1. Define vestibular apparatus? 2marks
2. abnormalities due to GH?5
3. Messiner corpuscales and paccin corpuscales difference?3
4. Oxytocin? 3
5. Five types of hormone kuch as type ka q th?
6. Gastrointestinal track? 5
7. Prostaglandins sa related q th? 10 mrks

short questions epinephrine and
nor epinephrine hyperthyroidism
diseasea

homeostasis example and its component
Donnan equilibrium long questions note
on axon exocrine glnd and its examples

oceli and stigma t3 and t4 function and
hyperthyroidism 10

1:Differentiate between Norepinephrine and Epinephrine?2

2: Name two components of rhdopsin? 2mks

3: Define the terms gland and secretion? 2mks

4: Write the role of Fibers Zonula and ciliary muscles in eye? 3

5: Describe Hodgkin cycle in detail? 3

6: Explain two examples of feedback mechanism in detail? 5

7:What are taste buds?Explain taste receptors cells in detail?5

8: Which hormones are involved in the regulation of water and ions? 3

9: Enlist five functions of estrogen hormones in pregnancy? 5

10:Write the functions of T3 T4 and describe hyperthyroidism in detail? 10mks

Mcqs:

1: The human ear can detect sound frequencies lying between 20 to 20000 hertz.

2: In small diameter, nonmyelinated fibers, speedmay be as low as 0.25m/s.

3: Acclimatization Happens due to chronic exposure to new, naturally occurring environmental conditions.

4: hyperthyroidism leads to: high body temp, profuse sweating, weight loss, Irritability high blood pressure.

Stigma and ocelli 3

Abnormalities of growth Harmon 5

Note on axone 5

Colorblindness 3

Feedback mechanism 3

Donnan equilibrium 2

Note on the functions of prostaglandins 10 for

100% mcqs.read each & every line of ppts.

prostaglandin 10 marks

Website: www.vuways.com www.facebook.com/vuways

hair cilia types diseases by
hypothyroidism active
potential phases others
repeated.

1) diff b/w epinephrine n norepinephrine 2 marks
2) 2 basic types of stimuli 2 marks
3) androgens secreted by adrenal cortex 2 marks
4) effects of neuromodulation 3 marks
5) 2 examples of interoceptive receptors 3 marks
6) name the types of thyroid glandular cells and also their hormones 5 marks
7)name and explain hair cell types 5 marks
8) 5 hormones released by gastrointestinal track with functions 5 marks
9) functions of T3 and T4 and also hyperthyroidism 10 marks

2 marks question
1. Acclimitization and its effects
2.define line coding
3.hormones of ovary
3 marks question
4.name mechanism of homeostasis and example of homeostasis
5. Explain the types of hair cells
6. Explain photoreceptor
5 marks question
7.axon
8. Hormones of adernal cortex
9.discuss exocrine glands
10 marks ques
10. Prostaglandin

1. Define vestibular apparatus? 2marks
2. abnormalities due to GH?5
3. Messiner corpuscales and paccin corpuscales difference?3
4. Oxytocin? 3
5. Five types of hormone kuch as type ka q th?
6. Gastrointestinal track? 5
7. Prostaglandins sa related q th? 10 mrks

Zoo502 Final term 2018

Neurohypophysis is .....lobe of pituitary gland •
Receptor of thyroid gland are found in .....
• Myofibril...in diameter
• Study of phsycal law related to.....system
• Arterial blood pressure is high during.....
• Fenestrated capillaries found in.....
• Brow fate contain....as appear brown
• Local reconstruction.....
• Blood with hemoglobin can caery.....oxygen is.....
• Respiratory system of .....composed a to 9 air sacs
• Central chemo receptor are found in .....of mamals
• Camel can lose water.....%
• ...involve maintaining ph of urine • Require ..... water to excret urea
• Lenght of jejanum.....
• Salivary and pancreatic secretion contain .....ion • Goblet produce.....
• .....largest water soluble nutrient
• Example of negative feedback
• True about action potential
• Meisner corpuscle linked to.....
• Markel disk associated with reception of .....
• Not a part of organ corti.....
• Cold receptor are.....more than heat receptor
• Human retina has .....cone
• Which not endocrinegland
• Diameter pitutary gland..... Long questions (6-9-18)
• Pheromones and their role
• Physiological adaptation of ectotherm in hot environment.
• Types of stomch in invertebrates
• Objectives of ethology
• Uses of cropes in animals
• Name three vasodilators
• Define bulbber and their role
• Parastalsis
• Fahraeus lindquist effect
