To calculate the components required for the job cost sheet, let's break down each component step by step based on the provided information.

1. Prime Cost:

Prime cost is the sum of Direct Materials and Direct Labor.

Direct Materials:

Nov. 25: Rs. 15,300

Nov. 30: Rs. 25,800

Dec. 8: Rs. 17,400

Dec. 15: Rs. 13,600

Total Direct Materials = Rs. 15,300 + Rs. 25,800 + Rs. 17,400 + Rs. 13,600

Direct Labor:

Nov. 25: Rs. 1,900

Nov. 30: Rs. 13,400

Dec. 8: Rs. 21,100

Dec. 15: Rs. 16,200

MGT 402 GDB Solution

ZB

Total Direct Labor = Rs. 1,900 + Rs. 13,400 + Rs. 21,100 + Rs. 16,200

Prime Cost = Total Direct Materials + Total Direct Labor

2. Applied Factory Overhead:

Factory overhead is applied at 15% of the prime cost.

Applied Factory Overhead = 15% × Prime Cost

3. Gross Profit:

Gross profit is the difference between the contract price and the total job cost (which includes prime cost and applied factory overhead).

Gross Profit = Contract Price - (Prime Cost + Applied Factory Overhead)

4. Net Profit:

Net profit is calculated by subtracting the selling expenses and administrative expenses from the gross profit.

MGT 402 GDB Solution

ZB

Selling Expenses = 3% of the contract price

Administration Expenses = 2% of the contract price

Total Selling and Administration Expenses = Selling Expenses + Administration Expenses

Net Profit = Gross Profit - Total Selling and Administration Expenses

Let's calculate these values:

Total Direct Materials:

$$15,300 + 25,800 + 17,400 + 13,600 = 72,100$$

Total Direct Labor:

$$1,900 + 13,400 + 21,100 + 16,200 = 52,600$$

Prime Cost:

$$\text{Prime Cost} = 72,100 + 52,600 = 124,700$$

Applied Factory Overhead:

$$15\% \times 124,700 = 18,705$$

Gross Profit:

$$\begin{aligned} \text{Gross Profit} &= 300,000 - (124,700 + 18,705) = 300,000 - \\ &143,405 = 156,595 \end{aligned}$$

MGT 402 GDB Solution

ZB

Selling Expenses:

$$3\% \times 300,000 = 9,000$$

Administration Expenses:

$$2\% \times 300,000 = 6,000$$

Total Selling and Administration Expenses:

$$9,000 + 6,000 = 15,000$$

Net Profit:

$$\text{Net Profit} = 156,595 - 15,000 = 141,595$$

Final Report for the Job Cost Sheet:

Prime Cost: Rs. 124,700

Applied Factory Overhead: Rs. 18,705

Gross Profit: Rs. 156,595

Net Profit: Rs. 141,595

Passing criteria for a course

Letter Grade	Grade Points	Equivalent Percentage
A+	4.00	90-100
A	4.00	85-89
A-	3.66 - 3.99	80-84
B+	3.33 - 3.65	75-79
B	3.00 - 3.32	71-74
B-	2.66 - 2.99	68-70
C	2.00 - 2.65	61-67
D	1.00 - 1.99	50-60
F	0.00	00-49

Passing Criteria for a Course:

MGT 402 GDB Solution

ZB

The passing criteria is defined in such a way that it ensures the student shall be consistent in his studies throughout the semester.

Therefore, for passing a course/subject, student shall fulfill the following:

- a) Secure minimum **20%** score in Formative Assessments/Mid terms
- b) Secure minimum **20%** score in Final Term Examinations.
- c) Secure at least **40%** marks in aggregate while fulfilling the above requirements

Course Selection and Credit Hours

Q: How do I select courses when the course selection is open?

A: Follow these steps:

1. Check the credit hours allowed by your university (e.g., 21, 18, or 15 credit hours).
2. Each subject typically has 3 credit hours.
3. Divide the total allowed credit hours by 3 to determine how many subjects you can select.

Examples:

21 credit hours = 7 subjects

18 credit hours = 6 subjects

15 credit hours = 5 subjects

Remember, the university may allow different credit hours for each student, so check your specific allowance.

By following these steps, you can make informed decisions during course selection and manage your credit hours effectively.
