Principles of Animal Ecology

CURRENT FINAL TERM SUBJECTIVE QUESTIONS 2025

By 🌸★💖 **H**afiza **E**xpert **Z**oologist💖★🌸

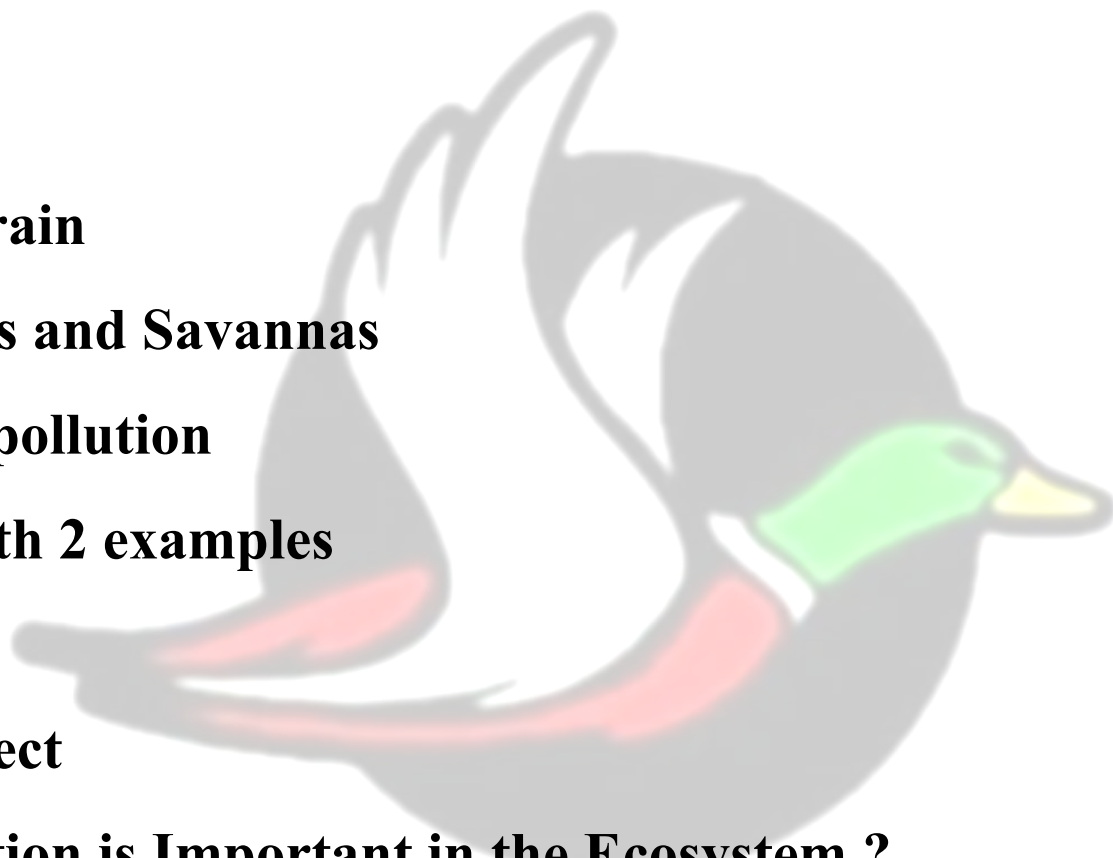

Current Final Term Subjective Questions

1. Radioactive Contamination
2. Survivorship curves
3. Tropical rainforest
4. Markhor distribution
5. Groundwater pollution and causes
6. Marine ecosystem distribution
7. Ecosphere
8. Reuse and recycle
9. Phosphorus circulation in ecosystem
10. Threats to snow leopard
11. Commensalism
12. Water pollution sources
13. Types of Glare
14. Pollution and it's Types
15. Decomposers

- 16. Lake water pollution and causes**
- 17. Importance of Symbiosis**
- 18. Noise pollution**
- 19. Snow leopard**
- 20. Types of acid rain**
- 21. Important features of food chain**
- 22. Types of Biogeochemical cycles**
- 23. Steps of carbon cycle**
- 24. Sources and causes of light pollution**
- 25. Define autotrophs.**
- 26. The United Nations divided the world's countries in how many categories?**
- 27. Effect of air pollution**
- 28. Types of Ecosystem**
- 29. Three strata of tropical grassland**
- 30. Types of Radiation**
- 31. Ecological and realized Natality**
- 32. Air pollution and its causes**
- 33. Four levels of biological organization**
- 34. Importance of study of Ecology**
- 35. Point pollution and its examples**
- 36. Population ecology and its types**
- 37. Municipal solid waste**
- 38. Differentiate between biotic and Abiotic factors**
- 39. Branches of Ecology**
- 40. Characteristics of Population**
- 41. Causes of water pollution**
- 42. Climate of marine ecosystem**
- 43. Causes of noise pollution**

- 44. Differentiate between logistic and population growth**
- 45. Effects of Climate change**
- 46. Community structure detail**
- 47. Scope of Ecology**
- 48. Importance of Phosphorus**
- 49. Differentiate between first and second law of Thermodynamics**
- 50. Effects of Radiation**
- 51. Flora and fauna of Temperate Deciduous forest**
- 52. Solution of land pollution**
- 53. Mining**
- 54. Herbivory**
- 55. Effects of acid rain**
- 56. Prairies, Steppes and Savannas**
- 57. Types of Noise pollution**
- 58. Amensalism with 2 examples**
- 59. Food web**
- 60. Greenhouse effect**
- 61. Why Conservation is Important in the Ecosystem ?**
- 62. Growth curve**
- 63. What is IDA?**
- 64. Causes of Global warming**
- 65. Ozone layer depletion**
- 66. How Mining waste generated?**
- 67. Tundra climate**
- 68. Interference competition**
- 69. What are biodegradable components?**
- 70. Causes of Acid rain**
- 71. Differentiate between autecology and Synecology**

72. Surface water pollution

73. Different species of Markhor

74. Sources of Noise pollution

75. How to save ground water from pollution?

76. Fauna of Deciduous forest

77. How Community ecology helps to understand interaction between species?

78. Differentiate between Exponential and logistic growth.
