CS621 QUIZ NO.2 BY IQRA AZHAR

1. _____ is a contract between processes and the data store that says that if processes agree to obey certain rules, the store promises to work correctly.

a) Client centric consistency model

b) **Data consistency model** Correct

c) Sequential model

d) Incremental model

2. _____, in Computer System Design, is an enhancement that helps in organizing the memory so that it can minimize the access time.

a) **Memory Hierarchy** Correct

b) Deadlock

c) Concurrency

d) Scalability

3. The _____ is the conventional multicore processor with limited parallelism to exploit.

a) Gateway Processing Unit (GPU)

b) **Central Processing Unit (CPU)** Correct

c) Graphics Processing Unit (GPU)

d) Command Processing Unit (CPU)

4. Which of the following is NOT true regarding the quality of load balancing algorithms?

a) **Minimized Scalability** Correct

b) Minimized Communication Overhead

c) High adaptivity

d) Minimized Idle time

5. _____ consist of point-to-point communication links among processing nodes and are also referred to as direct networks.

a) **Static networks** Correct

b) Dynamic networks

c) Indirect networks

d) Bus networks

CS621 QUIZ NO.2 BY IQRA AZHAR

6. In _____ control strategy, one central control unit is used to control the operations of the components of the system.

a) Supervised

b) Decentralized

c) Distributed

d) **Centralized** Correct

7. Number of bits transmitted in a unit of time is known as _____.

a) **Bandwidth** Correct

b) Latency

c) Bisection

d) Diameter

8. _____ is a non-blocking network allowing multiple input-output connection patterns to be achieved simultaneously.

a) **Cross Bar** Correct

b) Mesh

c) Bus

d) Tree

9. _____ is the process to forward packets coming in from one port to a port leading towards the destination.

a) Context switching

b) **Switching** Correct

c) Latency

d) Temporal locality

10. _____ is a method of communication in distributed systems where processes or objects exchange messages with each other to share information or coordinate activities.

a) **Message passing** Correct

b) Deadlock

c) Caching

d) Concurrency
