

IMPORTANT MCQS 301

1. Educators work to stimulate the spirit of **inquiry** and acquisition of knowledge.
2. **Facts or principles** that he has memorized by learning.
3. Every student has different **potential** of learning.
4. **Reflective practice** is a way of studying your own experiences to improve the way you work.
5. Zone of proximal concept was also established by **Vygotsky**.
6. This professional standard demands from us to create a climate that promotes the **Professional judgment**.
7. Teacher has the autonomy of how to teach in a **class**.
8. **Task analysis** model is a very important model of learning.
9. Idea of "Teaching is an Art", was developed by **William James in 1891**.
10. Knowledge about different facts is **stratified knowledge**.
11. Teaching has a very important **social function**.
12. Planning is important as there are three characteristics of **master teachers**.
13. **Intentionally inviting**: This is the highest level of your teaching development.
14. Knowledge is created, when we **act and reflect**.
15. Modes of presentation are **two** i.e. Inductive and deductive.
16. Nothing is learnt unless it is in **long term memory**.
17. To achieve the learning outcomes of every unit, we have to construct **some instructional objectives**.
18. While **writing performance** objectives, we have to use an action word that exactly shows the behavior.
19. In **horizontal level**, planning includes selection of activities, resources, assessment and homework.
20. In **vertical level**, it includes link between standards, benchmarks, learning outcomes and instructional objectives
21. **Intellectual growth** cannot take place unless we do not provide opportunities to our students to think at high level.
22. There are **three** foundations of curriculum: sociological, philosophical and psychological.
23. **"Analysis level** questions are higher-order questions that require students to think critically and in depth.
24. The art of developing logical plan for instructional activities is called '**sequencing**'. Such a plan consists of interlink steps.
25. The **taxonomy** has been widely used in curriculum and test construction. From google
26. **Learn skill of observation** then actually inductive mode of presentation is better than deductive mode of presentation.
27. Sequence helps to make learning more **manageable**.
28. **Comprehension level** of cognitive "Describe two nation theory".
29. **Holistic vision** comes from curriculum planning while detailed implementation comes from lesson planning.
30. In **curriculum planning**, assessment is taken into consideration.
31. Asking question is **a skill**.
32. Questions of students are **more important than the questions** of teachers.
33. **Curriculum documents** are not available in all schools.
34. Individual Education Plans (**IEP**)

35. The common thing in Tyler's model and Bloom's taxonomy is that the teachers observe the **behaviors**
36. **Content knowledge** is a very important competency of a teacher.
37. **Processes** are also very important in teachers' considerations.
38. **Sequencing** has different principles; these principles are the introduction of simple concepts then concrete examples.
39. Writing Standards and benchmarks in a sequence in **Curriculum Planning**.
40. Action research is very effective research for teachers, **because it aims at improvement**.
41. **Origination** is the highest level of Simpson's hierarchy.
42. **Lesson plan** starts with the subject.
43. There are different **mechanics** to do different things.
44. **Good textbooks** provide a structured sequence of lessons.
45. Working memory is our **conscious memory**.
46. Sequencing steps are in **progression**. They start from simple and go to complex.
47. **Origination** is the level where a child can originate things on his own.
48. Write performance objectives is **necessary**.
49. In order to teach a sequenced lesson teacher need to **add complexity** to the lesson.
50. **Unit planning** is the most important as well as the most time-consuming level of planning for each teacher. gave the idea by **Waish**
51. **Sentence formation** is a prerequisite for paragraph writing.
52. We have limited time to teach in a **class**.
53. **Bloom's Taxonomy** was knowledge level or recall level, where actually students recall their knowledge.
54. You will organize the experience in such a way that you will ask them **to first observe** and then record.
55. Teacher must come up with at least one example so that the students can **understand the concept easily**
56. **Content forms are three**: Facts, Concepts Generalizations
57. A lot of information can be communicated through a **picture**.
58. **Lesson plan** is actually detailed form of unit plan.
59. **Abstract** thinking is very important
60. Curriculum guides are planned by **Ministry of education** in Pakistan.
61. **Questioning** has a lot of significance value.
62. An important thing in inductive mode of presentation is **Process**.
63. **Enabling skills** are those skills which are required to achieve a certain goal.
64. The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**.
65. **Content and Processes** are also very important in teachers' considerations.
66. Whenever we are **sequencing**, we need to know what a prerequisite for a particular terminal objective is.
67. **The focus in IEP** will be on the needs of the learners rather on the content to be taught.
68. In **debriefing teacher** tells the students to reflect what they have learnt through this process.
69. Elements of planning **11**.
70. **Simulations** are done in the virtual environments and are computer based.
71. **Discovery learning** is a learner-centered method.
72. **Group processes** and the classroom goal, task, reward and participation structures are more directly under the teachers' control.

73. **Classroom structures** are the foundations that shape particular lessons and behaviors during those lessons. Three important structures include task, goal, and participation structure.
74. **Synthesis level** Summarize the story including its main idea.
75. There are **four** steps in Taylor's model of curriculum
76. Write an appropriate title for the text.. come from **Synthesis level**.
77. We need to sequence our **learning objectives**.
78. Adding on must not be **confusing**.
79. Instructional aims: **Student-oriented**.
80. If a teacher plans to take the students for field trips, then he needs to consider **school resources**.
81. **Abstractions** are something which is not tangible.
82. Lesson is a piece of a unit NOT a **block of time**.
83. **Learning activities** are those where students are actively involved.
84. **Effective individual education plans** (IEP) have key characteristics. They are Individualized and child centered.
85. **Girls** perform poor in mathematics and science.
86. Teacher is a **person** who is making lesson plan, unit plan and term plan.
87. A lesson plan is defined as "a **systematic design** for the development, implementation and evaluation of instruction".
88. . What we do in schools, we never focus on the **higher level** of learning.
89. The common think in Tayler and Bloom taxonomy is that to teacher the **behaviors**.
90. Methods are also identified in **instructional planning**.
91. **In evaluation**, we discuss that there are two things; criteria and method.
92. Where there is silence, there **is no learning**.
93. **Metacognition**: is cognitive about cognition.
94. You have to create a check list for assessing **communication skills**.
95. The other name for Learning by reflection is **Socratic Method**.
96. **Master teacher** communicate their instructional objectives effectively to the students.
97. Linear fashion focus **on goals**.
98. Nonlinear fashion focus on **process**.
99. **Negative reinforcement** occurs when something already present is removed (taken away) as a result of a person's behavior.
100. Gagne expands the steps of introducing and organizing experience to include a sequence of nine particular "**Instructional events**".
101. Teachers have to identify the **methods to monitor** the progress of the students.
102. Whenever we are **planning a unit**, we really need to select these learning activities very carefully. And we need to make a match between processes and learning activities.
103. The interesting thing is that our emphasis is **on working memory**.
104. Lesson plan is part of the **unit plan** while activity schedule is part of the block timetable.
105. **Performance objectives**, there are the three elements present i.e. performance condition and criterion.
106. **Performance objective** we need to align our performance objectives with the curriculum.
107. **Subject/ topic** Unit subject is the title of the whole unit.

108. **Unit planning** is important because we need to know the reasons for dividing the whole thing into components. Most of the times, teachers' complaint for shortage of time.
109. There are **three** levels of plans.
110. **Collegial context** is not restricted to the schools rather now it has become web based
111. There are **6 levels** of Bloom's taxonomy of cognitive domain.
112. **Feeling of efficacy** is very important for the teachers
113. It is our assumption that independent skills are prerequisites, so students know them already.
114. Less planning leads to less learning. **(Walsh, 1992.**
115. **Collegial context** is something that emphasizes that power and decision-making should be shared among some or all members of the organization **(Bush, 2003).**
116. **Keeping notes** is a very important type of post lesson activity because a teacher can have the record of his/her teaching.
117. Knowledge forms are **Content, Process.**
118. **Mechanism indicates** that a child is independent to do a task by following its mechanics.
119. **Unit planning** is very challenging and time consuming but the most important thing is that good unit planning is a guarantee to effective instruction and effective learning.
120. **Schools' policy** is to cover the content as much as possible.
121. Evaluate your teaching, come up with judgments but provide sufficient evidence to support your statement.
122. **Declarative knowledge:** This is the knowledge that is declared in books, research papers, and newspapers.
123. 124. According to research, the best **recognition** is got from students and not from the government or the school administrators.
124. **Blind and Low Vision** – A condition of partial or total impairment of sight or vision that even with correction affects educational performance adversely.
125. **Active learning:** Active learning is where human mind is actively involved in constructing meaning of the experience.
126. **Freire** was a Brazilian educator and philosopher who was a leading ...
127. **Freire was born on September 19, 1921** to a middle-class family in Recife, Pernambuco, **Brazil.**
128. Teacher is more interested in **covering the syllabus** instead of bringing conceptual change in the students.
129. **Science** is an organized body of knowledge.
130. Answering some key questions to create an image of the classroom teaching and learning.”
- Reflective practice:**
131. **Reflective practice** is very important for a teacher.
132. **Nolan and Francis (1992) believe that:** Knowledge is actively constructed by learners.
133. **Learning is there when teachers try to help learners change their cognitive structures instead of focusing on their own teaching.**
134. “Much human behavior is learnt by observing the behavior of others **(Bandura 1978**
135. **Zone of Proximal Development (ZPD)**

136. The gap between actual and potential level of a child is **Zone of Proximal Development**
137. **Cognitive perspective** is to develop students' academic and thinking skills from a novice level to a more expert level.
138. **Speech is a powerful psychological tool that lays the foundation for basic structures of thinking later in one's development.**
139. According to **Vygotsky's theory**, language, learning and environment is a social context.
140. Creativity is also a part of **metacognition**
141. Learning depends on **prior learning**
142. Schools not only teach the students but also raise them. **(Sausa,2003)**
143. What students are taught in schools affects the ways they will thereafter see and treat others. **(Schlesinger, 1993)**
144. **CAP:** Cognitive, Affective and Psychomotor
145. **Psychomotor domain** is the domain where your body movements are involved.
146. Perception means **attending to a stimulus.**
147. Set is a readiness for **action.**
148. **Word 'complex'** shows that here the child can do many things independently.
149. 1Adaptation comes from the word '**Adapt**' which means to set yourself in the given situation.
150. **Hierarchy of affective** domain was developed by Bloom and **Krathwohl in 1964.**
151. In organization, you start showing that behavior but that is not a **consistent behavior.**
152. **"Taxonomies may be used to decide what to teach, how to teach and how to evaluate teaching."** (Marzano, Pickering, and Pollock 2001)
153. Research shows that learning do not take place if presented in isolated items (**Hohn,1995**)
154. Taxonomies provide a **cognitive structure.**

Knowledge about different facts is-

stratified knowledge.

subjective knowledge

objective knowledge

factual knowledge

A teacher is responsible in the development of a child. Select the correct option

physical

moral

emotional

cognitive

In -- - level of functioning, teachers intentionally don't want to share their ideas and don't ask for advice. Select the correct option

Unintentionally Disinviting

Unintentionally Inviting

Intentionally Disinviting

Intentionally Inviting

means the knowledge about how to teach the students. Select the correct option

Objective knowledge

Subjective knowledge

Pedagogical knowledge

Stratified knowledge

According to Gagne, knowledge is "knowing that.." Select the correct option

Procedural

Metacognition

Stratified

Declarative

Verbal information or factual information are the other names for knowledge, Select the correct option

Procedural

Metacognition

Declarative

Stratified

According to research, the best recognition teachers got is from the Select the correct option Colleagues

Administrators

Students

Parents ...

There are types of communication disability. Select the correct option

two

Three

Four

five

There are necessary elements of planning. Select the correct option

10

9

11

12

The level of to the profession must be to the range of every student. Select the correct option

obligation

commitment

word

assurance

In current understanding, the student must be dissatisfied with the Select the correect option modeling process

modeling effect

Conceptual change

feedback

A profession allows Select the correct option

autonomy

no autonomy

practice

no practice

The term is used while explaining multiple diversity among people.

dyslexia

autism

giftedness

exceptionality

are skill oriented things where our motor muscles are involved. Ep Select the correct option Cognitive domain

Affective domain

Psychomotor domain

all of the above

is method which helps to achieve the objective. Select the corect option

Strategy

Approach

Technique

Scheme

is the mean of creating a dialogue.

Reflection

Action

Reflection in action

Reflection on action

Kinesthetic learning is also known as Select the correct option

Visual learning

Auditory learning

Learning by doing

Tactile learning

There are ----- kinds of diversity. Select the correct option

Teacher can managae different -----in school for ethical development of child.

activities

Orientation

Lectures

games

Who presented the multiple intelligence theory? **Harvard Gardner**

How many levels Bloom's taxonomy? **6**

What is concept map? **Graphic organization**

Sentence formation is a prerequisite for paragraph. Teacher identifies classroom assessment criteria. Art of developing logical plan for instructional activities is called? "**Sequencing**"

Methods are also identified in... ? "**Instructional planning**"

Good Textbooks provide sequence? "**Structured sequence of lessons**"

Knowledge has forms? "**Two**"

Knowledge is something that is learnt by reflecting, acting on something is called? "**Subjective**"

A child knows about own cogitation is called? "**Metacognitive knowledge**"

Memorized things in? "**Facts**"

Task analysis model is a very important model as it helps the teacher to identify **prerequisites**. The process of setting goals, developing strategies is **planning**.

We discuss criteria and method in **evaluation**.

The individualized part of IEP means that the plan has to be tailored specifically to your child's **special needs**

. A unit plan is a **hierarchy** of lesson plans.

Methods are also identified in instructional planning **Student-oriented**.

IEP is basically an extended adaptation of a lesson plan. We can remember those things which are connected without **prior learning**.

Adolescence is a time of profound brain growth.

Advance organizer model is based upon **deductive learning**.

Nonlinear fashion focus on **process**

Brainstorming is a common tool to **describe** a thing

The white hat in the De Bono's six thinking hats signifies **information known or needed**

Teacher model skill in direct instruction

Network integration is created among group of students

Teacher role is minimized in **unguided** inquiry

In United States, pre-school is named as **pre K Gatekeeper** equalizes participation

Generative topics actually make **connections**

Divergent thinking is outside the box thinking

The learning of **core concepts** is lifetime

Different countries have different age levels of **formal** education

Children can come up with different ideas and teachings must **accept** all ideas

Children construct their own knowledge

Our teachers do not focus on **core concept**

Objects must be in the form that it can be **measured**

British preschool name Nursery School or simply “**nursery**”

United States preschool name pre-school and pre K Child is a natural discoverer. **Bruner**

By the **three**, a child has TWICE as many brain connections

In order to start working, the cells need to **communicate** with each other

A research was conducted and it was reported that teachers

mostly focus **hemisphere** of children.

For creativity **divergent** thinking is very important.

Different types of -functions occurs in the left and right hemisphere. **Mental** (Lec22)

The networked methodology of integration is **Student centered** (Lec 27)

Asking question is a **Skill** (Lec 20)

Brain development continues till the age of **8** (Lec 23)

We can remember those things which are concerned with our **Right side memory** (Lec 22)

Adolescence is a time of profound brain growth. (Lec 26)

Integration means putting things **Together** (Lec 27)

Advance organizer model is based upon **Deductive learning** (le21)

Case method is a very good approach to know problem solving. (Lec 28)

Pedagogy means how to teach **Students/**

Core concepts are **declarative** knowledge

Development cannot be separated from the **social context** in which it occurs

Development of **gross motor** skills is very important in preschool or early childhood education

Children construct their own knowledge.

John dewy says that there is no such profession where **knowledge** is separable from doing or practice.

Application of core concepts in new level is important

In **left** hemisphere there is logical thinking. Verbal intelligence and convergent thinking

Teachers want to teach in **depth** but want to cover the syllabus too

Curriculum is a dead thing teacher's give life to it.

Researchers use the word discourse for discussion

Teachers must provide the students with opportunities to

discover things

Performance assessment can be used to measure student's problem solving potential as

Knowledge can be assessed through **written tests**

Usually we do not **question** our tradition and authority Wait time is **thinking** time

The last level of Maslow's hierarchy of need is **Self- actualization**

Socratic Method is the example of discussion method

Edison invented the bulb

Projects tend to be **multidimensional**

Different types of **mental** functions occur in the left and right hemisphere. (Lec22)

Pedagogy means how to teach **children**.

Adolescence is a time of profound brain growth. (Lec 26)

Advance organizer model is based upon **Deductive learning**. (Lec 21)

Case method is a very good approach to know problem solving. (Lec 28)

Andragogy means how _ learn. **Adults**

Beyer says that critical thinking has **two** important dimensions.

The inquiry learning cannot be **rushed**

Learners are responsible for planning. Conducting and evaluating their own effort

Process of **assimilation** leads to consideration of new options and points of view

According to Kolb (1984), learning is a process of a combination of grasping **experience** and transforming it. Curious observation is the start of the inductive process

Students love integrated curriculum

What type of goodwill message is most likely to use an RSVP? Condolence, **invitation**, appreciation, holiday greeting,

Generative topics actually make __ schemes, **connections**, procedure or assessments

Schooling average age.... **4/ 3**

model is an important way of leaning. Select the correct option

Information processsing model

Task analysis model

observational learning

Apprentice ship model

The educators need to exert every effort to --- professional standards. Select the correct option lower

Raise

promote

neglect

is a learning disorder that is characterized by a disturbance in rate of educational development. Select the correct option

Intellectual disability

Mild intellectual disability

Giftedness

Austim
