

Contemporary Issues and Trends in Education (EDU401)

Assignment No. 1 (Fall, 2021)

Total Marks: 20

(Lesson 1-12)

It is just an idea solution, kindly don't copy paste and try to make your assignment unique to avoid plagiarism and marks deduction.

Instructions:

Late assignments will not be accepted.

- If the file is corrupt or problematic, it will be marked zero.
- **Plagiarism will never be tolerated. Plagiarism occurs when a student uses work done by someone else as if it were his or her own; however, taking the ideas from different sources and expressing them in your own words will be encouraged.**
- No assignment will be accepted via e-mail.
- The solution file should be in Word document format (MS word 2007); the font color should be preferably black, and the font size should be 12 Times New Roman.
- All questions are compulsory to answer.
- Scoring Rubric is also given below as well.

Total Marks= (10+10=20)

Question 1:

- a) **How peaceful are schools and classrooms in Pakistan? In your experience, have schools become more or less peaceful in recent years? What makes you say this? (10 marks)**

Education has been touted as one of the most powerful tools we can implement in our global efforts to promote world peace.

Here's a look at the top ways **schools and classrooms** peace.

Education Boosts Confidence & Hope

Confidence breeds hope. Hope breeds peace.” Confidence has been defined as the belief that you can succeed at something and a sense of self assuredness. Knowledge is a key confidence builder; it allows one to feel a sense of accomplishment, to be more fearless, and to grow in unexpected ways. This confidence and self assuredness in turn sparks motivation and optimism—or hope as Confucius says— to work towards peace.

2 Education Promotes Independent Thinking

Education encourages independent thinking, and it opens doors to new ideas. Independent thinkers tend to try to make sense of the world and draw their own conclusions instead of blindly following the beliefs of others. Independent thinkers may be less likely to join militant groups or be followers, and may instead be leaders towards positive change and action.

3 Education Inspires Problem Solving Skills

Along with math skills that are learned in classrooms, students are often challenged to use logical thinking in order to analyze different pieces of literature, the significance of historical events, and scientific findings. Coupled with independent thinking, these critical thinking skills can lead to innovative solutions and alternatives to violence.

4 Education Builds Communication Skills

In the classroom, students are often asked to speak or read in front of others, offer opinions, and break into small groups to work on projects together. This is how communication skills are honed, and communication is the key to solving conflict. Through quality education, students may be armed with the tools to work within their communities to solve problems, or to do so on a global scale.

5 Education Opens Doors

There's no doubt that education for peace leads to career enhancement, employment opportunities, and chances of higher earnings. What was once out of reach for girls in the remote villages we work with—say becoming a doctor or a lawyer—are now possibilities. And with these careers in place, many come back to work within their communities and support their families, often promoting peace.

6 Education Reduces Poverty

Imagine always being uncomfortable, malnourished, and fearful, not knowing where your next meal will come from if it comes at all. This fear can often lead to anger, and anger to violence. Education, especially when it's combined with technical training (read more about CAI's vocational training programs), has been proven to reduce poverty. This is one driving force behind education for peace. With education comes knowledge, power, safety, security, and peace. One study by UNESCO found that income around the world would be 23 percent higher per capita in countries with education for all. If poverty were reduced, violence would follow suit.

7 Education Increases Political Involvement

Educated citizens are less likely to stand for government corruption and can spur more government accountability. For women, education can even the playing field, and they are more likely to participate in political discussions, town meetings, and decision making, therefore leading to a government that represents its citizens more equally. Because educated women are less likely to support terrorism (see number 8), they can promote alternatives through politics.

b) What have you planned to do if violence erupts in your classroom? (10 marks)

Things to do Prevent Violence in Class Rooms

Talk to Your Student

Keeping the lines of communication open with your student and teens is an important step to keeping involved in their schoolwork, friends, and activities.

Ask open-ended questions and use phrases such as "tell me more" and "what do you think?" Phrases like these show your student that you are listening and that you want to hear more about their opinions, ideas, and how they view the world.

Set Clear Rules and Limits for Your Student

Students need clearly defined rules and limits set for them so that they know what is expected of them and the consequences for not complying. When setting family rules and limits, be sure students understand the purpose behind the rules and be consistent in enforcing them.

Discipline is more effective if students have been involved in establishing the rules and, oftentimes, in deciding the consequences. Remember to be fair and flexible—as your student grows older, they become ready for expanded rights and changes in rules and limits. Show your student through your actions how to adhere to rules and regulations, be responsible, have empathy toward others, control anger, and manage stress.

Know the Warning Signs

Knowing what's normal behavior for your son or daughter can help you recognize even small changes in behavior and give you an early warning that something is troubling your child.

Sudden changes—from subtle to dramatic—should alert parents to potential problems. These could include withdrawal from friends, decline in grades, abruptly quitting sports or clubs the child had previously enjoyed, sleep disruptions, eating problems, evasiveness, lying, and chronic physical complaints (stomachache or headaches). Learn more about emotional & mental health.

Don't Be Afraid to Parent; Know When to Intervene

Parents need to step in and intervene when Student exhibit behavior or attitudes that could potentially harm them or others. And you don't have to deal with problems alone—the most effective interventions have parent, school, and health professionals working together to provide on-going monitoring and support.

Stay Involved in Your Child's School

Show your student you believe education is important and that you want your student to do their best in school by being involved in their education. Get to know your child's teachers and help them get to know you and your child. Communicate with your child's teachers throughout the school year, not just when problems arise.

Help to Organize a Community Violence Prevention Forum

Parents, school officials, and community members working together can be the most effective way to prevent violence in our schools.
