STA301 - Statistics and Probability

Solved by: **Sahirullah** | 03191954292 | info.sahirweb@gmail.com

1. For a symmetric distribution, the Mean, Median, and Mode are:

- Always different
- Negative
- **All equal**
- Undefined

2. Which of the following is the measure of the 'average' of a data set?

- Standard Deviation
- Range
- **Arithmetic Mean**
- Variance

3. The sum of the deviations of the values from their mean is always:

- Positive
- Negative
- **Zero**
- One

4. The mean of 10 observations is 25. If one observation 25 is added, the new mean will be:

- 20
- **25**
- 30
- 25.5

5. Which of the following is NOT a measure of central tendency?

- Median
- Mode
- **Standard Deviation**
- Mean
