

Application Layer (TCP/IP Suite)

DNS

1: In a _____ name space, a name is assigned to an address. A name in this space is a sequence of characters without structure.

- a. flat b. hierarchical c. organized d. none of the above

The correct answer is a

2: In a _____ name space, each name is made of several parts.

- a. flat b. hierarchical c. organized d. none of the above

The correct answer is b

3: To have a hierarchical name space, a _____ was designed.

- a. domain space b. domain name c. domain name space d. none of the above

The correct answer is c

4: In the DNS, the names are defined in _____ structure.

- a. a linear list b. an inverted-tree c. a graph d. none of the above

The correct answer is b

5: Each node in the tree has a _____, which is a string with a maximum of ____ characters.

- a. label; 127 b. name; 255 c. label; 63 d. none of the above

The correct answer is c

6: The root of the DNS tree is _____.

- a. a string of characters b. a string of 63 characters
c. an empty string d. none of the above

The correct answer is c

7: A full domain name is a sequence of labels separated by _____.

- a. semicolons b. Dots c. Colons d. none of the above

The correct answer is b

8: If a label is terminated by a null string, it is called a _____.

- a. PQDN b. FQDN c. SQDN d. none of the above

The correct answer is b

9: If a label is not terminated by a null string, it is called a _____.

- a. PQDN b. FQDN c. SQDN d. none of the above

The correct answer is a

10: A _____ is a subtree of the domain name space.

- a. label b. name c. domain d. none of the above

The correct answer is c

11: What a server is responsible for or has authority over is called a _____.

- a. domain b. Label c. Zone d. none of the above

The correct answer is c

12: A _____ is a server whose zone consists of the whole tree.

- a. domain server b. zone server c. root server d. none of the above

The correct answer is c

13: A _____ server loads all information from the disk file.

- a. primary b. secondary c. zone d. none of the above

The correct answer is a

14: A _____ server loads all information from the primary server.

- a. primary b. secondary c. zone d. none of the above

The correct answer is b

15: When the secondary downloads information from the primary, it is called _____ transfer.

- a. domain b. Zone c. Label d. none of the above

The correct answer is b

16: In the Internet, the domain name space (tree) is divided into _____ different sections:

- a. three b. two c. four d. none of the above
The correct answer is a
- 17: The _____ domains define registered hosts according to their generic behavior.
a. generic b. country c. inverse d. none of the above
The correct answer is a
- 18: The first level in the generic domains section allows _____ possible labels.
a. 10 b. 12 c. 16 d. none of the above
The correct answer is d
- 19: The _____ domain section uses two-character country abbreviations.
a. generic b. country c. inverse d. none of the above
The correct answer is b
- 20: The _____ domain is used to map an address to a name.
a. generic b. country c. inverse d. none of the above
The correct answer is c
- 21: In _____ resolution, the resolver expects the server to supply the final answer.
a. iterative b. recursive c. straight d. none of the above
The correct answer is b
- 22: In _____ resolution, the server returns the IP address of the server that it thinks can resolve the query.
a. iterative b. recursive c. straight d. none of the above
The correct answer is a
- 23: In the domain name chal.atc.fhda.edu, _____ is the least specific label.
a. chal b. atc c. edu d. none of the above
The correct answer is c
- 24: In the domain name chal.atc.fhda.edu, _____ is the most specific label.
a. chal b. atc c. fhda d. none of the above
The correct answer is a
- 25: A host with the domain name pit.arc.nasa.gov. is on the _____ level of the DNS hierarchical tree.
(The root is level one.)
a. third b. fourth c. fifth d. none of the above
The correct answer is c
- 26: A pointer query involves the _____ domain.
a. inverse b. Reverse c. Root d. none of the above
The correct answer is a
- 27: DNS can use the services of _____ using the well-known port 53.
a. UDP b. TCP c. either (a) or (b) d. none of the above
The correct answer is c

E-Mail

- 33: When the sender and the receiver of an email are on the same system, we need only _____.
a. one UA b. two UAs c. one UA and one MTA d. none of the above
The correct answer is b
- 34: When the sender and the receiver of an email are on different systems, we need only _____.
a. one MTA b. two UAs c. two UAs and one pair of MTAs d. none of the above
The correct answer is c
- 35: When the sender is connected to the mail server via a LAN or a WAN, we need _____.
a. two MTA b. two UAs and two pairs of MTAs c. two UAs and a pair of MTAs
d. none of the above
The correct answer is b
- 36: When both sender and receiver are connected to a mail server via a LAN or a WAN, we need _____.

- a. two UAs, two pairs of MTAs, and a pair of MAAs b. two UAs, and two pairs of MTAs
c. two UAs, two pairs of MTAs, and two pairs of MAAs d. none of the above

The correct answer is a

37: _____ provides service to the user to make the process of sending and receiving a message easier.

- a. An MTA b. An MAA c. A UA d. none of the above

The correct answer is c

38: Which of the following services is not provided by a UA?

- a. composing messages b. reading messages c. replying messages d. all are

The correct answer is d

39: There are two types of user agents: _____ and _____.

- a. command-driven; data-driven b. command-driven; GUI-based
c. command-based and data-based d. none of the above

The correct answer is b

40: The _____ usually contains the sender address, the receiver address, and other information.

- a. message b. envelope c. both a and b d. none of the above

The correct answer is b

41: The message contains the _____ and the _____.

- a. header; envelop b. header; body c. envelop; body d. none of the above

The correct answer is b

42: In the Internet, the email address consists of two parts: a _____ and a _____.

- a. local part; domain name b. global part; domain name
c. label; domain name d. none of the above

The correct answer is a

43: _____ is a supplementary protocol that allows non-ASCII data to be sent through email.

- a. JPEG b. MPEG c. MIME d. none of the above

The correct answer is c

44: The actual mail transfer is done through _____.

- a. Uas b. MTAs c. MAAs d. none of the above

The correct answer is b

45: The formal protocol that defines the MTA client and server in the Internet is called _____.

- a. SMTP b. SNMP c. TELNET d. none of the above

The correct answer is a

46: The process of transferring a mail message occurs in _____ phases.

- a. two b. four c. five d. none of the above

The correct answer is d

47: SMTP is a _____ protocol.

- a. pull b. push c. both a and b d. none of the above

The correct answer is b

48: The third stage in an email transfer needs a _____ protocol.

- a. pull b. push c. both a and b d. none of the above

The correct answer is a

49: The third stage in an email transfer uses a(n) _____ protocol.

- a. UA b. MTA c. MAA d. none of the above

The correct answer is c

50: Currently two message access protocols are available: _____ and _____.

- a. POP3; IMAP2 b. POP4; IMAP1 c. POP3; IMAP4 d. none of the above

The correct answer is c

51: Which part of the mail created by the UA contains the sender and receiver names?

- a. envelope b. address c. header d. none of the above

The correct answer is c

52: The MIME _____ header uses text to describe the type of data in the body of the message.

- a. content-type b. content-transfer-encoding c. content-description d. none of the above

The correct answer is c

53: _____ is more powerful and complex than _____.

- a. POP3; IMAP4 b. IMAP4; POP3 c. SMTP; POP3 d. none of the above

The correct answer is b

WWW and HTTP

1: _____ is a repository of information linked together from points all over the world.

- a. The WWW b. HTTP c. HTML d. none of the above

The correct answer is a

2: The WWW today is a _____ client-server service, in which a client using a browser can access a service using a server.

- a. limited b. vast c. distributed d. none of the above

The correct answer is c

3: The _____ is a standard for specifying any kind of information on the Internet.

- a. URL b. ULR c. RLU d. none of the above

The correct answer is a

4: In a URL, the _____ is the client-server program used to retrieve the document.

- a. path b. protocol c. host d. none of the above

The correct answer is b

5: In a URL, the _____ is the computer on which the information is located.

- a. path b. protocol c. host d. none of the above

The correct answer is c

6: In a URL, an optional _____ can be inserted between the host and the path, and it is separated from the host by a colon.

- a. path b. protocol c. host d. none of the above

The correct answer is d

7: In a URL, the _____ is the full name of the file where the information is located.

- a. path b. protocol c. host d. none of the above

The correct answer is a

8: A cookie is made by the _____ and eaten by the _____.

- a. client; client b. client; server c. server; server d. none of the above

The correct answer is c

9: The documents in the WWW can be grouped into _____ broad categories.

- a. two b. three c. four d. none of the above

The correct answer is b

10: A _____ document is a fixed-content document that is created and stored in a server. The client can get a copy of the document only.

- a. static b. dynamic c. active d. none of the above

The correct answer is a

11: _____ is a language for creating Web pages.

- a. HTTP b. HTML c. FTTP d. none of the above

The correct answer is b

12: A _____ document is created by a Web server whenever a browser requests the document.

- a. static b. dynamic c. active d. none of the above

The correct answer is b

13: _____ is a technology that creates and handles dynamic documents.

- a. GIC b. CGI c. GCI d. none of the above

The correct answer is b

14: Dynamic documents are sometimes referred to as _____ dynamic documents.

- a. client-site b. server-site c. both a and b d. none of the above

The correct answer is b

15: For many applications, we need a program or a script to be run at the client site. These are called _____ documents.

- a. static b. dynamic c. active d. none of the above

The correct answer is c

16: One way to create an active document is to use _____.

- a. CGI b. Java stand-alone programs c. Java applets d. none of the above

The correct answer is c

17: Active documents are sometimes referred to as _____ dynamic documents.

- a. client-site b. server-site c. both a and b d. none of the above

The correct answer is a

18: HTTP uses the services of _____ on well-known port 80.

- a. UDP b. IP c. TCP d. none of the above

The correct answer is c

19: In HTTP, the first line in a request message is called a _____ line; the first line in the response message is called the _____ line.

- a. request; response b. response; request
c. response; status d. none of the above

The correct answer is d

20: In a _____ connection, one TCP connection is made for each request/response.

- a. persistent b. nonpersistent
c. both a and b d. none of the above

The correct answer is b

21: In a _____ connection, the server leaves the connection open for more requests after sending a response.

- a. persistent b. nonpersistent c. both a and b d. none of the above

The correct answer is a

22: HTTP version 1.1 specifies a _____ connection by default.

- a. persistent b. nonpersistent c. both a and b d. none of the above

The correct answer is a

23: In HTTP, a _____ server is a computer that keeps copies of responses to recent requests.

- a. regular b. proxy c. both a and b d. none of the above

The correct answer is b

24: An HTTP request message always contains _____.

- a. a header and a body b. a request line and a header
c. a status line, a header, and a body d. none of the above

The correct answer is b

25: Which of the following is present in both an HTTP request line and a status line?

- a. HTTP version number b. URL c. status code d. none of the above

The correct answer is a

26: The HTTP request line contains a _____ method to request a document from the server.

- a. GET b. POST c. COPY d. none of the above

The correct answer is a

27: A user needs to send the server some information. The request line method is _____.

- a. OPTION b. PATCH c. POST d. none of the above

The correct answer is c

28: The HTTP request line contains a _____ method to get information about a document without retrieving the document itself.

- a. HEAD b. POST c. COPY d. none of the above

The correct answer is a

29: A response message always contains _____.

- a. a header and a body b. a request line and a header
c. a status line and a header d. none of the above

The correct answer is c

30: An applet is _____ document application program.

- a. a static b. an active c. a passive d. a dynamic

The correct answer is b

Connecting Devices MCQs

1: A repeater is a connecting device that operates in the _____ layer of the Internet model.

- a. physical b. data link c. network d. all of the above

The correct answer is a

2: A _____ regenerates a signal, connects segments of a LAN, and has no filtering capability.

- a. repeater b. bridge c. router d. none of the above

The correct answer is a

3: A _____ is a connecting device that operates in the physical and data link layers of the Internet model.

- a. repeater b. bridge c. router d. none of the above

The correct answer is b

4: A _____ bridge can forward and filter frames and automatically build its forwarding table.

- a. simple b. dual c. transparent d. none of the above

The correct answer is c

5: A bridge can use the _____ algorithm to create a loopless topology.

- a. binary tree b. spanning tree c. multiway tree d. none of the above

The correct answer is b

6: A _____ LAN allows several LANs to be connected.

- a. backbone b. wireless c. wired d. none of the above

The correct answer is a

7: A backbone is usually a _____.

- a. bus b. star c. either (a) or (b) d. neither (a) nor (b)

The correct answer is c

8: A virtual local area network (VLAN) is configured by _____.

- a. software b. physical wiring c. hardware d. none of the above

The correct answer is a

9: Membership in a VLAN can be based on _____.

- a. port numbers b. MAC addresses c. IP addresses d. all of the above

The correct answer is d

10: VLANs can _____.

- a. reduce network traffic b. provide an extra measure of security
c. either (a) or (b) d. both (a) and (b)

The correct answer is d

11: _____ is just a connector.

- a. An active hub b. A passive hub c. either (a) or (b)
d. neither (a) nor (b)

The correct answer is b

12: In a star-topology Ethernet LAN, _____ is just a point where the signals coming from different stations collide; it is the collision point.

- a. An active hub b. A passive hub
c. either (a) or (b) d. neither (a) nor (b)

The correct answer is b

13: _____ is part of the media; its location in the Internet model is below the physical layer.

- a. An active hub b. A passive hub
c. either (a) or (b) d. neither (a) nor (b)

The correct answer is b

14: A _____ is a device that operates only in the physical layer.

- a. passive hub b. repeater c. bridge d. router

The correct answer is b

15: A _____ receives a signal and, before it becomes too weak or corrupted, regenerates the original bit pattern. It then sends the refreshed signal.

- a. passive hub b. repeater c. bridge d. router

The correct answer is b

16: A _____ forwards every frame; it has no filtering capability.

- a. passive hub b. repeater c. bridge d. router

The correct answer is b

17: _____ is actually a multiport repeater. It is normally used to create connections between stations in a physical star topology.

- a. An active hub b. A passive hub c. either (a) or (b) d. neither (a) nor (b)

The correct answer is a

18: A _____ operates in both the physical and the data link layer.

- a. passive hub b. repeater c. bridge d. router

The correct answer is c

19: A _____ can check the MAC addresses contained in the frame.

- a. passive hub b. repeater c. bridge d. router

The correct answer is c

20: A _____ has a table used in filtering decisions.

- a. passive hub b. repeater c. bridge d. none of the above

The correct answer is c

21: A _____ is a device in which the stations are completely unaware of its existence.

- a. passive hub b. repeater c. simple bridge d. transparent bridge

The correct answer is d

22: IEEE 802.1d specification, defines _____ criteria for a transparent bridges.

- a. two b. three c. four d. none of the above

The correct answer is b

23: A spanning tree is a graph in which there is no _____.

- a. node b. branch c. loop d. arc

The correct answer is c

24: In a bridged LAN, the _____ algorithm creates a topology in which each LAN can be reached from any other LAN through one path only.

- a. spanning tree b. binary tree c. unary tree d. none of the above

The correct answer is a

25: A three-layer switch is a kind of _____.

- a. repeater b. bridge c. router d. none of the above

The correct answer is c

26: A two-layer switch is a _____.

- a. repeater b. bridge c. router d. none of the above

The correct answer is b

27: Some new two-layer switches, called _____ switches, have been designed to forward the frame as soon as they check the MAC addresses in the header of the frame.

- a. cut-through b. go-through c. come-through d. none of the above

The correct answer is a

28: A _____ is a three-layer device that handles packets based on their logical addresses.

- a. repeater b. bridge c. router d. none of the above

The correct answer is c

29: A _____ normally connects LANs and WANs in the Internet and has a table that is used for making decisions about the route.

- a. repeater b. bridge c. router d. none of the above

The correct answer is c

30: A _____ switch is a faster and more sophisticated router.

- a. two-layer b. three-layer c. four-layer d. none of the above

The correct answer is b

31: A _____ is normally a computer that operates in all five layers of the Internet model or seven layers of OSI model.

- a. repeater b. bridge c. router d. gateway

The correct answer is d

32: A _____ can be used as a connecting device between two internetworks that use different models.

- a. repeater b. bridge c. router d. gateway

The correct answer is d

33: In a _____ backbone, the backbone is just one switch.

- a. bus b. ring c. star d. none of the above

The correct answer is c

34: A _____ link acts as a LAN in a remote backbone connected by remote bridges.

- a. point-to-point b. multipoint c. multidrop d. none of the above

The correct answer is a

35: VLANs create _____ domains.

- a. unicast b. multicast c. broadcast d. none of the above

The correct answer is c

36: In a(n) _____ configuration, the administrator types the port numbers, the IP addresses, or other characteristics, using the VLAN software.

- a. manual b. automatic c. semiautomatic d. none of the above

The correct answer is a

37: In a(n) _____ configuration, the stations are automatically connected or disconnected from a VLAN using criteria defined by the administrator.

- a. manual b. automatic c. semiautomatic d. none of the above

The correct answer is b

38: In a(n) _____ configuration, the initializing is done manually, with migrations done automatically.

- a. manual b. automatic c. semiautomatic d. none of the above

The correct answer is c

Question No: 8 (Marks: 1) - Please choose one

Bit rate is equal to baud rate in_____.

- FSK
- PSK
- ASK
- QAM

Question No: 12 (Marks: 1) - Please choose one

Human brain is considered as _____.

- DTE
- DCE
- Computer
- Network

Question No: 31 (Marks: 1) - Please choose one

In CRC the quotient at sender becomes the _____at receiver.

- Divisor
- Zero
- one
- None of the above

Question No: 32 (Marks: 1) - Please choose one

Which error detection method can detect single bit error.

- Simple parity check
- LRC
- CRD
- All of the above

Question No: 33 (Marks: 1) - Please choose one

Which error detection method involves use of parity bits.

- Simple parity check
- LRC
- CRD
- All of the above

Question No: 34 (Marks: 1) - Please choose one

At CRC generator _____ is added to data before the division process.

- Zeros
- Ones
- Polynomial
- None of the above

Question No: 37 (Marks: 1) - Please choose one

For sliding window of N-1 there can be _____frames sent un acknowledged.

- N+1
- N
- N -1

- 2N

Question No: 38 (Marks: 1) - Please choose one

Stop & Wt ARQ N data frames sent _____ acknowledgements require.

- N-1
- N
- N+1
- 2N

Question No: 39 (Marks: 1) - Please choose one

Sliding windows require data frames be transmitted _____.

- Sequentially
- Individually
- Simultaneously
- None of the Above

Here are the answers

Question No: 8 (Marks: 1) - Please choose one

- **ASK**

Question No: 12 (Marks: 1) - Please choose one

Human brain is considered as _____.

- **DTE**

Question No: 31 (Marks: 1) - Please choose one

In CRC the quotient at sender becomes the _____ at receiver.

- **Divisor**

Question No: 32 (Marks: 1) - Please choose one

Which error detection method can detect single bit error.

- **All of the above**

Question No: 33 (Marks: 1) - Please choose one

Which error detection method involves use of parity bits.

- **Simple parity check**

Question No: 34 (Marks: 1) - Please choose one

At CRC generator _____ is added to data before the division process.

- **Zeros**

Question No: 37 (Marks: 1) - Please choose one

For sliding window of N-1 there can be _____ frames sent un acknowledged.

- **N -1**

Question No: 38 (Marks: 1) - Please choose one

Stop & Wt ARQ N data frames sent _____ acknowledgements require.

- **N**

Question No: 39 (Marks: 1) - Please choose one

Sliding windows require data frames be transmitted _____.

- **Sequentially**

QUIZ # 2

CS 601 DATA COMMUNICATION

FALL 2009

Question # 1 of 10

Classes of Transmission Media are _____

- Electromagnetic Spectrum
- Coaxial and Twisted Cable Media
- **Guided and Unguided Media**
- None of Given

Question # 2 of 10

56k Modems maximum uploading Data rate is 40K.

- True
- **False**

Question # 3 of 10

Light source can either _____ or _____

- ELD,LID
- LED,LID

- ELD,ILD
- **LED,ILD**

Question # 4 of 10

Tropospheric Propagation is in two ways Light-of-Sight and Broadcast

- True
- **False**

Question # 5 of 10

Modem standards are _____

- Cable Modem
- Bell and ITU-U modem
- Traditional and 56K Modem
- **None of Given**

Question # 6 of 10

In 56K Modem maximum uploading speed is _____ bytes and downloading speed is _____ Bytes

- 40K,56K
- **33.6K,56K**
- 56K,33.6K
- None of Given

Question # 7 of 10

A Broadcast signal is received by orbiting satellite which rebroadcasts

- To the resender
- To the sender
- To the atmosphere

- **None of Given**

Question # 8 of 10

Data rate limitation of traditional modems is 6KHz.

- True
- **False**

Question # 9 of 10

Q STP can eliminate a phenomenon called Crosstalk

- **True**
- False

Question # 10 of 10

Speed of Light in a vacuum is

- 200,000 Km/sec
- **300,000 Km/sec**
- 600,000 Km/sec
- None of Given

Please Answer these Networking MCQ?

(1) There are three types of Hubs that exist. Which of the following options correctly describes these three.

1. Passive, dormant, special
2. Active , dormant , passive
3. Passive, Active, Turbo
- 4. Passive, Active, Intelligent**

ANS:----

2. A number of different factors determine the cost of a Hub. Which of the following is among these factors?

1. Speed rating
2. Durability
3. Brand
4. Class

(3) Three(3) basic devices are used in setting up a single Network. Which of the following best describes these devices?

1. **NIC (Ethernet), Hub, Twisted pair/Coaxial cable**
2. Disk drive, CPU, Hub
3. Hub, CPU, NIC (Ethernet)
4. Disk drive, Hub, NIC (Ethernet)

4. Which of the following network topologies among the list below is incorrect?

1. Star
2. **Internet**
3. Ring
4. Bus

4. Which of the following is not a feature of Base band Coaxial Cable?

1. **Bi-directional**
2. Few Kilometer ranges
3. Proton based
4. Ethernet (basis for 802.3) at 10 Mbps

4. Which of the following is not a function of a repeater?

1. Uses Jumper Settings
2. **Transmits data in both directions**
3. No Buffering
4. Joins two(2) segments of cables

4. Which level of the TCP/IP reference model routes data/information across a network channel ?

1. Application layer

2. Data Link Layer
3. **Transport Layer**
4. Network Layer

4. The function of a modem is to convert signals. Identify the correct signals it converts.

1. **Analogue to Digital**
2. Analogue to Baud rate
3. Baud rate to Analogue
4. Digital to Binary

4. Which of the following is not a LAN – Architecture?.

(a) Protocol architecture

2. Media access control
3. **Logical Protocol**
4. Logical Link Control

4. Identify the statement which best describes TCP and UDP.

1. **TCP is a connection oriented Protocol whiles UDP is a datagram service**
2. TCP is a protocol for the Network Layer of the OSI
3. UDP and TCP could be used interchangeably
4. TCP is an advanced protocol whiles UDP is a single protocol

4. Which of the following characteristics best describes a frame?

1. Data link layer(Header, Trailer, Data)
2. Network Layer(Header, Trailer, Data)
3. **Transport Layer(Header, Trailer, Data)**
4. Physical Layer(Header, Trailer, Data)

4. What does the terminology ISDN mean?

1. **Internal Digital Services Network**
2. Integrated Systems Digital Network

3. Integrated Services Digital Naming System
4. Integrated Services Digital Network

4. What does the terminology ATM mean?

1. **Automatic transfer mode**
2. Automatic translation mode
3. Asynchronous transfer mode
4. Asynchronous transformation mode

4. A simple Architecture for File Transfer is made up of :

1. File transfer application; Communications service module; Network access module
2. File transfer application; transport layer; Network access module
3. Network access layer; Transport layer; Application layer
4. **Application layer; Network layer; Session layer**

4. Which of the following statements is true about standards?

1. Standards create additional cost
2. Standards help individuals users to increase effectiveness
3. **Standards allow products from multiple vendors to communicate**
4. Standards cannot freeze technology

4. Which of the following statement is true about FLOW CONTROL?

1. Flow control is a function performed by a receiving entity to limit the amount or rate of data on a network.
2. **Flow control adjusts the weights on a network**
3. Flow control is a function performed by the MODEM
4. Flow control is an advanced form of network management

4. Identify the most suitable description for ERROR CONTROL?

1. Error control is an activity that manages deadlock.
2. Error control is an advanced form of parity bit
3. **Error control is a sub-function of a modem and Hub**
4. Error control is needed to guard against loss or damage of data

(18) What is the full meaning of the terminology SMTP?

1. State Mail Transfer Protocol
2. Simple Mail Tailor Protocol
3. Simple Management Transfer Protocol
4. **Simple Mail Transfer Protocol**

19. Several Computers connected together is called:

1. Client-server
2. **Client**
3. Computer network
4. Hub

19. In which of the following networks does the client submit a task to the server, then the server executes and returns the result for the requesting client station?

1. Peer-to-Peer
2. Client-Server
3. Server-Based
4. **All of the above**

19. In which network topology are all workstations connected in cascade form?

1. Star
2. Ring
3. **Mesh**
4. Bus

19. Which network topology uses a Hub?

1. Star
2. **Bus**
3. Mesh
4. Ring

Question No: 1 (Marks: 1) - Please choose one

In RS 422 Balanced mode two lines carry _____ signals which are not identical to each other.

- ▶ same
- ▶ **different**
- ▶ digital
- ▶ analog

Question No: 2 (Marks: 1) - Please choose one

The _____ generates the data and passes it along with any control information to a _____.

- ▶ DTE; DCE
- ▶ DCE; DTE
- ▶ DCE; node
- ▶ DTE; application

Question No: 3 (Marks: 1) - Please choose one

In _____ transmission, a start bit and a stop bit frame a character byte.

- ▶ **Asynchronous serial**
- ▶ Synchronous serial
- ▶ Parallel
- ▶ Asynchronous & Synchronous serial

Question No: 4 (Marks: 1) - Please choose one

In _____ transmission, bits are transmitted simultaneously, each across its own wire.

- ▶ Asynchronous serial
- ▶ Synchronous serial
- ▶ **Parallel**
- ▶ Asynchronous & Synchronous serial

Question No: 5 (Marks: 1) - Please choose one

Asynchronous transmission is _____

- ▶ slow
- ▶ costly
- ▶ **non-effective**
- ▶ fast

Question No: 6 (Marks: 1) - Please choose one

In _____ transmission the timing of the signal is unimportant.

- ▶ **Asynchronous**
- ▶ Synchronous
- ▶ Polar
- ▶ Bi-polar

Question No: 7 (Marks: 1) - Please choose one

In 8QAM each signal shift or one baud represents _____.

- ▶ 4 bits
- ▶ **2 bits**
- ▶ 5 bits
- ▶ 3 bits

Question No: 8 (Marks: 1) - Please choose one

PCM is the first process of PAM.

- ▶ True
- ▶ **False**

Question No: 9 (Marks: 1) - Please choose one

Bi phase encoding is a type of bipolar encoding in which we use two voltage levels.

- ▶ **True**
- ▶ False

Question No: 10 (Marks: 1) - Please choose one

The amplitude of a digital signal depends upon the _____ to represent a bit.

- ▶ phase
- ▶ voltage
- ▶ wavelength

Question No: 11 (Marks: 1) - Please choose one

Time domain plot show changes in signal phase with respect to time.

- ▶ **True**
- ▶ False

Question No: 12 (Marks: 1) - Please choose one

OSI model was developed prior to TCP/IP model.

- ▶ **True**
- ▶ False

Question No: 13 (Marks: 1) - Please choose one

The _____ layer is the layer closest to the transmission medium.

- ▶ **physical**
- ▶ data link
- ▶ network
- ▶ transport

Question No: 14 (Marks: 1) - Please choose one

Data chunk at data link layer is called _____

- ▶ frame
- ▶ packet
- ▶ datagram

Question No: 15 (Marks: 1) - Please choose one

The internet model consists of _____ layers.

- ▶ three
- ▶ two
- ▶ **five**
- ▶ seven

Question No: 16 (Marks: 1) - Please choose one

_____ representation of links that connect nodes is called as physical topology.

- ▶ geometrical
- ▶ logical
- ▶ physical

Question No: 17 (Marks: 1) - Please choose one

_____ is a multipoint topology.

- ▶ Ring
- ▶ Mesh
- ▶ Tree
- ▶ **Bus**

Question No: 18 (Marks: 1) - Please choose one

In mesh topology, if there are five nodes then there will be _____ links.

- ▶ 5
- ▶ **10**
- ▶ 15
- ▶ 20

Question No: 19 (Marks: 1) - Please choose one

Non proprietary standard is also termed as de facto standard.

- ▶ **True**
- ▶ False

Question No: 20 (Marks: 1) - Please choose one

Effective network mean that the network has fast delivery, timeliness and

- ▶ **high bandwidth**
- ▶ Duplex transmission
- ▶ accurate transmission
- ▶ Low bandwidth

Question No: 21 (Marks: 2)

What is purpose of distributed processing?

Question No: 22 (Marks: 3)

What is HDB3?

Question No: 23 (Marks: 5)

Differentiates between the following terms. [10 marks]

- (a) Syntax and Semantics of protocol.
- (b) Network management and exchange management.
- (c) Monolithic and structured.

Question No. 4 Marks: 2

The _____ layer is the layer closest to the transmission medium.

- ☐ Physical
- ☐ Data Link
- ☐ Network
- ☐ Transport

Question No. 5 Marks: 2

The information to be communicated in a data communication system is the _____.

- ☐ Medium
- ☐ Protocol
- ☒ **Message**
- ☐ Transmission

Question No. 6 Marks: 2

In _____ transmission a timing of signal is unimportant.

- ☐ Synchronous
- ☐ Asynchronous
- ☒ **Both**
- ☐ None of these

Which of the following is most affected by voice?

- ☐ QAM
- ☐ ASK
- ☒ **FSK**
- ☐ PSK

The _____ layer is the layer closest to the transmission medium.

- ☐ Physical
- ☐ Data Link
- ☐ Network
- ☐ Transport

Which error detection method uses ones complement arithmetic?

- ☐ Simple parity check
- ☐ Two-dimensional parity check
- ☐ CRC
- ☐ Checksum

Question No. 2 Marks : 2

In a time-domain plot, the vertical axis is the measure of _____.

- ☐ Amplitude
- ☒ **Frequency**
- ☐ Phase
- ☐ Time

Which topology requires a multipoint connection?

- ☐ Mesh
- ☐ Star
- ☒ **Bus**
- ☐ Ring

Draw the sender and receiver windows for a system using Go-Back-N ARQ, given the following:

- a. Frame 0 is sent; frame 0 is acknowledged.**
- b. Frames 1 and 2 are sent; frame 1 and 2 are acknowledged.**
- c. Frames 3, 4 and 5 are sent; frame 4 is acknowledged; timer for frame 5 expires.**
- d. Frames 5, 6 and 7 are sent; frames 4 through 7 are acknowledge.**

A timer is set when _____ is (are) sent out.

- ☐ A data frame
- ☐ An ACK
- ☐ A NAK
- ☐ An ARQ

If the data unit is 11111, the divisor 1010, and the remainder 110, what is the dividend at the receiver?

- ☐ 11111011
- ☐ 11111110
- ☐ 1010110
- ☐ 11011111

In cyclic redundancy checking, what is the CRC?

- ☒ the divisor
- ☒ the quotient
- ☒ the dividend
- ☒ the remainder

In fiber optics the signal source is _____ waves.

- ☒ Light
- ☒ **Radio**
- ☒ Very Low frequency

☐ Infrared

Which multiplexing technique shifts each signal to a different carrier frequency?

☐ FDM

☐ Synchronous TDM

☐ Asynchronous TDM

☐ None of the above

The _____ of a signal is the width of the frequency spectrum.

☐ Amplitude

☐ Bandwidth

☐ Bit interval

☐ Phase

Poll/Select is a technique related with

▶ line control

▶ **line discipline**

▶ error control

Router work on

▶ data link layer

▶ physical layer

▶ **network layer**

A Null modem is a

▶ traditional modem

▶ **technique to connect two DTE**

▶ both

WDM(wave division multiplexing) deals with

▶ electric waves

▶ light waves

▶ **both**

Set of rules governing communication is known as

▶ OSI model

▶ **Protocol**

▶ Medium

Burst error is easily corrected then bit error.

- ▶ TRUE
- ▶ FALSE

Unipolar use one voltage levels.

- ▶ TRUE
- ▶ FALSE

TCP/IP application layers combine the functions of OSI Application, Session and Transport layers.

- ▶ TRUE
- ▶ FALSE

OSI standard is practically implemented in the form of internet.

- ▶ TRUE
- ▶ FALSE

In fiber optics, the signal source is _____ waves.
light
radio
infrared
very low frequency

Wave division multiplexing (WDM) is conceptually the same as FDM, except that the multiplexing and demultiplexing involve _____ signals.
analog
light
digital
periodic

Local loop is a connection between _____ and _____.
Subscriber's handset and exchange
exchange and T-Lines
exchange and E-Lines
None of the above

In vertical redundancy check (VRC) a _____ bit is added to every data unit.
synchronization
framing
parity
interleaving

In cyclic redundancy checking, what is CRC?

The divisor

The remainder

The quotient

Which error detection method involves polynomials?

CRC

VRC

LRC

Checksum

In stop and wait ARQ, if “data 1” has an error, the receiver sends a _____ frame.

NAK

NAK 0

NAK 1

NAK 2

Poll/Select line discipline requires _____ to identify the packet recipient.

an address

a timer

a buffer

a dedicated line

Which of the following best describes a single-bit error?

1 A single bit is inverted

2 A single bit is inverted per transmission

3 A single bit is inverted per data unit

4 Any of the above

In fiber optic cable, the signal source is _____ waves

1 Infrared

2 Light

3 Radio

4 Very Low Frequency

In an environment with many high-voltage devices, the best transmission medium would be _____.

1 **Atmosphere**

2 Coaxial Cable

3 Twisted Pair

4 Fiber Optic Cable

Which of the following is not a guided medium?

1 Twisted Pair

2 Fiber Optic Cable

3 Coaxial Cable

Which multiplexing technique involves signals composed of light beams?

1 TDM

2 FDM

- 3 WDM
4 None of the above

The _____ layer changes bits into electromagnetic signals.

- 1 Network
2 Application
3 **Physical**
4 Presentation

Flow Control is needed to prevent _____

- 1 Overflow of sender buffer
2 **Overflow of the receiver buffer**
3 Bit Errors
4 Collision between sender and receiver

DB25 and DB9 are the mechanical specifications of

▶	RS232	
▶	EIA232	
▶	EIA530	

[Top](#)

Q STP is less expensive than UTP and is less susceptible to noise
True

False

Q Tropospheric Propagation is in two ways light of sight and broadcast.

True

False

Q STP can eliminate a phenomenon called Crosstalk

True

False

Q Data rate limitation of traditional modems is 6KHz.

True

False

Q TROPOSHERE is the layer of atmosphere above the troposphere but below space

True

False

Q Classes of Transmission Media are _____

Electromagnetic Spectrum

Coxial and Twisted Cable Media

Guided and Unguided Media

None of Given
