Psychologist

Psy516

- 👉 quiz from Handsout and conceptual
- 👉 sampling distribution short question
- 👉 statistics and its applications
- 👉 binomial distribution with example explain
- 👉 it numerical type tha question bhol giya 😊😊😊

Psy516 Statistics in psychology

OBJECTIVE

All mcqs are conceptual bht ajeeb thy formulas nhi thy

SUBJECTIVE

SHORT QUESTIONS

- 👉 Define histogram
- 👉 What are three types or measure of dispersions
- 👉 Numerical tha mean or standard deviance find krna tha

LONG QUESTIONS

- 👉 Define variables and describe its three 3 types
- 👉 steps of bar graph in frequency distribution
- 👉 explain binomial distribution

Mcqs

The descriptive statistics is ..

Answer is the summarize and organize the large set of data.

The mode of 2,3,3,5 ?

Answer 3

Mean of z score is ?

Answer 0

Probability of 3 times tosses is ..

Answer 3

In confidence interval one standard deviation is?

68 percent

In confidence interval the standard deviation is three?

99.7 percent

Center limit theorem is increase the sample proportion when the?

Answer normal shape curve

The mode of 22,33,5

Answer is 3

If the large the sample size then?

Reduced the sampling error

Correlation between the intelligence and grade is?

Negative

Hockey game man Jo graph used?

Answer histogram

One scenario that like student is selected from the country and something

Answer population

The spread of value of average?

Answer variations

The probability of 2 times tosses is ?

2

Answer 2

The trail of each and every success is ?

N

Answer .n

Psy516 paper 9:30

Measurement scale name?

Z-score numerical tha?

Prons and cons of inter qurtile rane?

Long questions

Importance of statistics?

Steps of polygon?

Standard error ?

Development psychology (Psy505) 12/6/2023

Mcqs ajeeb treen thy 😞

Na file sy thy aur handouts se bhi buht kam mostly conceptual aur wo bhi itny gumha kr k chkr bnty thy 😞

- 👉 1. Breathing problems new born babies
- 👉 2. Hyperactivity influences on subject
- 👉 3. Explain Interview and use in which research method??

Long.....

- 👉 1. Scenario tha social factor influence on development process(on twins brothers)
- 👉 2. School phobia in detail
- 👉 3.define sensorimotor and explain it's subtypes

Mcqs

The discriptive statics is ..

Answer is the summerize and organize the large set of data.

The mood of 2'33'5 ?

Answer 3

Mean of z score is ?

Answer 0

Probability of 3 times toses is ..

Answer 3

In confidence interval one strandard deviation is?

68 percent

In confidence interval the strandard deviation is three?

99.7 percent

Center limit theorem is increase the sample porportion when the?

Answer normal shape curve

The mood of 22,33,5

Answer is 3

If the large the sample size then?

Reduced the sampling error

Correlation between the intelligence and grade is?

Negative

Hockey game ma Jo graph used hota?

Answer histogram

One scanrio tha like student is selected from the country and something

Answer population

The scared of value of average?

Answer variations

The probability of 2 times toses is ?

2

Answer 2

The trail of each and every success is ?

N

Answer .n

Psy516 paper 9:30

Measurement scale name?

Z-score numerical tha?

Prons and cons of inter qurtile rane?

Long questions

Importance of statistics?

Steps of polygon?

Standard error ?

Psy516

Define interqurtile range with formula

Write the methods of central tendency and explain one of them?

Create the string variables?

Data viewer window in spss describe,?

Z score k about calculation?

Directional hypothesis test or one tailed test?

[14/06, 11:50] Mishi: Psy 516 Paper 10 :30

1: Cause and affect relationship of experimental design

2: group frequency distribution ko define krna tha

3: z score ka tha

[14/06, 11:52] Mishi: Long m:

1: joind and confidential probability ka tha

2: variable or uski types

3: bar graph ka thPsy516

Date: 10/6/2023

Two types of experimental research design? Discuss (5)

Note on directional hypothesis test or one trailed test with example. (5)

Write steps for the construction of pie chart and bar graph. (5)

Define confidence interval with example.(3)

Name three measurements of scale. (3)

And one question about finding mean median & mode .(3)
