VU Biologists

BT404

Final Term Past Papers
Fall 2018

Virtual University Of Pakistan

Bt404 final term

Food additives (2)
Two types of glycerides (2)
Two common structure of secondary protein (2)
Structure of insuline.(3)
What are sphingolipids ? Where thaey are found (3)
What is meant by productivity how it is calculated(3)
Continuous fermentation and its applications in food industry(5).
5 species of bacteriofidum used as probiotics (5)
B_turns and its types.(5)
What is.botulism. write.its.cause. and.explain
THE TOXIN, PREVENTION OF OUTBREAKES DISTRIBUTION OF SPORES in terms of botulism.(10)

2:30pm
What is pro biotic?
Name three basic amino acid?
What is food additives?
Occurance of glutamic acid?
5 species of Bifidobacterium species?
What is kimchi?how it produce?
Continuous fermentation and its application in food industry?
Typesof amino acid on the basic of nutrients and also writs two examples of each type?
Botulism wla tha long
404
Two types of secondary structure
Major the four name of carbohydartes
What is probiobiotic
Whis is productivity and how its calculated
What is food additive
Contineous fermentation and its imprtance in food industry 5
Botulism wla 10 nvr ka or five species name fibidobactrium and how can used in probiotic
Bt404 11:00am Final term 28 Feb, 2019
1. Write 2 types of secondary structure of protein 2 marks
2. Name the Major classes of carbohydrate 2 marks
3. Structure of insuline 3 marks
4. Three pathways of amino acid production in microbial engineering 3

marks
5. Define tempeh and how it is produced 3 marks
6. Write names of Bidiobacterium species used as probiotics. 5 marks
7. Good Characteristics of industrial
microorganism which use in food industry. 5 marks
8. Define B-turn and its types. 5 marks
9. What is botulism. Write its cause and explain
THE TOXIN, PREVENTION OF OUTBREAKES DISTRIBUTION OF SPORES in terms of botulism 10 marks
404
M.c.q mstly mid waly e thy .
4 types of carbohydrates(2)
Occurance of glutamic acid(2)
Name.two.enzyme that hydrolyzevplant cell wall(2)
Structure of insuline.(3)
B_turns and its types.(5)
5 species of bacteriofidum used as probiotics (5)
Continuous fermentation and its applications in food industry(5).
Name two.reducing disaccharides(2)
What is.botulism. write.its.cause. and.explain
THE TOXIN, PREVENTION OF OUTBREAKES DISTRIBUTION OF SPORES in terms of botulism.(10)
