Total Questions: 10

Question 1:

The learning experiment is based on the principle of:

A. Operant Conditioning

B. Classical Conditioning

C. Latent Learning

D. Observational Learning

Selected Answer: B

Question 2:

The dependent variable in the learning experiment is liking nonsense syllables.

A. False

B. True

C. Option C not found

D. Option D not found

Selected Answer: B

Question 3:

"Ugly" is a positive adjective.

A. False

B. True

C. Option C not found

D. Option D not found

Selected Answer: A

Question 4:

It was hypothesized in the memory experiment that colored words would be remembered better than those in black and white.

A. False

B. True

C. Option C not found

D. Option D not found

Selected Answer: B

Question 5:

All of the following are the examples of negative adjectives EXCEPT:

A. Cruel

B. Nice

C. Smelly

D. Ugly

Selected Answer: B

Question 6:

In the memory experiment, what was hypothesized about colored words?

A. Colored words would be remembered better than those in black and white.

B. Black and white words would be remembered better than colored words.

C. Both colored and black-and-white words would be remembered equally.

D. The color of the words would have no effect on memory.

Selected Answer: A

Question 7:

In an experiment where nonsense syllables were paired with positive and negative adjectives to test association, the liking of nonsense syllables was influenced by:

A. The participant's prior exposure to the nonsense syllables.

B. The process of association with positive or negative adjectives.

C. The repetition of the nonsense syllables alone.

D. The length of the nonsense syllables.

Selected Answer: B

Question 8:

Color and black-and-white words are considered independent variables in the memory experiment.

A. True

B. False

C. Option C not found

D. Option D not found

Selected Answer: A

Question 9:

It was hypothesized in the learning experiment that nonsense syllables paired with positive adjectives would be liked more than those paired with negative adjectives.

A. True

B. False

C. Option C not found

D. Option D not found

Selected Answer: A

Question 10:

In the study by Staats and Staats (1976, 1977), nonsense syllables were paired with both positive and negative adjectives to test the influence of these associations on the liking of the nonsense syllables.

A. True

B. False

C. Option C not found

D. Option D not found

Selected Answer: A
