

_____ identifying which quality standards are relevant to the project and determining how to satisfy them.

▶ **Quality Planning (page 139)**

▶ Communications Planning

▶ Organization Planning

▶ Staff Acquisition

These all are outputs of Initiating Process except

▶ Project Manager Assignments

▶ Constraints

▶ **Selection Criteria (page 134)**

▶ Assumptions

Project management processes can be organized into _____ groups

▶ Four

▶ **Five (page 131)**

▶ Six

▶ Seven

Product quality depends on its conformance to _____

▶ Software requirements

▶ Development standards

▶ Implicit requirements

▶ **All of given (page 119)**

_____ is the technical kernel of software engineering

- ▶ **Design (page 107)**
- ▶ Implementation
- ▶ Requirements analysis
- ▶ Testing

Mode of specification has a great impact on quality of solution. Forcing SWE to work with incomplete, inconsistency, or misleading specifications result in frustration and confusion affecting:

- ▶ Quality
- ▶ Timeliness and
- ▶ Completeness of SW product

▶ **All of given (page 103)**

Finally, the specification includes a _____

- ▶ **Bibliography (page 103)**
- ▶ Appendix
- ▶ Both Bibliography and Appendix
- ▶ Reference

Cognitive model describes a system as perceived by its _____

▶ **User community (page 103)**

- ▶ Developer
- ▶ Top level management
- ▶ Manager

A review of the *Software Requirements Specification* is conducted by _____

- ▶ Software developer
- ▶ Customer
- ▶ **Both the software developer and the customer (page 103)**
- ▶ Top level management

A meeting is conducted at a _____ and attended by both software engineers and customers.

- ▶ Software engineer site
- ▶ **Neutral site (page 100)**
- ▶ Customer site
- ▶ Company site

The model serves as the basis for the creation of _____ for the Software.

- ▶ Design
- ▶ Maintenance
- ▶ Testing
- ▶ **Specifications (page 95)**

Throughout evaluation and solution synthesis, the analyst's primary focus is on

- ▶ **"What, not "how." (page 95)**
- ▶ Model
- ▶ Evaluation and Synthesis
- ▶ Specification

In problem evaluation area of effort, once problems have been identified, the _____ determines what information is to be produced by the new system and what data will be provided to the system.

▶ **Analyst (page 95)**

- ▶ Designer
- ▶ Coder
- ▶ Manager

Requirements are refined and analyzed to assess their clarity, completeness, and _____

- ▶ Correctness
- ▶ **Consistency (page 93)**
- ▶ Concurrency
- ▶ None of given

A software project that meets all the stated objectives is a success of _____

- ▶ Project quality
- ▶ Project fundamental purpose
- ▶ **Project management myth (page 82)**
- ▶ Project requirement

All of the following describe the activity list except:

- ▶ It's an extension of the WBS
- ▶ It include all activities of the project
- ▶ **It describe the WBS update**

- ▶ It include a description of project activities

Software project are carried out sequentially and that each phase is completed before the next is taken up.

- ▶ The Prototyping Model
- ▶ The Incremental Model
- ▶ **The Waterfall model (page 82)**
- ▶ The Spiral model

Project management is a _____ of constant communication and negotiation.

- ▶ **Process**
- ▶ Concept
- ▶ Practice
- ▶ None of given

These all are design phase activities except

- ▶ Output Design
- ▶ Input Design
- ▶ **The software test plan (page 16)**
- ▶ Software Selection

Which organization has set the de facto standards for project management techniques?

- ▶ PMBOK
- ▶ **PMI (page 154)**

- ▶ PMA
- ▶ PMO

McCall (MCC77) and his colleagues proposed some software quality factors based on three most important aspects of a software product: Which organization has set the de facto standards for project management techniques?

- ▶ 4
- ▶ 3 (page 120)
- ▶ 6
- ▶ 5

The model serves as a foundation for software design and as the basis for the creation of _____ for the Software.

- ▶ Design
- ▶ Maintenance
- ▶ Testing
- ▶ Specifications (page 95)

A 'facilitator' controls the meeting can be _____.

- ▶ Customer
- ▶ A developer
- ▶ An outsider
- ▶ All of the given (page 100)

Cognitive model describes a system as perceived by its _____.

▶ **User Community (page103)**

- ▶ Developer
- ▶ Top level Management
- ▶ Manager

Upon evaluating current problems and desired information (input and output), the analyst begins to _____.

▶ **Synthesize solutions (page 94)**

- ▶ Model
- ▶ Specification
- ▶ All of the Given

These all are Product Revision Factors except.

▶ **Usability (page 121)**

- ▶ Maintainability
- ▶ Flexibility
- ▶ Testability

Foundational design concepts are.

- ▶ Information Hiding
- ▶ Abstraction
- ▶ Inheritance

▶ **All of the given (page 107)**

The US DOD (1988) defines software quality rather simply as:

▶ **The ability of a software product to satisfy its specified requirements.**
(Page 118)

- ▶ “An inherent or distinguishing characteristic or a property”
- ▶ “Quality is in the eye of the beholder, a matter, of the client's judgment.”
- ▶ All of the given

—defining and refining objectives and selecting the best of the alternative courses of action to attain the objectives that the project was undertaken to address

- ▶ Initial Process
- ▶ **Planning Process (page 131)**
- ▶ Executing Process
- ▶ Controlling Process

When you build a product or system, it's important to go through a series of predictable steps – a road map that helps you create a timely, high-quality result, The road map that you follow is called —

- ▶ Software Design
- ▶ **Software Process (page 10)**
- ▶ Software schedule
- ▶ Framework

Each process is described by:

- ▶ Inputs

- ▶ Outputs
- ▶ Tools & Techniques
- ▶ **All of the given (page 131)**

McCall (MCC77) and his colleagues proposed some software quality factors based on three most important aspects of a software product: Which organization has set the de facto standards for project management techniques?

- ▶ 4
- ▶ **3 (page 120)**
- ▶ 6
- ▶ 5

— ensures that appropriate steps to follow the product development procedures are carried out

- ▶ Quality Management
- ▶ Design
- ▶ **Process monitoring (page 123)**
- ▶ Quality control

Cognitive model describes a system as perceived by its _____

- ▶ **User community (page 103)**
- ▶ Developer
- ▶ Top level management
- ▶ Manager

Synchronization control helps to ensure that parallel changes performed by two different people do_____.

- ▶ **Not overwrite one another (page 114)**
- ▶ Overwrite one another
- ▶ May overwrite one another
- ▶ None of given

These all are Product Transition Factors except.

- ▶ Interoperability
- ▶ Configurability
- ▶ Expandability
- ▶ **Testability (page 121)**

To control versions, you can use _____.

- ▶ Version Control File
- ▶ **Version Control Register (page 111)**
- ▶ Version Control Authority
- ▶ All of the given

The Introduction of the software requirements specification states the

- ▶ Goals
- ▶ Objective
- ▶ Design
- ▶ **Goals and objectives of the software (page 104)**

The British Standards Institution (1986) has stated the quality as

- ▶ The ability of a software product to satisfy its specified requirements
- ▶ “An inherent or distinguishing characteristic or a property”
- ▶ **“Quality is in the eye of the beholder, a matter, of the client's judgment.” (Page 104)**
- ▶ All of the given

The check-in and checkout facilities provide _____

- ▶ Best control
- ▶ FTR control
- ▶ SCI control
- ▶ **Synchronization control (page 114)**

A baseline version _____

- ▶ Have a short life
- ▶ Can be assigned version numbers 3.2
- ▶ **Tested and certified version of a system (page 115)**
- ▶ Survive only during bug fixing

You can use the Item Traceability Matrix to identify _____ at the end of each phase

- ▶ **SCIs (page 110)**
- ▶ SCM
- ▶ Design
- ▶ Construction

Defined scope is a

- ▶ Technology-related problems
- ▶ **Product-related problems (page 87)**
- ▶ Process-related problems
- ▶ People-related problems

Software requirements engineering is a process of all except

- ▶ Discovery
- ▶ Refinement
- ▶ **Design (page 92)**
- ▶ Specification

The model serves as the basis for the creation of _____ for the Software.

- ▶ Design
- ▶ Maintenance
- ▶ Testing
- ▶ **Specifications (page 92)**

Most software project manager's practice a lot of management techniques that are of doubtful authenticity are called

- ▶ Project management tools
- ▶ **Project management myths (page 92)**
- ▶ Project management thumb rules
- ▶ Project management fundamentals

The Introduction of the software requirements specification states the

- ▶ Goals

- ▶ Objective
- ▶ Design
- ▶ **Goals and objectives of the software (page 104)**

The quality of software is said to be high if it meets the

- ▶ Standards, defined for the product
- ▶ Procedures, defined for the product
- ▶ **Standards and procedures, defined for the product (page 118)**
- ▶ Design defined for product

Both the software engineer and customer take an active role in software requirements engineering-a set of activities that is often referred to as

Requirement:

- ▶ Managing
- ▶ Recognition
- ▶ **Analysis (page 92)**
- ▶ Modeling

The Efficiency with which a program runs on different platforms or operating systems is called :

- ▶ **Portability (page 121)**
- ▶ Reusability
- ▶ Configurability
- ▶ Interoperability

Efficiency with which a program runs on different platforms or operating systems is Reusability

▶ True

▶ **False**

_____ is a software engineering task that bridges the gap between system level requirements engineering and software design.

▶ Cost Analysis

▶ Design analysis

▶ Risk analysis

▶ **Requirements analysis (page 93)**

_____ is path finding_____, is path following

▶ **Leadership, Management (page 45)**

▶ Leader, Leadership

▶ Management, Leadership

▶ Manager, Management

_____ theory when the deliverables of a project are more important than its phases. This normally happens when the deliverables are decided before the project begins.

▶ Project life-cycle-based

▶ Scheduled

▶ **Deliverable-based (page 277)**

▶ None of given

Predecessor activities need to _____ before the next can begin. After a predecessor activity is completed, the successor activity becomes the predecessor for another activity.

- ▶ Start
- ▶ Scheduled
- ▶ **End page (page 297)**
- ▶ None of given

Each _____ can be subdivided into sub tasks.

- ▶ Program
- ▶ **Task (page 297)**
- ▶ Project
- ▶ None of given

Using PERT and CPM, _____, helps you complete a project on time. By using these techniques, you can determine the latest time by when an activity should start to be completed on time.

- ▶ Individually
- ▶ Combination
- ▶ **Individual and Combine (page 296)**
- ▶ None of given

Over the course of the project, a comparison of the due date and the date delivered provides a metric for how well deliverable dates are _____ by the project team.

► **Met (page 274)**

- Scheduled
- Changed
- None of given

Risk analysis and management are a series of steps that help a software team to understand and manage _____.

► **Uncertainty (page 305)**

- Crises
- Problem
- None of given

A node on a network schedule is that point in time at which an activity_____.

- Begins
- Ends
- **Begins or Ends (page 297)**
- None of given

To _____ risks from occurring, the project team prepares the risk plan before the commencement of the project.

► **Avoid (page 312)**

- Deal
- End Manage
- None of given

The first activity in risk analysis is risk management.

► True

► **False**

During the Implementation phase the software modules are coded and initial unit tests are performed.

► True

► **False**
