What is the relationship between CVE and the National Vulnerability Database (NVD)?

A. CVE and NVD are independent and unrelated entities
B. CVE feeds into NVD, providing vulnerability data for analysis and reporting
C. NVD contributes to the development and maintenance of the CVE list
D. NVD is responsible for assigning unique identifiers to vulnerabilities listed in CVE

What is the minimum key length required for RSA encryption?
A. 1024 bits
B. 512 bits
C. 56 bits
D. 128 bits

The reversibility of the Feistel Network allows for:
A. Protection against brute-force attacks
B. Easy key generation
C. Efficient encryption and decryption
D. High-speed data transmission

What is the purpose of cryptography?
A. To provide a way to store data without encryption
B. To provide secure communications in the presence of an adversary/attacker
C. To provide entertainment to people

D. To provide a way to communicate without encryption

Attribute-based access control (ABAC) controls access based on:
A. All of the given
B. User attributes only
C. Environmental conditions and policies
D. Resource attributes only

What is cryptanalysis?
A. The breaking of secret writing
B. The making of secret writing
C. The analysis of public speaking
D. The analysis of music composition

Which encryption algorithm was selected as the Advanced Encryption Standard (AES) by NIST?
A. DES
B. Blowfish
C. Rijndael
D. RSA

Which type of attack involves attempting to recover a password by trying all possible combinations?
A. Dictionary attack
B. Brute force attack
C. Rainbow table attack
D. Replay attack

What does RBAC stand for?
A. Resource-Based Access Control
B. Role-Based Access Control
C. Role-Based Authorization Control
D. Restricted-Budget Access Control

Which encryption algorithm is considered asymmetric encryption technique?
A. 3DES
B. AES
C. RSA
D. DES

Which of the following is a common method for user authentication?
A. All of the given
B. Password-based authentication
C. Multi-factor authentication
D. Biometric authentication

Which type of cipher replaces each letter with another letter based on a fixed shift value?
A. One-time pad cipher
B. Rail fence cipher
C. Caesar cipher
D. Vigenere cipher

Which access control policy is based on comparing security labels with security clearances?

A. Mandatory access control (MAC)
B. Attribute-based access control (ABAC)
C. Role-based access control (RBAC)
D. Discretionary access control (DAC)

Which of the following processes verifiy the identity of a user?

A. Access control
B. Accounting
C. Authorization
D. Authentication

Nessus originated in _____.

A. 2005
B. 1998
C. 2010
D. 1995

Which encryption algorithm is based on modular exponentiation?

A. RSA
B. AES
C. 3DES
D. DES

How is the score for a CVE derived?

A. By calculating the financial impact of the vulnerability
B. By evaluating a set of metrics using the Common Vulnerability Scoring System (CVSS)
C. By conducting penetration testing on the affected systems
D. By assessing the reputation of the affected software or hardware vendor

What is the purpose of a digital certificate in public-key cryptography?

A. Key generation
B. Key Management
C. Encryption
D. Authentication

_____ is the main advantage of using 3DES over DES for encryption.

A. Faster encryption speed
B. Shorter key length
C. Simplified design
D. Improved resistance against brute-force attack

Which Qualys feature is used to assess the compliance of systems against specific security policies?

A. Policy compliance scanning
B. Asset discovery; find and organize hosts
C. Qualys Secure Seal for websites
D. Continuous monitoring service

There are _____ steps of vulnerability management life cycle.

A. 9
B. 5
C. 8
D. 7

What is the purpose of a Feistel Network in symmetric encryption?

A. Key generation
B. Encryption and decryption
C. Key distribution
D. Digital signatures

IAM is primarily used for managing access to:

A. Enterprise applications and data
B. Cloud services
C. Network infrastructure
D. User accounts

Which type of attack involves trying every possible key until the correct one is found?

A. Dictionary attack
B. Phishing attack
C. Social engineering attack
D. Brute force attack

AAA stands for:

A. Access and Authorization Audit

Vu Topper RM

CS-627 Mcqs Quiz-1 File

For Help = 03224021365, 03164980094

B. Access and Accounting Audit
C. Authentication, Audit, and Access control
D. Authentication, Authorization, and Accounting

Which type of encryption uses different keys for encryption and decryption?

A. Asymmetric encryption
B. Symmetric encryption
C. Steganography
D. Hashing

What is the purpose of access control?

A. Granting or denying access to resources
B. Tracking resource consumption
C. Verifying the identity of a user
D. Enforcing policies

Which type of cipher uses a keyword to encrypt plaintext?

A. One-time pad cipher
B. Rail fence cipher
C. Caesar cipher
D. Vigenere cipher

Which type of attack involves using a pre-computed table to crack passwords?

A. Brute force attack
B. Social engineering attack

C. Rainbow table attack
D. Dictionary attack

What is cryptography?
A. The art of public speaking
B. The art of music composition
C. The art of painting
D. The art of secret writing

Which type of encryption uses the same key for both encryption and decryption?
A. Hashing
B. Asymmetric encryption
C. Steganography
D. Symmetric encryption

Which type of cipher uses a random key that is only used once?
A. Caesar cipher
B. Rail fence cipher
C. Vigenere cipher
D. One-time pad cipher
