VU Biologists

BT403

Final Term Past Papers
Fall 2018

Virtual University Of Pakistan

Bt403 6-3-19(5:00pm)
1-Genetic marker
2-Primary uses if pesticides
3-Short note on pest resistance
4-Why we need to see coolnies before bacterial trans
5-Botanical pesticides
6-Symptoms of peripheral nueropathy
7-Meristem culture technique
8-Enlist Pr Proteins involved in pathogenesis
9-Effects of Genetic engineering techniques on environment
10-Tissue culture techniques

1. A tangled knot
2. Number of genes – ……
3. Certainly the most widely used approach to analysis
of peptide mixtures is …..
4. Each component in the sample interacts slightly
differently with the adsorbent material, causing
different flow rates for the different components in which method?
5. Isoelectric point is found by drawing the sample through a
stable ,,,,,,,,,,,,
6. In 1D SDS-PAGE the extent of cross linking in gels varies
from ….
7. Actin
• Coronin
• Dystrophin
• Keratin
• Tubulin which type of protein are these??
8. How many amino acides ar epresent in human body
9. How many amino acid sequences are present in human
10. The modular units in proteins that confer specific properties and functions
are
referred to as
11. Large polypeptide
chains usually fold into
two or more globular
clusters known as
……
12. The simplest
arrangement which a
polypeptide chain
could assume with
its rigid peptide

bonds is a helical
structure, which
Pauling and Corey
called the ……
13. In a protein molecule,
each amino acid residue
is joined to its neighbour
by a specific type of
covalent bond which is
called …….
14. A complete description of proteins expressed
in any given cell at any given time…….
15. Xist appears to
recruit a specific
histone isoform
which maintains the
chromosome in
…….state
16. Dicer cleaves
double-stranded
RNA (dsRNA) and
pre-microRNA into
short doublestranded RNA
fragments called
small interfering
……..
17. They are naturally
produced as part of
the RNA interference
(RNAi) pathway by
the enzyme Dicer??
18. Dicer (type III RNAse
III) cleaves long
dsRNA into siRNA
21-25nt dsRNA from……..
19. .in DNA sequence purines are depurinated by.....
20. .first identified prokaryotic genome sequence belong to.....
21. in clustring by subgraph each sequence is.....vertex
22. intervening sequences do not have__
23. the tangel knot referes to number of genes=
24. allpath-lg assemble high quality genome of__bp
25. DBG related.. The de Bruijn
26. ._ eukaryotic genome __genome conatain major part of repeats...

27. .yac/bac is used in which sequencing.. Clone-by-clone shotgun sequencing
Baqi Kuch mcqs mushkl thy r kuch past paper ma sy thy
1.What is transcriptome? 2
2.why peptide bond is rigid and palanar? 3
3. difference between dicer and drosha? 3
4. ALLPATH- write two advantages. 5
5. Write 5 advantages of single molecule sequence. 5
6.Write steps in proteomics. 3 marks
7. Capillary electrophoresis working principal. 10 marks
8.define modular unit in proteins. 2 marks
9.Iso electric unit? 2 marks

Bt403 Final term 11:00am 25 Feb, 2019
1. What is constant flow system in microinjection 2 marks
2. How gm add more nutritional value to crops 2 marks
3. Why lattuce is used over tobacco for human therapeutic protein system 2 marks
4. Advantages of DNA based marker. 3 marks
5. Advantages of insect resistant sweet corn 3 marks
6. Types of pesticides poisioning 3 marks
7. Role of flavonoids in plants 5 plants
8. What is germoplasm preservation
9. Genetic engineering how effect on the environment. 5 marks
10. Types of tissue culture 10 marks
Bt_403
M.c.q bohhht.easy thy...
Define genetic marker 2
Effect of heat stres 5
Types of culture.
Areas of protoplast fusion
Lab animals treatd wd GM.
Roudup crops.
6 symptoms of severe poisoning
How multiplication occur in tissue culture.
How viruses transfer from one plant to another
