**Past Papers for Mids./Finals are also Available**

1. According to Weber's Law, what happens to the noticeable difference as stimulus intensity increases?

- It increases proportionately
- It decreases proportionately
- It remains constant
- It increases proportionately (Correct)

2. What is the primary focus of psychophysics?

- Social interactions
- Environmental assessment
- Sensory perception (Correct)
- Cognitive development

3. Which statement best describes basic behavioral science?

- It aims to solve environmental problems through policy development.
- It primarily investigates historical trends in human behavior.
- It studies human behavior and its underlying causes and consequences. (Correct)

4. According to the assumptions of environmental psychology, what is essential for sustaining life on earth?

- Ecosystems are crucial for supporting sustained life on earth. (Correct)
- Human populations can thrive without the need for ecosystems.
- Life on earth is sustained primarily by technological advancements.

- Individual organisms can survive independently of ecosystems.

5. Which approach asserts that excessive attentional demands can have differing effects on primary and secondary tasks?

- The Ecological Approach
- The Stimulus Load Approach (Correct)
- The Stress Approach
- The Arousal Approach

6. What can be potential consequences of overstaffing?

- Excessive resources and less individuals
- Competition among individuals for resources (Correct)
- Abundant resources
- Rightful distribution of resources

7. Rightful distribution of resources

- Ecological Biology
- Gestalt psychology (Correct)
- Geographical Determinism
- Rightful distribution of resources

8. All of the following environmental factors impact arousal levels EXCEPT:

- Noise level
- Light intensity
- Personal space invasion (Correct)
- Light intensity

9. The stimulus load approach focuses on:

- Cognitive information-processing abilities

- Physiological mediators only
- Behavioral coping mechanisms
- Physiological and affective mediators (Correct)

10. Arousal theorists emphasize the importance of consistency and break inconsistencies in:

- Identifying environmental factors
- Predicting behavioral responses (Correct)
- Understanding cognitive processes
- Evaluating individual differences
