Midterm Important Topic

Cs101

Introducing To Computing

1. *Search Engines*
2. *Advantages Search of operation*
3. *Boolean*
4. *Hexadecimal Notation*
5. *Flash Drives and Optical System*
6. *Binary Addition*
7. *2s Complement Notation*
8. *Floating Point Notation*
9. *CPU Basic*
10. *Compressing audio and video*
11. *Program Execution and Logic Operation*
12. *Arithmetic operator*
13. *Deadlock*
14. *Software Classification*
15. *Os basic concepts*
16. *Power of Self Test (POST)*
17. *Security attacks from inside and outside 18. Method of Process Communication*
19. *Direct Memory access and Handshaking*
20. *Recursive Structure*
21. *Layered approach to internet Software*
22. *HTML*
23. *XML*
24. *TCP/IP pro*
25. *Algorithm Efficiency*
26. *Software Verification*
27. *Protocols*
28. *Internets*
29. *Discovery*
30. *World Wide Web*
31. *Insertion Sort Algorithm*

Learning With A&I

32. *Representation*
33. *Encryption*

Cs201

Introduction to Programming

1. *Structures*
2. *Loops*
3. *Conditions Statements*
4. *Data Types*
5. *Functions*
6. *Pointers*

Cs301 Data Structure

1. *BST Tree*
2. *AVL Tree*
3. *List link*
4. *Queue*
5. *Array and Stack in Data Structure*
6. *Infix, Postfix and Prefix*

Learning With A&I

Cs304

Object Oriented Programming

1. *Inheritance*
2. *Encapsulation*
3. *Abstraction & Class*
4. *Overloading*
5. *Polymorphism*
6. *Aggregation*
7. *Member function & Friend Function*

Cs401

Assembly Language Programming

1. *Operation*
2. *String Program*
3. *Register*
4. *Addressing Modes*
5. *Multiplication Algorithms*
6. *Program Flow*

Learning With A&I

Midterm Important Topic

Cs402 Theory of Automata

1. NFA
2. Moore Machine
3. Mealy Machine
4. Kleen
5. Regular Expression
6. Finite and Infinite Language
7. Finite and Infinite Languages

Cs403

Database Management System

1. Normalization
2. Dependencies
3. Database Architecture
4. Function Dependency
5. Joins, Attributes, The Keys
6. E-R-Data Model
7. DFD

Learning With A&I

Cs408

Human Computer Interaction

1. Goals
2. Interaction
3. Design Principle
4. The Computer
5. User Research
6. Life Cycle Models in HCL

Cs410 Visual Programming

1. Z-Order
2. Super Class
3. WM- Print Message
4. System Window Classes
5. Bit wise Operation
6. Processes in Windows
7. Architecture of a Standard win32API

Learning With A&I

Cs411 Visual Programming

1. *Events*
2. *Transforms and Panels*
3. *XML, WPF & XAML*
4. *Logical and Visual Trees*
5. *Dependency Properties*
6. *Interface, Indexes and Exception Handling*

Cs501

Advance Computer Architecture

1. *RTL*
2. *CISC & RISC*
3. *Pipelining SRC*
4. *Machine Exceptions*
5. *Microprogramming*

Cs502

Design and Analysis of Algorithms

1. Merge sort 2.
Heap

Learning With A&I

3. *Algorithms*
4. *Sorting Algorithms*
5. *Asymptotic Notation*
6. *Quick Sort*
7. *Selection Problem*

Cs504 Software Engineering-1

1. *GUL*
2. *Use Case*
3. *Coupling and Cohesion*
4. *Identify Structure*
5. *Software Architecture*
6. *Connie's Convenience Store*
7. *Interaction Diagram and Sequence Diagram*

Cs506

Web Design & Development

1. *Socket*
2. *Streams*
3. *Applets*
4. *Events*
5. *JDBC*
6. *Meta Data*

Learning With A&I

7. *Serialization*

Cs507 Information System

1. *CBIS*
2. *Marketing*
3. *Infrastructure*
4. *Decision Making*
5. *Model's*
6. *System Analysis*
7. *System Development Life Cycle*

Learning With A&I

CS508

Modern Programming Language

1. *PROLOG*
2. *SNOBOL*
3. *Language Evolution Criteria*
4. *LISP Programming Language 5. Ada Programming Language*

Cs601 Data Communication

1. *Physical Topology*
2. *OSI Model*
3. *Bandwidth and Wavelength*
4. *TCP/IP Protocol Layered Architecture*
5. *Analog and digital Signal*
6. *Line Coding and Decoding*
7. *Multiplexing*
8. *Switching*
9. *Transmission Media*
10. *Spread Spectrum*
11. *ASK , FSK and PSK*

Cs602

Computer Graphic

1. *Point*

Learning With A&I

2. *Clipping*
3. *Projection*
4. *3D Transformation*
5. *2D Transformation*
6. *Techniques*
7. *Filled Area Primitives*
8. *Triangle and Planes*

CS604

Operating System

1. *Algorithms*
2. *Processes*
3. *Threads*
4. *Types of Operating System*
5. *UNIX & LINUX*
6. *Critical Section Problems*

Cs606

Compiler Construction

1. *Parse Trees*

Learning With A&I

2. *Handle*
3. *Computing First Aids*
4. *Top-Down Parser*
5. *Register Allocation*
6. *Recursive Descent*
7. *LL1 Table Construction*

Cs607

Artificial Intelligence

1. *CLIPS*
2. *Expert System*
3. *Searches*
4. *Genetic Algorithms*
5. *Branch and Bound*
6. *Knowledge*
7. *Formal KR Techniques*

Learning With A&I

Cs605

Software Engineering-II

1. Risk
2. Metrics
3. Software Project
4. The Project Management
5. Function Point Counting Process
6. Statical Control Techniques

CS609

System Programming

1. COM Port
2. Keyboard Interface
3. Real Time Click
4. Hardware Interrupts
5. TSR Programmers and Interrupts
6. Peripheral Programming Interface
7. Serial Communication

Learning With A&I
