1. The phenomena of plasma skimming and resultant increase blood flow viscosity is called.....**Fahraeus-Lindqvist Effect**
2. According to..... flow of blood is inversely related to viscosity. **Poiseuille's law**
3. Blood pressure is generated by..... of ventricle of heart. **Contraction**
4. Plasma skimming is the natural separation of..... from plasma. **RBCs**
5. Vasodilation is the..... **widening of blood vessels**
6. In peripheral circulation pathway blood is pumped **left ventricle**
7. The animal circulatory system alternatively can be called as.... **The body's blood transporting system**
8. .....serves as a major inducer of vasodilation in the cardiovascular system. . **Nitric oxide (NO)**
9. ..... Conduct exchange of materials between blood and tissues. **Capillaries**
10. Which type of blood vessels carries blood away from the heart ❤️ **arteries**
11. What does Vasoconstriction stands for..... **narrowing of blood vessels**
12. Blood is..... times viscous than water 🌊. **3 to 4**
