MOST RECENT PRICING PAGE TEARDOWN RECUR NOW PROFITWELL REPORT PROTECT THE HUSTLE

Psychological pricing is the business practices of setting prices lower than a whole number. The idea behind psychological pricing is that customers will read the slightly lowered price and treat it lower than the price actually is. An example of psychological pricing is an item that is priced $3.99 but conveyed by the consumer as 3 dollars and not 4 dollars, treating $3.99 as a lower price than $4.00.

Click to Save Answer & Move to Next Question

It is always done in response to all advertising campaigns in order to know the overall impact of the advising activities. Advertising researches bring answer for all the above mentioned aspects & through these companies can know where the change is required either in your message, your budget, your media selection or etc.

PERSONAL SELLING

"A promotional tool in which a salesperson communicates one-on-one with potential customers"

- It is the most expensive form of promotion per contact. Most companies spend twice as much on personal selling as on all other marketing activities combined. Expenses include salespeople's compensation and overhead, usually travel, food, lodging. The cost of a single sales call has been estimated at about $300.
- Sales force automation and new technologies are relieving salespeople of nonproductive tasks, making the time they spend with customers more efficient and profitable.
