LECTURE WISE NOTES:
Short Questions File & MCQ's File
0325-4755408

COURSE: PSY611
MCQ's File For Midterm

Lecture # 1

What do ethics in psychology primarily focus on?

- A) Societal norms
- B) Moral and philosophical codes**
- C) Cultural changes
- D) Technological advancements

Which organization provides Ethical Principles and a Code of Conduct for psychologists?

- A) UNESCO
- B) WHO
- C) APA**
- D) AMA

What is the main purpose of APA's Ethical Principles and Code of Conduct?

- A) Regional standards
- B) Global uniformity**
- C) Individual preferences
- D) Cultural variations

What is one of the goals of ethics in psychology related to decision-making?

- A) Absence of rules
- B) Flexibility and variety
- C) Uniformity in rules**
- D) Resistance to societal changes

What influences ethical behavior in psychology according to the paragraph?

- A) Economic factors
- B) Cultural contexts**
- C) Individual preferences
- D) Technological advancements

Why are ethics considered necessary in psychological research?

- A) To limit participant involvement
- B) To ensure psychological harm
- C) To provide guidelines and protection**
- D) To prioritize societal benefits

How are the benefits and risks of research assessed in ethical considerations?

- A) Through cultural analysis
- B) Through a cost-benefit analysis**
- C) Through societal norms
- D) Through individual preferences

What is the Nuremberg Code associated with?

- A) Research principles after WWII**
- B) APA's ethical guidelines
- C) Development of DSM-V
- D) Declaration of Helsinki

Which principle from the Belmont Report emphasizes respecting individuals' autonomy?

- A) Respect for Persons**
- B) Beneficence
- C) Justice
- D) Non-maleficence

What does the principle of Beneficence in the Belmont Report focus on?

- A) Maximum benefits with minimal harm**
- B) Individual autonomy
- C) Equitable subject selection
- D) Cultural variations

What is the primary role of the Declaration of Helsinki in research involving human subjects?

- A) Defining ethical guidelines for psychologists
- B) Protecting patient health in medical research**
- C) Balancing benefits and risks
- D) Informed consent for research participation

How often are APA's Code of Ethics and Conduct updated?

- A) Annually
- B) Monthly
- C) Regularly**
- D) Biennially

What is the main disadvantage of a spinlock semaphore in psychological research?

- A) Complexity
- B) Lack of structure
- C) Busy waiting**
- D) Overhead costs

In the context of research ethics, what is the definition of "benefit"?

- A) Potential advantages**
- B) Financial gains
- C) Physical harm
- D) Psychological risks

Which ethical principle emphasizes treating subjects equitably in research?

- A) Justice**
- B) Respect for Persons
- C) Beneficence
- D) Non-maleficence

What is the primary purpose of the Nuremberg Code?

- A) Protecting patient health
- B) Ensuring justice in research
- C) Establishing ethical principles after WWII**
- D) Defining research ethics

What is the goal of the Declaration of Helsinki concerning vulnerable groups in research?

- A) To exploit vulnerability
- B) To minimize risks**
- C) To use vulnerable groups exclusively
- D) To disregard ethical norms

What is the primary focus of the Belmont Report's principle of Justice?

- A) Individual autonomy
 - B) Equitable subject selection**
 - C) Maximizing benefits
 - D) Avoiding research with unfavorable risk-benefit ratios
- Answer: B) Equitable subject selection

Lecture # 2

What was one common ethical issue with some past studies that hindered their replication?

- A) Lack of scientific rigor
- B) Lack of informed consent**
- C) Excessive replication
- D) Lack of statistical significance

Which researcher conducted self-experimentation by swallowing various doses of drugs without knowing the potential risks?

- A) Johann Jorg**
- B) Gerhard Domagk
- C) Louis Pasteur
- D) Edward Jenner

What ethical concern is associated with the Little Albert Experiment conducted by J.B. Watson and Rayner?

- A) Lack of informed consent
- B) Coercion of volunteers
- C) Deception**
- D) Exploitation of a vulnerable group

In the Landis' Facial Expressions Experiment, what was the major ethical issue related to subjects?

- A) Lack of informed consent
- B) Psychological distress**
- C) Withholding information about risks
- D) Exploitation of a vulnerable group

What was the primary goal of the Public Health Service Syphilis Study?

- A) To cure syphilis
- B) To document the natural history of syphilis**
- C) To protect patient health
- D) To test a new drug

Which study involved intentionally giving mentally retarded children hepatitis without informing parents about the true nature of the study?

- A) Monster Study
- B) Willowbrook Experiment**

- C) Milgram Experiment
- D) Zimbardo's Prison Study

What was Stanley Milgram's primary focus in the Milgram Experiment?

- A) Induced stress
- B) Stuttering
- C) Obedience to authority**
- D) Facial expressions

What was injected into senile patients in the Jewish Chronic Disease Study without informing them?

- A) Antibiotics
- B) Live cancer cells**
- C) Vaccines
- D) Painkillers

What was the main purpose of Philip Zimbardo's Prison Study?

- A) Measuring the effect of role-playing**
- B) Studying facial expressions
- C) Investigating obedience to authority
- D) Analyzing speech therapy

Why are unethical studies of this nature no longer conducted in the scientific community?

- A) Lack of interest
- B) Sensitivity to potential harm**
- C) Funding issues
- D) Lack of technology

Lecture # 3

What was one common ethical issue with some past studies that hindered their replication?

- A) Lack of scientific rigor
- B) Lack of informed consent**
- C) Excessive replication
- D) Lack of statistical significance

Which researcher conducted self-experimentation by swallowing various doses of drugs without knowing the potential risks?

- A) Johann Jorg**

- B) Gerhard Domagk
- C) Louis Pasteur
- D) Edward Jenner

What ethical concern is associated with the Little Albert Experiment conducted by J.B. Watson and Rayner?

- A) Lack of informed consent
- B) Coercion of volunteers
- C) Deception**
- D) Exploitation of a vulnerable group

In the Landis' Facial Expressions Experiment, what was the major ethical issue related to subjects?

- A) Lack of informed consent
- B) Psychological distress**
- C) Withholding information about risks
- D) Exploitation of a vulnerable group

What was the primary goal of the Public Health Service Syphilis Study?

- A) To cure syphilis
- B) To document the natural history of syphilis**
- C) To protect patient health
- D) To test a new drug

Which study involved intentionally giving mentally retarded children hepatitis without informing parents about the true nature of the study?

- A) Monster Study
- B) Willowbrook Experiment**
- C) Milgram Experiment
- D) Zimbardo's Prison Study

What was Stanley Milgram's primary focus in the Milgram Experiment?

- A) Induced stress
- B) Stuttering
- C) Obedience to authority**
- D) Facial expressions

What was injected into senile patients in the Jewish Chronic Disease Study without informing them?

- A) Antibiotics

B) Live cancer cells

- C) Vaccines
- D) Painkillers

What was the main purpose of Philip Zimbardo's Prison Study?

A) Measuring the effect of role-playing

- B) Studying facial expressions
- C) Investigating obedience to authority
- D) Analyzing speech therapy

Why are unethical studies of this nature no longer conducted in the scientific community?

A) Lack of interest

B) Sensitivity to potential harm

- C) Funding issues
- D) Lack of technology

What is the primary reason unethical studies like the ones discussed are no longer conducted?

A) Lack of interest

B) Ethical guidelines and sensitivity

- C) Technological limitations
- D) Lack of funding

Answer: B) Ethical guidelines and sensitivity

Which report, published in 1979, emphasized the principles of Respect for Persons, Beneficence, and Justice in research?

- A) Belmont Report
- B) Nuremberg Code
- C) Declaration of Helsinki
- D) Willowbrook Report

Answer: A) Belmont Report

In the Milgram Experiment, what were participants tasked to administer when the student (actor) gave the wrong answer?

A) Electric shocks

- B) Medication
- C) Verbal feedback
- D) Rewards

What ethical principle involves ensuring that the benefits of research outweigh any potential harms?

- A) Respect for Persons
- B) Justice
- C) Beneficence**
- D) Informed Consent

Which milestone document emphasizes protecting patient health, considering local regulatory norms, and balancing risks and benefits in medical research?

- A) Nuremberg Code
- B) Belmont Report
- C) Declaration of Helsinki**
- D) APA's Code of Conduct

Lecture # 4

What is the primary purpose of ethical principles in psychology?

- A) To confuse individuals
- B) To promote misconduct
- C) To guide responsible behavior**
- D) To generate errors

Answer: C) To guide responsible behavior

How many ethical principles are listed (A-E) in the paragraph?

- A) Two
- B) Three
- C) Four
- D) Five**

Which ethical principle involves balancing the benefits of treatment against the risks and costs involved?

- A) Principle B
- B) Principle C
- C) Principle D
- D) Principle A**

What is the focus of Principle B (Fidelity and Responsibility)?

- A) Avoiding harm
- B) Establishing trust**
- C) Maintaining honesty
- D) Promoting accuracy

What does the principle of Integrity require psychologists to promote?

- A) Exploitation
- B) Honesty and accuracy**
- C) Conflicts of interest
- D) Fraudulent behavior

Who is mentioned as an example of lack of integrity in research?

- A) Mr. Diederik Stapel**
- B) Johann Jorg
- C) Gerhard Domagk
- D) Louis Pasteur

What does the principle of Justice promote in psychology?

- A) Unjust practices
- B) Fair and equitable treatment**
- C) Discrimination
- D) Indifference

What is the primary concept of Principle E (Respect)?

- A) Promoting bias
- B) Equal moral consideration**
- C) Discrimination
- D) Injustice

What does Respect for dignity recognize about human beings?

- A) Inherent worth**
- B) Perceived differences
- C) Social status
- D) Discrimination

Which aspect is NOT mentioned as a consideration under the statement of values for Principle E?

- A) Privacy and confidentiality
- B) Consent
- C) Issues of power
- D) Excessive control**

In which setting might the application of the principle of Justice face challenges?

- A) Private sector
- B) Educational institutions
- C) Long-term care (LTC)**
- D) Research labs

What is the primary goal of Beneficence according to Principle A?

- A) Causing harm
- B) Avoiding benefits
- C) Balancing benefits against risks**
- D) Falsifying data

What is the primary focus of Principle C (Integrity)?

- A) Conflicts of interest
- B) Promoting fraud
- C) Maintaining honesty**
- D) Exploitation

What does Principle D (Justice) aim to ensure?

- A) Discrimination
- B) Indifference
- C) Fair and equitable treatment**
- D) Unjust practices

What is the foundational concept for many other ethical principles across disciplines and boundaries?

- A) Fairness
- B) Privacy
- C) Respect for dignity**
- D) Justice

Lecture # 5

How many ethical standards are outlined by the APA?

- A) Five
- B) Ten**
- C) Fifteen
- D) Twenty

What is the primary focus of ethical standards?

- A) Legal compliance
- B) Financial gain
- C) Guiding psychologists in various roles**
- D) Personal interests

What is the potential consequence of violating an ethical standard for an APA member?

- A) Monetary fine

B) Loss of licensure

- C) Written warning
- D) Public apology

What does Principle 1.1 address in the context of resolving ethical issues?

- A) Discrimination

B) Misuse of psychologists' work

- C) Conflicts between ethics and law
- D) Emergencies

How should psychologists handle conflicts between ethics and organizational demands (Principle 1.3)?

- A) Ignore conflicts
- B) Prioritize organizational demands
- C) Resolve conflicts in favor of ethics**
- D) Shift responsibilities to others

When is it appropriate for psychologists to report ethical violations (Principle 1.4)?

- A) Only when confidentiality is maintained
- B) When an intervention would violate confidentiality**
- C) In all cases
- D) Only for major violations

What action should psychologists take for an informal resolution of ethical violations (Principle 1.5)?

- A) File an official complaint
- B) Consult a lawyer
- C) Seek professional consultation**
- D) Engage in retaliation

What is considered an ethics violation in the context of cooperation with ethics committees (Principle 1.6)?

- A) Making a request for deferment
- B) Defending oneself in litigation
- C) Failure to cooperate**
- D) Cooperation without a lawyer

What is the focus of Principle 1.7 (Improper Complaints)?

- A) Encouraging complaints
- B) Filing complaints with disregard for facts**
- C) Reporting minor violations

D) Avoiding complaints

What does Principle 1.8 address regarding ethics complaints?

A) Unfair discrimination

B) Denying employment based on complaints

C) Encouraging ethics complaints

D) Responding to ethics complaints

What is the primary focus of Principle 2 (Competence)?

A) Avoiding referrals

B) Continuity of services

C) Areas of competence

D) Legal compliance

In what situations may psychologists provide services in emergencies (Principle 2.2)?

A) Only for financial gain

B) When trained and licensed

C) Regardless of training

D) In any situation

What is the primary goal of maintaining competence (Principle 2.3)?

A) Continuous education

B) Ongoing efforts

C) Financial gain

D) Establishing professional boundaries

What should psychologists consider when delegating work to others (Principle 2.5)?

A) Personal relationships

B) Professional boundaries

C) Educational background

D) Financial interests

What does Principle 3.1 address regarding human relations?

A) Multiple relationships

B) Avoiding harm

C) Unfair discrimination

D) Exploitative relationships

What is the primary concern of Principle 3.3 (Sexual Harassment)?

A) Multiple relationships

B) Exploitative relationships

- C) Avoiding harm
- D) Strictly avoiding sexual harassment**

When should psychologists obtain informed consent (Principle 3.5)?

- A) After completing the therapy
- B) Only in research settings
- C) Before conducting any service**
- D) When it's convenient

What is the focus of Principle 3.6 (Conflict of Interest)?

- A) Exploiting relationships
- B) Personal interests
- C) Objectivity, competence, and effectiveness**
- D) Professional boundaries

How should psychologists respond to third-party requests for services (Principle 3.7)?

- A) Decline all requests
- B) Clarify important aspects**
- C) Ignore requests
- D) Request additional fees

What should psychologists avoid in relationships with those under their authority (Principle 3.8)?

- A) Collaboration
- B) Exploitation**
- C) Discrimination
- D) Withdrawal of services

Lecture # 6

What is the primary obligation of psychologists concerning confidential information?

- A) Public disclosure
- B) Limited protection
- C) Reasonable precautions**
- D) Legal sharing

What is recommended for researchers to ensure confidentiality of participants?

- A) Public disclosure of identities
- B) Use of participant names in research

C) Assigning codes to participants

D) No need for confidentiality

When should psychologists discuss the limits of confidentiality in a relationship?

A) Only when requested by clients

B) At the end of the therapy

C) At the start and when new circumstances arise

D) Never

In what situation may psychologists break the confidentiality clause?

A) At any time

B) In legal matters and involvement of legal stakeholders

C) Only in emergencies

D) When clients request it

When should psychologists discuss confidentiality in electronic transmission of information?

A) Only when using sensitive information

B) At their discretion

C) Only during emergencies

D) Before providing services via electronic transmission

What must psychologists obtain before recording voices or images of individuals?

A) No permission required

B) Consent from legal representatives only

C) Consent from all individuals or their legal representatives

D) Consent from the psychologist

What does Principle 4.4 emphasize regarding written/oral reports?

A) Inclusion of irrelevant information

B) Revealing all client details

C) Including only pertinent information

D) Excessive disclosure

When can psychologists disclose confidential information with appropriate consent?

A) Only in emergencies

B) When mandated by law

C) At their discretion

D) Never

In what circumstances can psychologists disclose confidential information without consent?

- A) Only to gain professional consultations
- B) Only to obtain payment for services
- C) As mandated by law or for valid purposes**
- D) Only for research purposes

What is the primary consideration when consulting with colleagues (Principle 4.6)?

- A) Full disclosure of client information
- B) Theoretical concepts alignment**
- C) Informing clients about the consultation
- D) Getting consent from clients

Under what conditions can psychologists disclose confidential details in writings/lectures?

- A) Never
- B) Only when approved by the APA
- C) When disguised or consented**
- D) Only for therapeutic purposes

What is the focus of Principle 5.1 (Avoidance of False or Deceptive Statements)?

- A) Legal compliance
- B) Honesty in public statements**
- C) Advertising fees
- D) Monetary compensation

What must psychologists ensure when engaging others for public statements (Principle 5.2)?

- A) Exaggeration of claims
- B) Professional responsibility**
- C) Monetary compensation
- D) Unnecessary claims

What must psychologists ensure in advertisements describing workshops and seminars (Principle 5.3)?

- A) High fees for participants
- B) Proper justification of fees**
- C) False information
- D) Minimum disclosure

When providing public advice via print, internet, or electronic medium, what precautions should psychologists take (Principle 5.4)?

- A) Building a professional relationship
- B) Consistency with Ethics Code**
- C) Providing direct contact information
- D) Aligning with theoretical concepts

What is prohibited regarding testimonials (Principle 5.5)?

- A) Seeking testimonials from current clients**
- B) Providing testimonials for colleagues
- C) Offering monetary compensation for testimonials
- D) Only accepting positive testimonials

What is prohibited in in-person solicitation of business (Principle 5.6)?

- A) Collaborating with reputable clients
- B) Engaging with community outreach services
- C) Engaging in uninvited in-person solicitation**
- D) Providing free services

What is emphasized regarding record-keeping (Principle 6.1)?

- A) Frequent disposal of records
- B) Minimal documentation
- C) Compliance with the law**
- D) Avoiding replication of research

Under what circumstances can psychologists withhold records for nonpayment (Principle 6.3)?

- A) Never**
- B) Only for clients in therapy
- C) Only in emergencies
- D) When payment is received

How should psychologists determine fees and financial arrangements (Principle 6.4)?

- A) Solely based on reputation
- B) After providing services
- C) Through mutual agreement with clients**
- D) Without informing clients

Lecture # 7

What is the primary obligation of psychologists regarding confidential information?

- a. To disclose information to the public
- b. To protect confidential information**
- c. To sell confidential information
- d. To store confidential information indefinitely

According to the paragraph, when must psychologists discuss the limits of confidentiality?

- a. Only during the initial therapy session
- b. Only in legal matters
- c. Only when involving children in research
- d. At the start of the relationship and as new circumstances arise**

What should psychologists do before recording the voices or images of individuals for services?

- a. Obtain permission**
- b. Inform the participant after recording
- c. Record without consent
- d. Only record in public places

In what situations can psychologists disclose confidential information without consent?

- a. Only in legal matters
- b. To obtain payment for services
- c. To provide needed professional services
- d. a, b, and c**

When consulting with colleagues, what information can psychologists disclose about their clients?

- a. Any information that might lead to identification
- b. Information related to consultation only**
- c. Client's actual name only
- d. Information for research purposes

What should psychologists avoid in their public statements, according to the paragraph?

- a. Making false, deceptive, or fraudulent statements**
- b. Providing honest information
- c. Disclosing all information about their clients
- d. Compensating media employees for publicity

What is the primary consideration when designing educational and training programs, according to the paragraph?

- a. Providing inappropriate knowledge
- b. Meeting requirements for license, certification, or other goals**
- c. Offering programs with misleading information
- d. Allowing unlicensed individuals to provide services

When do psychologists require students to disclose personal information in course-related activities?

- a. Never
- b. Only if the information is related to sexual history
- c. When it is necessary for program evaluation**
- d. Always, to build rapport

What should psychologists ensure in assessing student and supervisee performance?

- a. Avoid providing feedback
- b. Evaluate based on personal biases
- c. Establish a timely and specific process for feedback**
- d. Provide feedback only at the end of supervision

According to ethical standards, what should psychologists seek before conducting research?

- a. Approval from participants
- b. Approval from media outlets
- c. Approval from the institution**
- d. Approval from governmental agencies

What is psychologists' responsibility regarding the humane care and use of animals in research?

- a. Minimize discomfort, infection, and pain of animals**
- b. Use animals without any consideration for their well-being
- c. Conduct experiments causing severe harm to animals
- d. Follow laws and regulations, but not professional standards

Lecture # 8

What is the primary goal when psychologists base opinions on assessments?

- a. Achieve unreliable results
- b. Generalize findings**

- c. Provide misleading information
- d. Ignore diagnostic statements

Why is it important to align assessment tools with cultural appropriateness?

- a. To confuse participants
- b. To achieve inconsistent results
- c. To yield accurate results**
- d. To limit the observations

In what situations do psychologists explain the source of information for opinions?

- a. Always
- b. Only if convenient
- c. When consultation or supervision is not necessary**
- d. Never

Why do psychologists use different assessment techniques in various scenarios?

- a. To confuse participants
- b. To complicate the process
- c. To match the appropriateness of techniques with scenarios**
- d. To limit the observations

What should psychologists consider when using instruments in assessments?

- a. Cultural alignment**
- b. Random selection
- c. Unreliable instruments
- d. All of the above

Why is informed consent important in assessments?

- a. To secure permission for profitable gains
- b. To avoid complaints about using data**
- c. To confuse participants
- d. To limit assessments

. In what situations do psychologists explain the source of information for opinions?

- a. Always
- b. Only if convenient
- c. When consultation or supervision is not necessary**
- d. Never

15. When interpreting assessment results, what do psychologists consider in addition to scores?

- a. Only the score
- b. Purpose of assessment**
- c. Individual's language preference
- d. None of the above

16. Why are psychological assessment techniques by unqualified persons discouraged?

- a. To encourage unbiased results
- b. For training purposes with appropriate supervision**
- c. To minimize assessment accuracy
- d. None of the above

Lecture # 9

1. What is the primary goal when psychologists base opinions on assessments?

- a. Achieve unreliable results
- b. Generalize findings**
- c. Provide misleading information
- d. Ignore diagnostic statements

2. Why is it important to align assessment tools with cultural appropriateness?

- a. To confuse participants
- b. To achieve inconsistent results
- c. To yield accurate results**
- d. To limit the observations

3. In what situations do psychologists explain the source of information for opinions?

- a. Always
- b. Only if convenient
- c. When consultation or supervision is not necessary**
- d. Never

4. Why do psychologists use different assessment techniques in various scenarios?

- a. To confuse participants
- b. To complicate the process
- c. To match the appropriateness of techniques with scenarios**
- d. To limit the observations

5. What should psychologists consider when using instruments in assessments?

- a. Cultural alignment**
- b. Random selection
- c. Unreliable instruments
- d. All of the above

6. Why is informed consent important in assessments?

- a. To secure permission for profitable gains
- b. To avoid complaints about using data**
- c. To confuse participants
- d. To limit assessments

7. In what circumstances do psychologists construct new assessment tests?

- a. When existing tests are readily available
- b. When there is no need for new tools
- c. When existing tools are outdated**
- d. When existing tools are culturally appropriate

8. What do psychologists consider when interpreting assessment results?

- a. Purpose of assessment**
- b. Test factors only
- c. Participant's clothing
- d. Assessment location

9. Why is the use of psychological assessment techniques by unqualified persons discouraged?

- a. To confuse participants
- b. Lack of clinical judgment**
- c. To limit assessments
- d. To increase participation

10. According to ethical guidelines, what should not be the basis for assessment/intervention decisions?

- a. Outdated tests**

- b. Revised tests
- c. Tests aligned with the current research
- d. Tests aligned with old concepts

11. What information should psychologists accurately describe when offering assessment or scoring services?

- a. Only scoring procedures
- b. Norms, validity, reliability, and applications**
- c. Only reliability
- d. Personal opinions

12. When do psychologists explain assessment results to individuals or representatives?

- a. Only in security screenings
- b. Always
- c. Only in group therapy
- d. When nature of the relationship allows**

13. Why do psychologists make reasonable efforts to maintain test security?

- a. To confuse participants
- b. To enhance test validity**
- c. To increase open access
- d. To limit assessments

14. What is the significance of obtaining informed consent in therapeutic settings?

- a. To complicate the therapy process
- b. To avoid questions from clients
- c. To inform clients about the nature and course of therapy**
- d. To limit transparency

15. When therapists are trainees, what information is provided during informed consent?

- a. Name of the supervisor only
- b. No information is provided
- c. The therapist is in training and being supervised**
- d. The therapist is a senior supervisor

Lecture # 10

. What is the role of the Institutional Review Board (IRB) regarding research risks?

a. Identifying and evaluating risks

- b. Conducting the research
- c. Analyzing data
- d. Publishing results

2. Why are risks in social and behavioral science research often more ambiguous?

- a. Lack of participant involvement
- b. Predictability of outcomes

c. Presence of confounding variables

- d. Clear guidelines

3. In what categories does the IRB consider risks related to research?

- a. Physical and emotional only

b. Psychological, physical, social, legal, and emotional

- c. Social and economic only
- d. Psychological and legal only

4. What is invasion of privacy, as mentioned in the paragraph?

- a. Unauthorized release of data
- b. Traumatic memories

c. Personal information revealed without knowledge

- d. Sensitive questions

5. What is the primary source of risk related to disclosure of information outside the research setting?

- a. Psychological harms
- b. Invasion of privacy

c. Breach of confidentiality

- d. Economic harms

6. What is one example of social and economic harms mentioned in the paragraph?

- a. Panic attacks
- b. Psychological distress

c. Loss of employment

- d. Depression

7. What are the two main elements associated with the assessment of risk?

- a. Time and culture
- b. Probability of harm and Magnitude of harm**
- c. Subject population and Situation
- d. Probability and Time

8. What is the significance of Certificates of Confidentiality?

- a. To overrule state reporting requirements
- b. To protect identifiable research information**
- c. To disclose sensitive information
- d. To minimize risks

9. What information can be protected by a Certificate of Confidentiality?

- a. Substance abuse, illegal behavior**
- b. Research staff information
- c. General demographic data
- d. Publicly available information

10. When might a waiver of documentation of consent be considered?

- a. In all research studies
- b. When there is no risk involved
- c. In studies involving stigmatization or illegal activity**
- d. In biomedical research only

Lecture # 11

1. What is the primary intent of obtaining informed consent in research?

- a. To gather personal information
- b. To ensure participants enter research freely**
- c. To guarantee positive research outcomes
- d. To disclose minimal information

2. When does the process of informed consent begin in research?

- a. Midway through the research study
- b. After data analysis
- c. During recruitment and screening**
- d. Only at the end of the research

3. What is the significance of providing subjects adequate time to consider their decisions in the informed consent process?

- a. To rush participants into decisions
- b. To minimize the research duration
- c. To ensure voluntary agreement**
- d. To accelerate the research process

4. In which situation is a written consent process more likely to be used?

- a. Literacy is a problem
- b. Time for consent is limited
- c. First access to research participants is by providing written information**
- d. Participants are busy with shopping

5. What are the essential elements of informed consent?

- a. Disclosure of information, Competency, and Compensation
- b. Risks, Benefits, and Alternatives
- c. Reading and signing forms
- d. Purposes of the research, Expected duration, and Description of procedures**

6. When might an oral consent process be preferable?

- a. In complex research
- b. When literacy is not a problem
- c. In a natural disaster with time limitations**
- d. When written information is available

7. What is the primary criterion for a waiver of any of the required elements of informed consent?

- a. The research is complex
- b. The research involves minimal risk**
- c. The participants request a waiver
- d. The research has multiple stages

8. When is a waiver or alteration of informed consent elements not appropriate?

- a. When the research is complex
- b. When the research involves minimal risk
- c. When it adversely affects the rights and welfare of subjects**
- d. When participants demand a waiver

9. What is "debriefing" in the context of informed consent?

- a. A process of providing additional pertinent information after participation**
- b. A form of written informed consent
- c. A statement describing costs a participant might incur
- d. A description of consequences of participant's decision to withdraw

10. In what situation might a waiver of informed consent be justified due to the demand effect?

- a. Covert observation
- b. Incomplete disclosure**
- c. Natural disaster
- d. Deception

11. What is the term for the process in which participants alter their behavior when they become aware of the researcher's expectations?

- a. Covert observation
- b. Demand effect**
- c. Incomplete disclosure
- d. Debriefing

12. When might covert observation require a waiver of all elements of informed consent?

- a. When literacy is a problem
- b. When there are cultural or political concerns
- c. When people know their behavior is being observed**
- d. When the research is complex

13. What is the primary justification for using deception in research despite potential harm to participants?

- a. To increase the complexity of the research
- b. To create a demand effect
- c. To investigate a particular phenomenon**
- d. To expedite the research process

14. What is the term for the process of obtaining informed permission from parents for their children's participation in research?

- a. Covert permission
- b. Informed consent
- c. Informed permission**
- d. Parental agreement

15. Under what circumstance might a waiver of documentation of consent be considered?

- a. When literacy is a problem
- b. When participants are busy with shopping
- c. When the consent form links participants to the study**
- d. When there are cultural concerns

Lecture # 12

1. What are the two methods available for documentation of informed consent?

- a. Verbal Consent and Written Presentation
- b. Written Consent Form and Verbal Presentation with Short Form**
- c. Oral Agreement and Written Affirmation
- d. Informal Agreement and Verbal Disclosure

2. In the written consent process, what is given to the participant as a reference and reminder of the information conveyed?

- a. Original research documents
- b. Consent form copy**
- c. Verbal summary
- d. Witness statement

3. Under what circumstances might documentation of the consent process be waived?

- a. Participants want to hide their identity
- b. The study involves minimal to no risk
- c. Participants are busy with shopping
- d. Both a and b**

4. When might renewal of informed consent be necessary?

- a. When participants want to hide their identity
- b. When the study involves minimal risk
- c. When the original consent was invalid**
- d. When participants are busy with shopping

5. In which situation might re-consent be considered appropriate when children reach adulthood in a longitudinal study?

- a. When children want to withdraw from the study
- b. When the research procedures change

c. When children's interests and preferences change

d. When the research involves minimal risk

6. What is the purpose of providing participants with a copy of the consent form in the written consent process?

a. To provide proof of participation

b. To remind them of the study's purpose

c. To keep for legal documentation

d. To exchange for compensation

7. Under what circumstances might an impartial witness be used in the verbal presentation with short form method?

a. When participants are illiterate

b. When participants are busy with shopping

c. When participants refuse to provide consent

d. When participants want to hide their identity

8. In which situation might the documentation of informed consent be waived according to the paragraph?

a. When participants are busy shopping

b. When the study involves minimal risk

c. When participants are fluent in English

d. When the research procedures change

9. When might renewal of informed consent be necessary according to the paragraph?

a. When participants want to hide their identity

b. When the study involves minimal risk

c. When the original consent was invalid

d. When participants are fluent in English

10. What is the purpose of obtaining child assent in research involving children under the age of 18?

a. To replace parental consent

b. To ensure children are willing to participate

c. To gather additional information

d. To document the child's age

11. What issues are mentioned in the paragraph related to cultural differences in obtaining informed consent?

a. Language and literacy

b. Comfort in asking questions

c. Layered consent

d. False expectations

12. In which situation might layered consent be relevant?

- a. When participants are fluent in English
- b. When participants are illiterate
- c. When participants refuse to provide consent
- d. When participants need to choose among several options**

Lecture # 13

1. What is the primary focus of psychological assessment, according to the paragraph?

- a. Cultural competence
- b. Scientific psychology**
- c. Legal guidelines
- d. Behavior change programs

2. What components can be included in a psychological assessment?

- a. Formal tests only
- b. Norm-referenced psychological tests only
- c. Interview information, medical evaluation, and observational data**
- d. School records and medical records only

3. In what settings do psychologists usually undertake psychological assessments?

- a. Only clinical settings
- b. Only educational settings
- c. Diverse settings, considering cultural and related factors**
- d. Settings with minimal cultural influence

4. How may awareness of cultural factors influence psychologists, according to the paragraph?

- a. By maintaining stereotypes
- b. By ignoring cultural differences
- c. By influencing the choice of assessment methods and interpretation of results**
- d. By excluding diverse clients

5. What is the purpose of obtaining informed consent in psychological assessments?

- a. To restrict access to stored information
- b. To withdraw from methods or procedures
- c. To establish financial basis for psychological services
- d. To ensure clients are fully informed about the procedures and risks**

6. What information should be clarified during the informed consent process?

- a. All information using complex language
- b. The conditions for termination of services**
- c. Only the nature of procedures
- d. The Code and Guidelines of psychological assessment

7. How do psychologists provide information during the informed consent process?

- a. Using complex language
- b. In plain language**
- c. Using legal jargon
- d. With explicit exceptions

8. What is essential for psychologists when providing psychological services?

- a. Compliance with personal opinions
- b. Impairment of mental and physical states
- c. Adherence to the Code and Guidelines of psychological assessment**
- d. Ignoring the law

9. What does competent conducting of psychological assessments involve?

- a. Relying on isolation of assessment data
- b. Making cultural adaptations only when necessary
- c. Ignoring cultural differences in procedures
- d. Accurately scoring, interpreting results, and considering contextual information**

10. In what context should assessment data be considered?

- a. In isolation from other information
- b. Without adapting to cultural differences
- c. In the context of all available information about the client**
- d. Only in clinical settings

Lecture # 14

1. What is the definition of cultural competence, as mentioned in the paragraph?

- a. The ability to discriminate based on cultural differences
- b. The capacity to ignore cultural assumptions
- c. The willingness to acknowledge cultural biases

d. The capacity to increase understanding of cultural differences

2. According to the paragraph, what is required for psychologists to address biases in assessment and treatment?

- a. Discrimination
- b. Ignorance

c. Cultural competence

d. Cultural blindness

3. How is cultural competence described in the paragraph?

a. A one-time goal to be attained

b. A continuous process of examination and change

c. A fixed state achieved through learning

d. A goal achieved through theoretical knowledge

4. What does a culturally competent program demonstrate, according to the paragraph?

a. Ignorance of cultural practices

b. Inclusion of the client population in program policy-making

c. Discrimination in treatment design

d. Lack of sensitivity to the first language of clients

5. Why does cultural competence matter, according to the paragraph?

a. It encourages discrimination

b. It reduces chaos caused by individual differences

c. It discourages client-therapist connectedness

d. It limits treatment opportunities

6. What does cultural competence encourage, according to the paragraph?

a. Discrimination

b. Acceptance of differences

- c. Cultural blindness
- d. Segregation

7. According to the paragraph, what may cultural competence improve?

- a. Discrimination
- b. Client retention**
- c. Cultural blindness
- d. Chaos caused by individual differences

8. In the stages of cultural competence, what is the focus of Stage 1 (Cultural Destructiveness)?

- a. Acceptance and respect for cultural differences
- b. Exclusion of people not fitting cultural patterns**
- c. Acknowledgment of cultural assumptions
- d. Integration of cultural strengths

9. What is the emphasis of Stage 4 (Cultural Pre-competence)?

- a. Segregation
- b. Treating people equally**
- c. Discrimination
- d. Ignoring cultural strengths

10. What characterizes Stage 6 (Cultural Proficiency) in the stages of cultural competence?

- a. Desire to deliver quality services
- b. Acceptance and respect for all cultures**
- c. Exclusion based on cultural patterns
- d. Maintaining stereotypes

11. Why is cultural competence considered increasingly important, according to the paragraph?

- a. To discourage diversity
- b. To improve standards for culturally appropriate services**
- c. To limit treatment opportunities
- d. To maintain stereotypes

12. What is the emphasis of cultural competence, according to the paragraph?

- a. Discrimination based on appearance
- b. Ignoring cultural differences
- c. Acknowledging and addressing differences**
- d. Treating all people the same

13. What is the role of cultural competence in the assessment and treatment of clients, according to the paragraph?

- a. To promote cultural blindness
- b. To discriminate based on cultural differences
- c. To address discrimination and biases**
- d. To support cultural incapacity

\

14. What may cultural competence help with, as stated in the paragraph?

- a. Reinforcing cultural stereotypes
- b. Chaos caused by individual differences
- c. Discrimination in treatment design
- d. Rapport building and client retention**

15. How is cultural competence described in terms of its development?

- a. A fixed state achieved through learning
- b. A goal achieved through theoretical knowledge
- c. An ongoing process of examination and change**
- d. A one-time goal to be attained

Lecture # 15

1. What is the primary focus of psychological assessment, according to the paragraph?

- a. Cultural competence
- b. Scientific psychology**
- c. Legal guidelines
- d. Behavior change programs

2. What components can be included in a psychological assessment?

- a. Formal tests only
- b. Norm-referenced psychological tests only
- c. Interview information, medical evaluation, and observational data**
- d. School records and medical records only

3. In what settings do psychologists usually undertake psychological assessments?

- a. Only clinical settings
- b. Only educational settings
- c. Diverse settings, considering cultural and related factors**

d. Settings with minimal cultural influence

4. How may awareness of cultural factors influence psychologists, according to the paragraph?

a. By maintaining stereotypes

b. By ignoring cultural differences

c. By influencing the choice of assessment methods and interpretation of results

d. By excluding diverse clients

5. What is the purpose of obtaining informed consent in psychological assessments?

a. To restrict access to stored information

b. To withdraw from methods or procedures

c. To establish financial basis for psychological services

d. To ensure clients are fully informed about the procedures and risks

6. What information should be clarified during the informed consent process?

a. All information using complex language

b. The conditions for termination of services

c. Only the nature of procedures

d. The Code and Guidelines of psychological assessment

7. How do psychologists provide information during the informed consent process?

a. Using complex language

b. In plain language

c. Using legal jargon

d. With explicit exceptions

8. What is essential for psychologists when providing psychological services?

a. Compliance with personal opinions

b. Impairment of mental and physical states

c. Adherence to the Code and Guidelines of psychological assessment

d. Ignoring the law

9. What does competent conducting of psychological assessments involve?

a. Relying on isolation of assessment data

b. Making cultural adaptations only when necessary

c. Ignoring cultural differences in procedures

d. Accurately scoring, interpreting results, and considering contextual information

10. In what context should assessment data be considered?

a. In isolation from other information

b. Without adapting to cultural differences

c. In the context of all available information about the client

d. Only in clinical settings

11. What does the term "Cultural Competence" refer to in the context of the paragraph?

a. Discrimination against cultures

b. Treating all cultures the same

c. Capacity to understand and address cultural differences

d. Encouraging cultural blindness

12. According to the paragraph, what does cultural competence involve?

a. Achieving a goal once

b. Acknowledging cultural biases

c. Ignoring cultural practices

d. A one-time process

13. What is the purpose of obtaining informed consent for psychological assessments?

a. To limit access to stored information

b. To advise clients to withdraw from procedures

c. To ensure clients are fully informed about procedures and risks

d. To avoid providing relevant information

14. In what stage of cultural competence is there acceptance and respect for cultural differences?

a. Cultural Blindness

b. Cultural Destructiveness

c. Cultural Competence

d. Cultural Incapacity

15. What is included in a culturally competent program, according to the paragraph?

a. Ignoring the first language of clients

b. Excluding the client population from decision-making

c. Understanding and respecting cultural practices

- d. Avoiding treatment methods reflecting culture-specific values

Lecture # 16

1. What are primary credentials in psychology based on?

- a. Tertiary credentials
- b. Short-term courses
- c. Direct contact with trained instructors**
- d. Online assessments

2. Which type of credentials may include licensing and certification?

- a. Primary Credentials
- b. Secondary Credentials**
- c. Tertiary Credentials
- d. Informal Credentials

3. What is the purpose of tertiary credentials?

- a. To obtain primary credentials
- b. To demonstrate the achievement of primary and secondary credentials**
- c. To qualify for primary credentials
- d. To replace primary credentials

4. According to the paragraph, what is the role of psychologists in test construction?

- a. Ignoring psychometric procedures
- b. Using outdated test results
- c. Following appropriate psychometric procedures**
- d. Avoiding scientific or professional knowledge

5. What factors do psychologists consider while interpreting assessment results?

- a. Personal, professional, and social factors
- b. Personal, situational, and financial factors
- c. Situational, personal, and linguistic factors**
- d. Physical, emotional, and cultural factors

6. What does informed consent for assessments involve?

- a. Explaining the purpose of assessments only

- b. Describing only the risks of assessments
- c. Ensuring clients are unaware of information collection
- d. Explaining the nature, purpose, risks, and other relevant aspects of assessments**

7. According to ethical guidelines, when can psychologists release test data without client consent?

- a. Only when there is a legal mandate**
- b. Whenever psychologists deem it necessary
- c. Without any restrictions
- d. Only when they find it appropriate

8. What does competent conducting of psychological assessments include?

- a. Ignoring cultural differences
- b. Making decisions without interpreting results
- c. Interpreting results in isolation
- d. Choosing appropriate procedures and interpreting results accurately**

9. In the context of test security, what does "breach of security" refer to?

- a. Developing alternate test forms
- b. Unauthorized removal of test materials**
- c. Copyrighting testing materials
- d. Analyzing test response data

10. How do breaches in test security impact measurement integrity and reliability?

- a. Enhance validity
- b. Have no impact
- c. Increase measurement integrity and reliability
- d. Decrease validity and reliability**

11. What is one consequence of a poorly secured testing program mentioned in the paragraph?

- a. Increased validity
- b. Lowered confidence in psychological assessment**
- c. Enhanced organizational performance
- d. Improved social perceptions

12. What factors are mentioned as challenges in securing test content, processes, and data?

- a. Only physical and electronic security
- b. Only cultural values
- c. Physical and electronic security, qualification levels, cultural values, and delivery technology**
- d. Delivery technology and cultural values

13. What is one method psychologists use to secure testing programs mentioned in the paragraph?

- a. Avoiding alternate/parallel test forms
- b. Allowing unrestricted access to test materials
- c. Copyrighting only some testing materials
- d. Developing alternate/parallel test forms**

14. Why do psychologists monitor and analyze test response data for abnormal patterns?

- a. To increase validity
- b. To decrease validity
- c. To identify potential breaches in test security**
- d. To ignore abnormal response patterns

15. When do psychologists refrain from releasing test data?

- a. When they find it appropriate
- b. Only when clients provide consent
- c. To protect clients or others from harm or misuse**
- d. Without any restrictions

Lecture # 17

1. What do psychologists use for test design, standardization, and validation?

- a. Personal opinions
- b. Current scientific or professional knowledge**
- c. Popular beliefs
- d. Past experiences

2. In interpreting assessment results, psychologists consider various factors except:

- a. Situational factors
- b. Personal characteristics
- c. Linguistic factors
- d. Gender differences**

3. When do psychologists allow the use of psychological assessment techniques by unqualified persons?

- a. Always
- b. Only for research purposes
- c. Only when appropriate supervision is provided for training purposes**
- d. Never

4. What do psychologists not base their assessment decisions on?

- a. Outdated data**
- b. Current scientific or professional knowledge
- c. Obsolete test results
- d. Past experiences

5. What responsibility do psychologists retain in offering assessment or scoring services to other professionals?

- a. No responsibility
- b. Responsibility for scoring only
- c. Responsibility for the appropriate application, interpretation, and use of assessment instruments**
- d. Responsibility for the marketing of services

6. When do psychologists provide explanations of assessment results?

- a. Only in pre-employment screenings
- b. Whenever they feel it's appropriate
- c. To individual clients or designated representatives**
- d. Only in forensic evaluations

7. When can psychologists refrain from releasing test data?

- a. Whenever they find it appropriate
- b. To protect a client or others from harm or misuse**
- c. Only when clients provide consent
- d. Without any restrictions

8. What does "test security" refer to in the context of assessments?

- a. Continuous improvement of tests
- b. Continuous maintenance and control of test material**
- c. Sharing test data with unauthorized individuals

d. Regular updating of test questions

9. What is a consequence of a breach of test security mentioned in the paragraph?

- a. Increased organizational performance
- b. Improved selection procedures
- c. Decreased validity and reliability**
- d. Enhanced social perceptions

10. What challenges exist in securing test content, processes, and data?

- a. Only physical and electronic security
- b. Only differences in stakes
- c. Physical and electronic security, qualification levels, cultural values, and delivery technology**
- d. Only cultural values

Lecture # 18

1. What is psychotherapy primarily aimed at addressing?

- a. Physical illnesses
- b. Emotional difficulties and mental illnesses**
- c. Social challenges
- d. Cultural differences

2. Why are therapeutic relationships considered complicated?

- a. Due to the simplicity of client issues
- b. Complexity of therapist's qualifications
- c. Complexity of the client's issues and problems**
- d. Limited nature of therapy options

3. In the context of psychotherapy, what is often used in combination with medication to treat mental health conditions?

- a. Alternative therapies
- b. Holistic approaches
- c. Surgery
- d. Psychotherapy**

4. What functions do psychotherapists perform according to the paragraph?

- a. Healing only

- b. Technological and educational functions only
- c. Healing, educational, and technological functions**
- d. Administrative functions only

5. What is a crucial requirement for therapists to provide competent treatment?

- a. Seek counseling for personal issues
- b. Regularly change treatment methods
- c. Represent credentials inaccurately
- d. Only provide services for which they are qualified**

6. Which therapy type focuses on identifying and changing harmful thinking and behavior patterns?

- a. Dialectical Behavior Therapy
- b. Supportive Therapy
- c. Cognitive Behavioral Therapy**
- d. Interpersonal Therapy

7. What does Interpersonal Therapy (IPT) help patients understand?

- a. Technological issues
- b. Cognitive distortions
- c. Underlying interpersonal issues**
- d. Educational problems

8. Which therapy is often used for people with chronic suicidal thoughts, borderline personality disorder, eating disorders, and PTSD?

- a. Dialectical Behavior Therapy**
- b. Psychoanalysis
- c. Cognitive Behavioral Therapy
- d. Supportive Therapy

9. What is the basis of psychodynamic therapy?

- a. Childhood experiences and unconscious thoughts**
- b. Present-day challenges and conscious thoughts
- c. Cognitive distortions
- d. Social influences

10. What is the primary goal of psychoanalysis?

- a. Promoting growth and insight
- b. Changing thinking patterns
- c. Bringing unconscious thoughts and feelings to the conscious mind**
- d. Enhancing communication skills

11. What does supportive therapy primarily aim to do?

- a. Change thinking patterns
- **b. Strengthen coping mechanisms and build self-esteem**
- c. Bring unconscious thoughts to the surface
- d. Focus on current problems

12. In psychoanalytic therapy, what is the aim regarding repressed experiences and emotions?

- a. Ignore them for better mental health
- b. Repress them further
- **c. Bring them to the surface and examine them**
- d. Share them immediately with others

13. What is the overarching purpose of psychotherapy according to the paragraph?

- a. Eliminate all symptoms
- **b. Control troubling symptoms for improved functioning and well-being**
- c. Replace thoughts and behaviors with new patterns
- d. Provide medication for mental health conditions

14. What does the therapist-client relationship involve according to the paragraph?

- a. Simplistic issues and straightforward solutions
- b. Unqualified therapists promoting techniques
- **c. Complicated client issues and a complex relationship**
- d. Limited nature of therapy options

15. What is the importance of therapists keeping up on current information in the field?

- a. To impress clients with their knowledge
- b. To increase therapy fees
- **c. Especially in specialty areas to provide competent treatment**
- d. It has no impact on therapy quality

Lecture # 19

1. What information should psychologists inform clients about during the informed consent procedure for therapy?

- a. The therapist's favorite therapy techniques
 - b. Personal experiences of the therapist
 - c. Nature and course of therapy, fees, involvement of third parties, and limits of confidentiality**
 - d. Only the therapeutic benefits
- 2. In group therapy, what is a potential disadvantage related to the group therapist's control over the session?**
- a. Enhanced control compared to individual therapy
 - b. Less stress for group members
 - c. Reduced appropriateness for some clients**
 - d. Improved emotional expressiveness
- 3. What is the primary function of supportive therapy?**
- a. Focus on current problems
 - b. Strengthen coping mechanisms and build self-esteem**
 - c. Bring unconscious thoughts to the surface
 - d. Replace thoughts and behaviors with new patterns
- 4. What does the therapist need to clarify when providing therapy to couples or families?**
- a. Keep all relationships ambiguous
 - b. The therapist's personal relationships
 - c. The psychologist's role and the relationship with each person**
 - d. Only provide services to one individual in the relationship
- 5. In what situations should psychologists avoid engaging in sexual intimacies according to the paragraph?**
- a. Only with clients' guardians
 - b. Only with relatives of current clients
 - c. Only with current therapy clients and their relatives or significant others**
 - d. Only with current therapy clients
- 6. What factors should psychologists consider when planning for facilitating care in case psychological services are interrupted?**
- a. Weather conditions
 - b. The client's relocation and the therapist's illness, death, unavailability, or relocation**
 - c. The therapist's vacation plans
 - d. Changes in therapy techniques

7. When do psychologists need to ensure that responsibility for patient or client care is resolved?

- a. During the client's relocation
- b. When the therapist takes a vacation

c. When entering into employment or contractual relationships

- d. Only when the client requests it

8. What is important for therapists to recognize when dealing with clients from diverse backgrounds?

- a. Assume everyone has the same frame of reference
- b. Neglect cultural differences

c. Consider social, economic, and cultural pressures when organizing treatment

- d. Impose personal values on clients

9. What is the right of clients who are not satisfied with the therapy or risk–benefit statement?

- a. Clients have no rights in such situations
- b. They can only seek alternative care
- c. They must continue with the prescribed therapy

d. They can decide not to seek treatment or seek alternative care

10. In cases of conflicting values, what should therapists avoid doing?

- a. Encouraging clients to rebel against a repressive environment
- b. Adjusting to the client's values

c. Imposing personal values on the client

- d. Ignoring the client's values

11. What is a characteristic of the "exceptionally difficult client" as mentioned in the paragraph?

- a. Compliant and cooperative

b. Dangerous and intimidating

- c. Responsive and punctual
- d. Inactive and indifferent

12. What is the primary goal of psychotherapy according to the paragraph?

a. Eliminating or controlling troubling symptoms

- b. Prescribing medications
- c. Conducting psychological assessments
- d. Providing educational services

13. What is the primary function of cognitive-behavioral therapy (CBT)?

- a. Exploring childhood experiences
- b. Identifying and changing harmful thinking and behavior patterns**
- c. Bringing unconscious thoughts to the surface
- d. Providing guidance and encouragement

14. What is the nature of dialectical behavior therapy (DBT)?

- a. Focusing on unconscious thoughts
- b. Teaching new skills to change unhealthy behavior**
- c. Exploring interpersonal issues
- d. Providing supportive therapy

15. What is the purpose of interpersonal therapy (IPT)?

- a. Exploring childhood experiences
- b. Teaching new skills to change behavior
- c. Identifying and changing harmful thinking patterns
- d. Understanding underlying interpersonal issues**

Lecture # 20

1. What are some common characteristics of clients who make threats, as mentioned in the paragraph?

- a. Compliant and cooperative
- b. Facing personal, family distress, and serious mental illness with impulse control issues**
- c. Calm and composed
- d. Highly agreeable and satisfied with therapy

2. How can psychologists deal with clients who make threats?

- a. By ignoring the potential danger
- b. By providing immediate termination of therapy
- c. By being mindful of the potential danger and careful advance planning**
- d. By avoiding any discussion of the issues

3. When should psychologists terminate therapy, as per ethical guidelines?

- a. Only when the therapist is dissatisfied
- b. When the client is consistently late for appointments

c. When the therapist disagrees with the client on major treatment issues or when the client no longer needs the service, is not likely to benefit, or is being harmed by continued service

d. Only when the therapist is relocating

4. According to the APA Ethical Principles of Psychologists and Code of Conduct, what does the principle of Beneficence and Nonmaleficence require psychologists to do?

a. Imposing personal values on clients

b. Striving to benefit those with whom they work and taking care to do no harm

c. Avoiding termination of therapy

d. Terminating therapy abruptly

5. What is the primary purpose of therapy termination according to the paragraph?

a. To benefit the therapist

b. To review progress made in treatment and plan for managing any recurrence of symptoms

c. To make both the therapist and client feel insecure

d. To avoid discussing the reason for termination

6. How can therapists enhance the therapy termination discussion, regardless of the reason for termination?

a. By blaming the client for termination

b. By getting defensive about the reason for termination

c. By arguing with the client

d. By being compassionate, clear, and direct

7. When is it recommended to send a termination letter to the client, according to the guidelines?

a. Only when the therapist is dissatisfied with the client

b. When terminating a short-term therapy

c. When terminating with a client who has difficulty processing the rejection, or because of a poor fit, or when a client repeatedly no-shows

d. Only when the therapist is retiring

8. What is the purpose of a termination letter in therapy?

a. To blame the client for therapy termination

b. To protect the therapist from potential claims of abandonment

c. To create unnecessary formality

d. To terminate therapy abruptly

9. What does the APA Ethics Code recommend regarding termination of therapy when a client is not likely to benefit or is being harmed?

- a. Immediate termination without any counseling
- b. Termination without providing alternative service providers
- c. Termination with pre-termination counseling and suggesting alternative service providers as appropriate**
- d. Continuing therapy despite potential harm

10. What should therapists avoid during the therapy termination discussion?

- a. Being compassionate and direct
- b. Arguing with the client**
- c. Blaming the client for termination
- d. Providing alternative service providers

Lecture # 21

1. What is a recommended strategy to ease the transition when terminating therapy due to a client's progress?

- a. Avoid discussing the therapeutic process
- b. Reflect on the client's growth and plan to discontinue contact**
- c. Encourage the client to abruptly stop therapy
- d. Discourage any discussion of personal growth

2. In what situations might a therapist terminate therapy with an unhappy client?

- a. When the client expresses happiness with the therapist's services
- b. When there are serious disagreements between the therapist and client**
- c. Only if the therapist is dissatisfied with the client
- d. If the client has minor objections to the therapist's philosophy

3. How should therapists handle accusations of wrongdoing from a client during therapy termination?

- a. Defend themselves and protect their ego
- b. Take careful notes and consider memorializing the termination in a letter**
- c. Avoid termination discussions

d. Accuse the client in return

4. When a therapist is not a good fit for a client according to their problems, what is a recommended action?

- a. Keep the client without addressing the fit issue
- b. Encourage the client to adapt to the therapist's style
- c. Offer a referral to a therapist who might be a better fit**
- d. Terminate therapy abruptly without explanation

5. What should therapists strive for regarding their personal beliefs, values, and attributes in therapy?

- a. Disclose them to clients
- b. Limit their awareness of such characteristics
- c. Strive for awareness and limit their practices appropriately**
- d. Impose them on clients

6. How should therapists handle practical and mental health concerns when a client repeatedly no-shows?

- a. Terminate therapy without notice
- b. Initiate unnecessary treatment
- c. Encourage the client to continue missing sessions
- d. Send a termination notice using the client's preferred method of communication**

7. What ethical problems may arise if a therapist plays on a client's fears, insecurities, or dependencies during therapy termination?

- a. None, as it is an acceptable practice
- b. It helps in continuing unnecessary treatment
- c. It is a common therapeutic strategy
- d. It raises ethical concerns**

8. When terminating therapy, what should therapists respect if the client is not willing to continue therapy due to practical issues?

- a. The therapist's preferences
- b. The therapist's financial concerns
- c. The client's decision**
- d. The therapist's emotional state

9. What is a therapist's role when a client achieves their therapy goals?

- a. Discourage further personal growth
- b. Transition them to a new therapist**
- c. Persuade them to continue therapy indefinitely

d. Ignore the progress made

10. What is a key element to address during therapy termination with an unhappy client?

- a. Accuse the client of dissatisfaction
- b. Discuss only what went well in therapy
- c. Avoid defensiveness**
- d. Blame the client for disagreements

11. In what situations might a therapist terminate therapy when threatened or endangered by the client or another person with whom the client has a relationship?

- a. Only in extreme cases of physical harm**
- b. Never, as therapists are obligated to continue therapy regardless
- c. When the therapist feels uncomfortable
- d. Only if there is a court order

12. What is a purpose of the termination letter in therapy?

- a. To blame the client for termination
- b. To memorialize the therapist's ego
