ECO402 Final Term Papers By Waqar

The screenshot displays the VU Examination System (CLIENT) interface within a Windows Internet Explorer browser. The address bar shows the URL <http://localhost:8080/VUTES/Client/Instructions.aspx>. The page title is "VU Examination System (CLIENT) VUTES 6.5 Fall 2012 (FinalTerm)". The main content area shows "Question No : 1 of 60" and "Marks: 1 (Budgeted Time 1 Min)". The question is: "The supply curve for a competitive firm is:". Below the question, there are four radio button options for the answer:

- ☐ Its entire MC curve.
- ☐ The upward-sloping portion of its MC curve.
- ☐ Its MC curve above the minimum point of the AVC curve.
- ☐ Its MC curve above the minimum point of the ATC curve.

At the bottom of the interface, there is a timer showing "Start Time: 11:43 PM" and "120:00 Time Left". A large watermark "MADE BY WAQAR SIDDHU" is overlaid across the bottom of the screenshot. The taskbar at the very bottom shows the Start button and several open applications, including "VU Examination System (Client)" and "Chrome".

Question No : 5 of 60 Marks: 1 (Budgeted Time 1 Min)

Suppose that three oligopolistic firms are currently charging \$12 for their product. The three firms are about the same size. Firm A decides to raise its price to \$18, and announces to the press that it is doing so because higher prices are needed to restore economic vitality to the industry. Firms B and C go along with Firm A and raise their prices as well. This is an example of:

Answer (Please select your correct option)

☐ Price leadership.

☐ Collusion.

☐ The dominant firm model.

☐ The Stackelberg model.

Question No : 8 of 60 Marks: 1 (Budgeted Time 1 Min)

Assume that labor and capital are complements in production and that the wage of labor is being reduced. Which of the following statements best describes the adjustment in the use of labor?

Answer (Please select your correct option)

☐ Adjustments in labor use are not influenced by adjustments in capital use.

☐ The MRPL curve shifts downward in this case.

☐ More labor is used both because of the reduced wage and increased use of capital.

☐ Changes in labor use are indeterminate because the reduced wage and reduced use of capital have opposite influences on the use of labor.
