MGT211 - Theme 5: Operations Management

Part A: Introduction to Operations Management (OM)

1. Operations Management (OM) is primarily concerned with:

a) Selling products to customers
b) Designing and overseeing the process of transforming inputs into outputs
c) Hiring employees only
d) Managing bank accounts

2. The main goals of Operations Management include all EXCEPT:

a) Efficiency (reducing waste)
b) Quality maintenance
c) Maximizing shareholder dividends directly
d) Customer Satisfaction

3. Which functional area ensures that "goods and services are produced efficiently and cost-effectively"?

a) Marketing
b) Operations Management
c) HR
d) Finance

4. "Six Sigma" is a concept related to:

a) Marketing Strategy
b) Quality Management and minimizing defects
c) Employee Hiring
d) Accounting

LGWT
Learning & Growing With Team

5. "Just-in-Time" (JIT) inventory system aims to:

a) Increase inventory costs
b) Reduce storage costs by receiving goods only when needed
c) Store goods for 5 years
d) Delay production

6. ERP stands for:

a) Enterprise Resource Planning
b) Efficient Resource Production
c) Electronic Retail Process
d) Employee Retention Plan

7. Which of the following is an "Input" in a bakery?

a) The final cake
b) Flour, Sugar, and Eggs
c) Customer feedback

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

d) Delivery truck

8. The "Transformation Process" involves:

a) Buying the product
b) Converting inputs (raw materials) into outputs
c) Selling shares
d) Marketing ads

9. "Feedback" in the production process is used to:

a) Ignore customers
b) Improve efficiency and quality based on evaluation
c) Increase waste
d) Stop production

10. Operations Management helps in "Capacity Planning", which means:

a) Deciding how many employees to fire
b) Determining how much production the facility can handle to meet demand
c) Planning the office party
d) Deciding the color of the logo

Part B: Production Processes & Types

11. Which type of production involves making "Custom-made" or unique goods (e.g., designer furniture, tailored suits)?

a) Mass Production
b) Continuous Production
c) Job Production
d) Batch Production

12. Making goods in "Groups" or limited quantities (e.g., bakery items, medicines) is called:

a) Job Production
b) Batch Production
c) Flow Production
d) Mass Production

13. "Mass Production" is characterized by:

a) Unique items
b) Large-scale, standardized output (e.g., smartphones, cars)
c) Non-stop 24/7 operation
d) Hand-made items

14. Oil refining and electricity generation are examples of:

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

a) Batch Production
b) Job Production
c) Continuous Production
d) Project Production

15. Which process type uses an "Assembly Line"?

a) Job Production
b) Mass Production
c) Batch Production
d) Custom Production

16. "Tangible" items produced by businesses are called:

a) Services
b) Goods
c) Ideas
d) Processes

17. "Intangible" offerings like education, repair work, or consulting are:

a) Goods
b) Services
c) Raw Materials
d) Inventory

18. The "Secondary Sector" of the economy deals with:

a) Extraction
b) Manufacturing and Processing
c) Services
d) IT

LGWT
Learning & Growing With Team

Part C: Location Decisions

19. Choosing the right "Location" for a business is important because:

a) It affects costs (transport, labor) and delivery time
b) It looks good on the website
c) Managers like to travel
d) It has no impact

20. A cement factory is usually located near:

a) The city center
b) Raw materials (limestone quarries) to reduce transport cost
c) Airports
d) Schools

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

21. Retail shops and restaurants usually prefer a location near:

a) Forests
b) Customers
c) Factories
d) Mines

22. "Tech companies" often locate near universities (e.g., Silicon Valley) to access:

a) Cheap land
b) Skilled Talent and Innovation
c) Raw materials
d) Water supply

23. Which factor is crucial for a factory that uses heavy machinery?

a) Beautiful view
b) Reliable Energy/Power Supply
c) Near a park
d) Near a cinema

24. "Nearshoring" is a trend where companies:

a) Move production far away
b) Bring production closer to home or key markets
c) Close down production
d) Stop exporting

Part D: Resource Planning

25. The process of ensuring the right resources are available at the right time is:

a) Marketing
b) Resource Planning
c) Hiring
d) Selling

26. "Demand Forecasting" helps a business to:

a) Guess randomly
b) Predict future sales to estimate needed resources
c) Ignore market trends
d) Set high prices

27. "Gap Analysis" in resource planning means:

a) Identifying shortages between what we have and what we need
b) Taking a break
c) Analyzing competitors

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

d) Calculating profit

28. A "Gantt Chart" is a tool used for:

a) Calculating tax
b) Visual Scheduling of tasks and timelines
c) Hiring people
d) Designing logos

29. MRP stands for:

a) Money Resource Planning
b) Material Requirements Planning
c) Marketing Research Process
d) Management Resource Plan

30. Failure in resource planning can lead to:

a) High efficiency
b) Overproduction or Underproduction
c) Happy customers
d) Lower costs

Part E: Industry 4.0 & Smart Factories

31. "Industry 4.0" refers to the integration of:

a) Steam engines in factories
b) Digital technologies into manufacturing
c) Paper-based records
d) Manual labor

32. Devices connected to the internet that monitor performance in real-time are part of:

a) IOT (Internet of Things)
b) MRP
c) HR
d) Manual logs

33. A "Digital Twin" is:

a) A photocopy of a document
b) A virtual model of a real machine/process used for simulation
c) A backup employee
d) A second factory

34. "3D Printing" is also known as:

a) Subtractive Manufacturing

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

b) Additive Manufacturing
c) Mass Production
d) Casting

35. Using robots to perform repetitive or dangerous tasks is an example of:

a) Outsourcing
b) Automation
c) Manual labor
d) Craftsmanship

36. "Big Data Analytics" in factories helps to:

a) Increase confusion
b) Optimize energy use and predict maintenance needs
c) Slow down production
d) Increase waste

37. A major challenge of implementing Industry 4.0 is:

a) Low cost
b) High initial investment and cybersecurity risks
c) Too many workers
d) Lack of internet

Part F: Supply Chain Management (SCM)

38. SCM stands for:

a) Sales Chain Management
b) Supply Chain Management
c) System Control Method
d) Stock Control Market

39. SCM involves the management of the flow of:

a) Money only
b) Goods, Information, and Finances
c) Employees only
d) Marketing ads

40. The sequence of SCM is generally:

a) Customer -> Manufacturer -> Supplier
b) Supplier -> Manufacturer -> Retailer -> Consumer
c) Retailer -> Supplier -> Manufacturer
d) Manufacturer -> Supplier -> Customer

41. "Procurement" in SCM refers to:

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

a) Selling goods
b) Sourcing and purchasing raw materials
c) Delivering goods
d) Hiring staff

42. "Logistics" is primarily concerned with:

a) Manufacturing
b) Movement and transportation of goods
c) Advertising
d) Designing

43. Amazon using "Robots" in warehouses to speed up order fulfillment is an example of:

a) Modern SCM efficiency
b) Traditional manufacturing
c) Bad management
d) Manual labor

44. "Blockchain" in SCM is used for:

a) Buying Bitcoin only
b) Increasing transparency and tracking goods securely
c) Hiding data
d) Slowing down delivery

45. Which SCM strategy helps avoid "Stockouts" (running out of product)?

a) Ignoring demand
b) Forecasting and Inventory Management
c) Reducing supply
d) Closing warehouses

46. "Reverse Logistics" deals with:

a) Moving goods forward
b) Returns, recycling, and waste disposal
c) Manufacturing
d) Advertising

47. "Last-Mile Delivery" refers to:

a) The first step of shipping
b) The final step of delivering goods to the customer's door
c) Manufacturing process
d) Buying raw material

48. "Outsourcing" means:

a) Doing everything in-house
b) Hiring external parties to handle specific business functions

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

c) Closing the business
d) Hiring more full-time staff

49. Which company is famous for its "Just-in-Time" (Lean) production system?

a) Toyota
b) Ford (Mass production)
c) Nokia
d) Enron

50. "Predictive Maintenance" uses AI to:

a) Fix machines after they break
b) Predict when a machine *might* break to fix it beforehand
c) Replace workers
d) Increase energy bills

Part G: Miscellaneous & Concepts

51. A "Bottleneck" in operations is:

a) The fastest part of the process
b) A point of congestion that slows down the entire process
c) A type of bottle
d) Efficient point

52. "Quality Control" focuses on:

a) Speed only
b) Detecting defects in finished products
c) Marketing
d) Pricing

53. "Sustainability" in operations involves:

a) Wasting resources
b) Eco-friendly practices like recycling and green logistics
c) Using more plastic
d) Ignoring pollution

54. Which sector uses "Service Operations Management" more?

a) Car factory
b) Hotel or Hospital
c) Oil rig
d) Farm

55. The "Fourth Industrial Revolution" is also called:

For More Notes & Files Join Our Whatsapp Group
https://chat.whatsapp.com/CpYyqhErHGX3E8PJ9Aj2XR

a) Industry 1.0
b) Industry 2.0
c) Industry 4.0
d) The Steam Age
