SOLUTION :

WHILE ANIMALS POSSESS REMARKABLE INTELLIGENCE AND SENSITIVITIES, THEIR COMMUNICATION SYSTEMS DIFFER SIGNIFICANTLY FROM HUMAN LANGUAGE. ANIMAL COMMUNICATION SERVES PRIMARILY TO CONVEY EMOTIONS, ALERT TO DANGERS, AND MAINTAIN SOCIAL COHESION WITHIN THEIR GROUPS. IT LACKS THE KEY CHARACTERISTICS THAT DEFINE LANGUAGE, SUCH AS:

1. **ARBITRARINESS:** ANIMAL SIGNALS ARE DIRECTLY LINKED TO THE EMOTIONS OR SITUATIONS THEY REPRESENT, UNLIKE HUMAN LANGUAGE, WHERE WORDS AND SYMBOLS ARE ARBITRARILY ASSIGNED TO MEANINGS.

2. **PRODUCTIVITY:** ANIMALS CANNOT COMBINE SIGNALS IN NEW WAYS TO FORM NOVEL EXPRESSIONS, UNLIKE HUMANS WHO CAN CREATE AN INFINITE NUMBER OF SENTENCES USING A FINITE SET OF WORDS.

3. **DISPLACEMENT:** ANIMALS CANNOT REFER TO THINGS OR EVENTS THAT ARE NOT PHYSICALLY PRESENT, UNLIKE HUMANS WHO CAN DISCUSS THE PAST, PRESENT, OR FUTURE.

4. **DUALITY:** ANIMAL COMMUNICATION SYSTEMS DO NOT HAVE DISTINCT LEVELS OF MEANING, SUCH AS THE COMBINATION OF SOUNDS (PHONEMES) TO FORM WORDS (MORPHEMES) AND WORDS TO FORM SENTENCES (GRAMMAR), AS SEEN IN HUMAN LANGUAGE.

5. **OPENNESS:** ANIMAL COMMUNICATION SYSTEMS ARE LARGELY CLOSED, MEANING THEY ARE LIMITED TO A SPECIFIC REPERTOIRE OF SIGNALS AND CANNOT EASILY INCORPORATE NEW CONCEPTS OR IDEAS.

DUE TO THESE LIMITATIONS, ANIMAL COMMUNICATION IS NOT CONSIDERED A "LANGUAGE" IN THE SAME WAY THAT HUMAN LANGUAGE IS. HOWEVER, IT REMAINS A SOPHISTICATED AND COMPLEX SYSTEM THAT ALLOWS ANIMALS TO INTERACT EFFECTIVELY WITHIN THEIR ENVIRONMENTS.
