Question No.1:
From discipline of _____ we have the tools and techniques to investigate the human mind and ways to represent the resulting theories

Select correct option:

- Computer Science
- Biology
- Mathematics
- **Psychology** **Handouts Page # 09**

Question No. 2:
Trying to catch out own thoughts as they go by

Select correct option:

- **Introspection** **Handouts Page # 08**
- Psychological Experiments
- Introspection and Psychological Experiments
- None of the given

Question No. 3:
Hit and trial is a classical approach to solve the _____ problems easily.

Select correct option:

- **Trivial** **Handouts Page # 15**
- Medium

Question No. 4:

_____ AI treats the brain as a black box and just emulates its functionality.

Select correct option:

- **Weak** **Handouts Page # 08**
- Strong
- Weak and Strong
- None of the given

Question No. 5:
Most of the solution spaces for problems can be represented in a _____

Select correct option:

- **Graph** **Handouts Page # 21**
- Table
- Demo
- None of the above

Question No.6:
Which of the following disciplines provides us with the theories of structure and meaning of language?

Select correct option:

- **Linguistic** **Handouts Page # 09**
- Philosophy
- Biology
- Psychology

Question No.7:
Every graph can be converted into a tree.

Select correct option:

- **True** **Handouts Page # 22**
- False

Question No. 8:
Ability to tackle ambiguous and fuzzy problems demonstrate

Select correct option:

- **Intelligence** **Handouts Page #06**
- Non intelligence behavior
- All of the given
- None of the given

Question # 9
_____ AI actually tries to recreate the functions of the inside of the brain as opposed to simply emulating behavior

Select correct option:

- Weak
- **Strong** **Handouts Page # 08**
- Weak and Strong
- None of the given

Some MCQ's From Quizzes

Question # 1
Can we precisely define Artificial Intelligence?

Select correct option:

- Yes we can
- **No we can not**

Question # 2
Which of the following disciplines provides us with the theories of structure and meaning of language?

Select correct option:

- **Linguistic** **Handouts Page # 09**
- Philosophy
- Biology
- Psychology

Question # 3
We use graphs to represent problems and their solution spaces.

Select correct option:

- False
- **True** **Handouts Page # 22**

Question # 4
In Depth First Search the node with the largest value of height will be at the _____ priority to be picked.

Select correct option:

- Minimum
- **Maximum** **Handouts Page # 25**
- Zero
- Both minimum and maximum

Question # 5
Answering the Sequence Problem need

Select correct option:

- **Intelligence** **Handouts Page # 15**
- Ability to make plan
- Ability to schedule
- None of the given

Question # 6
Trying to catch out own thoughts as they go by

Select correct option:

- **Introspection** **Handouts Page # 08**
- Psychological Experiments
- Introspection and Psychological Experiments
- None of the given

Question # 7
Most of the solution spaces for problems can be represented in a _____

Select correct option:

- Graph **Handouts** Page # 21
- Table
- Demo
- None of the above

Question # 8
Ability to tackle ambiguous and fuzzy problems demonstrate

Select correct option:

- **Intelligence** **Handouts Page # 21**
- Non intelligence behavior
- All of the given
- None of the given

Question # 9
From discipline of _____ we have information about the network structure of a human brain and all the theories on functionalities of different human organs.

Select correct option:

- Mathematics
- **Biology** **Handouts Page # 09**
- Computer Science
- Psychology

Question # 10
The traveling inside a solution space requires something called as _____.

Select correct option:

- Operands

- Inner solution
- Space solution
- **Operators** **Handouts Page # 18**

Question No.
---------- Logic lets us define realistically the true function that defines real world scenarios.

Select correct option:

- **Fuzzy** **Handouts Page # 148**
- Classical
- Boolean
- None of the given

Machine learning typically follow ---------- phases according to finally

Select correct option:

- Two
- **Three** **Handouts Page # 160**
- Four
- Five

Identify the correct statement to list facts numbers 1 through 10.

Select correct option:

- Clips> {facts 1 10}
- Clips> {facts 1 to 10}
- **Clips> {facts 10}**

Question No.
Inductive learning is based on the knowledge that if something happens a lot it is likely to be generally.

Select correct option:

- **True** **Handouts Page # 161**
- False
- Ambiguities
- Non of the given

Question No.

---------- is the process of formulating the mapping from a given input to an output using fuzzy logic.

Select correct option:

- FIZ
- **FIS** **Handouts Page # 153**
- FOS
- None of the given

Question No.
A classical set is a container, which wholly include sor wholly excludes or wholly excludes any given element.

Select correct option:

- **True** **Handouts Page # 153**
- False

Question No.
If the antecedent is only partially true then the output fuzzy set is truckles according to the ----- method.

Select correct option:

- Intrinsic
- **Implication** **Handouts Page # 153**
- Boolean
- One of the given

Question No.
Of the multiple experts to the antecedent apply fuzzy logic ----------and resolve the antecedent to a single number between 0 and 2

Select correct option:

Operators **Handouts Page # 153**

Question No.
Best first search is also called a greedy search.

Select correct option:

- **True** **Handouts Page # 47**
- False

Question No.
In optimal path search we try to find the _____ solution.

Select correct option:

- Least
- Worst
- Least and worst
- **Best** **Handouts Page # 24**

Question No.
Procedure that search the solution space in an uninformed manner are usually costly with respect to_____

Select correct option:

- Time
- Space
- Time and space both
- **All of the given option** **Handouts Page # 37**

Question No.
In GA, the random process is repeated until an individual with required _____ level is found.

Select correct option:

- Higher
- Lower
- **Fitness** **Handouts Page # 86**
- Logical

Question No.
Mutation can be as simple as just flipping a bit at random or any number of bits

Select correct option:

- **True** **Handouts Page # 79**
- False

Question No.
Genetic algorithm uses evolutionary techniques, based on function optimization and artificial intelligence, to develop a solution.

Select correct option:

- **True**
- False

Question No.
_____ Reasoning is based on forming, or inducing a 'generalization' from a limited set of observations.

Select correct option:

- Deductive
- Adductive
- Analogical
- **Inductive** **Handouts Page # 102**

Question No.
A proposition is the statement of a _____.

Select correct option:

- Equation
- Action
- Theorem
- **Fact** **Handouts Page # 98**

Question No.
An AI system has a _____ component that allows the system to get information from its environment.

Select correct option:

- Planning
- **Perception** **Handouts Page # 89**
- Learning
- Execution

Question No.
A function by which we can tell which board position is nearer to our goal is called

Select correct option:

- Alternative function
- Recursive function
- Best function
- **Fitness function** **Handouts Page # 83**

Question No.
Semantic networks are graphs, with nodes representing _____ and arcs representing _____ between objects.

Select correct option:

- Distance, relationships
- objects, distance
- Relationships, distance
- **Objects, relationships** **Handouts Page # 97**

Question No.
In the worst case of semantic network, we may need to traverse the entire network and then discover that the requested info _____.

Select correct option:

- **Does not exist** **Handouts Page # 97**
- Exists
- Is incorrect
- Is correct

Question No.
A statement in conjunctive normal form (CNF) consists of _____

Select correct option:

- **Ands of Ors. Handouts Page # 107**
- Ands
- Ors
- Ors of Ands

Question No.

We can get optimal solution given some parameters using Genetic Algorithm.

Select correct option:

- **True** **Handouts Page # 79**
- False

Question No.
An AI system must form a meaningful and useful _____ of the internal information.

Select correct option:

- **Representation** **Handouts Page # 89**
- Execution
- Learning
- Planning

Question No.
In GA, the random process is repeated until an individual with required _____ level is found.

Select correct option:

- Higher
- Lower
- **Fitness** **Handouts Page # 86**
- Logical
-

Question No.
Mutation can be as simple as just flipping a bit at random or any number of bits

Select correct option:

- **True**
- False

Question No.
_____ reasoning is based on forming, or inducing a 'generalization' from a limited set of observations.

Select correct option:

- Deductive
- Abductive
- Analogical
- **Inductive** **Handouts Page # 102**

Question No.
_____ is the process of deriving logical conclusions from given facts.

Select correct option:

- Representation
- Execution
- **Reasoning** **Handouts Page # 102**
- Planning

Question No.
A function by which we can tell which board position is nearer to our goal is called

Select correct option:

- Alternative function
- Recursive function
- Best function
- **Fitness function** **Handouts Page # 83**

Question No.
A proposition is the statement of a _____.

Select correct option:

- Equation
- Action
- Theorem
- **Fact** **Handouts Page # 98**

Question No.
In the worst case of semantic network, we may need to traverse the entire network and then discover that the requested info _____.

Select correct option:

- **Does not exist** **Handouts Page # 97**
- Exists
- Is incorrect
- Is correct

Question No.
What is the correct order for solving a problem using GA I. Choose the best individuals from the population for crossover II. Choose initial population III. Evaluate the fitness of each individual

Select correct option:

- I,II,III
- I,III,II
- II,I,III
- **II,III,I**

MIDTERM EXAMINATION
Spring 2009
CS607- Artificial Intelligence (Session - 1)

Question No:
Most of the solution spaces for problems can be represented in a _____

Select correct option:

- **Graph** **Handouts Page # 21**
- Table
  Demo

Question No:
By getting grips on _____ that deal with searching techniques in graphs and trees, problem solving can be performed in an efficient manner.

Select correct option:

- Pseudocode
- **Algorithms** **Handouts Page # 21**
- Charts
- Graphs

Question No:
Every graph can be converted into a tree.

Select correct option:

- **True** **Handouts Page # 22**
- False

Question No:
Breadth-First Search checks all paths of a given length before moving on to any longer paths.

Select correct option:

- **True**
- False

Question No:

Breadth-first search is a good idea when you are confident that the branching factor is _____

Select correct option:

- Extremely small
- **Small**
- Medium
- Large

Question No:

The foothill problem occurs whenever there are_____ peaks.

Select correct option:

- High
- **Secondary**
- Primary
- Deep

Question No:

The Plateau problem comes up when there is a mostly flat area _____the peaks.

Select correct option:

- **Separating**
- Joining
- Over
- None of the given

Question No:

Which one of the problem is more subtle, and consequently, is more frustrating:

Select correct option:

- Foothill problem
- Plateau
- **Ridge**
- Box

Question No:

The paths found by best-first search are likely to be _____ than those found with other methods.

Select correct option:

- None of the given
- **Shorter**
- Longer

Question No:

In Basic Genetic Algorithm the term mutation refers to a small random _____.

Select correct option:

- Number
- **Change** **Handouts Page # 77**
- Operator
- Operand

Question No:

Which of the following two components are closely coupled and each is intrinsically tied to the other.
i. Knowledge representation
ii. Reasoning
iii. Execution
iv. Planning

Select correct option:

- i & iii
- ii & iii
- iii & iv
- **i & ii**

Question No:

Semantic networks are graphs, with nodes representing _____ and arcs representing _____ between objects.

Select correct option:

- **Objects, relationships** **Handouts Page # 97**
- Relationships, distance
- Objects, distance
- Distance, relationships

Question No:
A proposition is the statement of a _____.

Select correct option:

- **Fact** **Handouts Page # 98**
- Equation
- Action
- Theorem

Question No:

An _____ is "A computer program designed to model the problem solving ability of a human expert."

Select correct option:

- **Expert system** **Handouts Page # 111**
- Intelligent System
- Echo System
- Energy System

Question No:
Another expert system named _____ was developed by Digital Equipment Corporation, as a computer configuration assistant.

Select correct option:

- **R1/XCON** **Handouts Page # 112**
- MYCIN
- Dendral
- R3/XCON

Question No:
An expert system may replace the expert or assist the expert.

Select correct option:

- **True** **Handouts Page #113**
- False

Question No:
Conventional programming focuses on _____, while ES programming focuses on _____

Select correct option:

- Solution, Problem
- Problem, Solution
- Problem, Expert
- **Solution, Expert**

Question No:
In backward chaining terminology, the hypothesis to prove is called the _____.

Select correct option:

- Proof
- **Goal** **Handouts Page # 126**
- Plan
- None of the given

Question No.
"The branch of computer science that is concerned with the automation of intelligent behavior" this definition is from:

Select correct option:

- **Lugar and Stubblefield** **Handouts Page # 08**
- Winston
- Schalkoff
- Bellman

Question No.
In Artificial Intelligence GA stands for Genetic Algorithms

Select correct option:

- True **Handouts Page # 77**
- False

Question No.
---------- is based on forming, or inducing a 'generalization' from a limited set of observations

Select correct option:

- **Inductive reasoning**
- Deductive reasoning
- Analogical reasoning
- Common-sense reasoning

Question No.
An expert system may replace the expert or assist the expert

Select correct option:

• True **Handouts Page # 113**
• False

Question No.
A ------- ---------- is 'A person who posses the skill and knowledge to solve a specific problem in a manner superior to others'

Select correct option:

- **Domain expert** **Handouts Page # 122**
- Expert system
- Non of the above
- All of the above

Question No.

----------are closely coupled components; each is intrinsically tied to the other.
i-Knowledge representation
ii-Reasoning
iii-Planning
iv-Execution

Select correct option:

• ii & iii
• ii & iii
• iii & iv
• i & ii **Handouts Page # 89**

Question No.
Which one of the problem is more subtle and consequently is more frustrating?

Select correct option:

• Foothill
• Plateau
• Ridge
• Box
