Question No : 1 of 50
Which of the following does not come under the category of misuse?
Answer
Eavesdropping
Authorized access
Hacking
Fraud
BSCS.

Question No : 16 of 50
Which of the following is not a form of Information Classification?
Answer
Government classifications
Private Sector classifications
Individual classifications
Both Government and Private Sector classifications
BSCS.

Question No : 21 of 50
Which of the following terms is a measure of the probability that the system will cause an accident ?
Answer
Risk
Hazard probability
Accident
Damage
BSCS.

Question No : 19 of 50
Contract between two parties should be clear, concise and _____.
Answer
Mutual
Conformance
Custom
Consistent
BSCS.

Question No : 15 of 50
Information security, sometimes shortened to_____.
Answer
InfoSec
BSCS.
InfoTec
InfoJet
InfoSet

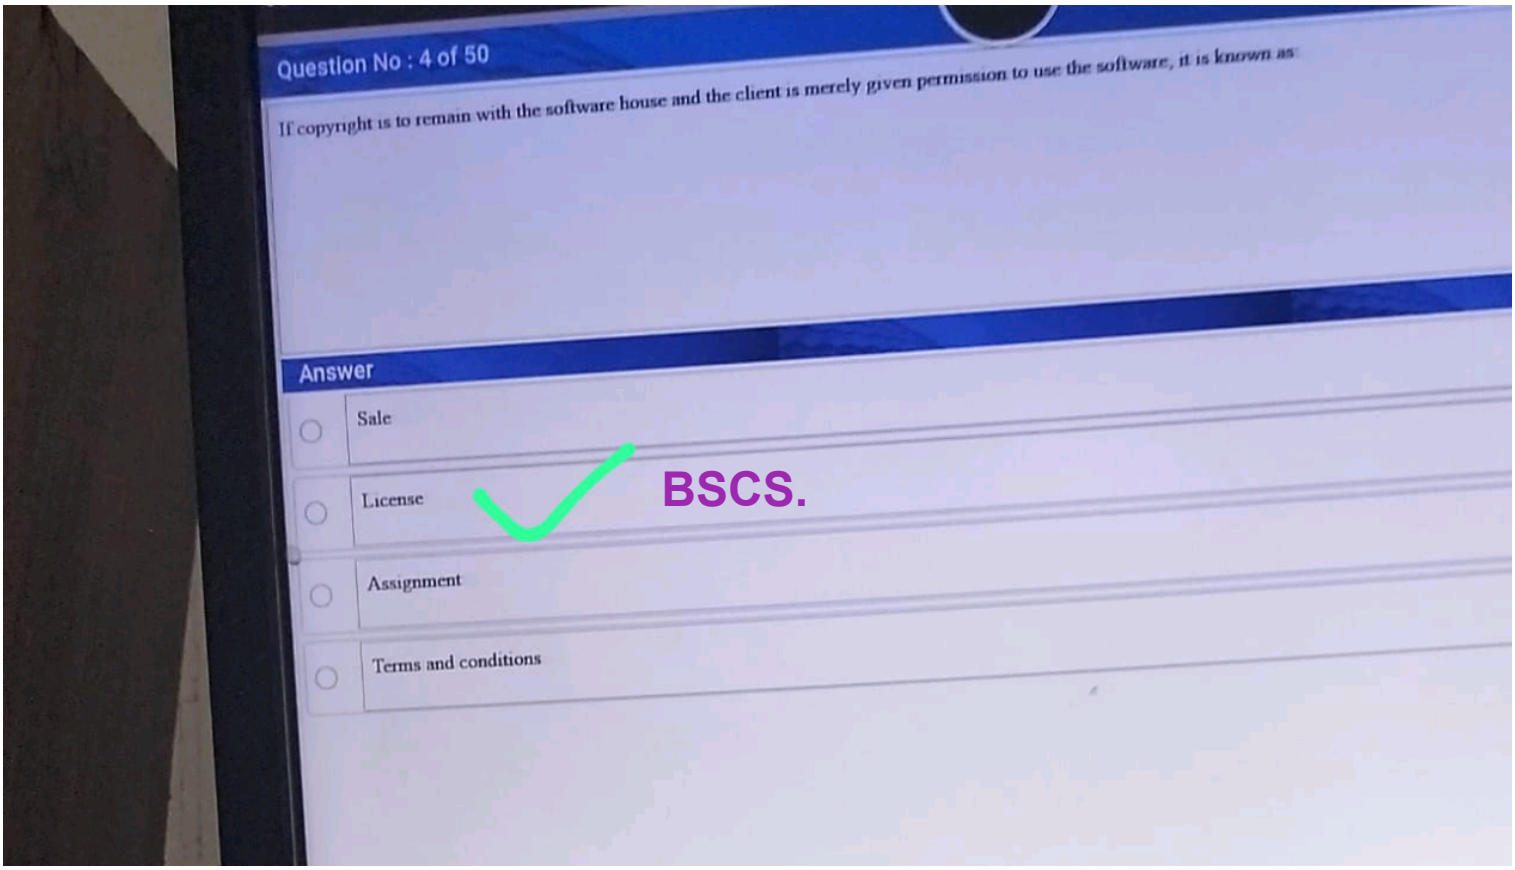

Question No : 30 of 50

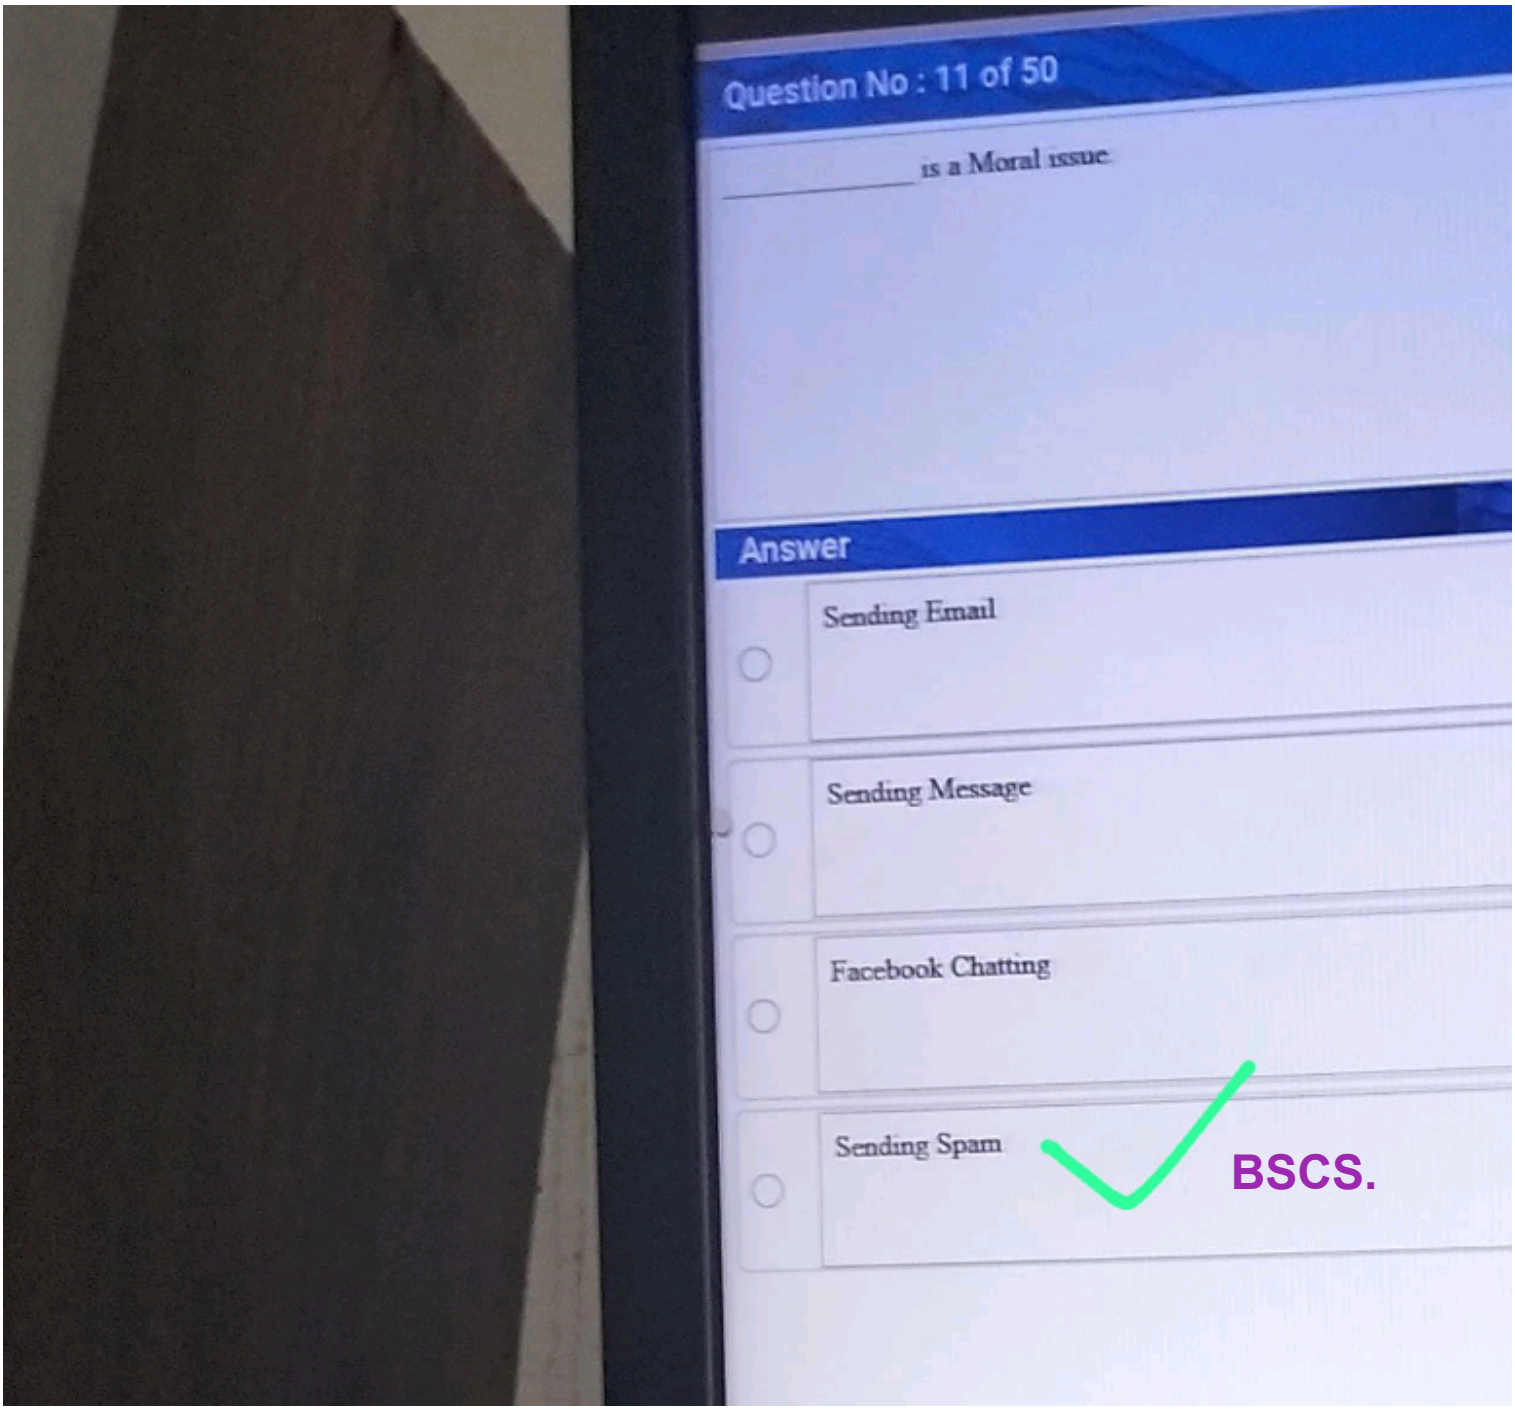

The term negligence in software liability refers to _____.

Answer

- Licensing
- System safety
- Ignore users
- Lack of care

BSCS.

Question No : 4 of 50
If copyright is to remain with the software house and the client is merely given permission to use the software, it is known as:
Answer
Sale
License
Assignment
Terms and conditions
BSCS.

Question No : 11 of 50
_____ is a Moral issue
Answer
Sending Email
Sending Message
Facebook Chatting
Sending Spam
BSCS.

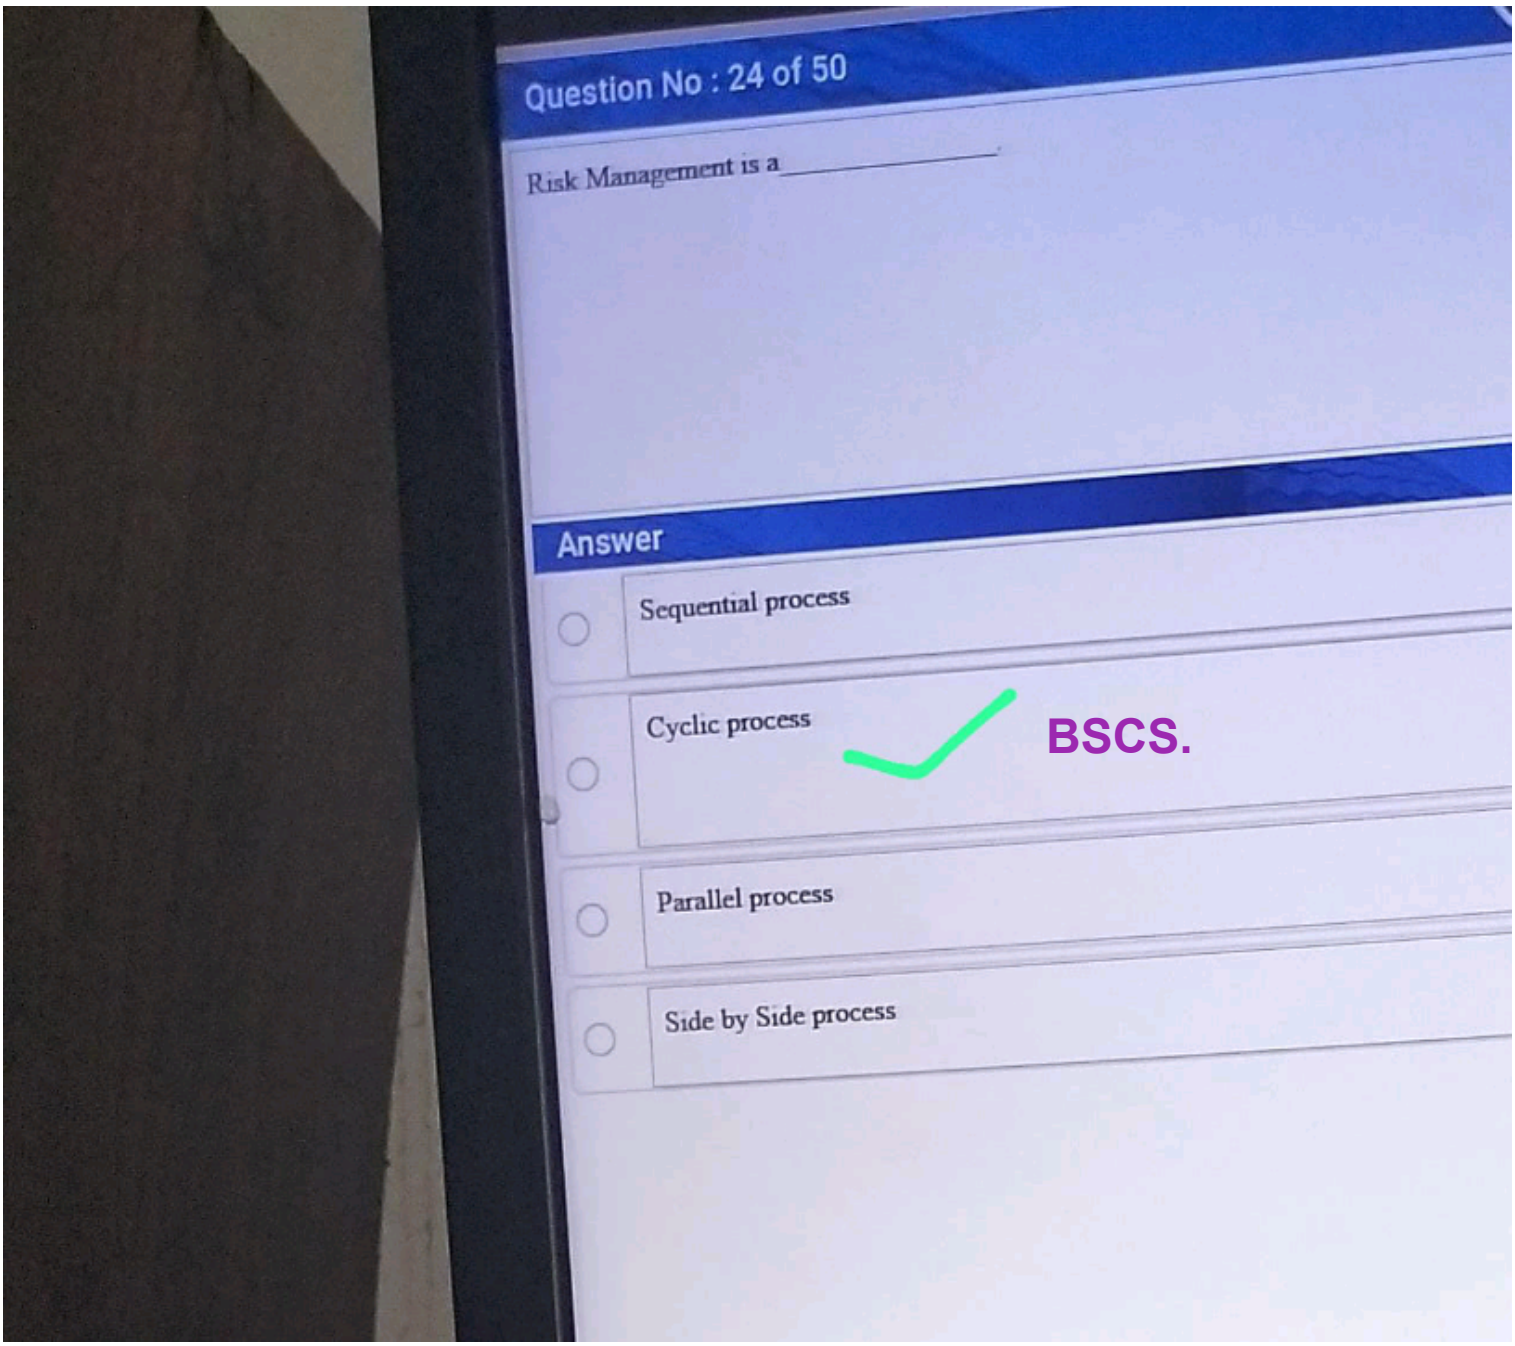

Question No : 29 of 50

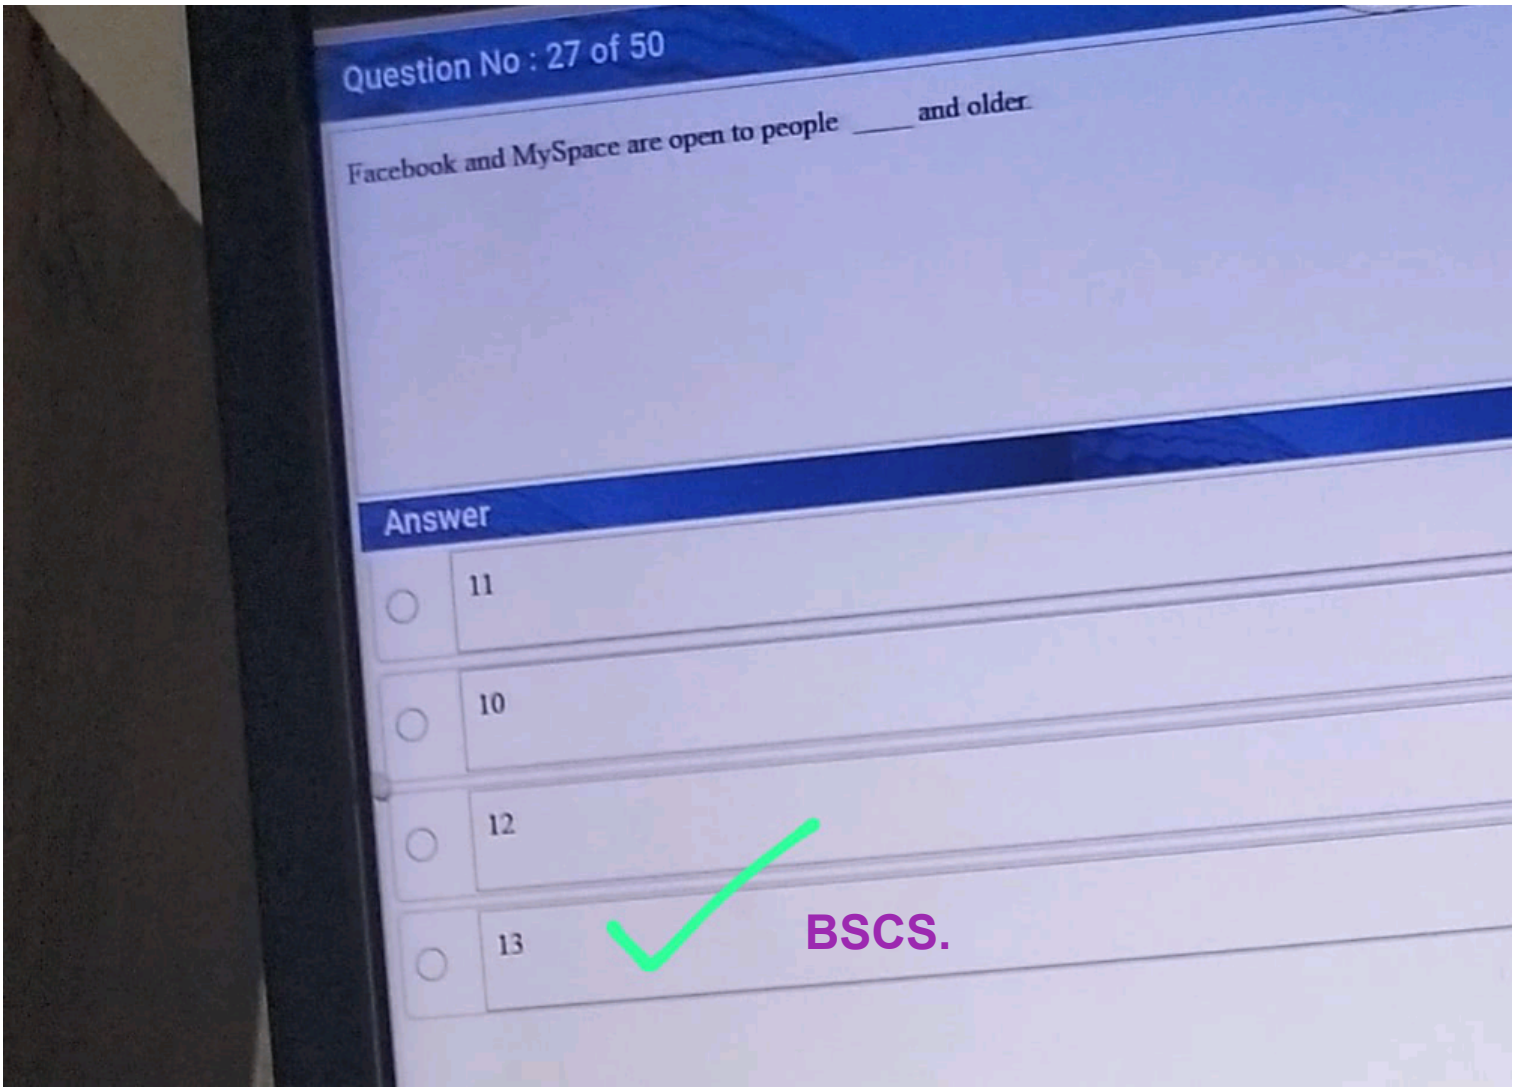

ISO is concerned with software _____.

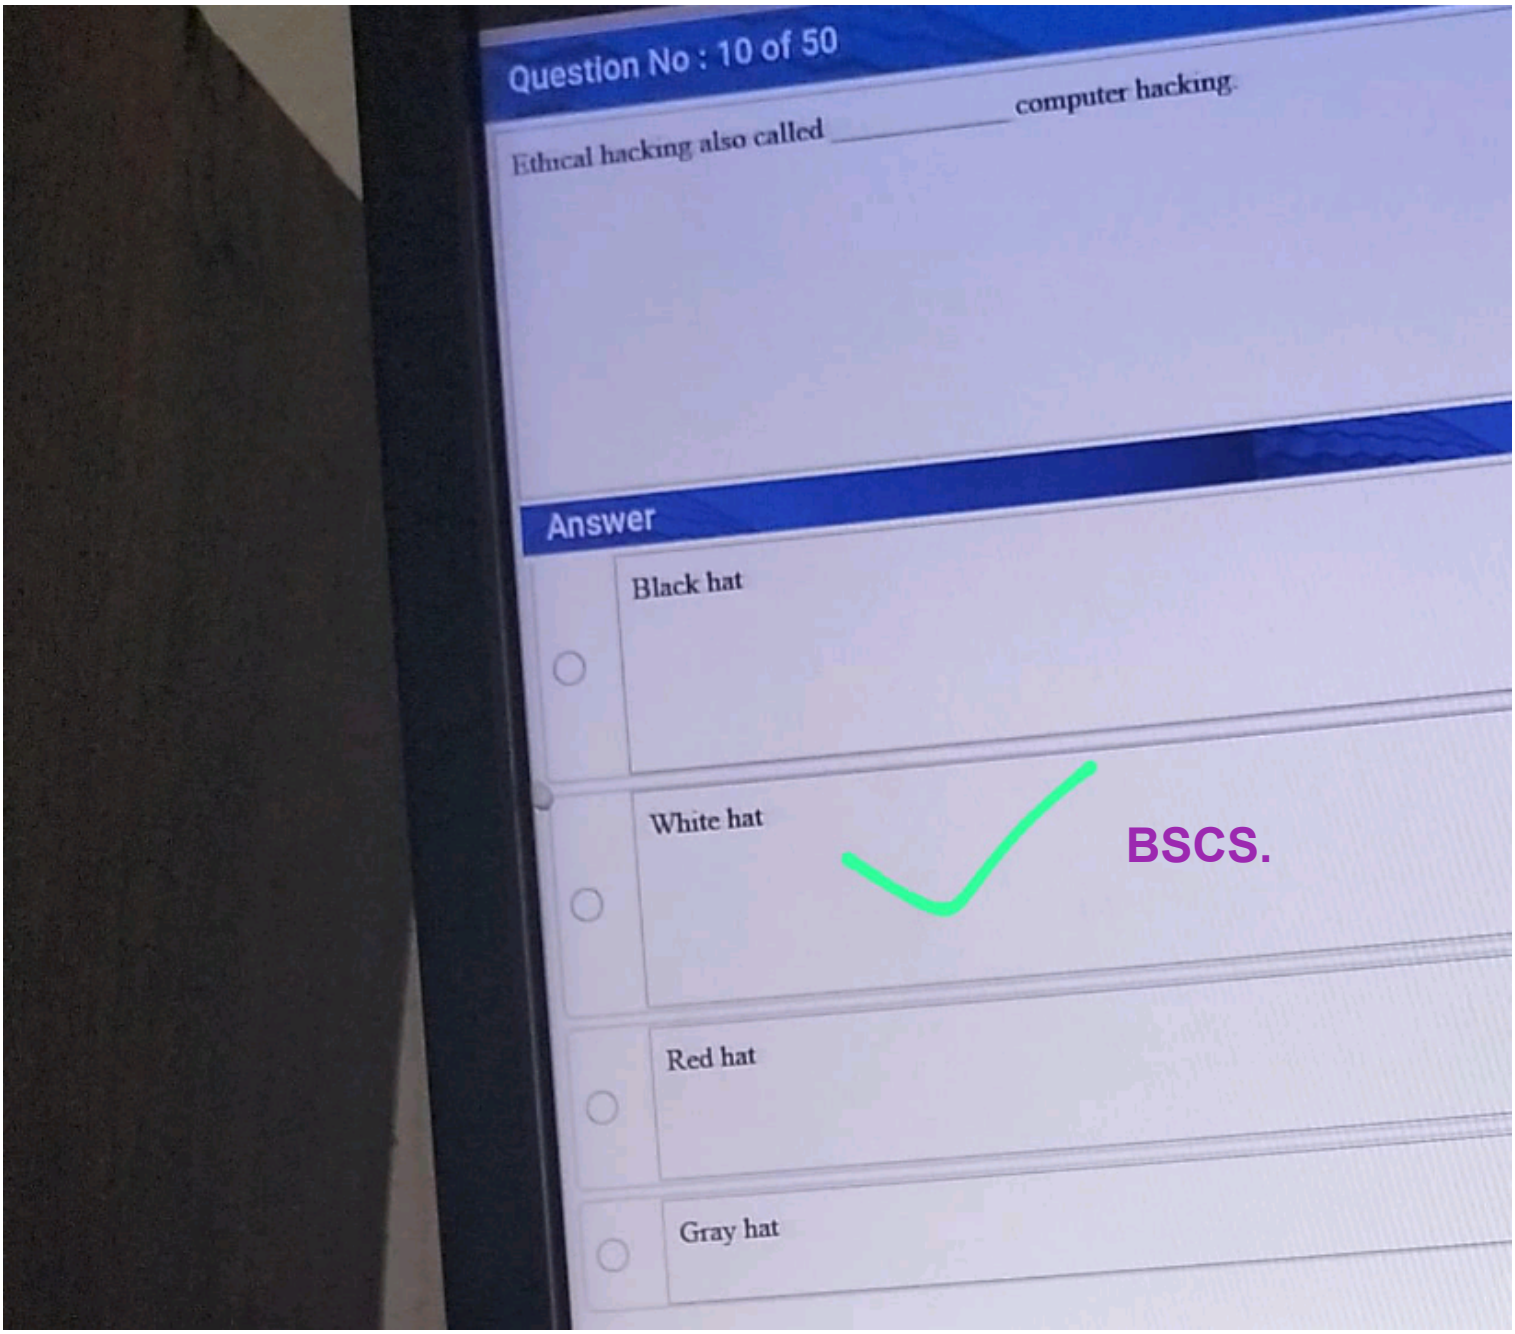

Answer

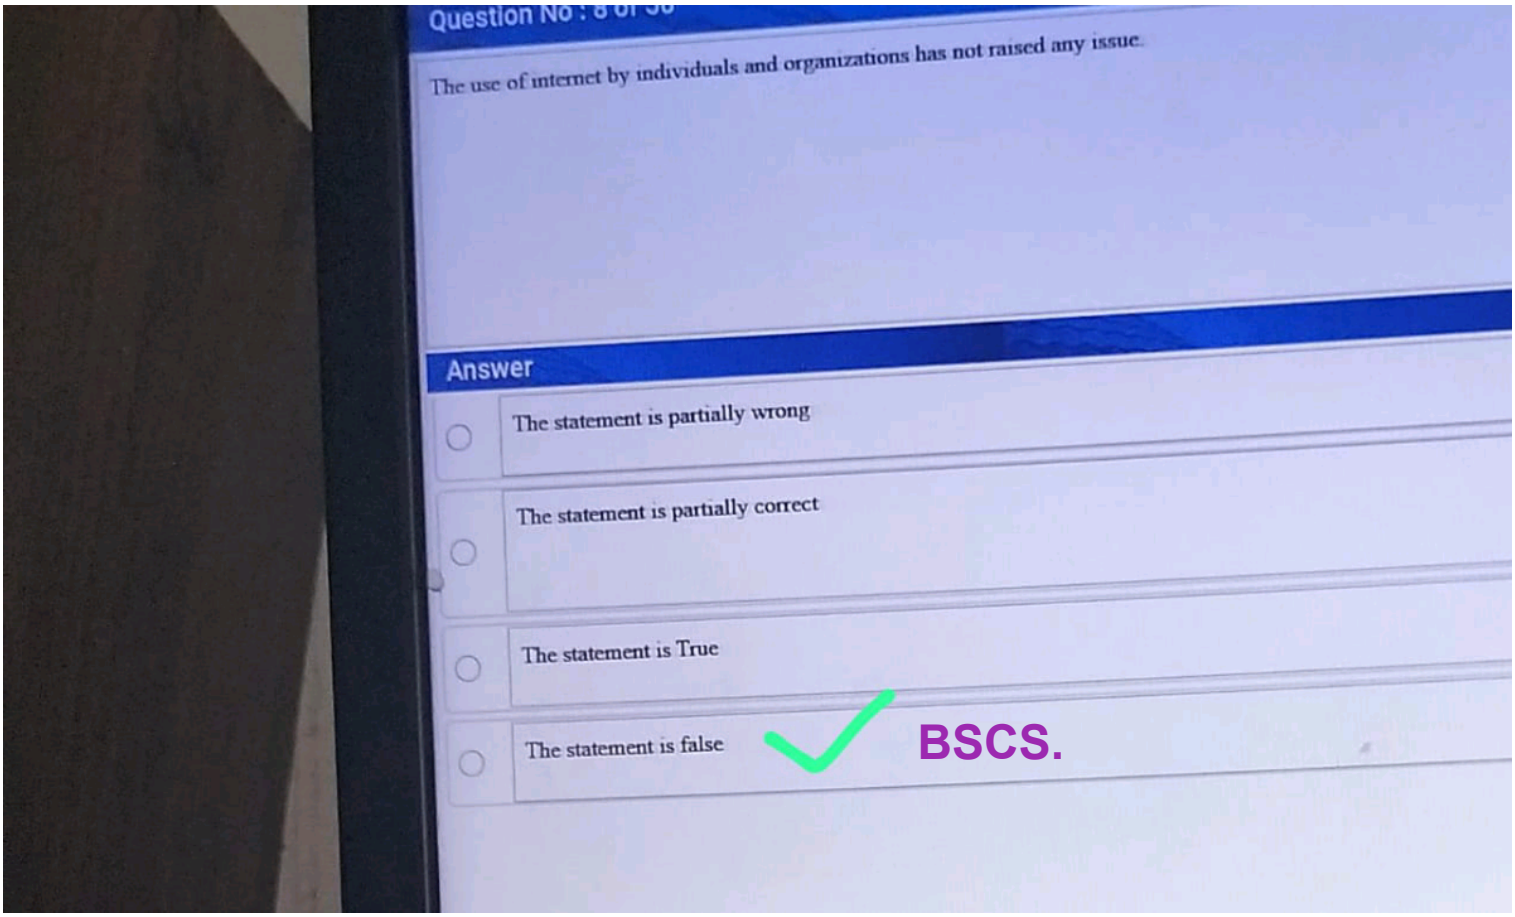

- Liability
- Security
- Standard
- Performance

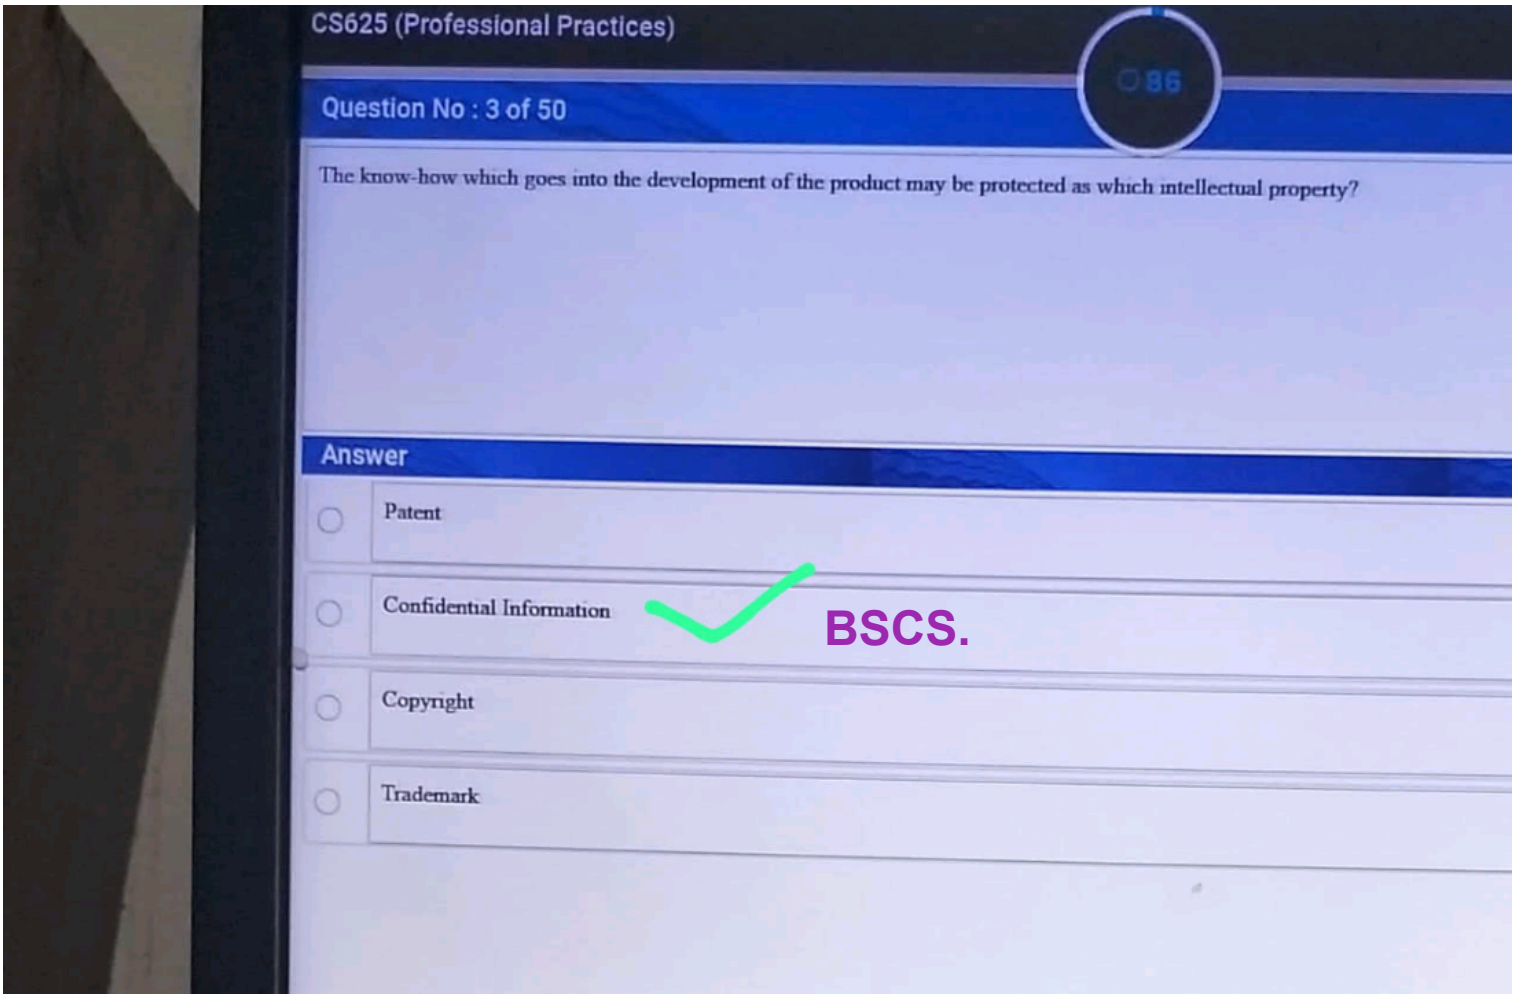

BSCS.

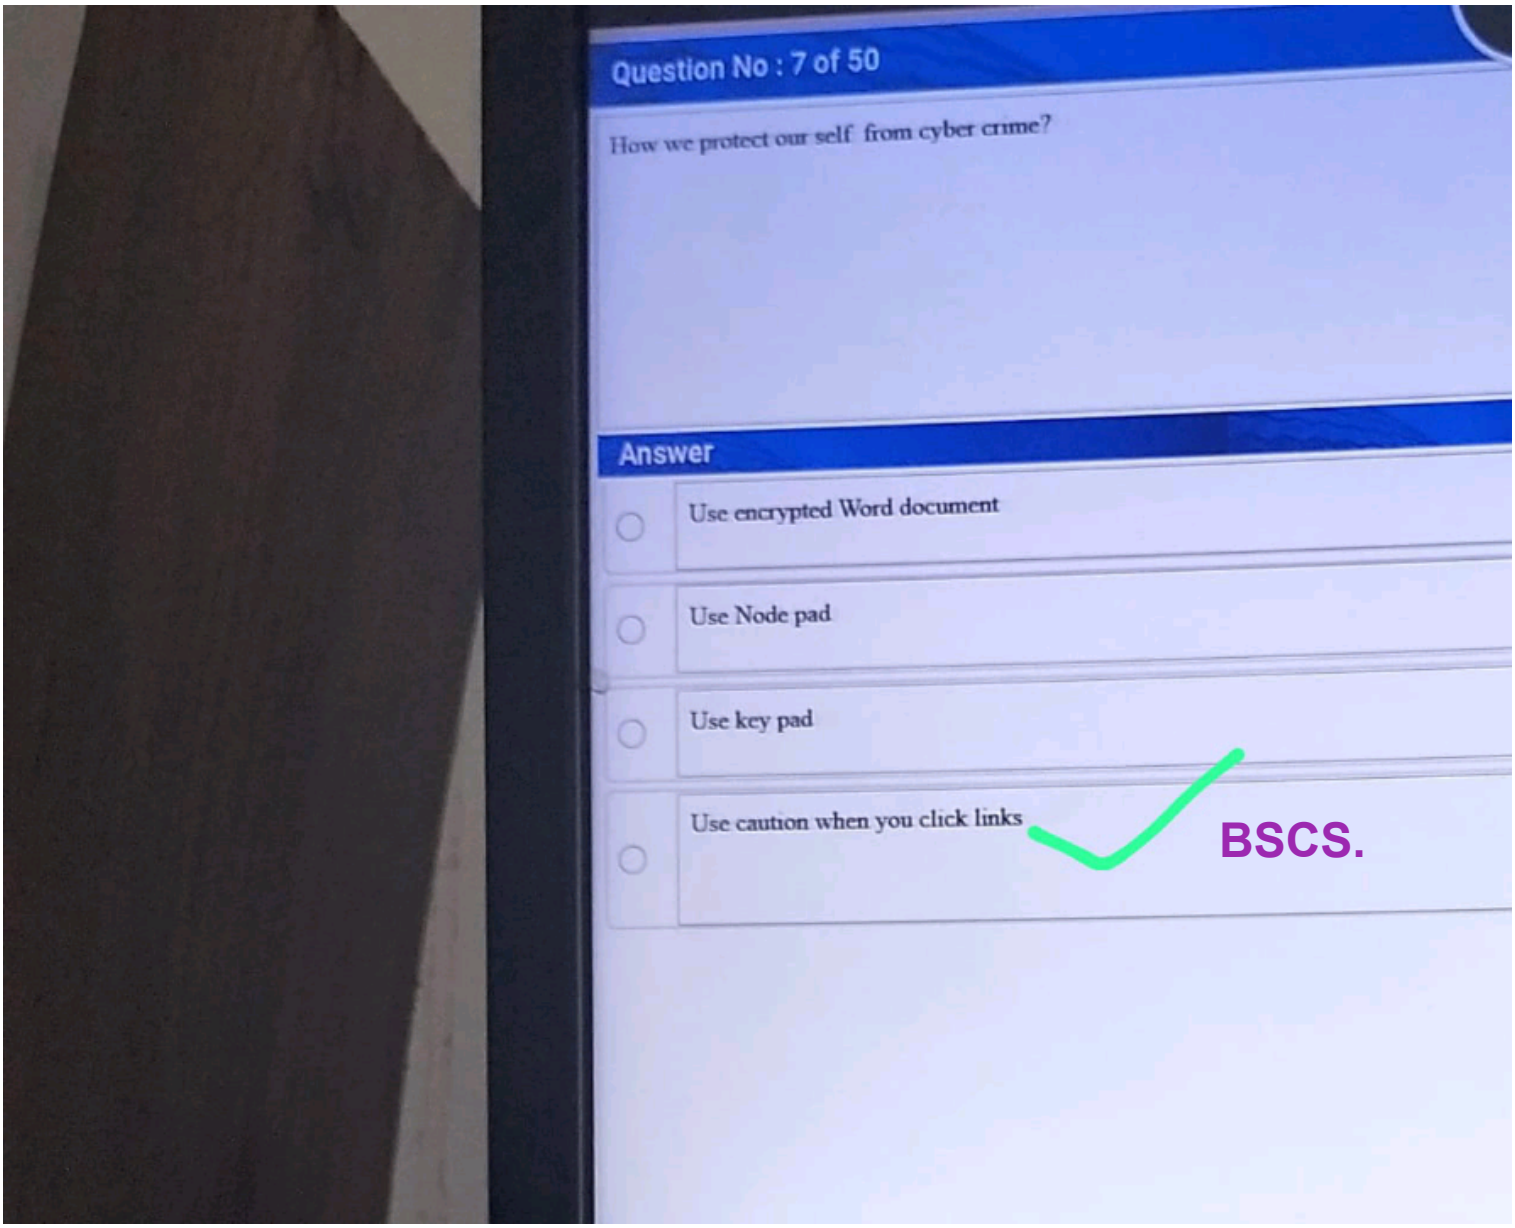

Question No : 24 of 50
Risk Management is a _____.
Answer
Sequential process
Cyclic process
Parallel process
Side by Side process
BSCS.

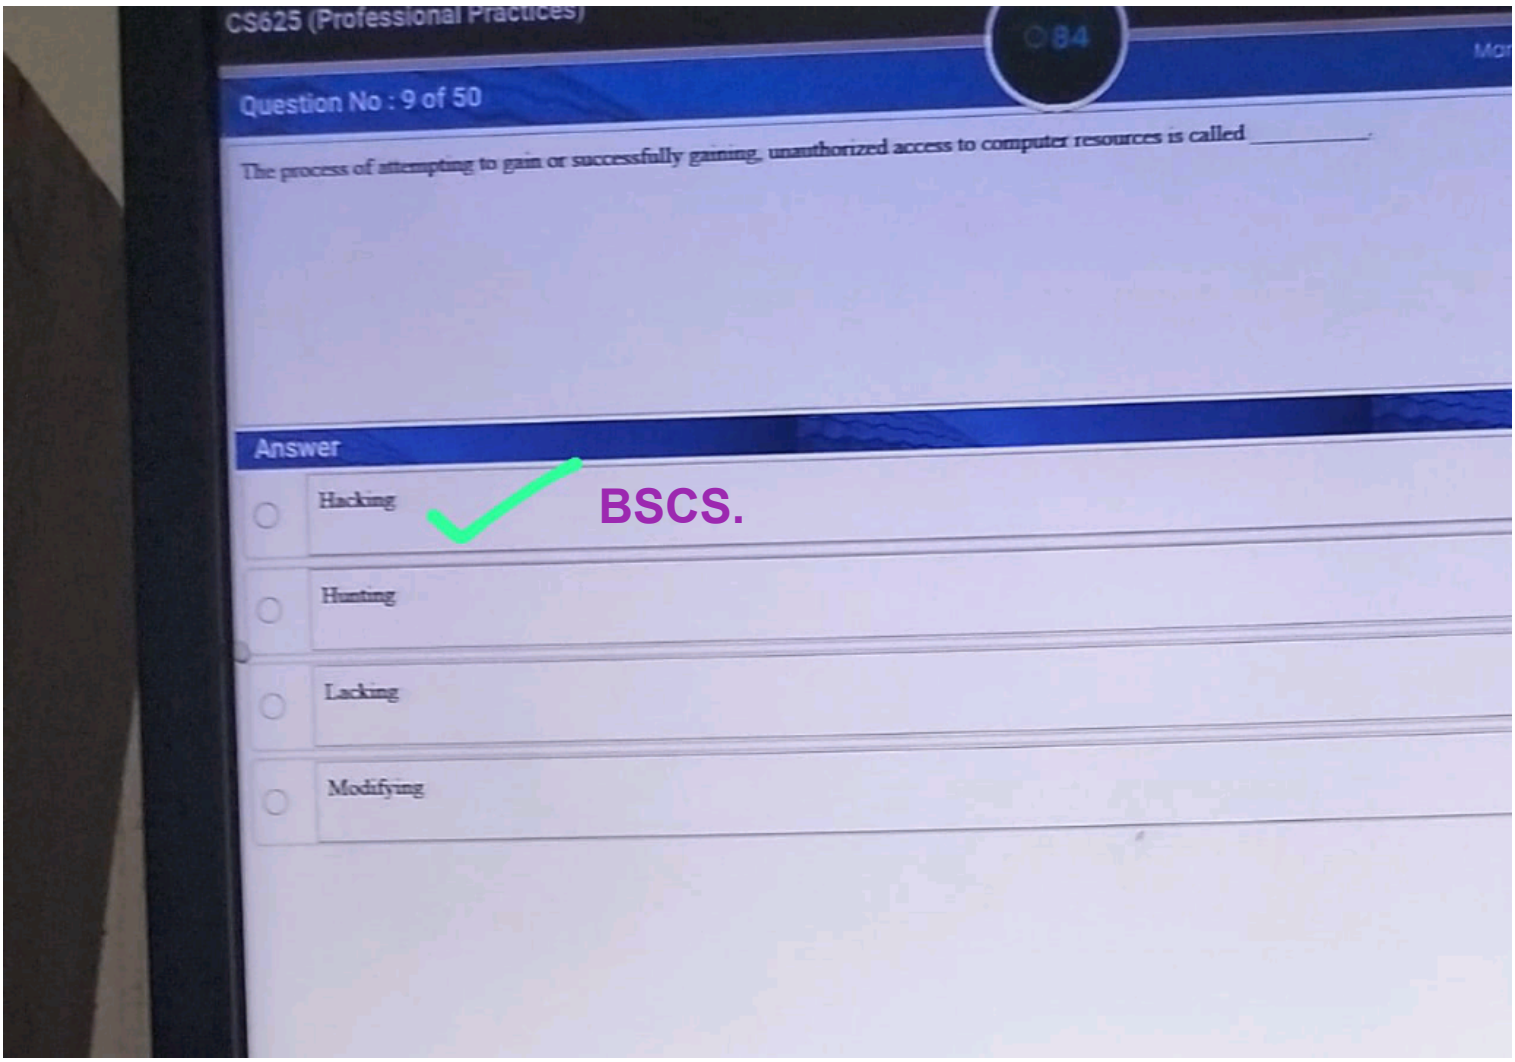

Question No : 27 of 50
Facebook and MySpace are open to people ____ and older.
Answer
11
10
12
13
BSCS.

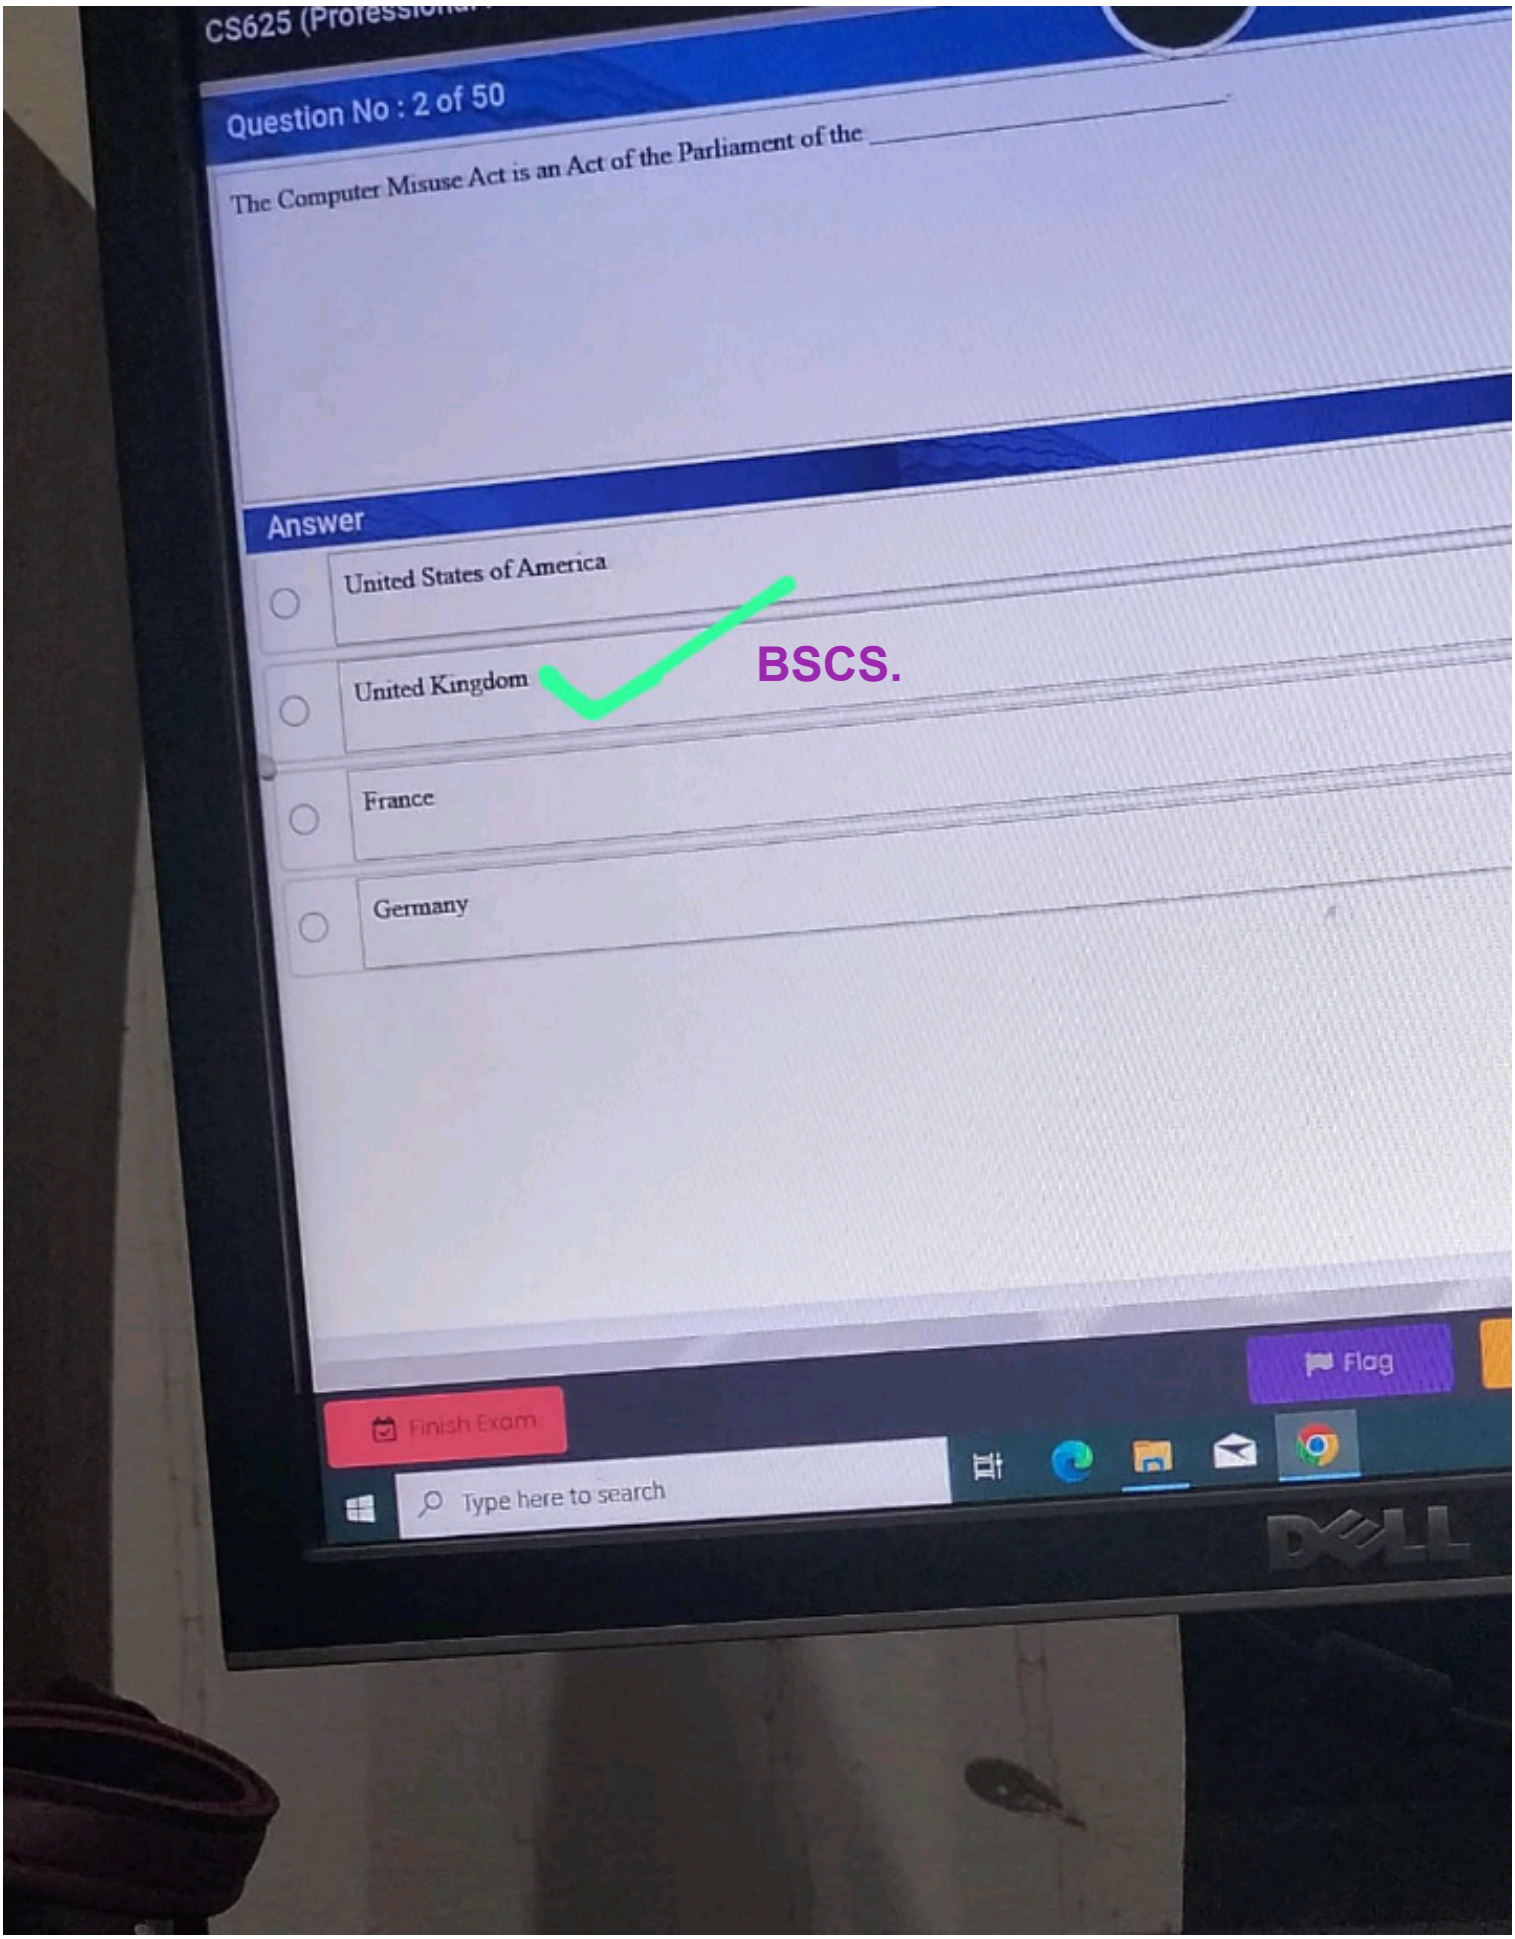

Question No : 10 of 50
Ethical hacking also called _____ computer hacking.
Answer
Black hat
White hat
Red hat
Gray hat
BSCS.

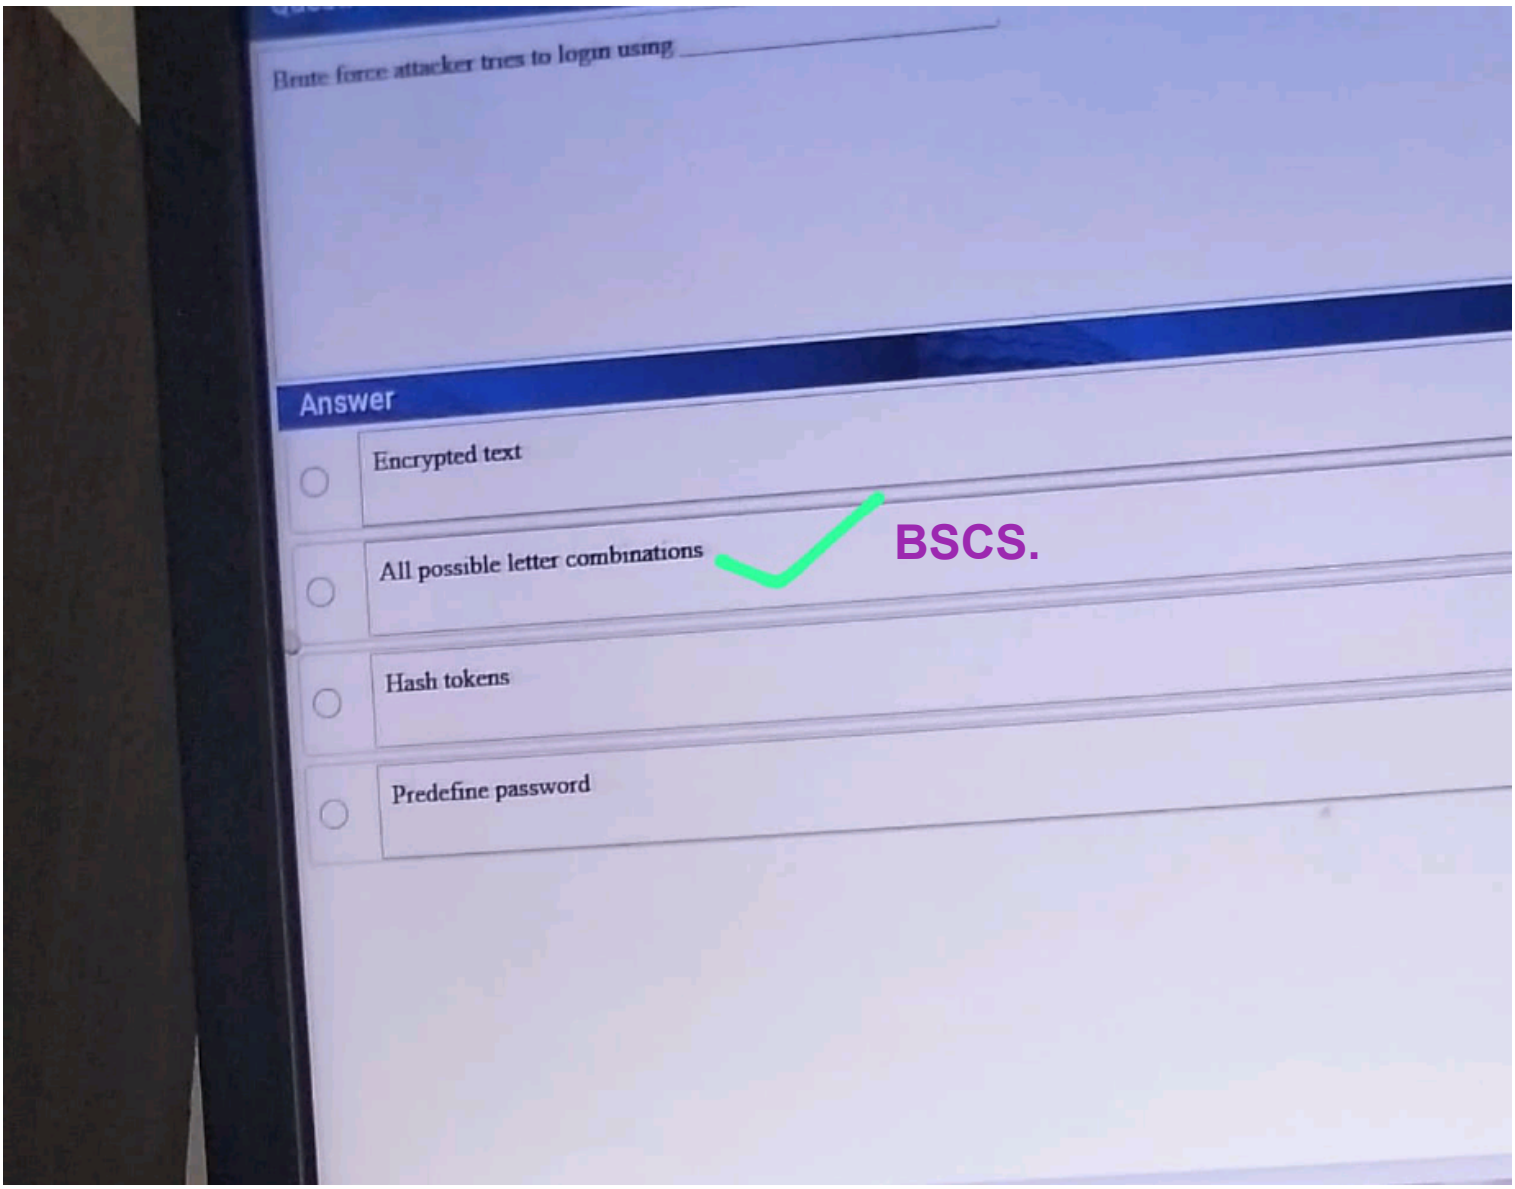

Question No : 8
The use of internet by individuals and organizations has not raised any issue.
Answer
The statement is partially wrong
The statement is partially correct
The statement is True
The statement is false
BSCS.

Short Q's:

1- Name 3 CIA Information security principles.
2- What type of intellectual property protection applies to computer programs and compilations of computer programs?
3- Enlist at least Three things which can be delivered to the client as a result of software contract?
4- Who benefits from data protection measures?
5- What do you think which information from the following we should not share on social media websites?
1. Financial Information B) Phone Number c) Memes ex Jokes
e- CNIC 4) News Articles
6- For a competent software engineer which factors/traits are considered important. Enlist any Three.

"L/Q"

① There are how many categories of computer fraud? Enlist their names.
② Enlist the names of any four common hacking tools.

③ You are required to fill the column B against column A in the following table.

Milestone of Payment (A)	Payment % (B)
1. An initial payment	
2. At development stage	
3. At acceptance level	
4. At end of the warranty period.	

④ Which of the following are the advantages of internet?

a. The internet provides a vast array of entertainment options.

b. The internet has created new opportunities for cybercrime.

c. The internet has made it possible for people to work from home or remote locations.

d. The anonymity of the internet has made it easier for people to engage in cyber bullying, harassment and hate speech.

⑤ A computer network is a set of machines connect by a set of ____?

a) cables b) people c) social entities d) organizations.

Block A (Pattern of Payments)	Block B (Percentage of Payment)
1. An initial payment	10-30%
2. at development stage	30-50%
3. at acceptance stage	20-40%
4. at end of the warranty	10-20%

Penetration-Testing Methodologies

- **White box model**

Tester is told everything about the network topology and technology and i authorized to interview IT personnel as well. Makes the job easier for him

- **Black box model**

Company staff does not know about the test. Tester is not given detail abou the network so the burden is on the tester to find out the details. The test determine if the security personnel are able to detect an attack.

- **Gray box model**

This mode of test is combination of both white and black box models. Th company provides the tester with partial information about the network.

www.paked ucation4u.c

What should do after hacked?

- ❑ Shut down /Turn off the system
- ❑ Separate the system from network
- ❑ Restore the system with backup Or reinstall all programs
- ❑ Connect the system to the network
- ❑ Good to call the police

Tools of Hacking

Scanners

A program that automatically detects security weakness in remote host

Telnet

It is terminal emulation program that allows us to connect to remote system

FTP

FTP is one type of protocol but some time it is used as hacking tool, port 21 for the ftp. For connecting ftp we need some ftp s/w known as ftp client For connecting ftp server you have to hammer that server.

Moral Issues Of internet

- Plagiarism
- Sending spam. People waste time deleting spam if the spam filter allows it through
- Companies monitoring staff use of the internet and e-mail
- Using someone's wireless internet connection without permission
- Using photo editing software to distort reality

www.pakeducation4u.com

Remedies for breach of copyright

- A copyright owner has all the usual civil remedies of search, injunction, damages and an action for an account of profits made in breach of copyright
- If it is shown that at the time of the infringement of copyright the defendant did not know and had no reason to believe that copyright subsisted in the work, then the plaintiff is not entitled to damages against the defendant

www.pakeducationvu.com

Remedies for breach of copyright

- A copyright owner is also given an important power to enter premises without using force in order to seize infringing copies, or articles specifically designed or adapted for making copies

www.pakeducationvu.com

Introduction

- Intellectual property rights are often the most valuable assets owned, used and developed by a software house.
- Intellectual property rights include:
  - Confidential information
  - Patents
  - trade marks
  - Designs
  - Copyrights protecting computer programs

www.pakeducation4u.com

Plagiarism

- the practice of taking someone else's work or ideas and passing them off as one's own.
- All of the following are considered plagiarism:
  - turning in someone else's work as your own
  - copying words or ideas from someone else without giving credit
  - failing to put a quotation in quotation marks

www.pakeducation4u.com

Plagiarism (continued)

- giving incorrect information about the source of a quotation
- changing words but copying the sentence structure of a source without giving credit
- for a computer program changing variable names only, or not changing the structure or flow of a program

Contracts for the supply of custom-built software at a fixed price

- Software suppliers try to use what are known as standard form contracts, which are used or intended to be used many times over.
- Such a contract might consist of:
  - a short introductory section
  - a set of standard terms and conditions
  - a set of appendices or annexes

Software contract consist of?

Computer Misuse & Criminal Law

Introduction:

The media and popular computing press abound with tales of multi-million pound computer frauds and of the dangers to commercial companies, governmental data banks, financial institutions and national security from the activities of computer hackers

www.pakeducation4u.com

Computing and criminal activity

- Modern business process is done through utilizing computer software and hardware, i.e. some form of computer system is used in it.
- There has been a sharp rise in the number of crimes involving computing; and the Internet has undoubtedly created new security risks

Legal Liability

Introduction

System designers and software engineers may have legal responsibilities under statutes such as the Health and Safety

Product liability and the Consumer Protection Act 1987

Product liability is the area of law in which manufacturers, distributors, suppliers and retailers are held responsible for any injuries products cause.

Regardless of any contractual limitations of liability, if a product or any of its component parts are defective its manufacturer may be liable for damage under the Consumer Protection Act (CPA) or the common law of negligence

Legal Liability

Negligence

The manufacturer or system designer has failed to take due care in the construction or design of the system, and this lack of care has resulted in failure leading to the injury

Categories of misuse

Under the study of the English criminal law, the Law Commission highlighted a number of categories of misuse of computers

- Computer fraud
- Unauthorized obtaining of information from a computer
  - Computer hacking
  - Eavesdropping on a computer
  - Making unauthorized use of computers for personal benefit
- Unauthorized alteration or destruction of information stored on a computer
- Denying access to an authorized user
- The unauthorized removal of information stored on a computer

www.pakeducation4u.com

Computer Fraud

- The Law Commission defined computer fraud as conduct which involves the manipulation of a computer or internet, by whatever method, in order dishonestly to obtain money, property, or some other advantage of value, or to cause loss
- Computer fraud is further divided into three categories
  - **Input frauds**

    e.g. intentionally entering false data or amending data into the computer
  - **Output frauds**

    Output fraud involves stealing or misusing system output
  - **Program frauds**

    Program fraud involves the dishonest alteration of a computer program

5hackers creeds

Hackers Code of Conduct

Hacker creed (Steven Levy's "Hackers: Heroes of Computer Revolution" - 1984):

- Access to computers should be unlimited and total.
- Always yield to the Hands-On Imperative
- All information should be free.
- Mistrust authority -- promote decentralization.
- Hackers should be judged by their hacking.
- You can create art and beauty on a computer.
- Computers can change your life for the better.

www.pakeducat

Introduction

mcq

- **Information security**, sometimes shortened to InfoSec, is the practice of defending **information** from unauthorized access, use, disclosure, disruption, modification, inspection, recording or destruction. It is a general term that can be used regardless of the form the data may take (e.g. electronic, physical)

Risk Assesment

- Assessing Potential Loss
- Percentage of Risk Mitigated by Current Controls
  - Uncertainty
- Risk Determination
- Likelihood and Consequences

What is risk assesement

Risk Control Strategies

- **Identify Possible Controls**
  - For each threat and its associated vulnerabilities that have residual risk, create a preliminary list of control ideas.

Three general categories of controls exist:

- Policies
- Programs
- Technical controls

Controle strategies?

Likelihood and cosequence(likely, unlikely, catastrophic imp 4exam)

Masters

Examples imp

Level	Descriptor	Example of Description
1	Insignificant	No injuries, low financial loss
2	Minor	First aid treatment, onsite release immediately contained, medium financial loss
3	Moderate	Medical treatment required, onsite release contained with outside assistance, high financial loss
4	Major	Extensive injuries, loss of production capability, offsite release with no detrimental effects, major financial loss
5	Catastrophic	Death, toxic release offsite with detrimental effect, huge financial loss

Likelihood and Consequences 1

Level	Descriptor	Description
A	Almost certain	Is expected to occur in most circumstances
B	Likely	Will probably occur in most circumstances
C	Possible	Might occur at some time
D	Unlikely	Could occur at some time
E	Rare	May occur only in exceptional circumstances

Likelihood and Consequences 2

CS625 27-7-24 4:30pm

① Write names of four common Hacking Tools?
② Enlist the four moral issues associated with internet.
③ What are the categories of computer frauds, enlist them.
④ Write three risk controlling strategies?
⑤ GATT concerned the protection of intellectual property rights of which software's product.
⑥ What are two categories of infringement in contracts.
⑦ If you are competent software developer, which factors/traits of software will you prefer.
⑧ W. of F is true about data protection.
- ★ Protection of information of employee
- ★ " " organization rights
- ★ " " organization repute.

⑨ Which of Following is not advantage of internet.
Five statement were given and three were not whom I mentioned.

Taken By: QAZI SHOAIB HASSAN

★All copyrights are reserved.

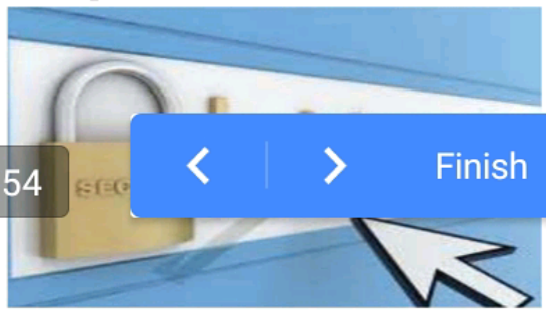

- A computer hacker is someone who develops, changes or attempts to circumvent computer security hardware or software.
- Intelligent, having advance knowledge of hardware and software.
- Can either happen for negative (criminal) or positive reasons.
- Criminal hackers develop computer malware or spyware to gain access to confidential information.

Types of hacking

- Website Hacking
- Net Hacking
- Password Hacking
- Software Hacking
- Ethical Hacking
- Email Hacking
- Computer Hacking

Website Hacking

- Hacking a website means taking control from the website owner to a person who hacks the website.

- Project Managers
- Acceptance procedure
- Warranty and maintenance
- Termination of the contract

www.pakeducation4u.com

Other types of software services contract

- There are four types of contractual arrangement which are widely used in connection with the provision of software services:
  - fixed price
  - contract hire
  - time and materials
  - consultancy

www.pakeducation4u.com

Contract Hire

- The supplier agrees to provide the services of one or more staff to work for the client
- The staff work under the direction of the client
- Supplier's responsibility is limited to provide suitable competent people and replacing them if they become unavailable or said unsuitable by the client
- Payment is on the basis of a fixed rate for each man day worked
- Issues such as delay payments, acceptance tests and many others simply do not arise

www.pakeducation4u.com

Time and Materials

www.pakeducation4u.com

Competence, training and experience

- Competence means "knowledge and the ability to apply that knowledge"
- There is an understood assumption that all those engaged in the design and development of safety system software are competent to perform the necessary tasks
- Factors such as training and relevant experience are also considered important traits for a competent software engineer

competence Software engineer traits

www.pakeducation4u.com

www.pakeducation4u.com

Regulation and control of personal information: data protection, defamation and related issues

Introduction:

- We can not deny the dramatic impact which increasing computerization has had on the storage, processing, retention and release of information and data.

when is it acceptable to use personal information for purpose other then whose mentioned in principle of pursonal information specifications??

www.pakeducation4u.com

Introduction(Continued…)

- Computerization has revolutionized the handling and processing of information to such an extent that the data itself has now become a commodity which possesses commercial value and can be traded on the market in the same way as any other commodity
- The value to businesses is also enhanced by the fact that how easily and safely data can be transferred around the globe

www.pakeducation4u.com
