Lesson-11

CONSTRUCTIVISM-II

Topic-043: Piaget's Cognitive Constructivism

Who is associated with the theory of constructivism in the context of cognitive development?

Jean Piaget.

According to Piaget, how is new understanding influenced in cognitive constructivism?

New understanding is influenced by existing knowledge of a particular experience.

What are the key elements in Piaget's theory that lead to disequilibrium?

Emotions, Experience, Natural maturation, Social interaction.

According to Piaget, what is the essence of intelligence?

Reasoning and logic.

Topic-044: Piaget's Key Concepts of Adaptation and Disequilibration

What is the foundation of the acquisition of cognitive content, according to Piaget?

Stages of intellectual development.

What is the concept proposed by Piaget based on adaptation to maintain equilibrium?

Equilibrium achieved by balancing assimilation and accommodation.

Name the four key elements proposed by Piaget that lead to disequilibrium.

Emotions, Experience, Natural maturation, Social interaction.

Topic-045: Bruner's Scaffolding and Discovery Learning

Who proposed the Theory of Scaffolding in 1976?

Jerome S. Bruner.

According to Bruner, what is the goal of education?

Learning to learn.

What are the three stages of 'Representation' in Bruner's Discovery Learning Theory?

Enactive, Iconic, Symbolic representation.

Topic-046: Bruner on Teaching Influencing Learning

What did Jerome Bruner emphasize in the field of education?

Involving learners in cognitive and constructive processes for meaningful learning.

According to Bruner, what should a learner be encouraged to do?

"Learn to make a leap" and explore possibilities.

Name some of Bruner's contributions in the field of education.

Modes of representation, Importance of teaching and learning optimal structure, Spiral curriculum, Learning through acts of discovery.

Lesson-12

CONSTRUCTIVISM-III

Topic-048: Understanding Self-Efficacy

What is Bandura's Social Cognitive Theory about?

It integrates behaviors, cognitions, and the environment for interaction.

Define self-efficacy according to Albert Bandura.

Answer: Self-efficacy refers to beliefs in one's capabilities to organize and execute actions required to manage situations.

What are the three scales proposed by Bandura to measure self-efficacy?

Answer:
Self-efficacy magnitude
Self-efficacy strength
Generality of self-efficacy

How does high self-efficacy affect learners, according to Bandura?

Answer: It motivates learners to undertake specific tasks.

What role do parents, peers, and the environment play in influencing self-efficacy?

Answer: They can play a positive role in enhancing high self-efficacy.

Topic-049: David Ausubel's Subsumption Theory

Who proposed the Subsumption Theory?

Answer: David Ausubel, an American Psychologist.

What is the subsumption process in learning, as per Ausubel's theory?

Answer: New information is related to existing knowledge in cognition.

List the four key principles of Subsumption Theory.

Answer:
Present most general concepts first.
Include new and previously acquired information.
Do not develop existing cognitive structures, but reorganize them.
The instructor bridges the gap between known and to-be-learned concepts.

Topic-050: Metacognition and Script Theory

According to John Flavellan, what does metacognition consist of?

Metacognition consists of metacognitive knowledge and metacognitive experiences or regulation.

Explain metacognition in terms of higher-order thinking processes.

It involves higher-order thinking processes such as learning task thinking, monitoring comprehension, and evaluating task completion progress.

Who introduced The Script Theory, and what does it propose?

Roger Schank and Robert P. Abelson introduced The Script Theory, which states that events are understood in terms of scripts, plans, knowledge structures, and relevant previous experiences.

What is Conceptual Dependency (CD), and how is it used?

Answer: CD is the collection of symbols used to represent knowledge. It has been widely used for natural language input for computers and various computer programs.

Lesson-13

KRASHEN'S INPUT HYPOTHESIS (MONITOR MODEL)-I

Topic-051: Krashen's Input Hypothesis (Monitor Model)-I

What are the five hypotheses and factors of Krashen's general theory?

1. Acquisition requires meaningful interaction in the target language.
2. Language acquisition does not require extensive use of conscious grammatical rules.
3. Comprehensible input is crucial for language acquisition.
4. The best methods supply comprehensible input in low anxiety situations.
5. Krashen's factors include internal (Age, Personality, Motivation, Experience, Cognition, Native Language) and external (Culture, Status, Motivation, Access to Native Speaker, Curriculum, Instructions).

How did Krashen define acquisition in the context of language learning?

Acquisition requires meaningful interaction and natural communication, focusing on messages rather than the form of utterances.

According to Krashen, what is the role of conscious grammatical rules in language acquisition?

Language acquisition does not require extensive use of conscious grammatical rules.

What is the significance of "comprehensible input" in Krashen's theory?

Comprehensible input is considered crucial and necessary for language acquisition.

How does Krashen view the role of anxiety in language learning?

The best methods provide comprehensible input in low anxiety situations.

Explain the concept of comprehensible input as proposed by Krashen.

Learners acquire knowledge that is slightly advanced and easy to comprehend compared to their current level of understanding.

Topic-052: The Natural Approach and SLA

Who developed the concept of Natural Approach, and what does it emphasize?

The Natural Approach was developed by Tracy Terrell, emphasizing effortless learning through comprehensible input and stimulating activities.

Why are grammar and audio-lingual methods considered "unnatural" in the context of the Natural Approach?

According to Krashen and Terrell, grammar and audio-lingual methods are unnatural because the Natural Approach relies on a more effortless and natural learning process.

What does the term "natural" imply in the Natural Approach?

In the Natural Approach, "natural" implies an effortless learning process where learning takes place with ease.

How do teachers contribute to the Natural Approach, according to Krashen and Terrell?

Teachers are expected to provide learners with comprehensible input and stimulating activities for meaningful learning.

What is the significance of the silent period in the Natural Approach?

Learners are not forced to speak during the silent period, allowing them to absorb the language naturally.

Lesson-14

KRASHEN'S INPUT HYPOTHESIS (MONITOR MODEL)-II

Topic-053: Acquisition vs. Learning Hypothesis

What is the distinction made by Krashen between acquisition and learning?

The 'acquired system' or 'acquisition' is subconscious, while the 'learned system' or 'learning' is a product of formal instruction.

How does language acquisition differ from language learning according to Krashen?

Language acquisition involves subconscious learning and intuition, while language learning focuses on the written form, emphasizing understanding language structure and rules.

What does Krashen argue is of greater importance in language learning?

In language learning, the form is of greater importance than communication.

What criticism did McLaughlin express about Krashen's distinction?

McLaughlin argued that Krashen's terms lacked precision and clarity.

What was Gregg's perspective on Krashen's distinction between acquisition and learning?

Gregg believed that some rules can be acquired through learning, supporting Krashen's distinction.

Topic-054: Natural Order Hypothesis and Input Hypothesis

What does the Natural Order Hypothesis propose regarding the acquisition process?

The Natural Order Hypothesis suggests a predictable sequence in the acquisition process, asserting that explicit instructions and the learning process cannot alter the natural order.

How does the order of acquisition differ between the first and second languages, according to the Natural Order Hypothesis?

The order of acquisition in the first language is often different from the second language.

According to Krashen's Input Hypothesis, what is the key factor in the acquisition of a second language?

The acquisition of a second language is highly dependent on the learner's comprehension of the input.

List some techniques suggested by Krashen for providing comprehensible input.

Use expression and body language, provide thinking time, use pauses between phrases, employ shorter sentences, stress high-frequency words, repeat/review vocabulary, repeat/restate for understanding, and be supportive.

Lesson-15

KRASHEN'S INPUT HYPOTHESIS (MONITOR MODEL)-III

Topic 55: Krashen's Monitor Hypothesis and Affective Filter Hypothesis

What does Krashen's Monitor Hypothesis claim about conscious language learning?

Answer: The conscious language learning monitors the output.

How does learning act in the process of language production according to the Monitor Hypothesis?

Answer: Learning acts as an editor or monitor by applying rules consciously and minimizing errors.

What are the three types of ways to use the Monitor Hypothesis?

Answer: Monitor over-users, Monitor under-users, The optimal monitor users.

Name the conditions to apply the Monitor Hypothesis.

Answer: Time, Focus on form, Knowledge of rule.

According to the Affective Filter Hypothesis, what can affect how well we acquire comprehensible input?

Answer: 'Filter' can be Motivation, Attitude, Self-confidence, Anxiety.

Topic 056: Communicative Language Teaching (CLT) and Criticism

What paved the way for the emergence of Communicative Language Teaching (CLT) approach?

Answer: Krashen and Terrell's Natural Approach.

On what basis was CLT formed, according to the lesson?

Answer: Input hypothesis and communicative competence.

What does Communicative Competence involve, according to the definition provided?

Answer: The ability to interpret and enact appropriate social behaviors; it requires active learner involvement in the production of the target language.

According to Stern (1992), where has CLT shown more success and where has it failed?

Answer: More successful in ESL (English as a second language) settings, failed to show successful results in EFL (English as a foreign language) contexts.

What did CLT proponents like Littlewood propose, and how did opponents view it?

Answer: Proponents proposed treating CLT as an umbrella term; opponents viewed it as renaming existing old approaches, nothing new or revolutionary.

What does criticism say about CLT's focus on fluency and accuracy?

Answer: It focuses more on developing fluency while neglecting accuracy.

How does CLT impact teachers, according to the criticism?

Answer: It overburdens teachers by demanding the development of a functional syllabus for effective classroom activities.
