Mcq's

1. Rabies virus passed on by with part of infected animal..ans shyd saliva.
2. Rubeola virus ..definition dekhna.
3. HIV invade which cell..ans shyd B cell
4. Transmission from dam to offspring
5. Key feature of cross section study..
6. Endemic dieases ..definition dekh lena
7. Incubation period of poly melitus.
8. Value of TCID in...unit btna ha..
9. Syber green dye bind with...
10. Week colour show in elisa ..mean?
11. Bocking agent in elisa
12. Dengue virus ka genus
13. Encephalopathy in goat and sheep also called
14. Adenovirus
15. HPV have extra.....
16. Hepatitis c caused...
17. Largest virus size n diameter
18. Genra of dengue virus
19. Herpisvirus main DNA komsa a.single ya duoble
20. Baltimore classifications based om ribonuclic acid
21. Baltimore clasification in 7 type
22. Taxon of virus
23. In ka sequence..
24. Like oder family sub family etc
25. Herbies virus receptor
26. Which virus produce diease in pig
27. T even t1 t2 t4 act on

Questions:-

1. Swine flue .note
2. How virus replicate its DNA
3. Aspects of epidemiology (10)
4. Define serological epidemiology, incidence, prevalence, morbidity and mortality (5)
5. Sandwich elisa (5)
6. Viral transmission (5)
7. Difference between RTPCR and rtPCR (3)
8. Heamgglutination assay (2)
9. Hemagglutination inhibition assay and its mechanism (5)
10. Ifluenza and its 4 groups (3)
11. Modes of cultivation of virus in animals (3)

12. General characteristics of virus 2
13. Life cycle of virus 5
14. Baltimore clasification 5
15. Lag or log phase
16. Herpesvirus describe
