LEARNING HELP BY WAQAS QURESHI

If software testing team's defect removal efficiency is 80% then _____.

Select the correct option

- 80% bugs still exist in application
- Zero bugs exist in application
- 20% bugs still exist in application
- 50% bugs removed from application

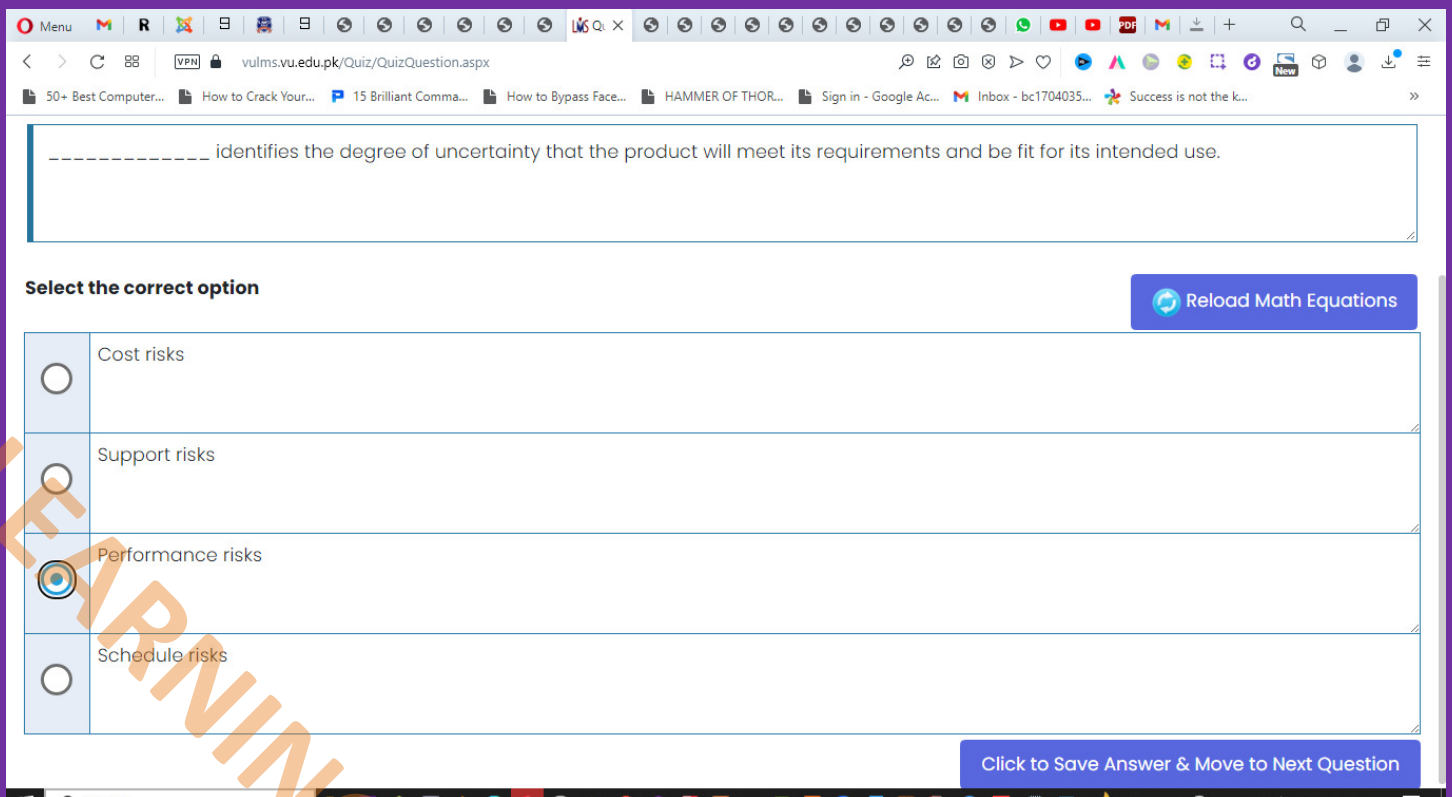

In order to use the PERT and CPM, which one of the followings is NOT required?

Select the correct option

- Estimation of effort.
- Decomposition of tasks – also known as the work breakdown structure (WBS).
- Teams communication mode details.
- Interdependencies.

LEARNING4HELP BY WAQAS QURESHI

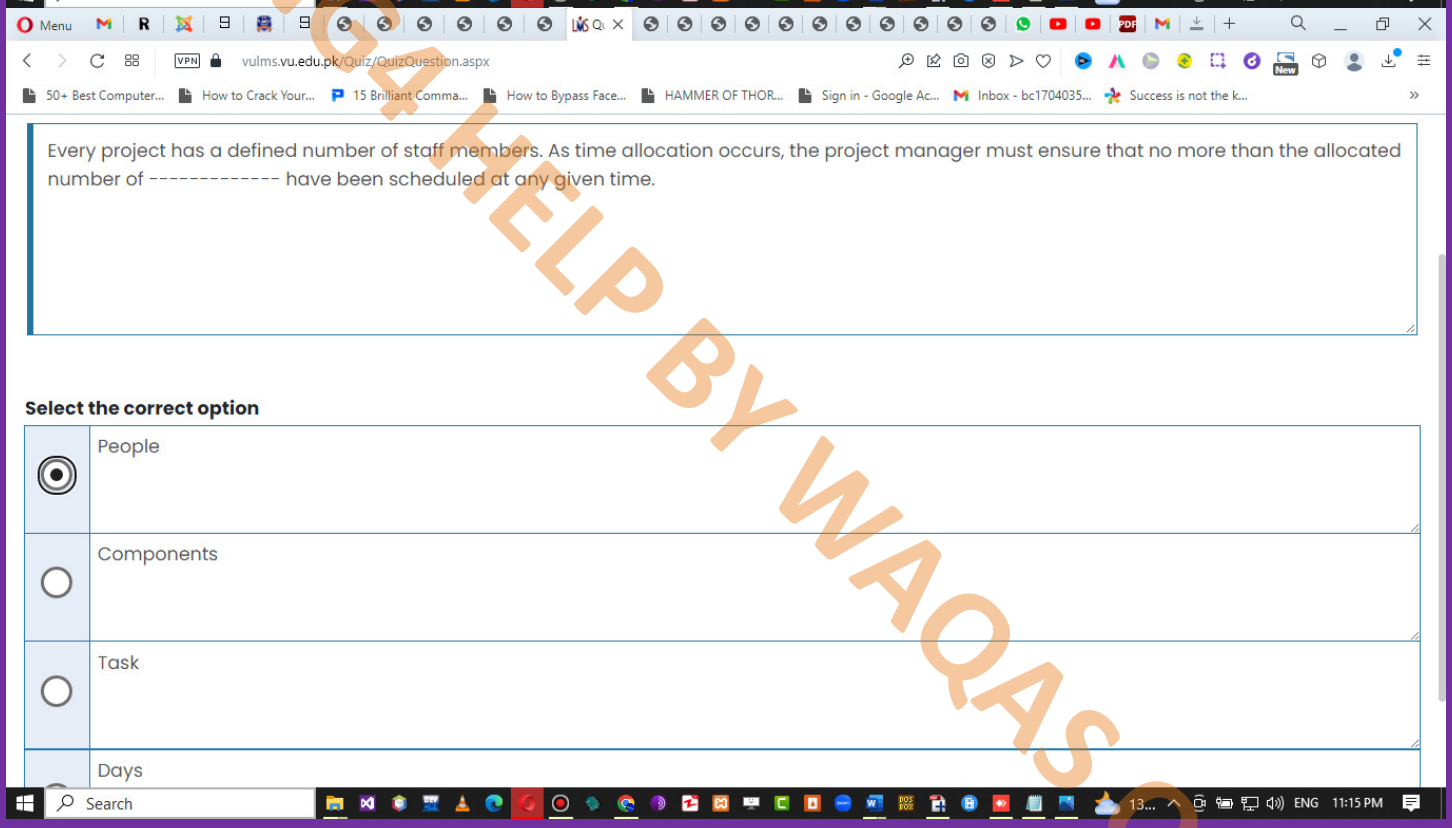

_____ identifies the degree of uncertainty that the product will meet its requirements and be fit for its intended use.

Select the correct option

Reload Math Equations

- Cost risks
- Support risks
- Performance risks
- Schedule risks

Click to Save Answer & Move to Next Question

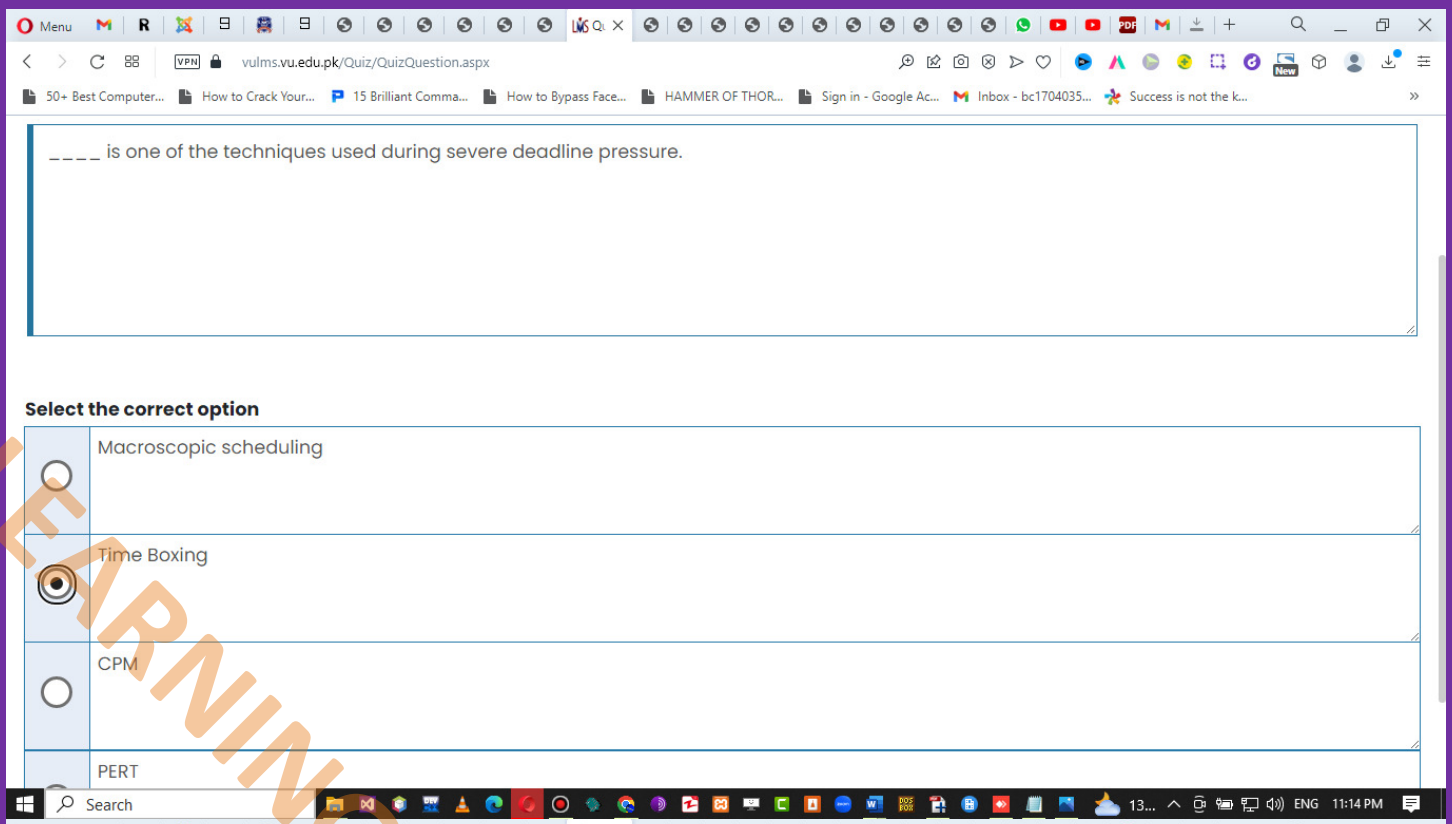

Every project has a defined number of staff members. As time allocation occurs, the project manager must ensure that no more than the allocated number of ---------- have been scheduled at any given time.

Select the correct option

- People
- Components
- Task
- Days

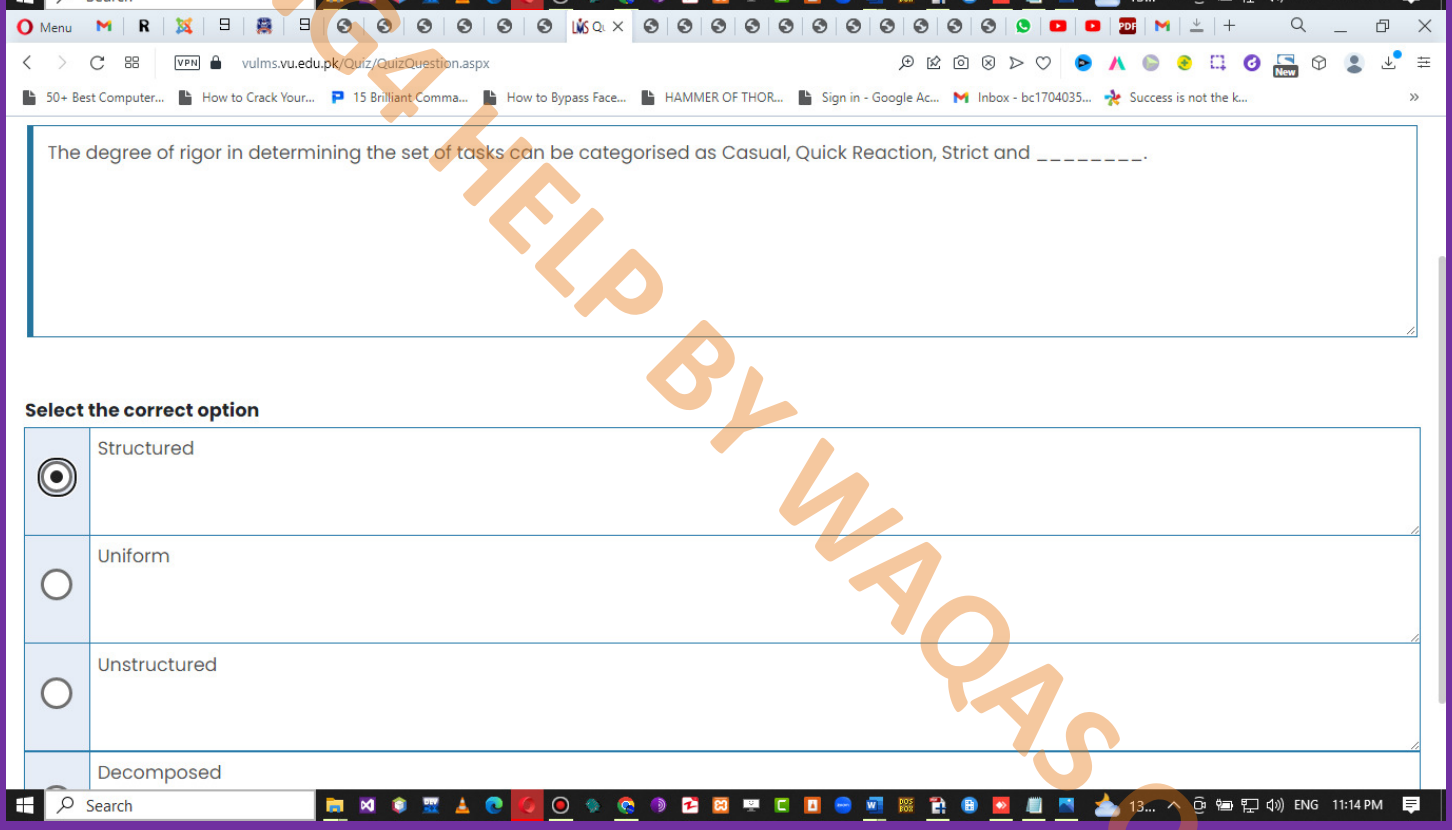

LEARNING4 HELP BY WAQAS QURESHI

____ is one of the techniques used during severe deadline pressure.

Select the correct option

- Macroscopic scheduling
- Time Boxing
- CPM
- PERT

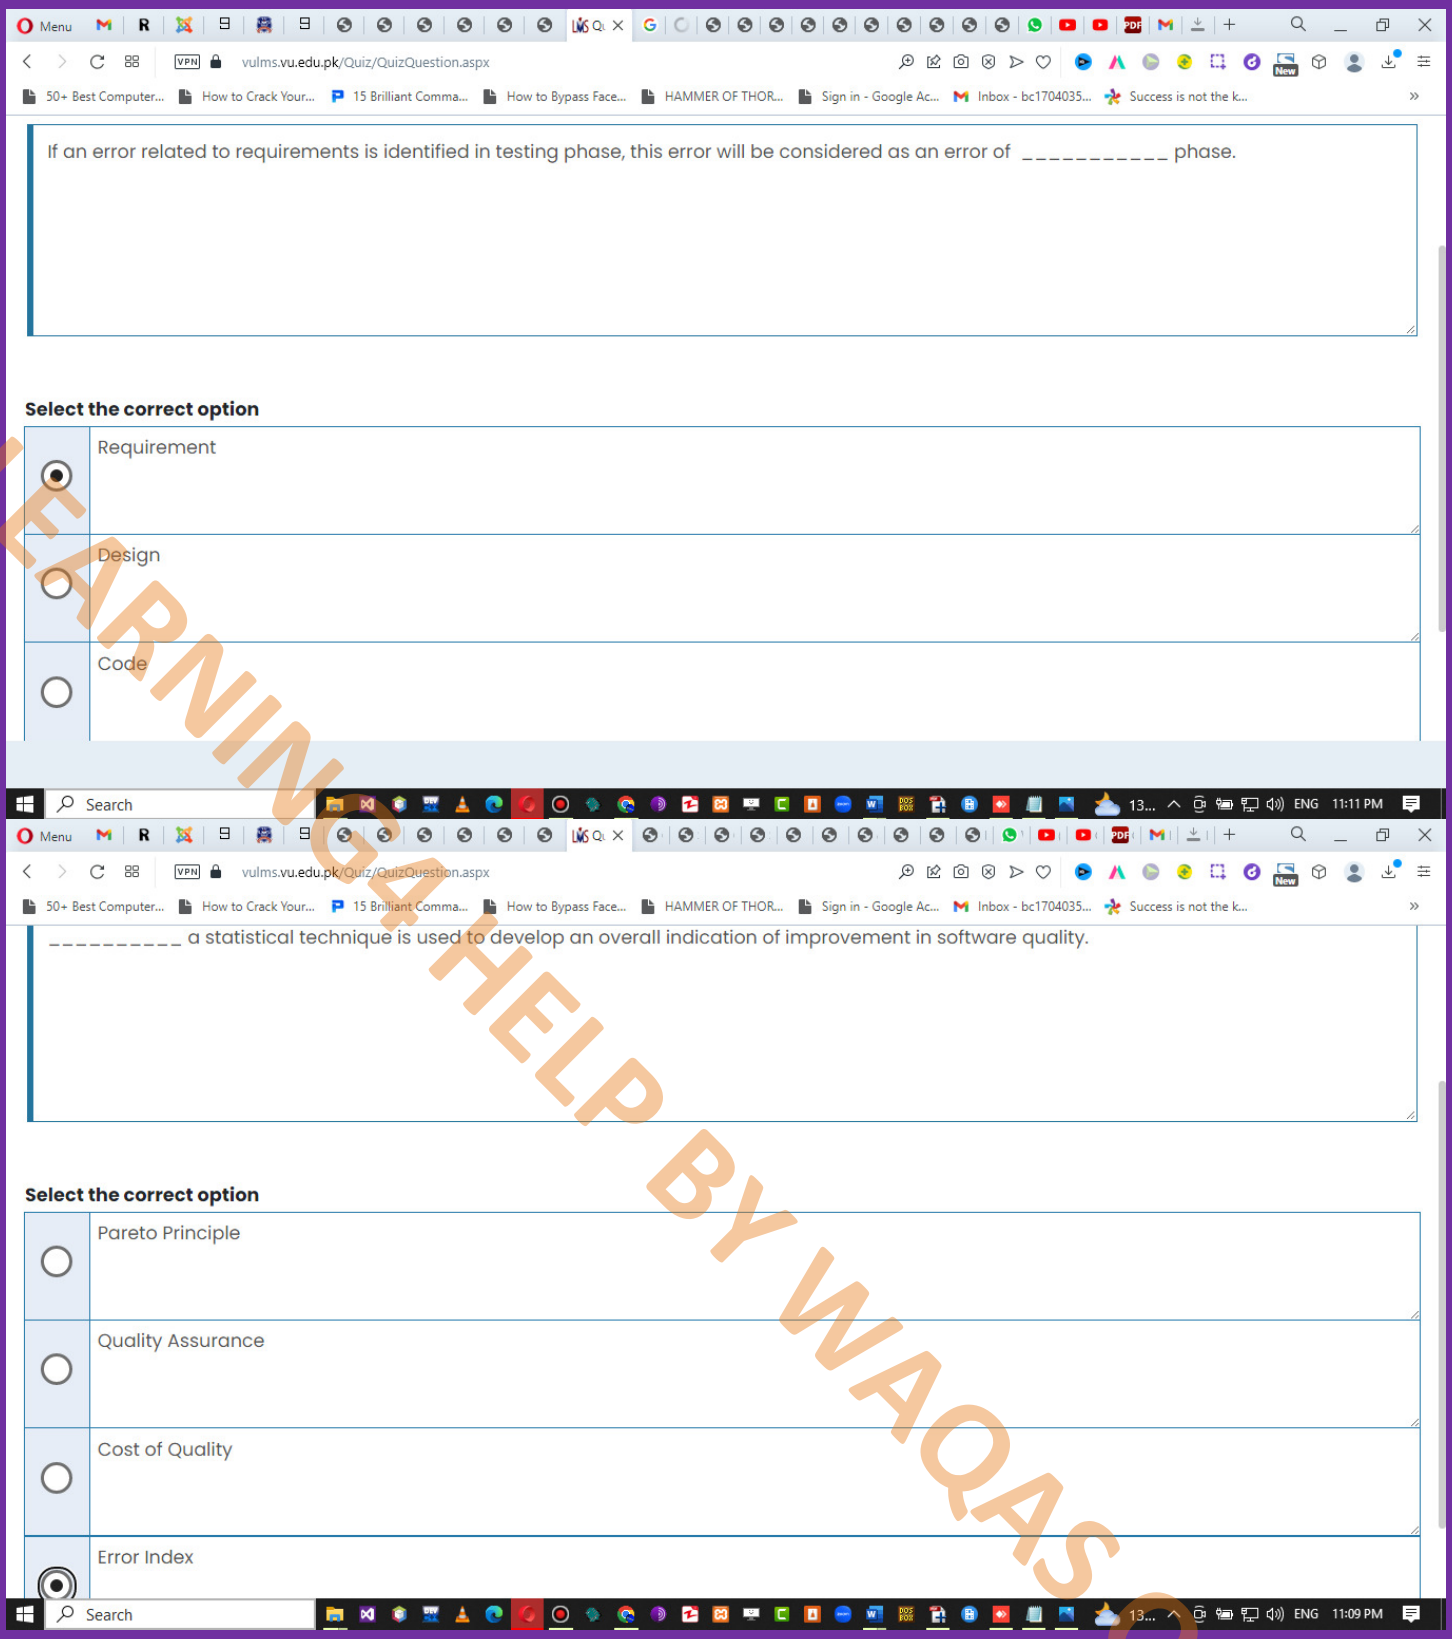

The degree of rigor in determining the set of tasks can be categorised as Casual, Quick Reaction, Strict and _____.

Select the correct option

- Structured
- Uniform
- Unstructured
- Decomposed

LEARNING4 HELP BY WAQAS QURESHI

If an error related to requirements is identified in testing phase, this error will be considered as an error of _____ phase.

Select the correct option

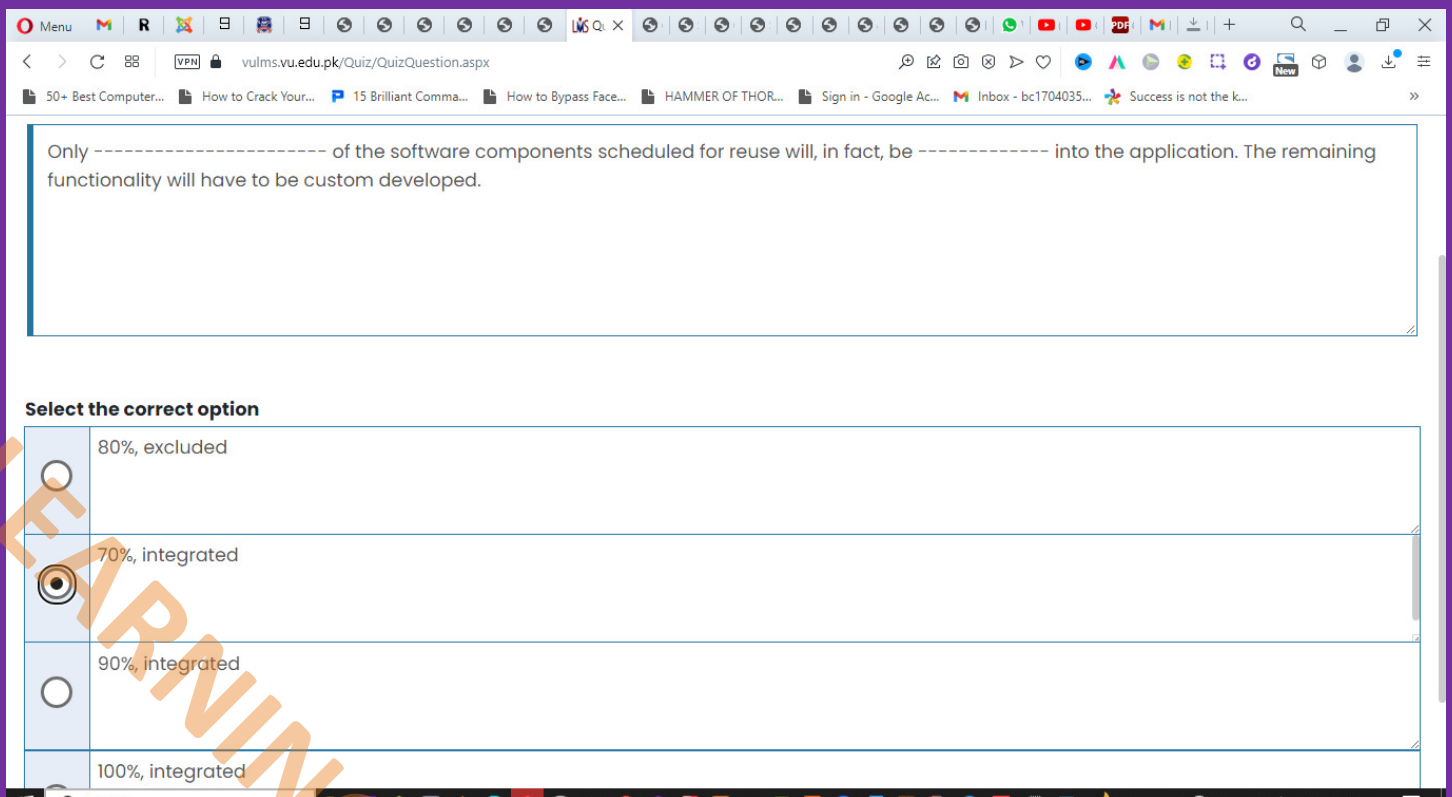

- Requirement
- Design
- Code

_____ a statistical technique is used to develop an overall indication of improvement in software quality.

Select the correct option

- Pareto Principle
- Quality Assurance
- Cost of Quality
- Error Index

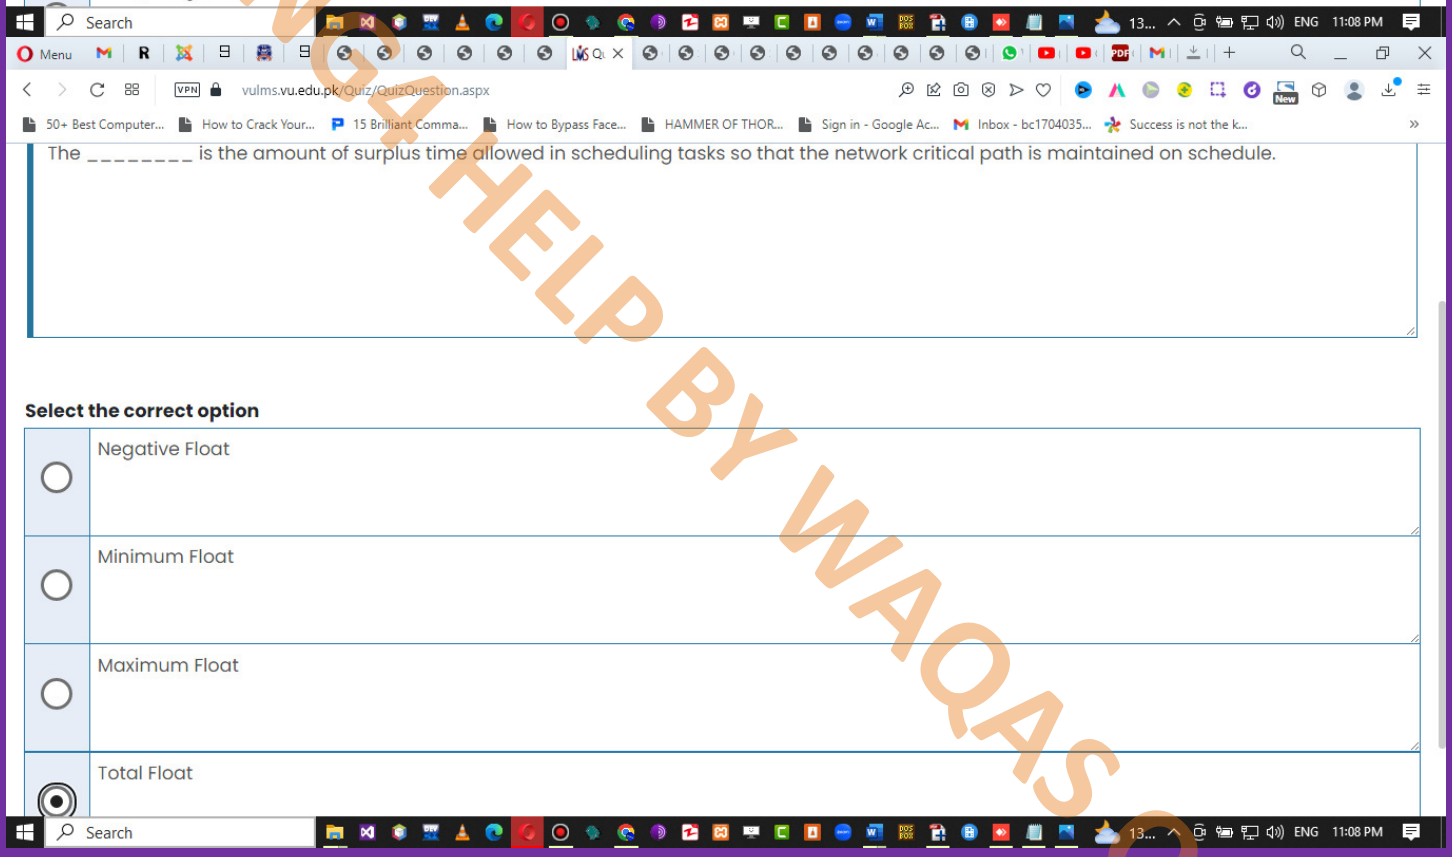

LEARNING4 HELP BY WAQAS QURESHI

Only ---------- of the software components scheduled for reuse will, in fact, be ---------- into the application. The remaining functionality will have to be custom developed.

Select the correct option

- 80%, excluded
- 70%, integrated
- 90%, integrated
- 100%, integrated

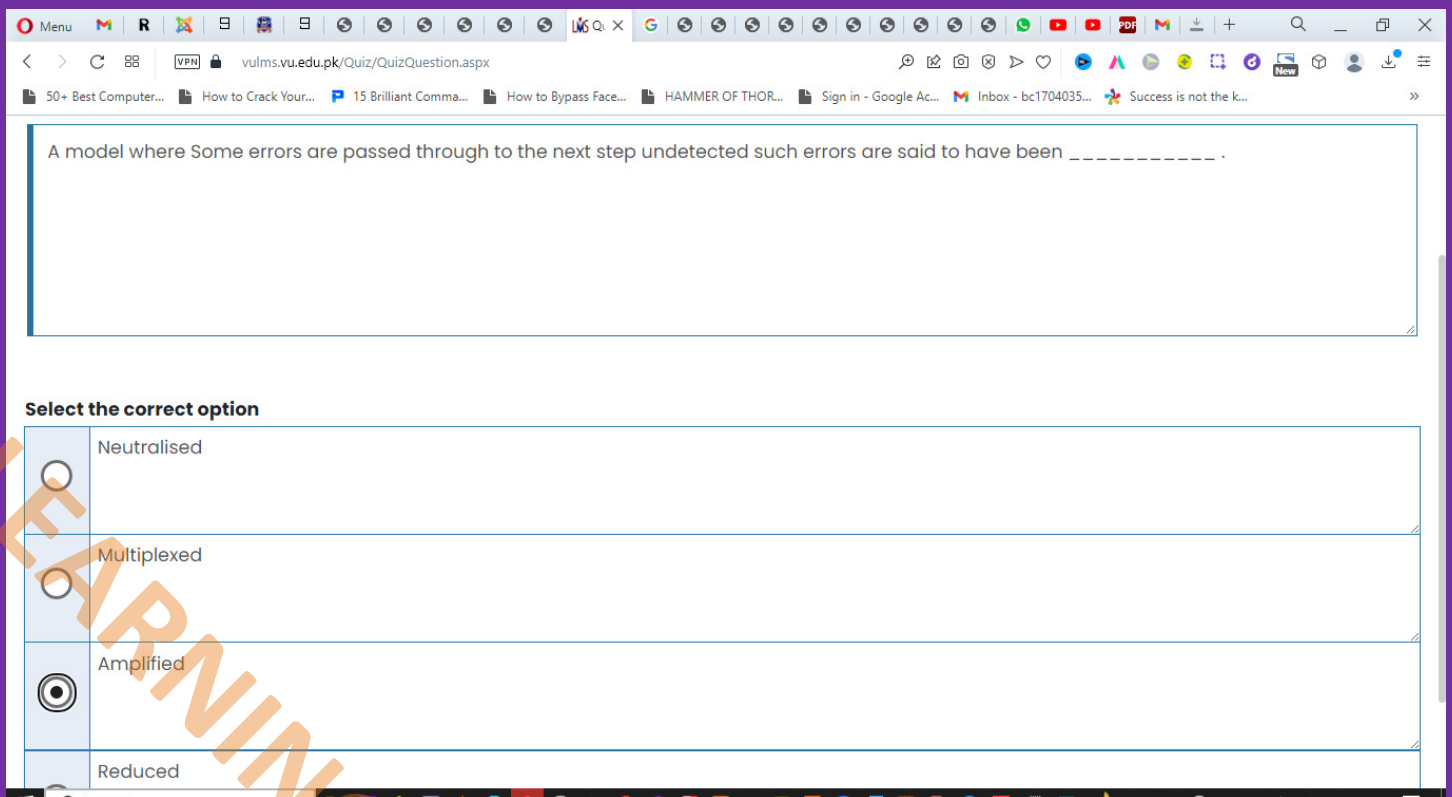

The _____ is the amount of surplus time allowed in scheduling tasks so that the network critical path is maintained on schedule.

Select the correct option

- Negative Float
- Minimum Float
- Maximum Float
- Total Float

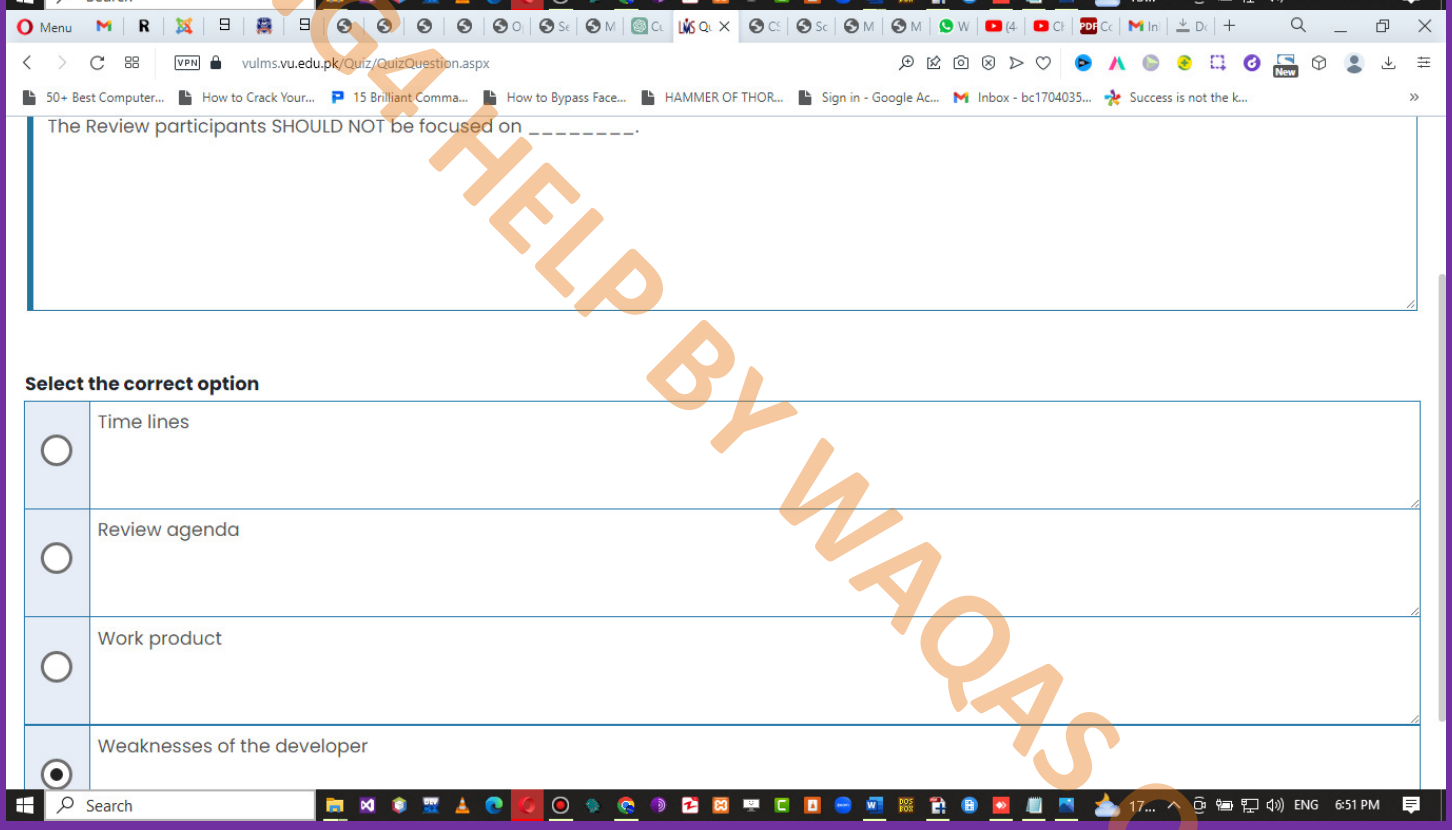

LEARNING & HELP BY WAQAS QURESHI

A model where Some errors are passed through to the next step undetected such errors are said to have been _____ .

Select the correct option

- Neutralised
- Multiplexed
- Amplified
- Reduced

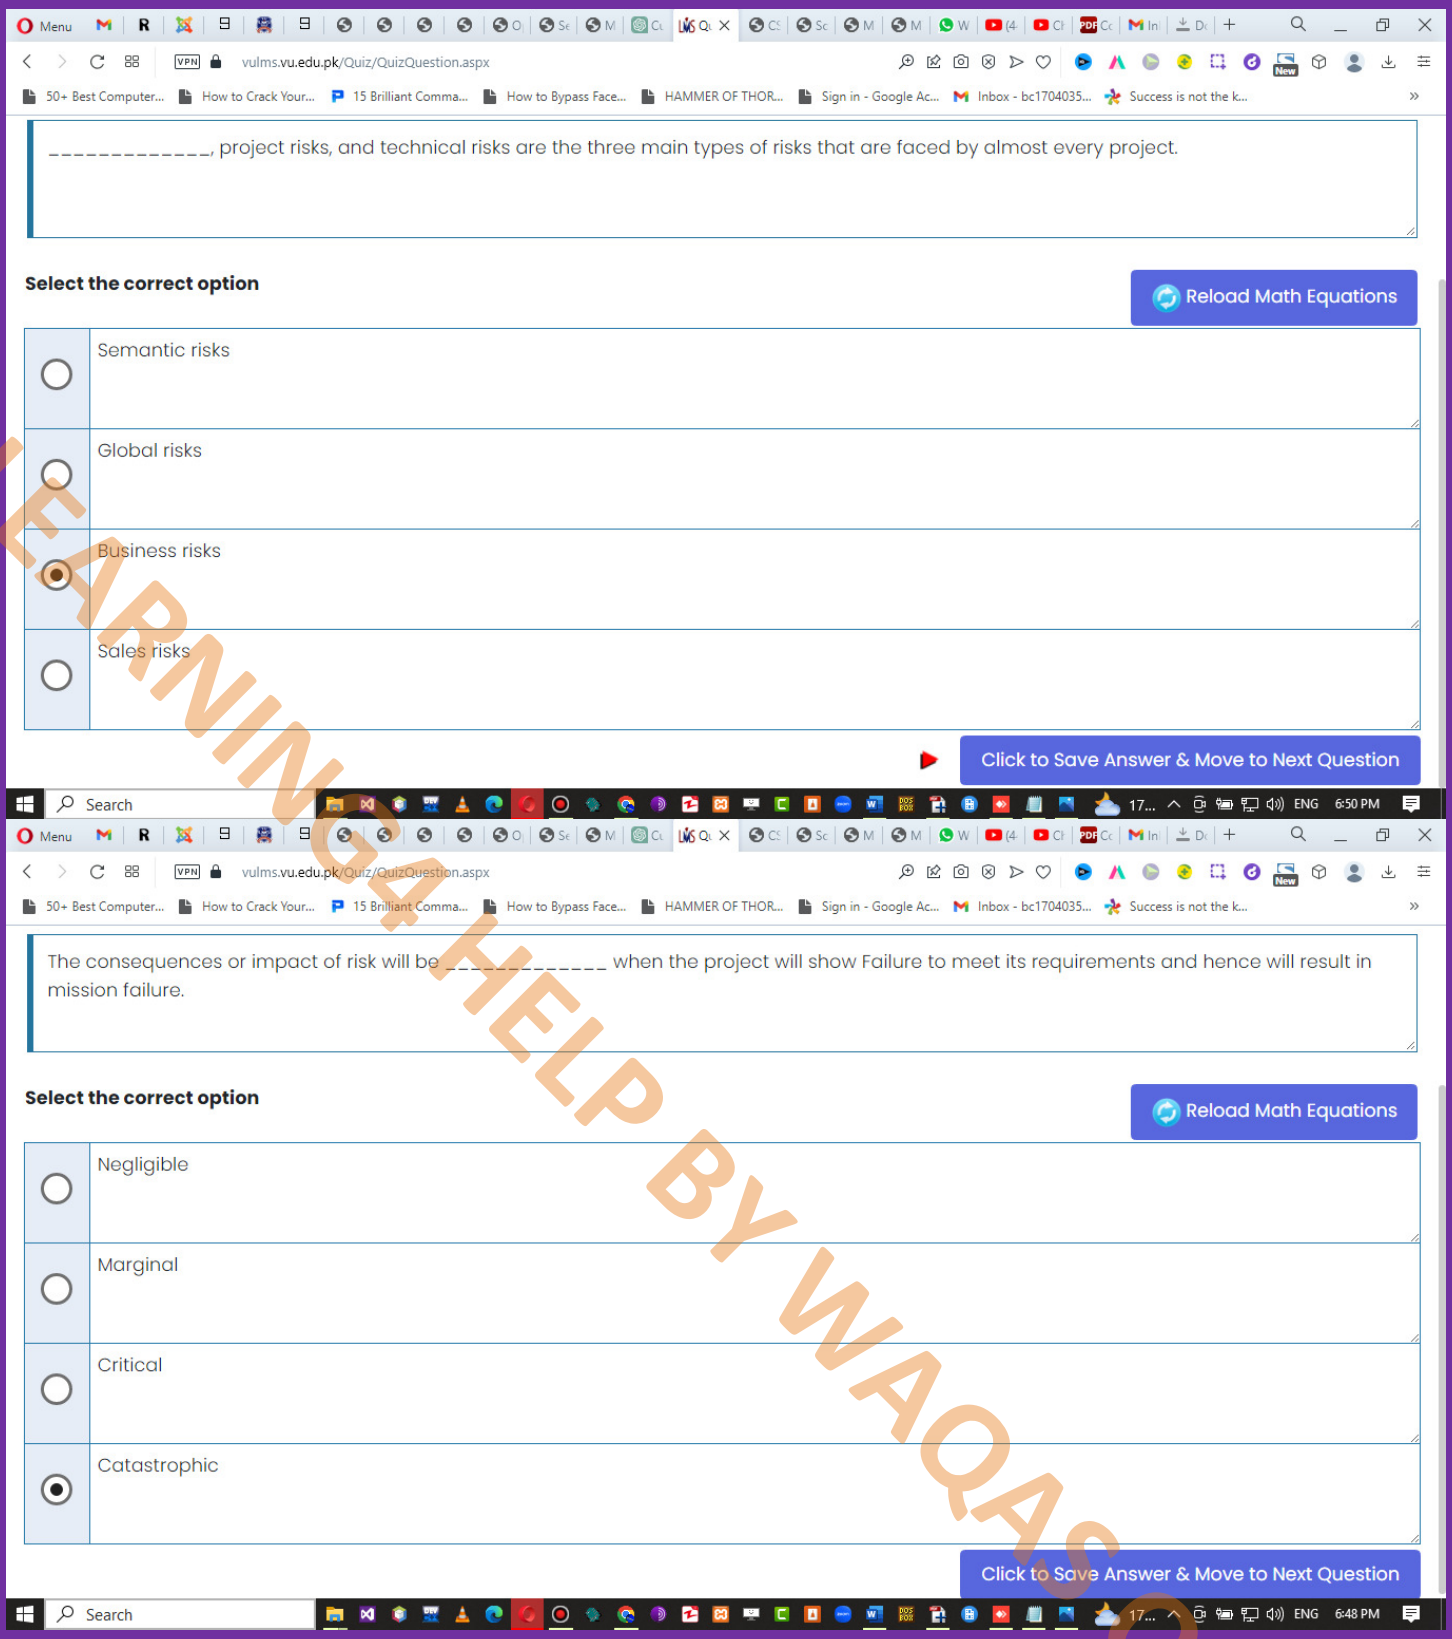

The Review participants SHOULD NOT be focused on _____.

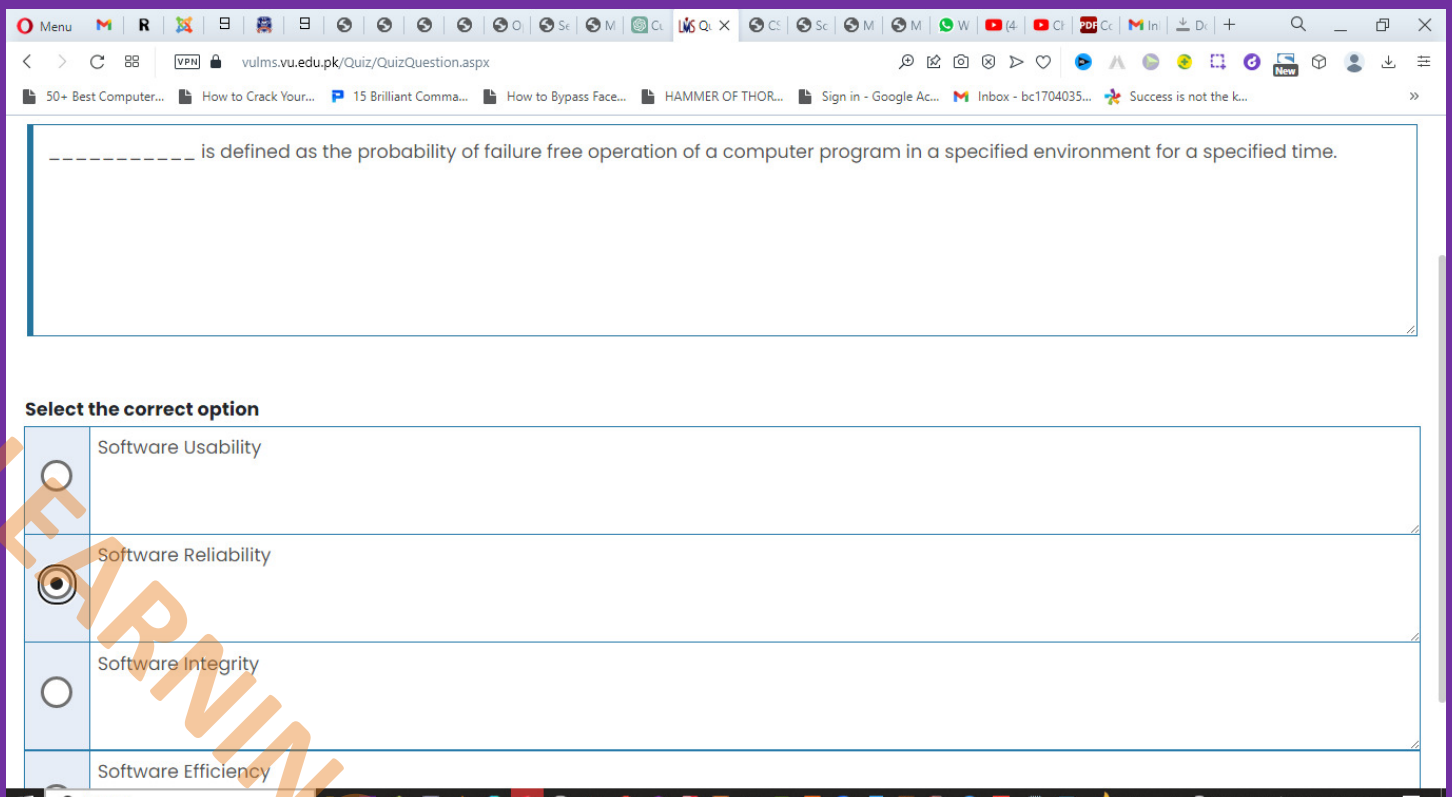

Select the correct option

- Time lines
- Review agenda
- Work product
- Weaknesses of the developer

LEARNING4 HELP BY WAQAS QURESHI

_____ is defined as the probability of failure free operation of a computer program in a specified environment for a specified time.

Select the correct option

- Software Usability
- Software Reliability
- Software Integrity
- Software Efficiency

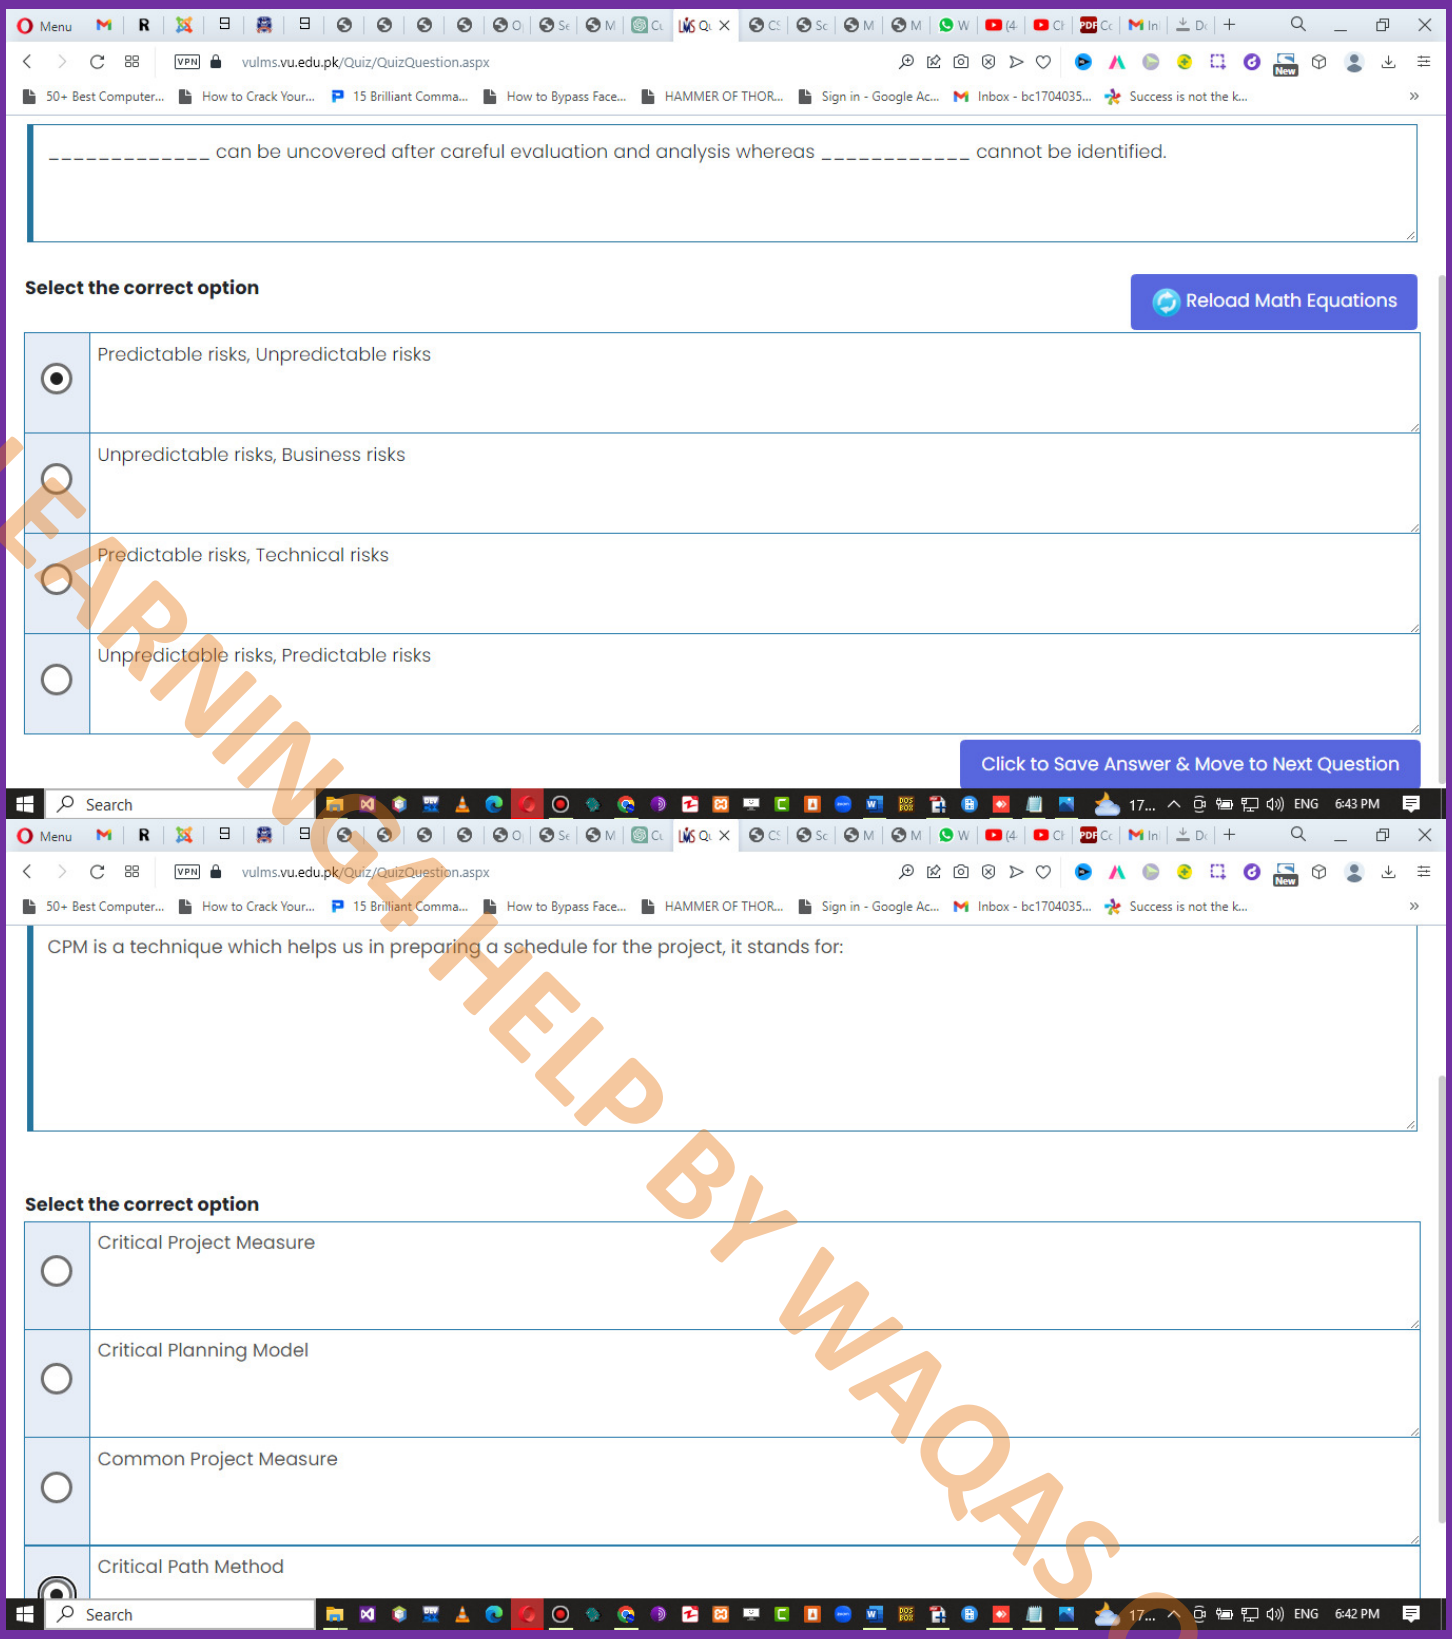

If software testing team's defect removal efficiency is 80% then _____.

Select the correct option

- Zero bugs exist in application
- 80% bugs still exist in application
- 50% bugs removed from application
- 20% bugs still exist in application

LEARNING4 HELP BY WAQAS QURESHI

_____ can be uncovered after careful evaluation and analysis whereas _____ cannot be identified.

Select the correct option

Reload Math Equations

- Predictable risks, Unpredictable risks
- Unpredictable risks, Business risks
- Predictable risks, Technical risks
- Unpredictable risks, Predictable risks

CPM is a technique which helps us in preparing a schedule for the project, it stands for:

Select the correct option

- Critical Project Measure
- Critical Planning Model
- Common Project Measure
- Critical Path Method

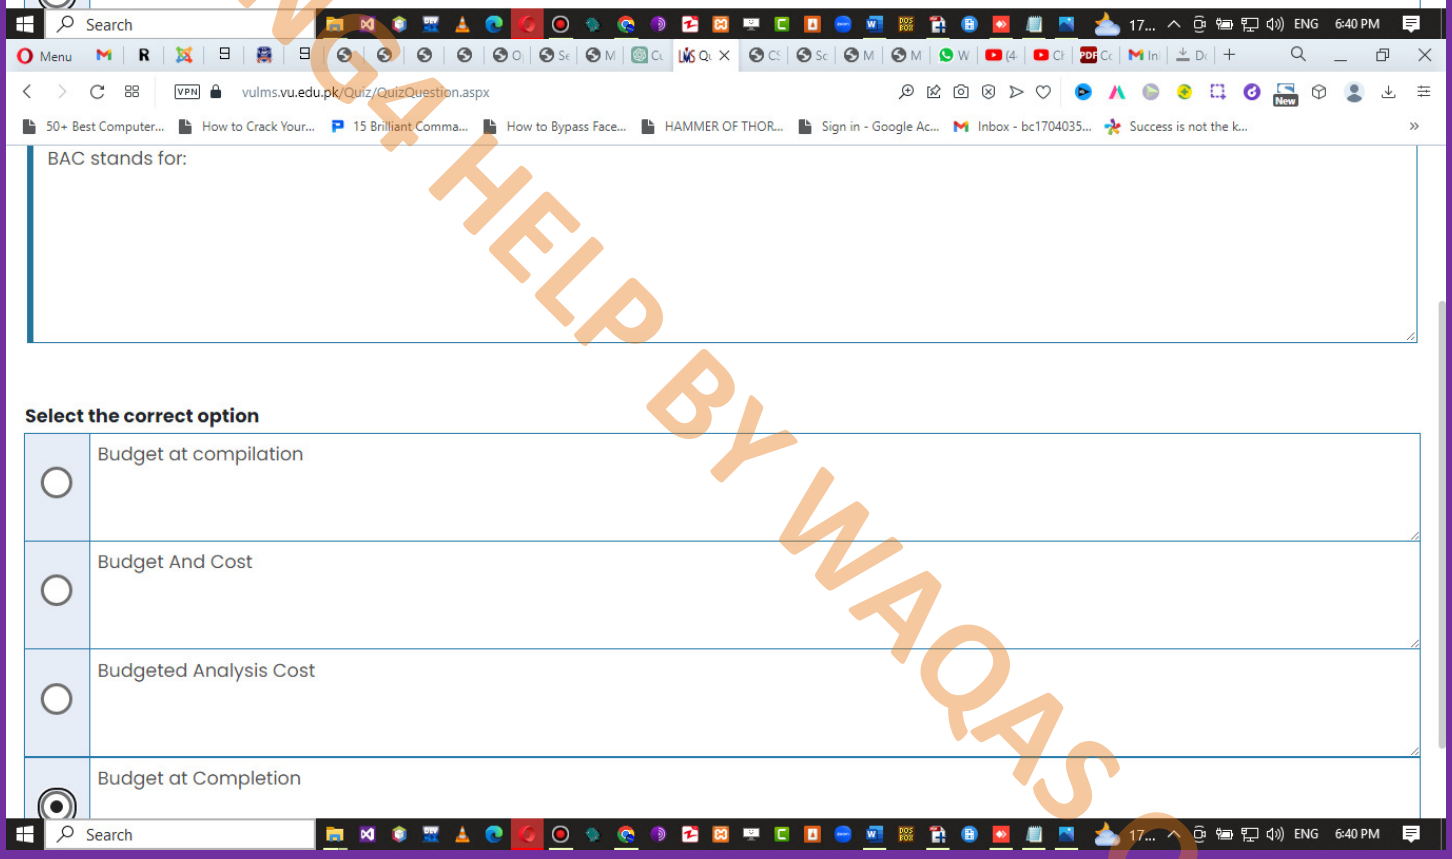

LEARNING4 HELP BY WAQAS QURESHI

It is noted that a/an _____ review can be worse than no review at all.

Select the correct option

- Intermediate
- Controlled
- Normal
- Uncontrolled

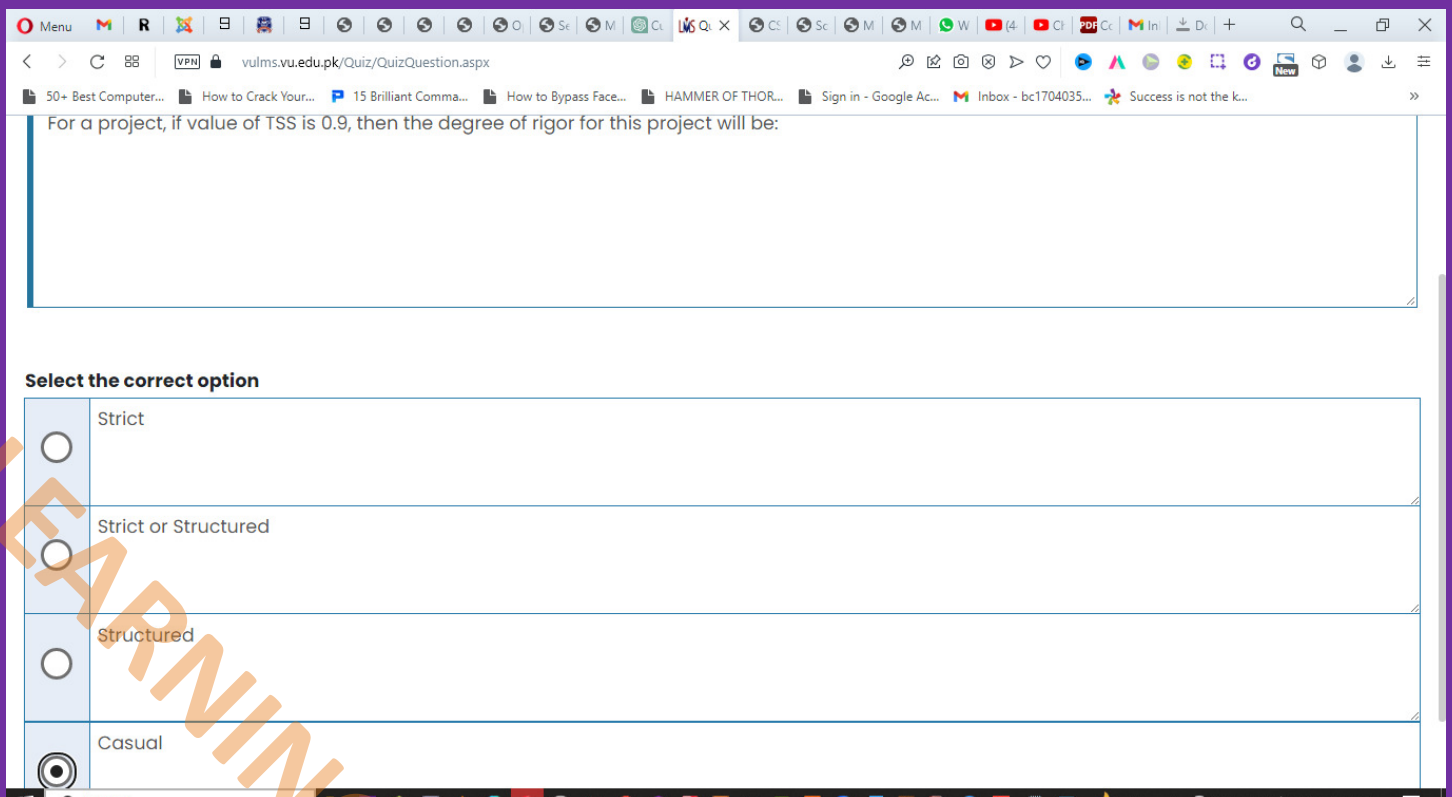

BAC stands for:

Select the correct option

- Budget at compilation
- Budget And Cost
- Budgeted Analysis Cost
- Budget at Completion

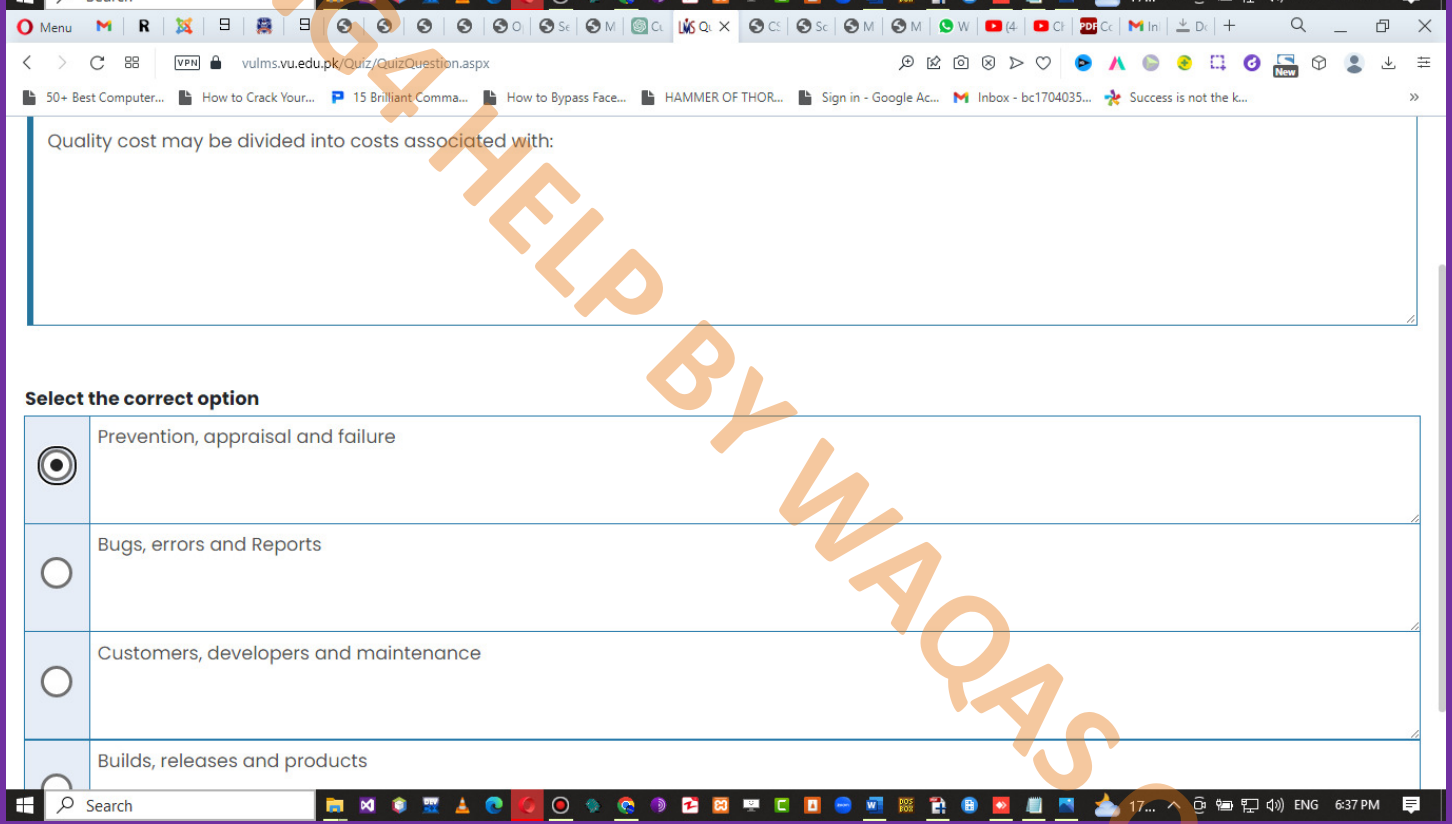

LEARNING4 HELP BY WAQAS QURESHI

For a project, if value of TSS is 0.9, then the degree of rigor for this project will be:

Select the correct option

- Strict
- Strict or Structured
- Structured
- Casual

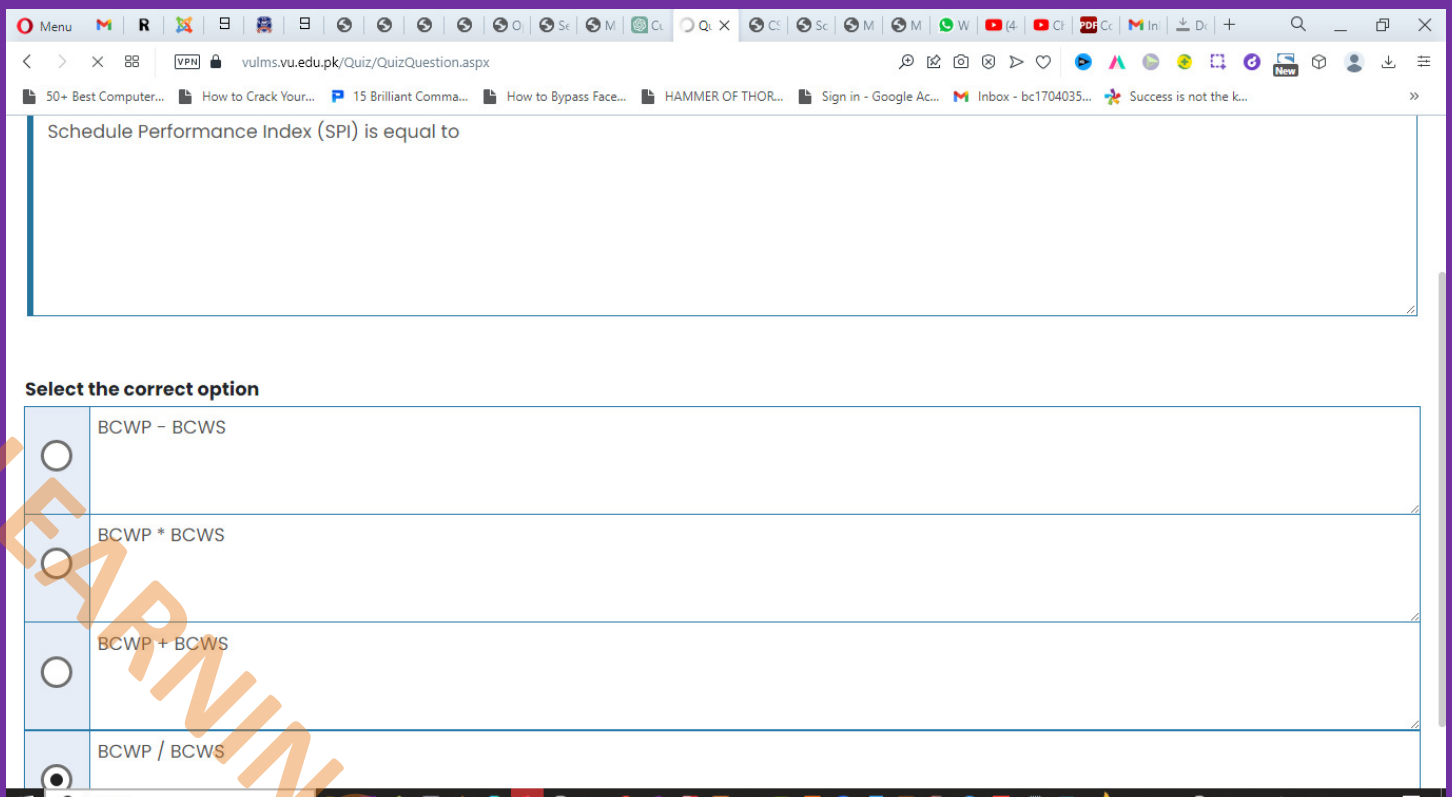

Quality cost may be divided into costs associated with:

Select the correct option

- Prevention, appraisal and failure
- Bugs, errors and Reports
- Customers, developers and maintenance
- Builds, releases and products

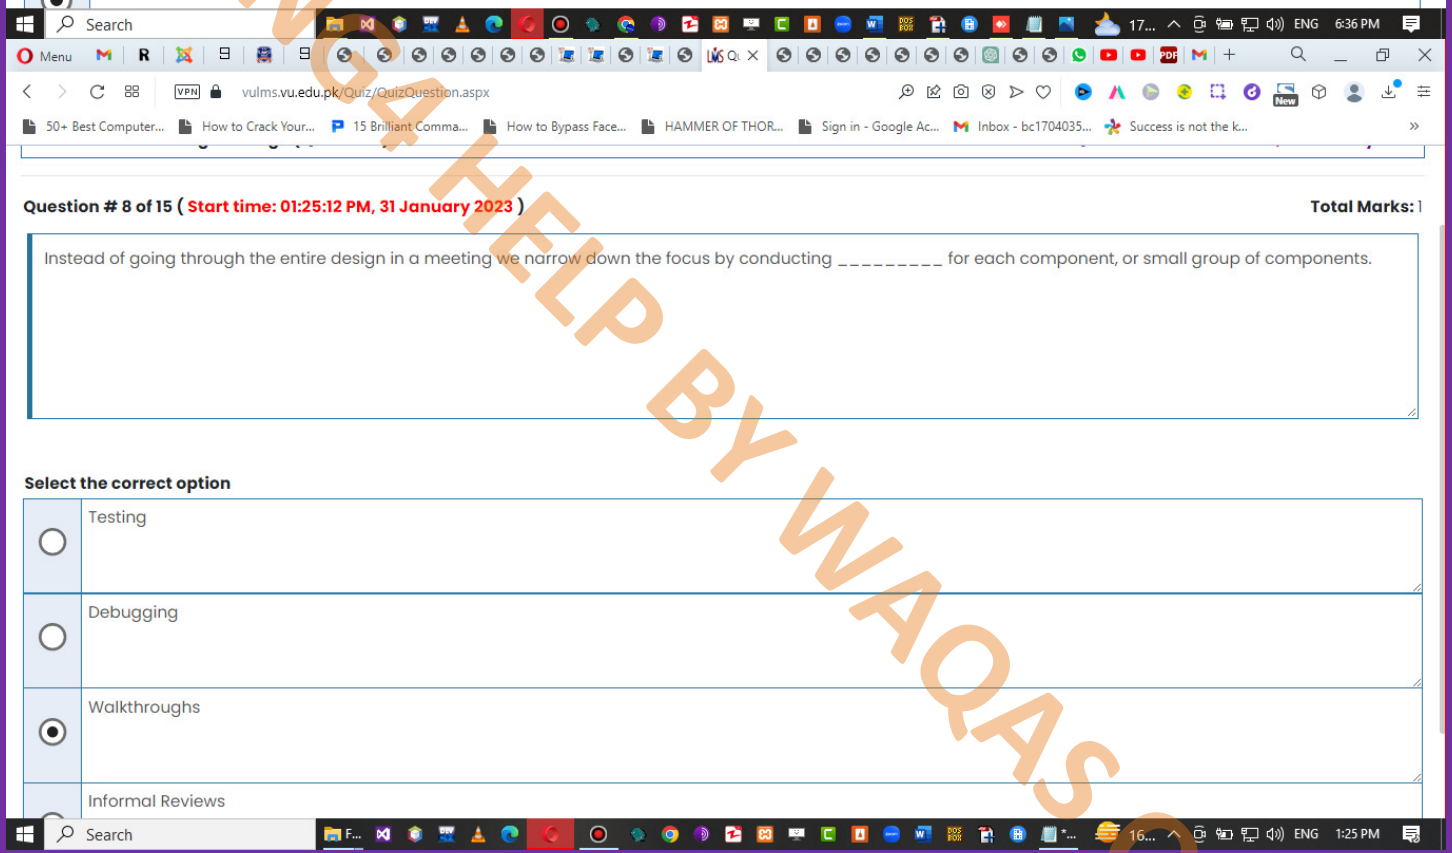

LEARNING4 HELP BY WAQAS QURESHI

Schedule Performance Index (SPI) is equal to

Select the correct option

- BCWP – BCWS
- BCWP * BCWS
- BCWP + BCWS
- BCWP / BCWS

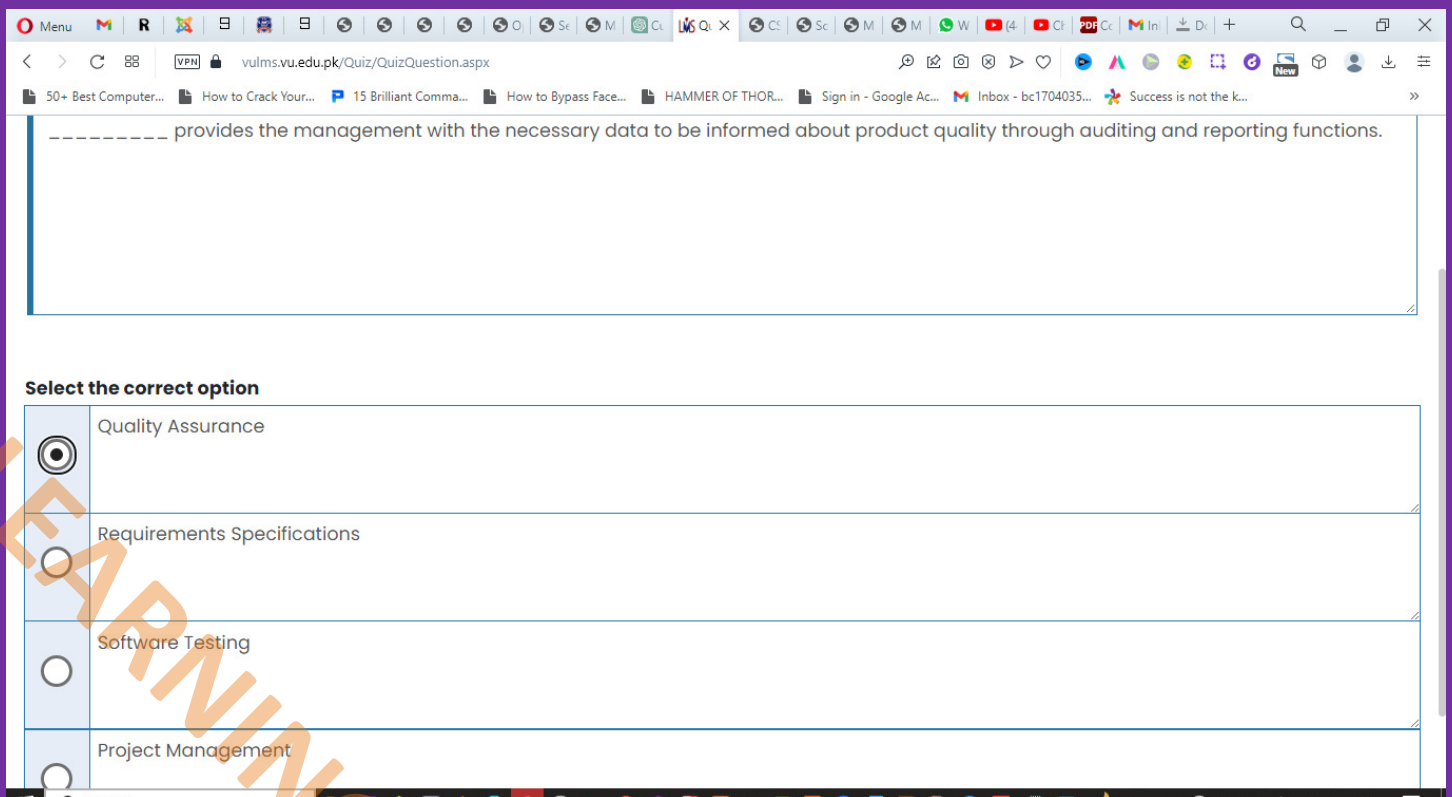

Question # 8 of 15 (Start time: 01:25:12 PM, 31 January 2023) **Total Marks:** 1

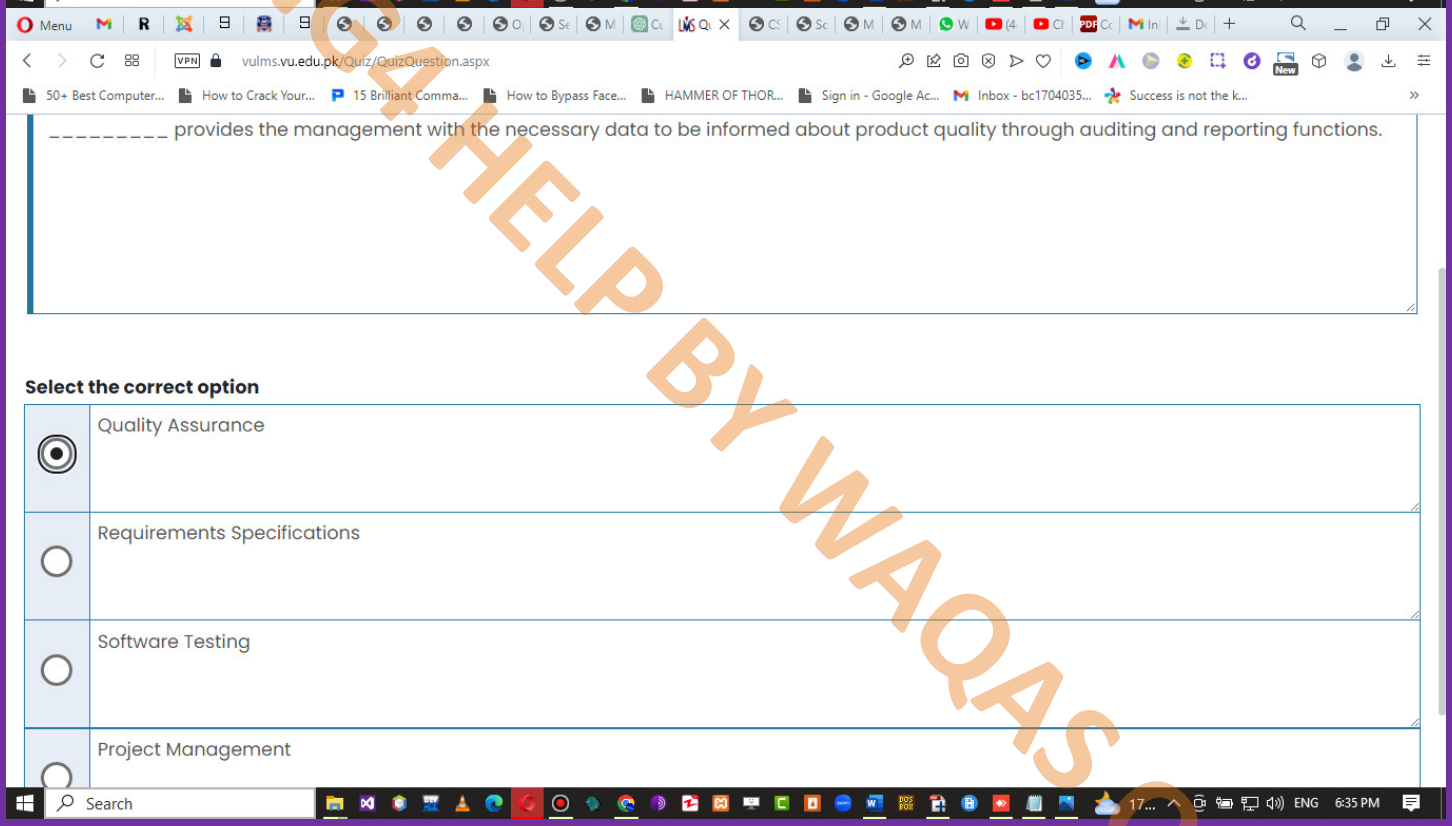

Instead of going through the entire design in a meeting we narrow down the focus by conducting _____ for each component, or small group of components.

Select the correct option

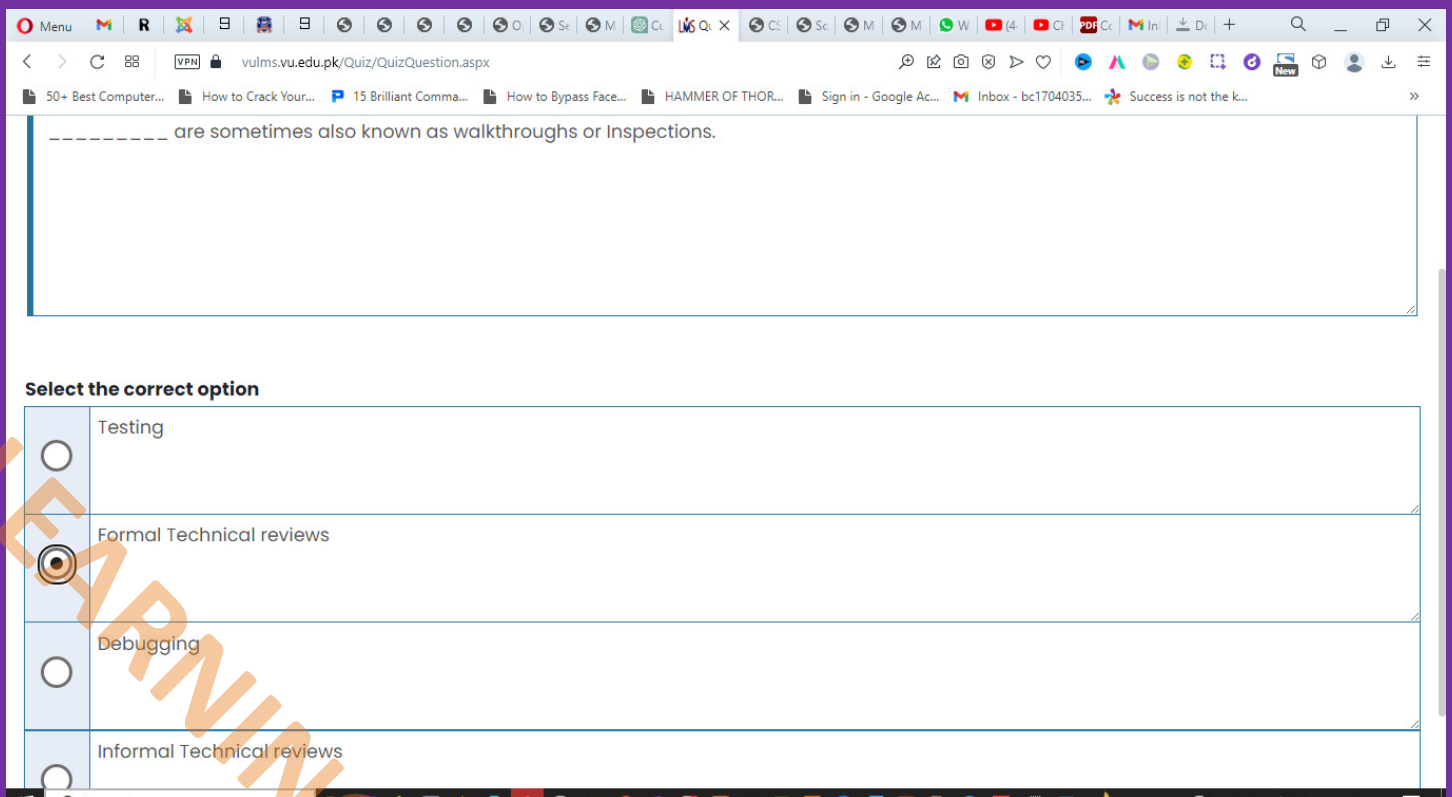

- Testing
- Debugging
- Walkthroughs
- Informal Reviews

Question # 13 of 15 (Start time: 01:29:14 PM, 31 January 2023) **Total Marks:** 1

Error-free designed software requirements but wrongly gathered by requirement engineers will return _____.

Select the correct option

- (●) Unwelcome product
- ( ) Absolutely correct product
- ( ) Desired product
- ( ) Accurate product

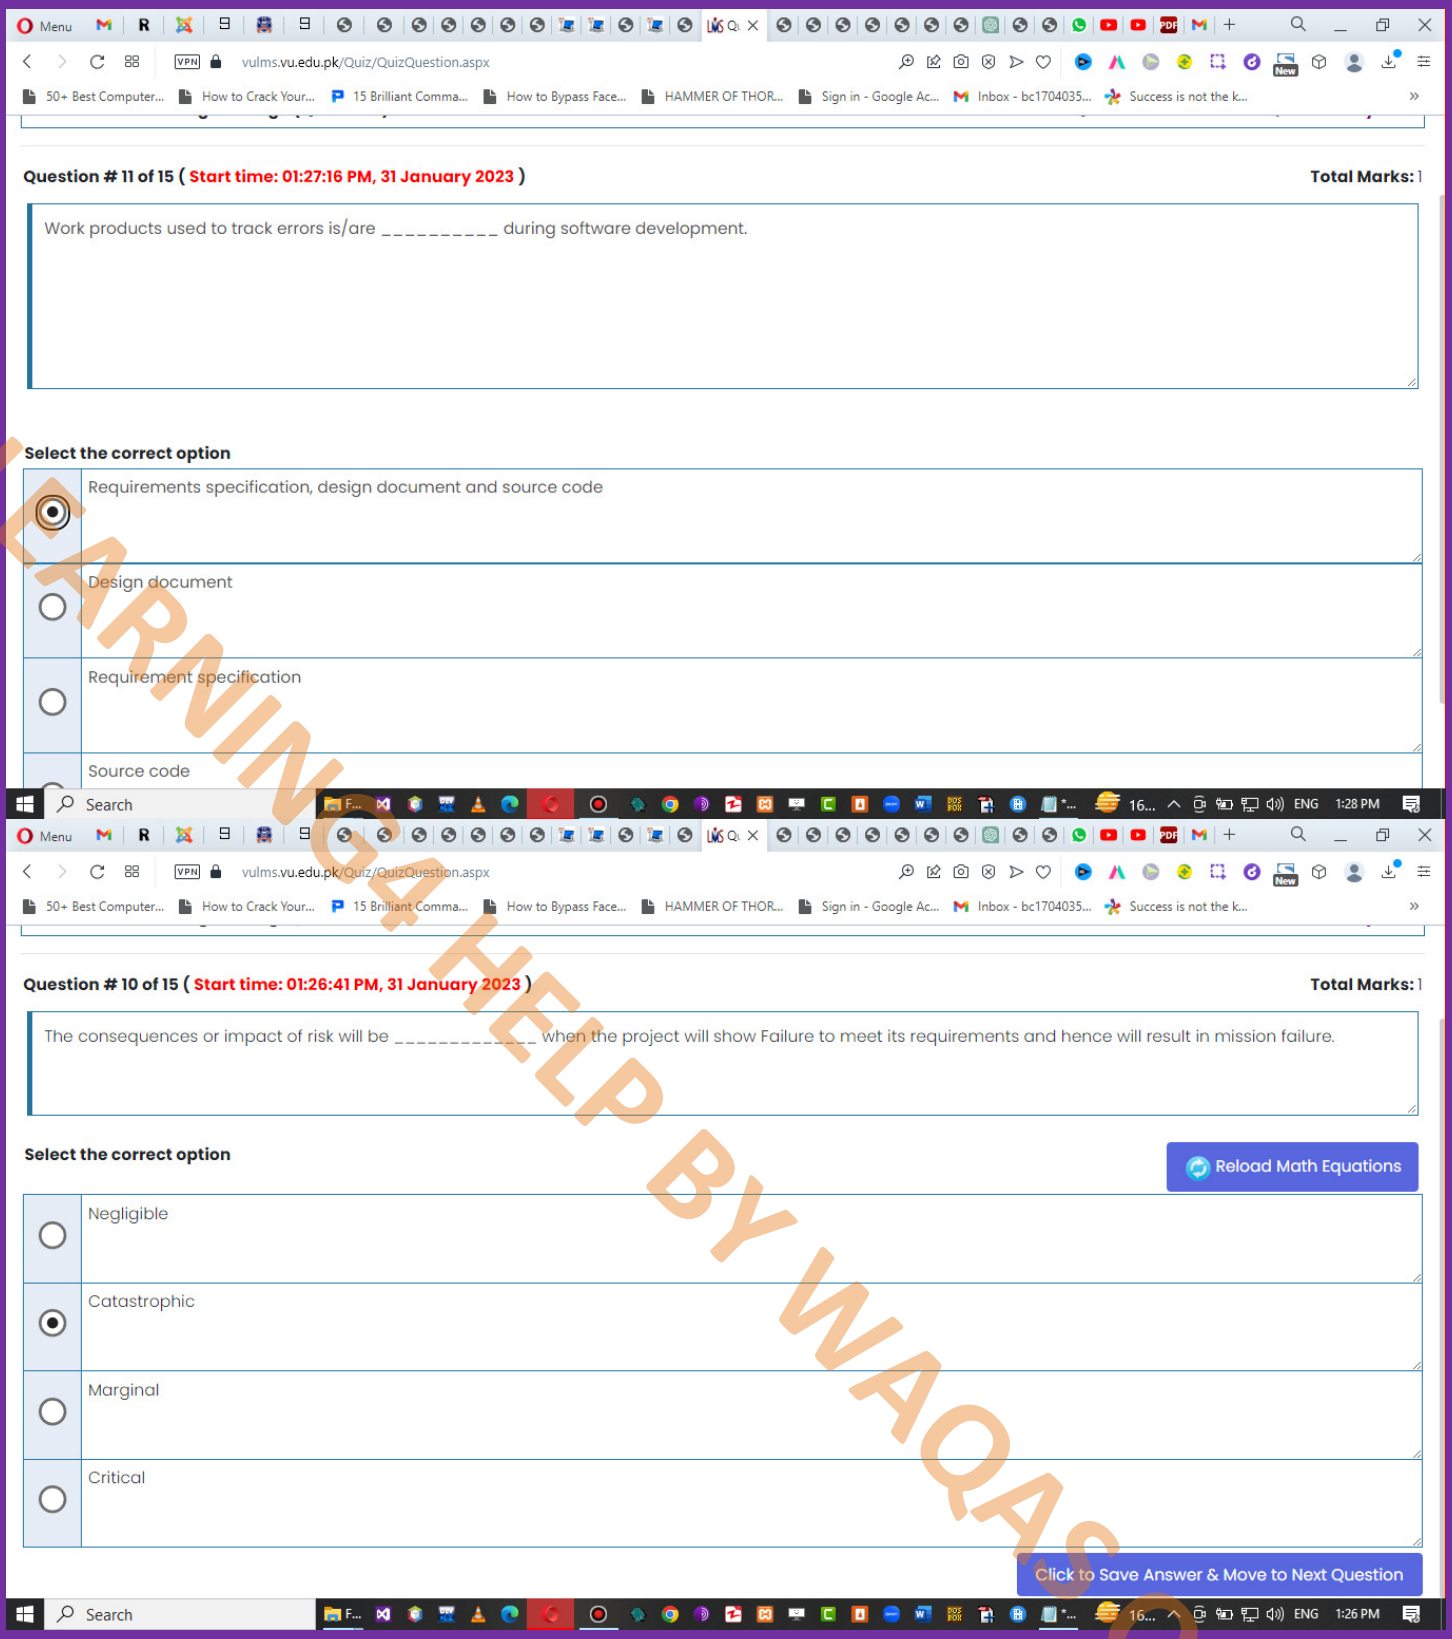

The first task in concept development project is to:

Select the correct option

- ( ) Determine the cost of the concept
- ( ) Determine the test cases for concept
- ( ) Determine the resources required for the concept
- (●) Determine the scope of the concept
