Total Questions: 10
Mathematical Questions: 3
CROPPED Screenshots: 3

Question 1:

You selected: B

Mathematical question (CROPPED screenshot - top 20% removed)

Selected Answer: B

Question 2:

.

A. The area is decreased.

B. The area is increased.

C. The area is undefined.

D. It doesn't affect the area.

Selected Answer: D

Question 3:

How is the volume of a solid calculated using the method of slicing perpendicular to the y-axis?

A. .

B. .

C. .

D. .

Selected Answer: A

Question 4:

Which mathematician introduced the concept of arc length and formulated the integral for its calculation?

A. Euclid

B. Isaac Newton

C. Archimedes

D. Pierre-Simon Laplace

Selected Answer: B

Question 5:

The volume of a cylinder is the area of a cross section of the cylinder multiplied by the _____ of the cylinder.

A. Base

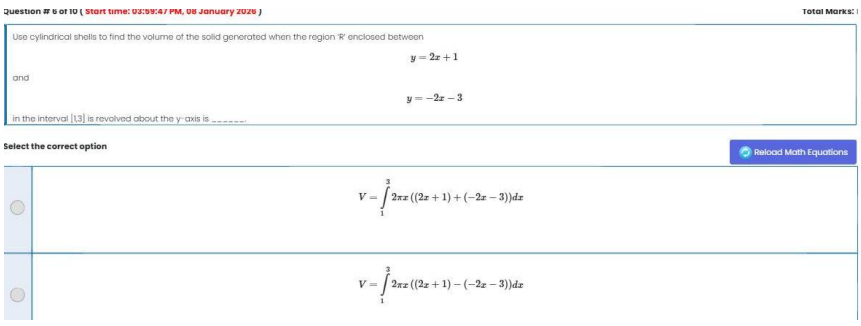

B. Diameter

C. Height

D. Radius

Selected Answer: C

Question 6:

You selected: B

Mathematical question (CROPPED screenshot - top 20% removed)

Selected Answer: B

Question 7:

If a function is continuous on a given interval then it is called....

A. Discontinuous function.

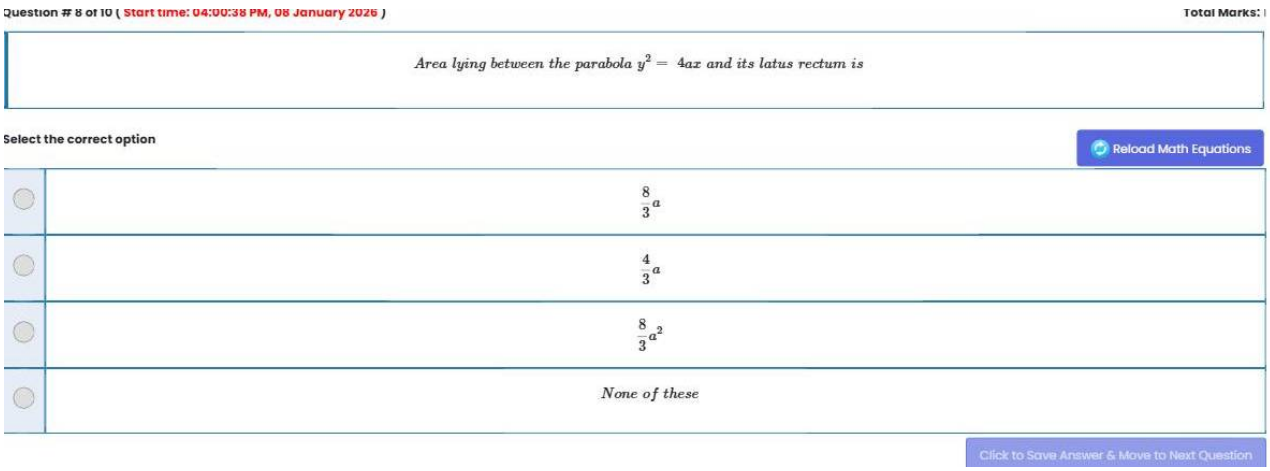

B. Smooth function.

C. Step function.

D. Piecewise function.

Selected Answer: B

Question 8:

You selected: C

Mathematical question (CROPPED screenshot - top 20% removed)

Selected Answer: C

Question 9:

If the radius of a sphere is doubled, how does the volume change?

A. It becomes eight times of the original volume.

B. It remains the same of the original volume.

C. It becomes four times of the original volume.

D. It becomes half of the original volume.

Selected Answer: A

Question 10:

Length of the arc y=c from x=0 to x=1 is _____.

A. None of the above

B. 1

C. 0

D. -1

Selected Answer: B

Mathematical Questions Note:

Questions containing mathematical equations and symbols are displayed as CROPPED screenshots (top 20% removed for privacy) to preserve the original formatting. Your selected answers are displayed below each screenshot for easy reference.
