

CS614-DATA WAREHOUSING

Final Term Past Paper

(Updated spring 2022)

Made by RAjpoOT

1. Multi-dimensional databases (MDDs) typically use proprietary _____ formats to store pre summarized cube structures.

File

Reference: Page 79

2. Many DW projects do not deliver to full potential because they treat data quality as a one-time undertaking as part of (UAT). Hence UAT stands for:

user acceptance testing

Reference: Page 193

3. Which is the least appropriate join operation for Pipeline parallelism?

Sort-merge joins

Reference: Page 217

4. Implementing a data warehouse requires _____ integrated activities.

Tightly

Reference: Page 289

5. The application development quality-assurance activities cannot be completed until the data is_____.

stabilized

Reference: Page 308

6. _____ is an application of information and data.

Knowledge

Reference: Page 11

7. Parallel execution dramatically reduces response time for _____ operations on large databases typically associated with Decision Support Systems (DSS) and data warehouses.

Data-Intensive

Reference: Page 201

8. If every key in the data file is represented in the index file then index is

Dense Index

Reference: Page 223

9. There are many variants of the traditional nested-loop join. If the index is built as part of the query plan and subsequently dropped, it is called _____.

Temporary index nested-loop join

Reference: Page 243

10. _____ Division is cotton hub of Punjab.

Multan

Reference: Page 331

11. Punjab is the _____ of Pakistan, and administratively divided into eight divisions.

bread-basket

Reference: Page 331

12. If some error occurs, execution will be terminated abnormally and all transactions will be rolled back. In this case when we will access the database, we will find it in the state that was before the _____.

Execution of package

Reference: Page 419

13. Execution of package can be completed successfully or it may be stopped due to some error. If some error occurs, execution will be terminated abnormally and all transactions will be _____.

Rolled back

Reference: Page 419

14. If some error occurs, execution will be terminated abnormally and all transactions will be _____.

Rolled back

Reference: Page 419

15. Identify the TRUE statement about Hypertext Transfer Protocol (HTTP).

HTTP is stateless protocol

Reference: Page 364

16. The i th bit is set to 1 if the i th row of the base table has the value for the indexed column.

Bitmap index

Reference: Page 223

17. For a K-means clustering algorithm:

t is much smaller than n

Reference: Page 281

The K-Means Clustering: Comment

- Strength

- *Relatively efficient: $O(tkn)$, where n is # objects, k is # clusters, and t is # iterations. Normally, $k, t \ll n$.*

18. In DWH project, it is assured that _____ environment is similar to the production environment.

Development

Reference: Page 314

19. Major issues of data cleansing had arisen due to data processing and handling at _____ levels by different groups of people.

four

Reference: Page 341

Major issues of data cleansing had arisen due to data processing and handling at **four** levels by different groups of people

1. Hand recordings by the scouts at the field level.
2. Typing hand recordings into data sheets at the DPWQCP office.
3. Photocopying of the typed sheets by DPWQCP personnel.
4. Data entry or digitization by hired data entry operators.

20. _____ a small piece of information generated by the Web server and stored on the client.

Cookies

Reference: Page 359

21. _____ can be placed in front of our enterprise's Web servers to help them offload requests for frequently accessed content.

Reverse Proxy

Reference: Page 369

22. In the process of Data extraction, The wizard creates package which is a collection of _____.

Tasks

Reference: Page 411

23. Which of the following query is not answered using DBMS Approach?

- List all students who enrolled in semester fall 2017.
- What is CGPA of a student with roll no “VU00000000”?
- Identify student who has achieved highest CGPA in semester Spring 2017
- **How to reduce drop out ratio of student?**

Reference: Page 17

24. As soon as transformation tab is clicked designer tries to map the source and destination table _____ automatically on the base of resemblances in the names.

Columns

Reference: Page 466

25. Which of the following algorithm are based on the principle survival of the fittest.

Genetic Algorithms

Reference: Page 258

26. To identify the _____ required we need to perform data profiling.

Degree of Transformation

Reference: Page 437

27. A company has implemented data warehouse for analytical purpose. Quantity sold is stored as a fact. This quantity sold is

Additive Fact

Reference: Page 119

28. In data warehouse, a query retrieves millions of records from very large table. Thus the ratio of records retrieved to the total number of records present is high, and hence the selectivity is _____.

Low

Reference: Page 22

29. In the telecommunication data warehouse, call detail data is large so _____ historical data is stored.

- Less Not Confirmed
- Large
- Medium
- No

Reference: Page 25

30. The telecommunications data warehouse is dominated by the sheer volume of data generated at the call level _____ area.

Subject

Reference: Page 35

31. Dimensional modeling techniques which focus on the concepts of _____ and _____ for organizing data.

facts, dimensions

Reference: Page 74

32. After implementing Change Data Capture, the advantage we have is that, data is able to be integrated and transformed _____.

In-flight

Reference: Page 152

33. PTCL is an example of _____ data warehouse organization.

Telecommunications

Reference: Page 323

34. Pakistan is one of the five majors _____ countries in the world.

Cotton-growing

Reference: Page 330

35. Data recorded by pest scouts consists of two parts:

Static and Dynamic

Reference: Page 342

36. Which of the following is/are drawback(s) of traditional web searches?

- Limited to keyword-based matching
- Cannot distinguish between the contexts in which a link is used
- Coupling of files has to be done manually
- All of the given options

Reference: Page 351

37. Which of the following is/are drawback(s) of traditional web searches?

- Limited to keyword-based matching
- Cannot distinguish between the contexts in which a link is used
- Coupling of files has to be done manually
- Do not perform search quickly. (This not the drawback of traditional web searches)

Reference: Page 351

39.3 Drawbacks of traditional web searches

1. Limited to keyword based matching.
2. Can not distinguish between the contexts in which a link is used.
3. Coupling of files has to be done manually.

38. Which of the following is NOT one of the issues of Clickstream data?

Identify the domain server

Reference: Page 363

39. Data Transformation Services (DTS) allows us to connect through any data source or destination that is supported by _____.

OLE DB

Reference: Page 373

40. In context of web warehousing, which of the following is NOT one of the ways to identify the session?

- Using Transient Cookies
- Using Time-contiguous Log Entries
- Using HTTP's secure sockets layer (SSL)
- **Using Simple Session Protocol (SSP)**
- Using Asynchronous Session track (AST) Protocol

Reference: Page 364

41. _____ is a process which involves gathering of information about column through execution of certain queries with intention to identify erroneous records.

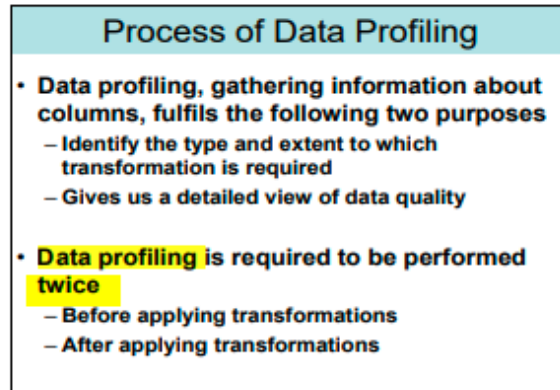

Data profiling

Reference: Page 439

42. In the context of Data standardization, data profiling is performed _____, in order to judge the effectiveness of transformation of data elements.

Two times

Reference: Page 440

43. _____ refers to the ability of the model to correctly predict the class label of new or previously unseen data.

Predictive accuracy

Reference: Page 266

- **Predictive accuracy:** this refers to the ability of the model to correctly predict the class label of new or previously unseen data
- **Speed:** this refers to the computation costs involved in generating and using the method.

Robustness: this is the ability of the method to make correct predictions/groupings given noisy data or data with missing values

44. Which model is most suitable for risk analysis?

Spiral Model

Reference: Page 284

45. Spiral model is _____.

- Sequence of waterfall model
- Risk oriented model
- An iterative model
- All of the given options

Reference: Page 284

46. Waterfall is a/an _____ model.

Simple linear sequential

Reference: Page 284
