MUHAMMAD ZAHID	Zoo501 Developmental Biology
MCQs	Fall 2020(13 February 2020)
Quiz 3	Final Term

1. In mammalian cleavage at 64-cell stage, the inner cell mass and the _____ cells have become separate cell layers, neither contributing cells to the other group....**Trophoblast**
2. The narrow connecting stalk of extra-embryonic _____ that links the embryo to the trophoblast eventually forms the vessels of the umbilical cord.....**Mesoderm**
3. The rudiment of the central nervous system, is called_____.....**Neurulation**
4. Fishes,_____, and birds undergo discoidal meroblastic cleavage, wherein the early cell divisions do not cut through the yolk of the egg.....**Reptiles**
5. Chorion is derived from _____ cells..... **trophoblast**
6. The first segregation in mammalian cells within the inner cell mass results in the formation of the _____..... **Primitive endoderm**
7. The original type of trophoblast cells constitutes a layer called the..... **Cytotrophoblast**
8. Neurulation in _____ is exclusively secondary.....**Fishes**
9. Fraternal twins are the result of ____ separate fertilization events.....**Two**
10. In mammalian cleavage _____ catches the blastocyst on an extracellular matrix containing collagen, laminin, fibronectin, hyaluronic acid, and heparin sulfate receptors..... **Endometrium**
11. The mammalian embryo obtains nutrients directly from its_____..... **Mother**
12. The cytotrophoblast initially adheres to the _____ through a series of adhesion molecules..... **Endometrium**
13. While gastrulation process in mammalian _____ becomes rich in the blood vessels that will provide oxygen and nutrients to the embryo..... **Decidua**
14. Mother provides the fetus with nutrients and oxygen, and the fetus sends its waste products _____ into the maternal circulation..... **Carbon dioxide and urea**
15. Discoidal meroblastic cleavage occur in_____..... **birds and reptiles**

Muhammad Zahid (Haveli Larka)

16. During mammalian cleavage the trophoblast cells secrete fluid into the morula to create a blastocoels this process called as…….. **Cavitation**

17. The prechordal _____ induces the formation of the forebrain; the chordamesoderm induces the formation of the midbrain, hindbrain, and spinal cord…… **Plate**

Muhammad Zahid (Haveli Lakha)
