Final Term (Live Quiz)

PAID VU LMS HANDLING by Mam Mehwish 03184148783
Past Papers for Mids./Finals are also Available

MAM MEHWISH 03184148783

Question 1: Proteins are made by ..... of amino acids.

- ◯Polymerization
- ◯Transcription
- ☑ Translation
- ◯None of these

Question 2: The purpose of MS1 in tandem mass spectrometry (MS/MS) is .....

- ◯To match the experimental mass with theoretical peptides from a database
- ◯To measure the mass of the fragments produced by MS2
- ◯To fragment the intact sample molecule into two parts
- ☑ To measure the molecular weight of the intake sample molecule

---

Question 3: How is the experimental mass reported from MS2 matched with theoretical peptides from a database?

- ◯Both experimental mass is compared to the theoretical masses of all the peptides in the database & experimental mass is matched to the theoretical mass of the peptide with the closest match

Note: Live quiz MCQs also repeated in Exam (6, 7)

Miss Mehwish: 03171491481

- ☑ The experimental mass is matched to the theoretical mass of the peptide with the closest match
- ◯ The experimental mass is compared to the theoretical masses of all the peptides in the database
- ◯ The experimental mass is used to calculate the sequence of the peptide

---

Question 4: Which of the following statements is true about proteins?

- ☑ Proteins are polymers of amino acids
- ◯ Proteins are polymers of di-sulfide bridges
- ◯ Proteins are polymers of peptide bonds
- ◯ Proteins are polymers of glucose

Question 5: The purpose of MS1 in protein identification .....

- ☑ To measure the mass of the intact molecule in the sample
- ◯ To identify the fragmentation technique used
- ◯ To identify the protein in the sample
- ◯ To determine the sequence of the protein

Question #1:

The significance of the score that is calculated when comparing the mass of the intact molecule from MS2 with the theoretical mass of database proteins .....

- The score is a measure of the accuracy of the mass spectrometer
- The score is a measure of the fragmentation efficiency of MS2
- The score is a measure of the molecular weight of the protein
- ✓ The score is a measure of the confidence that the protein that was originally analyzed has been identified

Note: Live quiz MCQs also repeated in Exam (6, 7)

Miss Mehwish: 03171491481

Question #2:

Beeta-pleated sheets are the examples of .....

- ✓ 2' OR 2-D OR Secondary Structure of proteins
- 4' OR 4-D OR Quaternary Structure of proteins
- 1' OR 1-D OR Primary Structure of proteins
- 3' OR 3-D OR Tertiary Structure of proteins

Question #3:

The final resort in protein search and identification .....

- Comparing the mass of the intact molecule in the sample with the mass of known proteins
- Matching experimental fragments with in silico fragments
- ✓ Determining the sequence of the protein
- Identifying the fragmentation technique used

Question #4:

Which of the following statements is un-true about 2' (Secondary) structure of proteins?

- 2' structures of proteins include Alpha helices and Beta sheets
- 2' Structures of proteins are formed as a result of peptides bond formation between N and C termini in a protein backbone
- Hydrogen bonds are the reason of 2' structures of proteins
- ✓ 2' Structures of proteins are formed as a result of Hydrogen bond formation between N and C termini in a protein backbone

---

Question #5:

The purpose of MS2 in protein identification is .....
