

529 MID TERM COMPILATION BY AMEER

Q. Technological tools for language learning

1. Learning Management Systems – Moodle, Blackboard
2. Mobile apps – Duolingo, Memrise
3. Virtual Reality (VR) tools for immersive learning
4. Speech recognition software – Rosetta Stone
5. Online collaborative platforms – Google Docs, Padlet

Q. Benefits of the internet in learning?

1. Quick access to information and learning tools.
2. Real-time communication through chat and video calls.
3. Access to multimedia resources for better learning.

Q. How technology is helpful in language teaching and learning?

1. Supports personalized learning.
2. Makes learning more interactive and engaging.
3. Gives access to authentic language materials.
4. Helps collaboration with people worldwide.
5. Assists teachers with grading and progress tracking.

Q. Websites for ESL learning?

1. [British Council Teaching English](#)
2. [Dave's ESL Cafe](#)
3. [Breaking News English](#)
4. [ManyThings.org](#)
5. [Edutopia](#)

Q. How technology has changed the education system?

1. Increased online and hybrid learning.
2. Easy access to global educational resources.
3. Use of multimedia in teaching.
4. Better collaboration through digital platforms.
5. Personalized learning through data analysis.

Q. Terms similar to CALL?

1. TELL – Technology-Enhanced Language Learning
2. MALL – Mobile-Assisted Language Learning
3. WELL – Web-Enhanced Language Learning
4. NBLT – Network-Based Language Teaching
5. CMC – Computer-Mediated Communication

Q. Benefits of technology for language learning?

1. Gives easy access to different learning resources.
2. Helps learners study independently.
3. Provides quick feedback and progress tracking.
4. Creates interactive and immersive learning environments.
5. Supports global communication and collaborative learning.

Q. Examples of technology in classrooms?

1. Interactive whiteboards for engaging lessons.
2. VR/AR tools for immersive learning experiences.
3. Collaborative platforms like [Google Classroom](#) and [Padlet](#) for group work.

Q. Technological tools for modernizing education?

1. [Zoom](#) / [Google Meet](#) for online classes.
2. [Moodle](#) / [Canvas](#) for course management.
3. [Kahoot!](#) for interactive quizzes.
4. [Grammarly](#) for writing help.
5. Flipgrid for video discussions.

Q. The role of technology in teaching methods?

1. Supports student-centered learning.
2. Encourages blended learning (online + classroom learning).
3. Develops critical thinking through interactive activities and simulations.

Q. Advantages of internet-based language learning?

1. Quick access to language resources.
2. Practice with native speakers online.
3. Different multimedia formats for learning.
4. Updated and current content.
5. More affordable than traditional methods.

Q. Definition of Technology?

According to [Merriam-Webster](#), technology is the practical use of knowledge, methods, and tools to perform tasks. Technology is the use of tools, machines, and knowledge to make work easier and solve problems. It helps people perform tasks more quickly and effectively. In education, technology includes computers, the internet, mobile apps, and digital tools used for teaching and learning.

Q. In language teaching and learning, technology can be used for?

1. Accessing information about language.
2. Exposure to the target language.
3. Entertainment through reading or listening.
4. Creating and sharing texts.

Q. Benefits of Learning Technology?

1. Increases learners' motivation and engagement.
2. Helps learners study beyond the traditional classroom.
3. Encourages learners to take responsibility for their learning.
4. Provides real exposure to language through technology.

Q. ESL video games for learners?

1. Phantasy Quest
2. Sound Factory
3. Kinetto 2
4. The Ballad of Kinetto 7
5. Heart of Tota
6. Monster Basement

Q. Name some useful sites for learning the English language?

1. [British Council Teaching English](#)
2. [Onestop English](#)
3. [Zozanga](#)
4. [ManyThings.org](#)
5. [Academia.edu](#)

Q. Technology as an Effective Tool for Language Learning?

Technology helps learners improve language skills through interactive learning. Teachers can use digital tools to support lessons and increase student participation. It also encourages cooperation, where learners work together and learn from each other online.

Q. Use of Technology and Development of Learners'?

Technology increases learners' motivation and interest in learning. Using films, computers, and the internet helps learners understand topics more meaningfully. It also develops higher-order thinking skills such as analysis, creativity, and problem-solving.

Q. CMC-based Environments?

Computer-Mediated Communication (CMC) allows learners to communicate and learn through computers and the internet. It gives students more freedom to ask questions, discuss ideas, and work together online instead of only following fixed course materials.

Q. Learning Management Systems (LMS)?

Learning Management Systems (LMS) are online platforms used to manage teaching and learning activities. They help teachers share lessons, assignments, quizzes, and learning materials with students online.

Examples:

- Moodle
- Blackboard

Q. Telecollaboration?

Telecollaboration is online communication between language learners and native speakers or learners from other countries. It helps students practice real-life communication and improve language skills naturally.

Q. Web 2.0 Tools?

Web 2.0 tools are interactive online tools that allow users to create, share, and edit content together, such as blogs and wikis. They support collaborative learning and communication.

Q. What are Virtual Worlds?

Virtual worlds are online 3D environments where people interact through digital characters called avatars. These spaces are mainly used for social interaction, communication, and learning.

Examples:

- World of Warcraft
- Second Life

Q. Characteristics of a Virtual World (VW)?

1. Online 3D environment
2. Use of avatars
3. 24-hour accessibility
4. Persistence (activities remain saved)
5. Social interaction and communication

Q. VWs begin with details in five key areas?

1. **Age Level:**
The recommended age or grade level for users.
2. **Game Level:**
Shows how much the VW is game-like (low, medium, or high).
3. **Socialization Level:**
Shows how much users can interact and socialize.
4. **Education Focus:**
Explains how useful the VW is for teaching and learning.
5. **Technical Requirements:**
Includes internet speed, graphics, and device requirements.

Q. Practical Activity of Corpus?

Corpus activities help learners explore real and authentic English language use. Students can learn independently by using online corpora related to their fields, such as news or academic writing. Mark Davies created many free corpora for language learners.

Q. E-books on the Internet In modern times, e-books are finally coming of age?

E-books are digital books available online for reading and downloading. They help students access a large number of books and research materials easily. Some e-books require software like Mobipocket Reader or WinRAR to open files.

Q. The World Wide Web and the Expansion of E-books?

The development of the World Wide Web made e-books easier to create, share, and access online. Many libraries and educational websites started digitizing books and literary works for readers worldwide. One example is Renaissance Editions, which provides old English literary texts online.

Q. E-books and Their Future on the Internet?

E-books started with simple online digital books and later became very popular on the internet. Early projects focused on sharing free public-domain books so people everywhere could access knowledge easily. Today, publishers, authors, and websites all support e-books for learning and reading. In the future, e-books are expected to grow more because they are easy to access, store, and share online.

Q. How has technology revolutionized teaching methods? Give three arguments?

1. **Enhanced Engagement:**
Technology makes lessons interactive through videos, animations, and simulations.
2. **Personalized Learning:**
Digital platforms provide learning according to students' needs and speed.
3. **Remote and Blended Learning:**
Online learning allows students to study from anywhere.

Q. How has technology changed the classroom atmosphere? Provide three examples?

1. **Smart Classrooms:**
Interactive boards and projectors make learning more interesting.
2. **Collaborative Learning:**
Online discussions and group work improve teamwork and communication.
3. **Paperless Environment:**
E-books and digital assignments reduce the use of paper.

Q. What are five benefits of using technology in language learning and teaching?

1. Improves pronunciation through AI tools.
2. Gives access to authentic language materials.
3. Makes learning fun through games and activities.
4. Provides instant feedback and assessment.
5. Supports flexible learning through mobile apps.

Q. What are five advantages of the internet in education?

1. Easy access to a large amount of information.
2. Supports remote and online learning.
3. Uses multimedia for better understanding.
4. Connects learners globally for knowledge sharing.
5. Provides quick updates on new research.

Q. How is the internet an instant source of information? Provide three points.

1. Gives real-time news and research updates.
2. Provides access to online libraries and databases.
3. Search engines give quick answers instantly.

Q. How has technology played a vital role in improving education? Give five arguments

1. Reduces the digital divide in education.
2. Uses AI for personalized learning.
3. Improves teacher-student communication through LMS.
4. Makes grading easier with automated assessment systems.
5. Uses VR and AR for practical learning experiences.

Q. Name five technology tools used for academic purposes?

1. Learning Management Systems (LMS)
2. [Google Classroom](#)
3. Digital libraries
4. [Turnitin](#) for plagiarism checking
5. Online collaboration tools

Q. Name three tools that modernize teaching methods?

1. Smart Boards
2. Virtual Reality (VR)
3. AI-based learning assistants

Q. Name three technology tools used for language learning?

1. Babbel
2. Grammarly
3. Google Translate

Q. What tools do you use for language learning? Mention three names?

1. Duolingo
2. Quizlet
3. Anki

Q. Name two tools used by teachers in an educational context?

1. Kahoot!
2. Edmodo

Q. Name three websites for ESL learners?

1. [BBC Learning English](#)
2. [ESL Library](#)
3. [FluentU](#)

Q. List three tools for ESL learners?

1. [English Central](#)
2. [LingQ](#)
3. [Speechling](#)

Q. What are three examples of technology-enhanced language learning?

1. AI-powered chatbots for conversation practice
2. Virtual Reality (VR) for immersive learning
3. Online language exchange platforms

Q. What does CALL stand for?

CALL stands for **Computer-Assisted Language Learning**.

Q. Name five terms related to CALL?

1. E-learning
2. Blended Learning
3. Digital Literacy
4. Online Language Labs
5. Mobile-Assisted Language Learning (MALL)

Q. What are five similar terms of CALL?

1. Technology-Enhanced Language Learning (TELL)
2. Computer-Based Language Learning (CBLL)
3. Mobile Learning (M-learning)
4. Intelligent Tutoring Systems (ITS)
5. Virtual Learning Environments (VLE)

Q. What are the key aspects of Computer-Mediated Communication (CMC)?

1. Synchronous and asynchronous communication
2. Text, audio, and video interaction
3. Online collaboration platforms
4. Cross-cultural communication
5. Instant feedback and adaptive learning

Q. What are five considerations before adopting a blended learning approach?

1. Institutional readiness
2. Technology infrastructure
3. Teacher training and support
4. Student accessibility and engagement
5. Assessment and feedback systems

Q. Name two web course management systems for higher education?

1. Moodle
2. Blackboard

Q. How do interactive whiteboards enhance student engagement? Provide five benefits.

1. Encourage interactive learning
2. Improve visual understanding
3. Support multimedia use
4. Allow real-time collaboration
5. Provide immediate feedback

Q. What are three benefits of e-assessments?

1. Automatic grading saves time
2. Instant feedback for students
3. Easy access from different locations

Q. What are five levels of virtual worlds?

1. Text-based virtual worlds
2. 2D graphical virtual worlds
3. 3D immersive environments
4. Augmented Reality (AR) spaces
5. Fully simulated Virtual Reality (VR) worlds

Q. Describe the social nature of virtual worlds?

Virtual worlds allow users to interact with each other in real time through avatars. They support communication, collaboration, social learning, and cultural exchange in an immersive online environment.

Q. When and who introduced the first e-book?

Michael S. Hart introduced the first e-book in 1971 through Project Gutenberg.

Q. How are major publishers selling e-books directly to consumers?

Major publishers sell e-books through their websites, digital platforms, and subscription services directly to readers.

Q. Name two e-book libraries?

1. [Project Gutenberg](#)
2. [Open Library](#)

Q. Three ways learners can contact their teachers and other learners?

1. Online socialization in learning platforms
2. Virtual office hours
3. Discussion forums and spaces

Q. How technology develops learners' higher-order thinking?

1. Increases motivation through interactive tools
2. Supports meaningful learning with multimedia
3. Develops problem-solving and analytical skills

Q. How does socialization differ among virtual worlds?

Some virtual worlds focus more on social interaction, while others are mainly game-oriented. They provide online social spaces beyond school and home environments.

Q. Five characteristics of virtual worlds?

1. Online 3D environment
2. Avatars representing users
3. Real-time interaction
4. Persistence after logout
5. Social spaces for communication

Q. Five major publishers that sell front-list e-books directly to consumers?

1. HarperCollins
2. Random House
3. Macmillan
4. Simon & Schuster
5. Penguin Books

Q. Three technical challenges faced by early e-Book creators?

1. Digital rights management
2. Fear of reducing print book sales
3. Difficulty finding suitable e-book formats and readers

THE END

Remember me in your Prayer
