CS605 Current Final Term Papers 2018 To 2020

2020

Paper 1

#CS605 Important Topics

Scheduling

Earned Value Analysis

Lecture 26, 27

V-model

Error Index (EI)

Lecture 32

Change Chaos

Software Configuration Management Tasks

Release numbering and internal release numbering

Configuration Status reporting (CSR)

Lecture -36, 37, 38

Software Reengineering, Software Reengineering Process Model

Reverse engineering

Forward engineering

Business process reengineering

5 mark question lecture 42-43

Capability Levels

CMM Maturity Levels

Cost of quality

NOTE:(prepare all diagrams and formula given in handouts)

Paper 2

CS605 VU Current Final Term Papers Spring 2020 (10 September onward)

today paper cs605

V-model k bary tha SCM k bary ma tha lack of ambiguity ka formula

direct removal efficiency ka Q ka solve krny wala formula lga k

source code or data k bary tha Q scrap legacy system ka tha 1 Q

70% must tha past ma sy

Paper 3

cs605 paper today

only 12 mcqs from past paper

Q Legacy system components. Q is Inappropriate Intimacy bad smell give reason. Q CMM maturity level ad hoc level 3 and 5..Q 5-mark question of TRUE/FALSE statements. Q scenario was given to calculate cost of maintenance. Q 5-marks code question was given to change .

Q short question W5HH Principle. Q requirement attributes. mostly paper was from lec 23-45

Paper 4

CS605 today Current paper final term

In SCM, What is SCI? 2 MARKS

Once the tasks have been identified, what network you need to manage sequence of activities? 2 marks

Long Parameter List is a bad smell? How?

Message Chains are bad smell? How?

Calculate availability? 5 marks

Calculate Cost performance index? 5 marks

How continuous representation is useful in small organizations? 5 marks.

We need to tag requirements with certain attributes in order to manage them in orderly fashion. Name 6 attributes.

Structure of releasing a compound number.

List the strategic option of legacy system assessment. 5 marks

Paper 5

Cs605

Almost 30 mcqs from waqar file

- 1) name the types of reviews?
- 2) u r the project manager and the task network is given just name the scheduling strategy in which u decide which task is time consuming?
- 3) when a system will be called a legacy system?
- 4) list the steps of software engineering process model. Just list the steps do not provide internal details?
- 5) CMMI levels?
- 6) in code refactoring. What is meant by bad smell?

2019

Paper 1

Cs605 today's paper

All Mcqs from moaz file

3 marks

Scheduling technique ke name .

Resource Tracablity

Review types

One System process model is feasible with all ?

Use of data and code restructuring

5 marks

Availability formula solving

Determine critical path

Bad smell me long methods

Re engineering ke steps

For More Visit: VUStudents.pk

One related to system life cycles

Paper 2

Cs605 today's paper

All Mcqs from moaz file

-----CS605-----

30mcqz from past moaz file

- 1....During program restricting we modify the code and data.what its benefit.
- 2...write goal statement of associated with requirement mangemnt.
- 3..types of reviews.
- 4..formula of defect removal efficiency
- 5..difrence b/w democratic decentrailizes and controller decentrailized
- 6..which team structure u prefer for complex project
- 7.steps of reengering model.
- 8..tasks of SCM
- 9..graph deya hwa tha critical path btana tha.
- 10..values given then maintince cost of system fr 4years find krna tha

Paper 3

Cs605

90 % mcqs were from past papers

Short Q name type of reviews.write formula of DRE.

Which model is best for avoiding risks?name it

Why parameter list of methods is bad smell.

Why prototype is used in business process.

Long.. find DRE with given value.

Find software availability with given value.it was also from past papers page 13 Q 4

One long was from past papers page 4 Q2 Moaaz Files

Paper 4

Cs605 today

Mcqs past se ayen thy

1: formula 2,3 hai book main in me se 2 ayen thy MTTR waghera wly

2: number release wla conceptual question tha

3:availability nikaalni thi

4:bad smell k 2 point dye thy or kaha tha explain kr k reason dain

5: network task ka question tha

2018

Paper 1

CS605 today's paper

Q1) "Software configuration management is a design activity". Do you agree or not? Provide at least one reason to support your answer. (3)

Q2) Do you think that a long parameter list of a function/method, can be a "bad smell"? Give reason for your answer. (3)

Q3) Normally Build and Fix model is not suitable for large and complex software projects. Why? (3)

Q4) Write the Goals statements which are associated with Requirement Management KPA? (3)

Q5) Write the name of those components which are associated with the failure cost? (3)

Q6) Being a software engineer, suppose you take a concept development project, list some of the tasks that you will perform to implement the project.

Note: just write the names of the tasks, no need to provide internal details (textual description) (5)

Q7) Many times we tag requirements with certain attributes, e.g. RequirementID, Requirement Status etc. list at least two (2) advantages of such tags.

Note: try to provide precise, to the point answer, avoid unnecessary details. (5)

Q8) Which team organization structures suggested by Mantei complete tasks faster and are most useful for handling simple problems? For the team morale point of view which team organization structure is better? (5)

For More Visit: VUStudents.pk

Q9) In the context of V-Model, which types of activities are used to achieve Software Quality assurance at the initial stages? In this model at the later stages, testing comes into picture. Write down the names of these later stages. (5)

Q10) Mention different types of representations in the CMMI models. Also discuss which representation allows selecting the order of improvement that best meets the organization's business objectives and mitigates organization's areas of risk. (5)

The End
