38) Ecological niche is important for the study of _____ **(Ecosystem)**
- 39) Blind Indus dolphin belong to _____ specie. **(Endangered)**
- 40) _____ process start ecological food web. **(Photosynthesis)**

- 41) ___ factor helpful to regulate the population? **Predation or Food Supply**
- 42) ___ %age of water that cover the earth surface. **(71%)**
- 43) ___ zone contain mountain head water streams. **(Transition)**
- 44) Ectotherm organisms regulate their body temperature through ___. **(Environment)**
- 45) CFCs stand for _____. **(Chloroflouro carbons)**
- 46) _____ is basic unit of life and responsible for the trait inherited. **(Gene)**
- 47) PAR stand for _____. **(Periodic Automatic Replenishment)**
- 48) mRNA is further translated into _____. **(Protein)**
- 49) Human affected environment _____ %. **(40%)**
- 50) Sulphur circulates through _____ cycle. **(Sulphur)**
- 51) Foliose is growth form of _____. **(Lichen grow on leaf like structure)**
- 53) Grass land biome is example of _____. **(Temperate)**
- 54) Study of large scale pattern of distribution and diversity of organisms. **Geographic ecology.**
- 55) The number of Alleles in a population is called _____. **Allelic richness**
- 56) There are _____ levels of genetic diversity. **3**
- 57) Sum up of the variation of an interbreed population is called _____. **Gene pool**
- 58) Mistletoe specie in Argentina and Chile is an example of _____. **local adaptation**
- 59) N_e is much smaller than N_c . **(10 – 30 %)**
- 60) _____ means that population contains all the possible allele for each particular gene locus. **Genetic Diversity.**
- 61) Physical location of a gene is called _____. **Locus**
- 62) _____ two of the same alleles at a given locus. **Homozygous**
