Mid-Term important & Past files

Q.No. 1):-

Define ICT and write its characteristics?

Answer:-

A diverse set of technologies, tools and resources used to communicate, and to create, disseminate, store and manage information is called ICT.
characteristics:-

- i) ICT is the integration of Hardware and Software Technology.
- ii) ICT fosters the dissemination of information and knowledge.
- iii) The nature of ICT is digital and virtual.
- iv) ICT is global, anywhere anytime.
- v) ICT is a key enabler in the creation of networks.

Q.No. 2):-

Define LAN and write its characteristics?

Answer:-

LAN is the abbreviation of Local Area network which are those networks with in a single building

or campus upto a few km in size.

characteristics:-

- i) Low delay
- ii) very few errors
- iii) Higher speed
- iv) Restricted in size
- v) Transmission Time is bounded.
- vi) Simple network management.

Q.No.3):-

What is WAN?

Answer:-

WAN is abbreviation of wide area network which are networks in a large geographical area often a country or continent.

Q.No.4):-

What is MAN?

Answer:-

MAN is abbreviation of metropolitan area network which are those networks which covers the area of a city (less than 100km).
MAN is an extension of LANs.

Q.No.5):-

What are advantages of ICT in education? (vip)

Answer:-

ICT has following advantages

in teaching.

- i) Quick access to information.
- ii) Easy availability of updated data.
- iii) Connecting Geographically dispersed regions.
- iv) catering to the individual differences.
- v) Wider range of communication media.
- vi) Wider learning opportunities for pupils.

Q.No.6):-

What is internet, web server and web browser?

Answer:-

Internet:- (VIP)

Internet is a huge collection of computer networks that can be communicated with each other.

web server:-

It is a programme and a computer clubbed into one entity which responds to the requests from web browsers for internet resources.

web browser:-

It is a programme that allows a user to display and interact with a "hypertext" documents.

Q.No.7):-

write difference b/w website and web page?

Sol:-

Website:-

A collection of related pages on particular information is called website.

web page:-

A file of information stored on a web server is called web page.

Q.No.8):-

Define Intranet ?

Sol:-

A collection of private computer networks within an organization is called intranet.

Q.No.9):-

write difference b/w uploads and downloads.

Answer:-

Both upload and download refer to the process of transferring a file. but

Uploads:-

upload means to transfer a file or files from your own computer to another computer.

Downloads:-

Download means to transfer a file from another computer to your own computer.

Q. No. 10):-

What is Markup Language?

Answer:-

Markup Language is a modern system for annotating a document in a way that is distinguishable from the text.

A widely used markup language is Hyper Text Markup Language (HTML), one of the document from world wide web.

Q. No. 11):-

Define Teaching Aids?

Answer:-

Teaching Aid are the physical tools used to convey information in the classroom.

It can be used to make the communication more effective.

It make the learning experience more concrete, realistic and dynamic.

Q.No.12):-

What is HTML?

Answer:-

Hyper Text Markup Language (HTML) is a standard language used for developing web pages. HTML is a markup language that web browsers use to interpret and compose text, images and other material into visual web pages.

Q.No.13):-

Teaching as a Noble profession.

Answer:-

Teaching is regarded as the noblest of all professions in the world.

A good Teacher not only shows the right path that the students should follow but also prepares the human resource for the further development of the nation.

It has the capacity to inspire life long learning and a passion for knowledge, understanding and innovation.

Q. No. 14)

What are Teaching Machines?

Answer:-

Teaching Machines were developed by S.L. Pessy. It's a piece of device designed to be developed/operated by an individual student for self-learning. The student is presented with a question by some form of display on machine. The student is required to respond either to write answer or put a button to indicate the correct response. The student will inform the correctness of the answer. An account is kept of the responses made by the student.

Q. No. 15):-

Define Cache?

Answer:-

Cache is a small capacity memory which allows quick access to data. By storing data from working memory cache, the speed of communication between processor and RAM is increased.

Q. No. 16):-

What is HDD?

Solution:-

Hard disk drive (HDD) is a place for permanent data storage (it does not delete/clear when computer shuts down).

Q. No. 17):-

What is RAM and ROM?

Answer:-

ROM:-

Read Only Memory (ROM) is a type of permanent, internal memory that is used solely for reading. All BIOS programs are stored in ROM.

RAM:-

Random access Memory (RAM) is a working memory in which analyzed data and programs are stored, while computer runs. It allows reading and writing data and it is deleted/cleared when the computer shuts down.

Q. No. 18):-

What are the names of General Principles of Teaching Aids?

Answer:-

There are four general principles of Teaching Aids.

- i) principle of selection.
- ii) principle of preparation.
- iii) principle of physical control.
- iv) principle of proper presentation.

Q. No. 19):-

What are modem and connectors?

Answer:-

Modem:-

Modem enables computers to communicate via telephone lines. They connect computers to the internet.

Connectors:-

connectors or ports are slots visible in the back and the front side of a computer.

Q. No. 20):-

What is bit and byte?

Answer:-

Bit (Binary digit) is the

basic unit used to measure the amount of information.

A byte or octet contains eight bits.

1 KB = 1024 Bytes

1 MB = 1024 KB

1 GB = 1024 MB

1 TB = 1024 GB

Q. No. 21):-

What are the merits and Demerits of HTML?

Answer:-

Merits of HTML:-

- i) HTML is simple but powerful formatting language to use.
- ii) The simplicity allows anyone to create web pages.
- iii) HTML documents are device independent.
- iv) The web pages can be linked together using links.
- v) The pages can be updated at any time.

Demerits of HTML:-

- i) HTML does not have any

Programming capabilities.

ii) Require expertise knowledge.

iii) Time consuming.

iv) Difficult to remember coding.

Q. No. 22):-

What is software and operating system?

Answer:-

Software:-

Software is, unlike hardware, intangible part of computer. It consists of a sequence of commands, written according to strict rules.

Operating systems:-

Operating system is a program which manages computer hardware.

First computers did not have operating systems; they had programs that were directly loaded into the computer.

Q. No. 23):-

What is application software?

Answer:-

Application Software (Utility Programs) are all programs that users use to perform different tasks or

for problem solving.

Q. No. 24):-

What is spreadsheet?

Answer:-

Spreadsheet is a calculation software which is used for performing various calculations and presentation of results in charts.

Q. No. 25):-

What is Narrator?

Answer:-

Narrator is commonly used by users with visual impairment. It can read text displayed on monitor. It tells current cursor position and describe certain events like warning and error messages generated by O.S.

Q. No. 26):-

What is E-commerce and E-banking and E-Government?

Answer:-

E-Commerce:-

E-commerce is a form of trade that allows customers

to browse and purchase products online.

E-Banking:-

E-Banking allows users to have control over their accounts, transaction from one account to another, credit payment, shopping vouchers for mobile phones etc.

E-Government:-

In E-Government, information technology is used to provide better public access to government information, therefore providing citizens with their human right to information.

Q. No. 27:-

What is E-learning?

Answer:-

E-learning consists of all forms of learning and/or knowledge transfer that are based on electronic technologies.

Advantages of e-learning greatly coincide with learning from books, with a difference that the books come only in text and graphic.

form on paper, while e-learning materials have multimedia features, and the ability to remotely monitor learners in real time.

Q.No. 28):-

What is virtual community?

Answer:-

The term "virtual community" encompasses a group of people who communicate via social networks, forums, IM services, blogs. we call it a community, since they are a collection of people who participate in a group of their interests, thus forming a virtual community, because it does not involve physical contact, but is carried out by means of ICT technologies.

Q.No. 29):-

What is WAP?

Answer:-

WAP is the abbreviation of wireless application protocol. A system that enables you to browse online services is called WAP.

M@lik Hafeez

Q. No. 30):-

What is volatile memory?

Answer:-

It is used to describe the internal main memory of a computer that loses its contents when power is switched off. RAM is volatile memory as the information is stored in memory chips as an electric charge.

Q. No. 31):-

What is VLE?

Answer:-

A Virtual Learning Environment (VLE) is a web-based package designed to help teachers create online courses, together with facilities for teacher-student communication and peer-to-peer communication. VLEs can be used to deliver learning materials within an institution or within a local education authority.

Q. No. 32):-

What is Video Conferencing?

Answer:-

A computer-based communications system that allows a group of computer users at different locations to conduct a "virtual conference" in which the participants can see and hear one another as if they were in the same room participating in a real conference.

Q. No. 33):-

What is Avatar?

Answer:-

A graphical representation of a real person, such as used in a MUVE or MMORPG, a kind of "virtual world". Participants in a MUVE or MMORPG choose a name and a visual representation of character that they wish to adopt as an inhabitant of the MUVE or player in the MMORPG.

Q. No. 34):-

which types of maps used in classroom?

Answer:-

There are different types of maps that are used in classroom.

- i) Geographical maps
- ii) Historical maps
- iii) Industrial maps
- iv) political maps.

Q. No. 35):-

Difference b/w CMS and LMS?

Answer:-

The difference b/w CMS and LMS are significant in their core functionality. For students or learners, a CMS is more of a passive application where they can simply view documents. With an LMS, learners have the ability to view, listen and interact with the data. They have the options to try examples, complete assessments and give evaluation or feedback on courses.

Q. No. 36):-

What is compatibility?

Answer:-

It is referred to pieces of hardware and/or software which is capable of being used together is described as compatible.

Q. No. 37):-

What is compression?

Answer:-

It is a technique which reduces the amount of space required to store data e.g. is used to reduce the amount of space needed to store an image, an audio recording or a video recording.

Q. No. 38):-

What is computer program?

Answer:-

It is a set of instructions that the computer carries out in sequence to perform a given task. Programs are written in English.

Q. No. 39):-

What is chart? write different types of charts used in a classroom?

Answer:-

A combination of graphics and pictorial media designed for the orderly and logical visualizing of relationship b/w key fact and ideas.

Types of charts:-

- | | |
|--------------------|-----------------|
| i) display charts | ii) Flow chart |
| iii) Tabular chart | iv) Tree chart |
| v) Time chart | vi) Flip chart. |

Q. No. 40):-

What is crash?

Answer:-

Crash is a term describing what happens to hardware or software when it suddenly fails to work properly.

Q. No. 41)

What is database?

Answer:-

Database is structured collection

of data that can be used for a variety of purposes. Database are usually stored on a Hard disc inside the computer, on a CD-ROM, or at a website.

Q. No. 42):-

What is distance learning?

Answer:-

It is a form of learning that takes place where the teachers and the students are in physically separate locations. Distance learning can be either Asynchronous or Synchronous.

Q. No. 43):-

What is DPI?

Sol:-

DPI is an abbreviation for Dots Per Inch. It is a measure of the quality of output i.e. the no. of dots per inch square produced by a printer or scanner, also referred to as its resolution.

Q.No.44):-

What is encryption?

Answer:-

Encryption is a system of coding that helps prevent access to private information on computer networks or on the web.

Q.No.45):-

What is GUI?

Answer:-

Graphical user interface (GUI) is an interface i.e. a software package that enables human beings to control what happens on their computers.

Q.No.46):-

Who is Hacker?

Answer:-

Hacker is a person who spends their time trying to gain access to information stored on other people's computers all around the world.

Q. No. 47):-

What is ISP?

Answer:-

Internet service provider (ISP) is defined as "a company that provides a subscription service to enable you to access the internet."

Q. No. 48):-

What is Karaoke microphone?

Answer:-

Karaoke Microphone is a popular name for a type of microphone that is more accurately described as a dynamic microphone.

Q. No. 49):-

What is A/D converter?

Answer:-

A device used to convert analog data to digital data. Analog data is continuously variable while digital data contains discrete steps.

Q.No.50):-

What is Address resolution?

Answer:-

It is the conversion of an IP address to the corresponding low-level physical address.

Q.No.51):-

What is ANSI?

Answer:-

This is the abbreviation of American National Standard Institute. This organization is responsible for approving U.S standards in many areas, including computers and communications. Standards approved by this organization are often called ANSI Standards.

Q.No.52):-

What is ASCII?

Answer:-

It is abbreviation of American (National) Standard code for information interchange. It is a standard character to-number encoding widely used in computer industry.

Q.No.53):-

What is AV?

Answer:-

This is called Audio Visual. AV Macintosh models have video capture hardware and have sophisticated sound and video recording capabilities.

Q.No.54):-

What is Bandwidth?

Answer:-

It is the capacity of the transmission medium stated in bits per second or as a frequency.

Q.No.55):-

What is Batch Scanning?

Answer:-

The sequential scanning of multiple originals using previously defined unique settings for each.

Q.No.56):-

What is Baud?

Answer:-

It is a unit of

measurements that denotes the no. of bits that can be transmitted per second.

Q. No. 57):-

What is BGI?

Answer:-

This is an abbreviation of Binary Gateway interface. It provides a method of running a program from a web server.

Q. No. 58):-

What is Scanner?

Answer:-

Scanner is used to load data (image, text etc) from the printed material into a computer. Software used to recognize text from image is called text recognition tool.

Q. No. 59):-

DOS is application or system software?

Answer:-

This is abbreviation of Disk operating system. The operating system used on IBM personal computer.

and compatible machines.

Q.No. 60):-

Difference b/w memory card and USB drive?

Answer:-

Memory card:-

Memory card is a type of flash memory used to store data in digital cameras, cell phones, MP3 players etc.

USB drive:-

USB stick is a data storage device. It features small dimensions, relatively high capacity, reliability and speed. It belongs to the type of flash memory that remembers data, even when not under voltage.

Q.No. 61):-

What is address resolution Protocol?

Answer:-

ARP is used to dynamically discover the low-level physical network hardware address that corresponds to high level IP address for a

given host, for instance.

Q. No. 62):-

What is field trip? write its types?

Answer:-

The tour made by a group is often called Field Trip.

It provides direct experience leading to effective understanding.

Excursions usually involve a tour by a person or a group of person to some selected place.

Types:-

- | | |
|--------------------|-------------------|
| i) Exhibition | ii) demonstration |
| iii) Dramatization | iv) MUSEUM |
| v) Planetarium | vi) Aquarium |
| vii) Terrarium | viii) Vivarium. |

Q. No. 63):-

Usage of Audio aids in class room:-

Answer:-

- i) Radio
- ii) Tape Recorder
- iii) Public Address system.

Q. No. 64):-

Difference b/w internal and external hard drive?

Answer:-

There is a difference b/w an internal hard disk, which is embedded in the computer case, and an external hard disk drive, which is connected to a computer by using an appropriate cable or USB port, and is usually used to transfer data from one computer to another or for backup.
