ENG504_Glossary

1. **Acceptability** :The quality of being tolerated or allowed. In linguistics it refers to a characteristic of good test.
2. **Access to Native Speakers** :The opportunity to interact with native speakers both within and outside of the classroom is a significant advantage. Native speakers are linguistic models and can provide appropriate feedback.
3. **Acculturation** :Acculturation is the process of social, psychological, and cultural change that stems from blending between cultures.
4. **Acquisition** :Acquisition is the 'subconscious' process identical to the process of first language learning.
5. **Activity Theory** :It considers an entire work/activity system (including teams, organizations, etc.) beyond just one actor or user.
6. **Affective Domain** :The affective domain (Krathwohl, Bloom, Masia, 1973) includes the manner in which we deal with things emotionally, such as feelings, values, appreciation, enthusiasms, motivations, and attitudes.
7. **Age** :Second language acquisition is influenced by the age of the learner.
8. **Approach** :An approach consists of a task hierarchy regarding when and how presentational and instructional activities are employed.
9. **Assimilation** :A child modifies input from the environment so that s/he can easily retain it.
10. **Audio-Lingual Method** :An approach to second language instruction based on Behaviorist learning theory that stresses memorization and pattern drills to attain mastery of the language.
11. **Authentic Materials** :The materials created in the target language for a target language audience.
12. **Autonomous** :Having the freedom to act independently.

By ASFAND YARR

ENG504_Glossary

13. **Autonomous Induction Theory** :Autonomous Induction theory by Suzanne Carroll (2000) acknowledges the existence of UG as the initial state for language acquisition and also notices the language processing mechanisms such as parsers (instead of LAD) in the gradual development of inter-languages.
14. **Behaviourism** :A psychological theory that all learning, whether verbal or non-verbal takes place through the establishment of habits. o Bilingual Education :Schooling in which students receive instruction in two or more languages, usually their home language and a second language.
15. **Categories** :Pre-defined taxonomies used to sort and group content into different sections.
16. **Cognition** :In general, it seems that students with greater cognitive abilities (intelligence) will make the faster progress. Some linguists believe that regardless of cognitive abilities, there is a specific, innate language learning ability that is stronger in some students than in others.
17. **Cognitive Domain** :The cognitive domain involves knowledge and the development of intellectual skills. This includes the recall or recognition of specific facts, procedural patterns, and concepts that serve in the development of intellectual abilities and skills.
18. **Cognitivist** :A research approach that emphasizes how the human mind receives, processes, stores and retrieves information in learning and retrieving information.
19. **Communication** :The act of exchanging thoughts, messages or information by speech, signs or writing.
20. **Communicative Activities :**The activities include practice in which learners use the language to exchange previously unknown information with one another.

By ASFAND YARR

ENG504_Glossary

21. **Communicative Competence** :The ability to use language in a variety of settings, taking into account relationships between speakers and differences in situations.
22. **Communicative Language Teaching (CLT)** :Approach to second language teaching that focus on providing opportunities for student to use the language to interpret and express real-life messages.
23. **Competence** :Competence is the abstract and hidden representation of language knowledge in our minds.
24. **Comprehensible Input** :Second language input beyond learners' current second language competence is known as 'Comprehensible Input'.
25. **Construct** :Meaningful interpretation of observed behaviour. o Content :The depth and breadth of the discussion of a topic or theme.
26. **Content-Based Instruction** :Teaching models that closely relate specific contents to second language teaching.
27. **Context** :The circumstance or setting in which a person uses the language
28. **Contrastive Analysis Hypothesis** :The expectation that learners will have less difficulty acquiring target language patterns that are similar to those of their first language than those that are different.
29. **Cultural Differences** :Cultural differences are the various beliefs, behaviors, languages, practices and expressions considered unique to members of a specific ethnicity, race or national origin.
30. **Culture and Status** :There is some evidence that students in situations where their own culture has a lower status than that of the culture in which they are learning the language make slower progress.

By ASFAND YARR

ENG504_Glossary

31. **Communicative Language Teaching** :An approach to language teaching that emphasizes interaction as both the means and the ultimate goal of study.
32. **Curriculum** :Language learning is less likely to take place if students are fully submersed into the mainstream program without any extra assistance or, conversely, not allowed to be part of the mainstream until they have reached a certain level of language proficiency.
33. **Developmental Features** :Those aspects of the language which, according to Pienemann and his colleagues, developed in a particular sequence, regardless of input variation, learner motivation, or instructional intervention.
34. **Dialect** :A particular form of a language which is peculiar to a specific region or social group.
35. **Direct Method** :A system of teaching a foreign language using only that language and without emphasis on the study of grammar.
36. **Ectenic learner** :Ectenic individuals want and need more conscious controlover the learning situation.
37. **Enhanced Input** :Input that is altered in an effort to make some language features more salient to learners.
38. **Error Analysis :**Error Analysis is the systematic investigation of second language learners' errors.
39. **Experiences** :Learners who have acquired general knowledge and experience are in a stronger position to develop a new language than those who haven't. The student, for example, who has already lived in 3 different countries and been exposed to various languages and cultures has a stronger base for learning another language than the student who hasn't had such experiences.

By ASFAND YARR

ENG504_Glossary

40. **Experimental Study** :Research designed to test a hypothesis about the impact of one or more very specific variables on another variable.

41. **Extrinsic Motivation** :Extrinsic motivation occurs when we are motivated to perform a behavior or engage in an activity to earn a reward or avoid punishment. Examples of behaviors that are the result of extrinsic motivation include: •Studying because you want to get a good grade •Cleaning your room to avoid being reprimanded by your parents

42. **Facilitation** :The action of facilitating something. o First Language or Native Language :The language first learned. Many children learn more than one language from birth and may be said to have more than one 'first' language. o Foreign Language Learning :This refers to the learning of a language, usually in a classroom setting, in a context where the target language is not widely used in the community (for example, learning French in China). This is sometimes contrasted with 'second language learning', where the language being learned is used in the community (for example, learning Italian in Florence).

43. **Form-focused Instruction :**Instruction that draws attention to the forms and structures of the language within the context of communicative interaction. This may be done by giving metalinguistic information, simply highlighting the form in question, or by providing corrective feedback.

44. **Fossilization** :Fossilization, or the cessation of learning, is recognized as a widespread phenomenon in second language acquisition

45. **Function Words** :Words that are mainly used as linking or supporting words for nouns, verbs, adjectives and adverbs. For example, prepositions ('to', 'for', 'by') and articles ('a', 'the') are two types of function words.

By ASFAND YARR

ENG504_Glossary

46. **Grammar Translation Method** :An approach to second language teaching characterized by the explicit teaching of grammar rules and the use of translation exercises.

47. **Hypothesis** :A statement of a possible fact that can be tested through research. o Influencing Factors :The agents that have power to create effect on something or someone externally or internally.

48. **Inner Speech** :Inner speech is Vygotsky's term for the unvocalized self-talk that many adults use to control their own thought and behavior.

49. **Input** :The language that the learners exposed to (either written or spoken) in the environment.

50. **Input Enhancement** :The concept of input to the language learner is examined with reference to some current theorizing about language processing and the idea of modular systems of knowledge.

51. Instruction :Clearly, some language teachers are better than others at providing appropriate and effective learning experiences for the students in their classrooms. Such students with better instructions will make faster progress.

52. **Instrumental Motivation :**Motivation that is essentially practical, such as the need to learn the language in order to get a better job.

53. **Integrative Motivation** :Motivation for second language learning that is based on a desire to know more about the culture and community of the target language group and even a desire to be more like members of that group.

54. **Interlanguage** :The learners developing second language knowledge. It may have characteristics of the learners first language, characteristics of the second language, and some characteristics that seem to be very general and tend to occur in all or most interlanguage systems. Interlanguages are systematic, but they are

also dynamic. They change as learners receive more input and revise their hypotheses about the second language.

55. **Interlocutor** :A participant in a conversation

56. **Internal Factors** :Internal factors are those that the individual language learner brings with him or her to the particular learning situation.

57. **Intrinsic Motivation :**Intrinsic motivation involves engaging in a behavior because it is personally rewarding; essentially, performing an activity for its own sake rather than the desire for some external reward. Examples of actions that are the result of intrinsic motivation include: •Participating in a sport because you find the activity enjoyable •Playing a game because you find it exciting

58. **Language** :Language is a complex communication system that is most evolved in the human beings.

59. **Language Acquisition** :According to Krashen, acquisition represents 'unconscious' learning, which takes place when attention is focused on meaning rather than language form.

60. **Language Awareness** :The explicit knowledge about language, conscious perception and sensitivity in language learning and language teaching and language use is termed as language awareness.

61. **Language Learning** :In Stephen Krashen's terms, learning is described as a 'conscious' process that occurs from the learners objective is to learn about the language itself, rather than to understand messages conveyed through the language.

62. **Language Transfer** :It is the transfer of linguistic features between languages in the speech repertoire of a bilingual or multilingual individual, whether from first to second, second to first or many other relationships.

63. **Learning** :Learning is a conscious process. It is a “knowing about” language. o Linguistic :Linguistics is the scientific study of language, and involves an analysis of language form, language meaning, and language in context

64. **Modularity :**Modularity is the degree to which a system's components may be separated and recombined. The meaning of the word, however, can vary somewhat by context

65. **Native Language Family** :Students who are learning a second language which is from the same language family as their first language have, in general, a much easier task than those who aren't. So, for example, a Dutch child will learn English more quickly than a Japanese child.

66. **Native-like** :The ability to comprehend and produce a second language at a level of performance that is indistinguishable from that of a native speaker.

67. **Nature** :The genes and hereditary factors that influence who we are—from our physical appearance to our personality characteristics.

68. **Negative Evidence** :Negative evidence is an input that lets the learner know that a particular form is not acceptable to target language norms.

69. **Nurture** :The environmental variables that impact who we are, including our early childhood experiences, how we were raised, our social relationships, and our surrounding culture.

70. **Perceptual Mechanism** :Anticipation of what will happen, or what an object will be, based on a person's sensory information and the related schemata h/she possesses.

71. **Performance** :Performance is the actual use of language.

72. **Personality :**Introverted or anxious learners usually make slower progress, particularly in the development of oral skills. They are less likely to take

advantage of opportunities to speak, or to seek out such opportunities. More outgoing students will not worry about the inevitability of making mistakes. They will take risks, and thus will give themselves much more practice.

73. **Perspective** :A particular attitude towards or way of regarding something; a point of view.

74. **Private Speech :**The language we use when we are talking to ourselves, not expecting anyone to hear or respond.

75. **Processing Instruction** :An approach to instruction in which learners are given explicit information about the language feature to be learned and their practice activities involve the comprehension (not production) of sentences or texts that cannot be understood without a focus on the language itself.

76. **Property Theory** :Property theory is concerned with modelling the nature of language system that is to be acquired.

77. **Recasts** :A recast is a technique used in language teaching to correct learners' errors in such a way that communication is not obstructed. To recast an error, an interlocutor will repeat the error back to the learner in a corrected form.

78. **Register** :A style or wave using language that is typical of or appropriate for the particular setting.

79. **Scaffolding :**In education, scaffolding refers to a variety of instructional techniques used to move students progressively toward stronger understanding and, ultimately, greater independence in the learning process.

80. **Second Language** :Any language other than the native language is known as Second language.

ENG504_Glossary

81. **Second Language Acquisition** :Second-language acquisition (SLA), second-language learning, or L2 acquisition, is the process by which people learn a second language.

82. **Self-efficacy** :The belief in one's capabilities to achieve a goal or an outcome.

83. **Social Psychological** :Social psychology is the study of how people's thoughts, feelings, and behaviors are influenced by the actual, imagined, or implied presence of others. In this definition, scientific refers to the empirical investigation using the scientific method o Socio-cultural :combining social and cultural factors.

84. **Sociolinguistic :**Sociolinguistics is the study of the relationship between language and society.

85. **Standard Variety :**The variety of a given language that is typically used in formal writing and formal public speaking (including broadcasting).

86. **Stephen Krashen's Theory** :•Language acquisition does not require extensive use of conscious grammatical rules, and does not require tedious drill. Acquisition requires meaningful interactions in the target language - natural communication - in which speakers are concerned not with the form of their utterances but with the messages they are conveying and understanding.

87. **Synoptic Learner** :These learners might not necessarily have conscious control over their own learning processes.

88. **Target Language** :The language being learned, whether it is a first language or a second (or third or fourth) language.

89. **Task-based Instruction :**Instruction in which classroom activities are 'tasks' similar to those learners might engage in outside the second or foreign language classroom.

By ASFAND YARR

ENG504_Glossary

90. **Transition Theory** :Transition theory is concerned with the developmental processes of language acquisition.

91. **Universal Grammar (UG) :**Innate linguistic knowledge which, it is hypothesized, consists of a set of principles common to all languages.

92. **Variability** :Lack of consistency or fixed pattern; liability to vary or change. "a great deal of variability in quality"

93. **Zone of Proximal Development** :The metaphorical 'place' in which a learner is capable of a higher level of performance because there is support from interaction with an interlocutor.
