M T W T F S S

- (1) Environmental Science is an interdisciplinary study of connections between The earth's life-support system and Human activities.
- (2) Which one of The Following falls under The category of renewable resources?
Soil
- ✓(3) Economic growth is an increase in a nation's out Put of goods and services.
- ✓(4) Solar energy is called a Perpetual resource because it is renewed continuously and is expected to last at least 6 billion year as The sun Completes its life cycle.
- ✓(5) Some nonrenewable resources, Such as Copper and aluminum, can be recycled or reused to extend supplies.
- (6) A Positive Feedback loop causes a system to change further in the same direction for which it is moving.
- (7) Viola tricolor lives in acidic environment.
- (8) Cockroaches are Present on earth Since 350 million years.

Fareed

- (9) Non native Species That have a Potential to cause economic or environmental harm to humans are termed a invasive Species.
- ✓ (10) A certain range of value within the tolerance range is called the range of optimum.
- (11) Algae lives in aquatic type of ecosystem.
- (12) Photosynthesis is a Process That starts an ecological food web.
- (13) Fungi belongs to Decomposers class of organisms.
- (14) Animal Populations change over Time as a result of All
Birth, Death, Dispersal.
- (15) Which Factor is helpful For The regulation of Population?
All Birth rate, Death rate, Climate.
- (16) About 71% of earth surface is covered with water.

- ✓ (17) Weathering is a Process of decomposition and disintegration that causes the rocks down in a natural way.
- ✓ (18) All of these is the example of Inland wetland, (marshes, swamps, Flood plains)
- ✓ (19) Eutrophic lake usually have All Given
- ✓ (20) The area of shoreline between low and high tides is called the Intertidal Zone
- ✓ (21) The harmful and toxic blooms of Dino Flagellates causes the color of sea water to become red.
- ✓ (22) CO₂ Play important role by Green house effect ✓
- ✓ (23) Human Population increase day by day at present 7.4 billion ✓
- ✓ (24) Atmosphere contain 21 % of oxygen ✓
- ✓ (25) Sequence of organism through which energy move in ecosystem is Food chain.

- (26) Blind Indus dolphin belong to endemic species
- (27) Giant Panda is example of ^{specialist} ~~spetist~~ species.
- (28) Organism are divide into Two type of basic cell structure
- (29) Tree Farm is example of artificial ecosystem
- (30) Natural capacity is supported ^{solar capital.} light source of energy
- (31) Environment include all living and non-living thing is
- (32) Source Zone contain mountain head water stream.
- (33) Carry Capacity play a vital role sustainability protection of environment
- (34) butterflies are Good indicator species.
- (35) How many subdivision of ecology 6

- (36) Cochroach are example of omnivorous species
- (37) Human eye can reach 380-760 nm of wavelength.
- (38) The word ecosystem was coined by Tensley in 1935
- (39) Fungi is belong to group Decomposers
- (40) India in its per capita ecological footprint was about 4.5 times the.
- (41) Shark keystone species.

Mcqs type questions for midtettm

- 1) Living and non-living things includes **environment**.
- 2) Non re Newable resources such as aluminium and **copper**.
- 3) Community of different **population** interact with each other.
- 4) Organisms are divided into **2** types.
- 5) Viola tricolor live in **acidic** environment.
- 6) Ecological Niche is important for the study of **community structure**.
- 7) Blind indus dolphin belong to **platanista minor** species.
- 8) **Photosynthesis** Process start ecological web.
- 9) **78.09** % age of nitrogen in atmosphere ?
- 10) **Biotic and Abiotic Factor** helpful to regulate the population ?.
- 11) **71** % age of water that cover the earth surface.
- 12) **Source** Zone contain mountain head water stream.
- 13) Ecotherm organisms regulate their body temperature through **external environment**.
- 14) Wavelength of electromagnetic radiations detect human eye **380 to 740**.
- 15) Tropical rain forest contain **50%** of total world life.
- 16) **Interspecific** Competition among same species are called.
- 17) **Commensalism** is a relationship in which one member is benefited and the second neither helpful or harmful.
- 18) Foliose is growth form of **lichen**.
- 19) **Camouflage** it is kind of coloration or pattern that help an animal to appear to blend with surrounding.
- 20) Grass land biomes is example of **terrestrial biomes**.
- 21) El nino effect occurs in 2 to 7 years.
- 22) CFCs stands for **chloroflouro carbon**.
- 23) % age of plants **22 %** and animals **70 %** species on world.
- 24) **DNA** Is basic unit of life and responsible for the trait inherited.

- 25) **Pollutants** ? anything in the environment that is harmful to health,
sssss
- 26) Survival or activities of humans or other organisms.
- 27) **Interspecific** Competitions within a specie member.
- 28) Physical location of gene are **locus**.
- 29) mRNA is further translated into **protein**.
- 30) when extra nucleotide put into DNA is called **frameshift mutation**.
- 31) Invasive species are called **non native species**.
- 32) Hibernation in large animals known as **winter sleep**.
- 33) **Aposematic coloration** animals protected themselves by being dangerous or distasteful to predators by using prominent coloration these are known as warning or aposematic coloration.
- 34) Sulphur circulate through **sulphur** cycle.
- 35) Actual place of an organism where it is lived is called **Habitat**.
- 36) Tiger belong to **tertiary** class of consumers.
- 37) An ecological pyramid is further classified into **3** main types.
- 38) **Food web** provide stability to ecosystem.
- 39) Cat fish is a **Detritivore**.
- 40) Grass hopper belong to class of consumer **primary**.
- 41) **Primary Consumer** eat producers first to get energy.
- 42) On land most producers are green plants which generally capture about **1 %** of solar energy.
- 43) Secondary consumers are also known as **meat eater**.
- 44) Atmosphere contain **21 %** of oxygen.
- 45) Study of human population is called **demography**.
- 46) A certain range of value with in tolerance range is called the range of **optimum**.
