

PSY502 - Lesson 43+44+45

PSYCHOLOGY IN THE 21st CENTURY

Psychology in the 21st century is **no longer limited to clinics and mental illness**.

Today, psychology is **applied everywhere**:

- Offices and factories
- Markets and shopping malls
- Hospitals and gyms
- Sports fields
- Daily happiness and life satisfaction

These lessons introduce **modern applied branches** of psychology.

◆ PART 1: INDUSTRIAL & ORGANIZATIONAL PSYCHOLOGY

(Lesson 43)

What is Industrial & Organizational Psychology?

Definition (Academic → Plain English):

Industrial and Organizational Psychology (I/O Psychology) is the **application of psychological principles to workplaces** to improve employee performance, satisfaction, and organizational productivity.

 In simple words:

It studies how people behave at work and how work can be improved for both employees and organizations.

Industrial Psychology vs Organizational Psychology

Industrial Psychology	Organizational Psychology
Focuses on factory workers and labor force	Focuses on people in any organization
Deals with efficiency, productivity, fatigue	Deals with attitudes, leadership, culture
Example: factory shift timing	Example: school teachers' motivation

◆ Areas Studied in I/O Psychology

1 Organizational Design

Definition:

Organizational design refers to **how an organization is structured**—how many levels of management it has and how responsibilities are divided.

Key terms explained:

- **Tall organization:** Many management levels (boss → manager → supervisor → worker)
- **Flat organization:** Fewer management levels

Example:

- A government department → tall structure
- A startup company → flat structure

👉 Psychology helps decide **which structure improves performance and communication**.

2 Organizational Culture

Definition:

Organizational culture means the **shared values, beliefs, rules, and behaviors** followed by employees in an organization.

In simple words:

"How things are done here."

Examples:

- A company that values punctuality
- A university that promotes academic honesty
- An office that encourages teamwork

👉 Psychologists:

- Develop healthy cultures
- Maintain positive values
- Reform toxic or harmful cultures

3 Globalization

Definition:

Globalization means the world becoming **interconnected**, allowing free movement of:

- People
- Goods
- Ideas
- Technology

Workplace impact:

Organizations now hire people from **different countries and cultures**.

Example:

A multinational company in Pakistan employing:

- Pakistani
- Indian
- Chinese
- European workers

👉 Psychology helps manage **cross-cultural communication and diversity**.

4 Diversity

Definition:

Diversity means **differences among employees** in:

- Culture
- Gender
- Age
- Religion
- Language
- Abilities

Why important?

- Diverse teams are more creative
- But also need better understanding and tolerance

👉 Industrial psychology studies **how to manage diversity without conflict**.

5 Personality-Related Factors in Organizations

This includes:

◆ Motivation

Definition:

Motivation is the **inner drive** that pushes a person to work.

Example:

A motivated employee works harder and enjoys their job.

◆ Attitude

Definition:

Attitude means a person's **positive or negative feelings** toward their job or organization.

👉 Psychology helps **increase motivation and positive attitudes**.

6 Leadership

Definition:

Leadership is the ability to **influence and guide others**.

Leadership styles studied:

- Authoritarian (strict control)
- Democratic (shared decision-making)
- Laissez-faire (hands-off approach)

👉 Psychologists help organizations find **effective leadership styles**.

7 Stress and Fatigue

Stress (Definition):

Stress is the body's **response to pressure or demand**.

Fatigue:

Extreme tiredness caused by prolonged stress.

Example:

- Long working hours
- Unrealistic deadlines

👉 Stress reduces productivity, so psychologists:

- Design stress-management programs
 - Help employees cope better
-

8 Selection and Training

Selection:

Choosing the **right person for the right job** using psychological tests.

Training:

Improving employee skills (e.g., stress management, teamwork).

👉 Psychology ensures **best job-person fit**.

PART 2: ENVIRONMENTAL PSYCHOLOGY

(Lesson 43)

What is Environmental Psychology?

Definition:

Environmental psychology studies the **interaction between humans and their environment**.

👉 How humans affect environment

👉 How environment affects humans

💎 Key Topics

1 Personal Space

Definition:

Personal space is the **invisible area around a person** they consider their own.

Example:

Feeling uncomfortable if someone stands too close.

2 Territoriality

Definition:

Territoriality means **claiming and defending a space**.

Example:

- "This is my room"
 - "This is my seat"
-

3 Environmental Toxins

Definition:

Environmental toxins are **harmful elements** in the environment.

Examples:

- Noise pollution → fatigue
 - Air pollution → illness
 - Climate change → stress and anxiety
-

PART 3: CONSUMER PSYCHOLOGY

(Lesson 44)

What is Consumer Psychology?

Definition:

Consumer psychology studies **how people think, feel, and behave when buying goods.**

👉 Every human is a consumer.

What Influences Consumer Behavior?

1 Cultural Factors

Definition:

Cultural factors are values learned from society.

Example (Pakistan):

- Halal food requirement
-

2 Sub-Cultural Factors

Definition:

Subcultures are **smaller cultural groups** within a society.

Example:

Punjabi vs Sindhi buying habits

3 Social & Familial Factors

- Society influences trends

- Family influences buying decisions
-

◆ Individual Determinants

- **Personal factors:** personality, age
 - **Involvement:** importance of the purchase
 - **Memory:** remembering ads
 - **Evaluation:** judging product quality
 - **Post-purchase behavior:** satisfaction or regret
-

PART 4: HEALTH PSYCHOLOGY

(Lesson 44)

What is Health Psychology?

Definition:

Health psychology studies **how psychological factors affect health and illness.**

◆ Body Systems Studied

- Cardiovascular → heart & blood
 - Nervous → brain & nerves
 - Endocrine → hormones
 - Digestive → food processing
 - Renal → waste removal
 - Reproductive → reproduction
-

◆ Key Focus Areas

- Health behavior
- Disease prevention
- Stress management

- Pain management
- Chronic & terminal illness care

👉 Psychology improves **quality of life**, not just survival.

PART 5: SPORTS PSYCHOLOGY

(Lesson 45)

Definition

Sports psychology applies psychology to **sports performance and exercise**.

Studied Factors

- Motivation
- Personality
- Attention & arousal
- Anxiety & mood

👉 Mental strength often decides victory more than physical strength.

PART 6: POSITIVE PSYCHOLOGY

(Lesson 45)

What is Positive Psychology?

Definition:

Positive psychology is the **scientific study of happiness, strengths, and well-being**.

👉 Focuses on:

- What makes life worth living
 - What makes people thrive
-

Key Concepts Explained

- **Optimism:** expecting positive outcomes
 - **Hope:** belief in future improvement
 - **Subjective well-being:** personal happiness
 - **Emotional intelligence:** managing emotions
 - **Self-efficacy:** belief in one's abilities
-

◆ Three Levels of Positive Life

1 **Pleasant Life** → enjoyment & pleasure

2 **Good Life** → engagement & flow

3 **Meaningful Life** → purpose & contribution

◆ Character Strengths and Virtues (CSV)

Definition:

A classification of **positive human traits**, similar to how DSM classifies mental disorders.

👉 Used by therapists, coaches, counselors.

★ FINAL TAKEAWAY

Psychology in the 21st century is:

- Practical
- Applied
- Positive
- Everywhere

It helps us:

- ✓ Work better
- ✓ Live healthier
- ✓ Buy smarter

✓ Play better

✓ Be happier

◆ LESSON 43 – INDUSTRIAL, ORGANIZATIONAL & ENVIRONMENTAL PSYCHOLOGY

Q1. What is Industrial and Organizational Psychology?

Answer:

Industrial and Organizational (I/O) Psychology is the branch of psychology that applies psychological principles and methods to the workplace. It aims to improve employee performance, satisfaction, and organizational productivity.

Explanation:

Think of I/O Psychology as **“psychology at work”**. Psychologists study how employees behave, what motivates them, and how organizations can run efficiently.

Example:

A psychologist creates a training program to improve teamwork in a company.

Tips:

- Remember: Industrial = factories/workers, Organizational = any workplace.
 - Link the concept with **productivity, motivation, and employee well-being**.
-

Q2. Differentiate between Industrial Psychology and Organizational Psychology.

Answer:

- **Industrial Psychology:** Focuses on **labor force in factories**, efficiency, fatigue, and productivity.

- **Organizational Psychology:** Focuses on **behavior of employees in any organization**, including motivation, leadership, and culture.

Explanation:

Industrial = about *getting workers to perform efficiently*.

Organizational = about *keeping employees happy, motivated, and productive*.

Example:

- Industrial: Planning shift hours in a factory.
- Organizational: Improving teacher motivation in a school.

Tips:

- Remember: "Industrial = hands, Organizational = minds."
-

Q3. What is Organizational Design?

Answer:

Organizational design is the structure of an organization and the arrangement of roles, responsibilities, and communication to achieve efficiency.

Explanation:

It's like the **skeleton of a company**. Tall structure = many management levels, Flat structure = few management levels.

Example:

Startup = flat for quick decisions, Government department = tall with many layers.

Tips:

- Always connect design with **efficiency and decision-making**.
-

Q4. What is Organizational Culture?

Answer:

Organizational culture refers to the shared values, beliefs, and norms that guide behavior in an organization.

Explanation:

Culture is the **personality of an organization**. It tells employees what's acceptable and what's not.

Example:

A company where teamwork and punctuality are highly valued.

Tips:

- Culture = values + beliefs + behavior
 - Link it to **employee productivity and satisfaction**.
-

Q5. Explain Globalization in I/O Psychology.

Answer:

Globalization is the process of the world becoming interconnected, allowing workforce mobility, trade, and idea exchange. In I/O Psychology, it affects workplace diversity and cross-cultural management.

Explanation:

Globalization = "people from different countries working together." Psychologists help manage **cultural differences**.

Example:

A multinational company hiring employees from Pakistan, Germany, and China.

Tips:

- Connect globalization to **diversity, workforce mobility, and cross-cultural communication**.
-

Q6. What is Diversity in Organizations?

Answer:

Diversity is the presence of individuals with different characteristics such as culture, age, gender, religion, and abilities in an organization.

Explanation:

Diversity is about **differences that bring new ideas** but need proper management.

Example:

An office employing men and women from multiple cultural backgrounds.

Tips:

- Diversity = differences + inclusion
 - Helps organizations survive in competitive markets.
-

Q7. What are Personality-Related Factors in Organizations?

Answer:

Personality-related factors include employee motivation, attitudes, and job satisfaction, which affect productivity.

Explanation:

Motivated and satisfied employees perform better and stay committed.

Example:

An employee who enjoys their job meets deadlines efficiently.

Tips:

- Motivation and attitude = **key determinants of performance.**
-

Q8. Why is Leadership Important in Organizations?

Answer:

Leadership influences employee motivation, job satisfaction, and overall productivity. Organizational psychology studies the best leadership styles.

Explanation:

A good leader brings out the best in employees and ensures smooth teamwork.

Example:

A democratic leader encourages participation and innovation.

Tips:

- Leadership = influence + guidance
 - Always connect leadership style with **employee performance**.
-

Q9. Explain Stress and Fatigue in Organizations.

Answer:

- **Stress:** Physical and mental response to work pressure.
- **Fatigue:** Tiredness caused by prolonged stress, reducing performance.

Explanation:

Excessive workload can make employees tired and unproductive. Psychologists design strategies to **reduce stress**.

Example:

Long working hours causing burnout.

Tips:

- Stress → Fatigue → Reduced productivity
 - Stress management programs are important in workplaces.
-

Q10. What is Selection and Training in I/O Psychology?

Answer:

- **Selection:** Choosing the best candidates for a job.
- **Training:** Improving skills, behavior, and productivity.

Explanation:

Right person + proper training = better employee performance.

Example:

Using aptitude tests to hire employees, followed by stress management training.

Tips:

- Selection = hiring
 - Training = skill enhancement
-

Q11. What is Environmental Psychology?

Answer:

Environmental psychology studies the **interaction between humans and their environment**, including how surroundings affect behavior and mental health.

Explanation:

It looks at **how humans affect the environment** and vice versa.

Example:

Noise pollution in cities increases stress levels.

Tips:

- Environment ↔ Behavior
 - Focus on **stress, personal space, and territoriality**.
-

Q12. Explain Personal Space.

Answer:

Personal space is the invisible area around a person that they consider their own. Intrusion causes discomfort.

Explanation:

Everyone has a “bubble” they want respected.

Example:

Feeling uneasy when someone stands too close in a queue.

Tips:

- Think: “my bubble = personal space”
-

Q13. What is Territoriality?

Answer:

Territoriality is the behavior of **defending a space or resource** from others.

Explanation:

People protect areas that belong to them physically or psychologically.

Example:

Defending your desk at work.

Tips:

- Territory = defended space
 - Connect with **competition and ownership**.
-

Q14. What are Environmental Toxins?

Answer:

Environmental toxins are **harmful factors in the environment** that affect human health and psychology.

Explanation:

Pollution, noise, or global warming can make people stressed or fatigued.

Example:

Air pollution causing headaches or irritability.

Tips:

- Toxins = harmful factors
 - Often linked with **stress and health psychology**
-

LESSON 44 – CONSUMER & HEALTH PSYCHOLOGY

Q1. What is Consumer Psychology?

Answer:

Consumer Psychology studies **why and how people buy products**, focusing on consumer choices, preferences, and behavior.

Explanation:

It helps businesses and marketers understand **how consumers decide what to buy**.

Example:

An elderly person buying more medicines than gadgets.

Tips:

- Think: "Psychology of shopping habits."
 - Always link to **marketing and consumer decision-making**.
-

Q2. What are Cultural Factors in Consumer Psychology?

Answer:

Cultural factors are **values, beliefs, and practices from society** that influence consumer behavior.

Example:

In Pakistan, food chains like McDonald's must sell **halal products**.

Tips:

- Culture = society-wide influence
 - Relate to **religion, customs, traditions**.
-

Q3. What are Sub-Cultural Factors?

Answer:

Sub-cultural factors come from **smaller cultural groups within a larger culture** and affect buying behavior.

Example:

Sindhi vs Punjabi food preferences in Pakistan.

Tips:

- Sub-culture = mini-culture
 - Focus on **regional, ethnic, or local differences**.
-

Q4. How do Social and Familial Factors Affect Consumer Behavior?

Answer:

- **Social factors:** Influence of friends, peers, and society.
- **Familial factors:** Influence of family traditions and habits.

Example:

Choosing a smartphone brand because friends use it (social); grocery shopping habits influenced by family (familial).

Tips:

- Social = outside influence, Familial = inside influence
-

Q5. What are Personal, Involvement, Memory, and Evaluation Factors?

Answer:

- **Personal factors:** Age, income, personality
- **Involvement factors:** Level of interest or importance in a purchase
- **Memory factors:** How well ads or product info are remembered
- **Evaluation factors:** How the consumer judges or compares the product

Example:

High involvement = buying a car vs low involvement = buying soap.

Tips:

- Relate to **real-life shopping decisions**.

Q6. What is Post-Purchase Behavior?

Answer:

Post-purchase behavior is how a consumer **reacts after buying a product**, including satisfaction, complaints, or repeat purchase.

Example:

Returning a defective product or recommending it to friends.

Tips:

- Post-purchase = "after buying actions"

Q7. What is Health Psychology?

Answer:

Health Psychology studies **how psychological factors affect physical health, disease prevention, stress, and well-being**.

Explanation:

It looks at mind-body interaction and how behavior influences health outcomes.

Example:

Stress reduction techniques lowering blood pressure.

Tips:

- Focus on **stress, chronic illness, pain management, and lifestyle**.

Q8. Which Body Systems are Studied in Health Psychology?

Answer:

- Cardiovascular system (blood circulation)
- Nervous system (brain and nerves)
- Endocrine system (glands & hormones)

- Digestive system (food breakdown)
- Renal system (excretion)
- Reproductive system (procreation)

Tips:

- Remember: "C.N.E.D.R.R" = Cardiovascular, Nervous, Endocrine, Digestive, Renal, Reproductive
-

Q9. What are Major Areas of Focus in Health Psychology?

Answer:

- Stress and its management
- Chronic illness management
- Pain management
- Terminal illness care
- Health behavior and disease prevention

Tips:

- Stress → Fatigue → Disease
 - Focus on **prevention and coping strategies**
-

◆ LESSON 45 – SPORTS & POSITIVE PSYCHOLOGY

Q1. What is Sports Psychology?

Answer:

Sports psychology studies **psychological factors affecting sports performance**, such as motivation, focus, anxiety, and personality.

Explanation:

It helps athletes improve performance by managing **mind and emotions**.

Example:

Helping a player stay calm before a football match.

Tips:

- Remember MAPA = Motivation, Attention, Personality, Anxiety
-

Q2. What are Motivation Factors in Sports Psychology?

Answer:

Motivation factors refer to the **drive that encourages athletes to perform and achieve goals**.

Example:

A medal or trophy motivating a player to practice harder.

Tips:

- Motivation = internal drive or reward-based drive
-

Q3. What are Personality Factors in Sports Psychology?

Answer:

Personality factors are **traits of an athlete** that influence performance, such as confidence, discipline, or resilience.

Example:

An athlete's determination helps overcome tough training.

Tips:

- Connect traits to **success in training and matches**
-

Q4. What are Attention and Arousal Factors?

Answer:

These factors refer to **focus, concentration, and alertness** that affect performance.

Example:

A gymnast focusing completely during a floor routine.

Tips:

- Attention = concentration, Arousal = alertness/motivation
-

Q5. How Do Anxiety and Mood Affect Sports Performance?

Answer:

Anxiety or negative mood can **reduce focus, coordination, and confidence**, affecting performance.

Example:

A player missing a penalty due to nervousness.

Tips:

- Connect with **mental training techniques** like visualization or breathing exercises
-

Q6. What is Positive Psychology?

Answer:

Positive psychology studies **human strengths, happiness, well-being, and thriving** rather than mental illness.

Example:

Helping employees recognize their strengths to increase job satisfaction.

Tips:

- Focus on **3 areas: Pleasant Life, Good Life, Meaningful Life**

Q7. What is the Pleasant Life in Positive Psychology?

Answer:

Pleasant life is about **experiencing and savoring positive emotions** in daily life.

Example:

Enjoying hobbies, entertainment, or relationships.

Tips:

- Pleasant life = "life of enjoyment"
-

Q8. What is the Good Life in Positive Psychology?

Answer:

Good life focuses on **engagement and flow** in activities, where strengths match the task.

Example:

A teacher deeply engaged in teaching and feeling accomplished.

Tips:

- Good life = "life of engagement"
-

Q9. What is the Meaningful Life in Positive Psychology?

Answer:

Meaningful life is **having purpose, belonging, and contributing to something bigger than oneself**.

Example:

Volunteering for social work or community service.

Tips:

- Meaningful life = "life of purpose"
-

Q10. What are Key Variables Studied in Positive Psychology?

Answer:

- Optimism
- Hope
- Happiness / Subjective well-being
- Emotional Intelligence
- Self-Efficacy

Tips:

- Mnemonic = **POGS-HES**

(P = Pleasant, O = Optimism, G = Good, S = Self-efficacy, H = Hope, E = Emotional intelligence, S = Sense of meaning)

◆ LESSON 43 – INDUSTRIAL, ORGANIZATIONAL & ENVIRONMENTAL PSYCHOLOGY

Q1. Explain Industrial and Organizational Psychology and its significance in the modern workplace.

Answer

Definition:

Industrial and Organizational Psychology (I/O Psychology) is the branch of psychology that **applies psychological principles to workplaces** to improve employee performance, satisfaction, and organizational productivity.

Key Components:

1. Industrial Psychology

- Focuses on **workers in industrial or factory settings**.
- Concerned with **selection, efficiency, fatigue, productivity**.

2. **Organizational Psychology**

- Focuses on **behavior of employees in any organization**.
- Concerned with **motivation, leadership, attitudes, culture**.

Areas of Study in I/O Psychology:

- **Organizational Design**
 - Structure of the organization (tall vs. flat)
 - Effective communication and delegation
- **Organizational Culture**
 - Shared values, norms, practices
 - Ensures smooth functioning and productivity
- **Globalization**
 - Workforce diversity due to international hiring
 - Cross-cultural interactions
- **Diversity**
 - Differences in age, gender, culture, abilities
 - Managed to enhance creativity and teamwork
- **Personality-Related Factors**
 - Motivation, attitudes, job satisfaction
- **Leadership**
 - Identifying effective leadership styles
- **Stress and Fatigue**
 - Managing work-related stress to prevent burnout
- **Selection and Training**
 - Hiring the right candidates

- Improving skills, behavior, and efficiency

Significance:

- Increases productivity
- Reduces stress and conflict
- Enhances employee satisfaction and motivation
- Helps organizations adapt to global trends

Example Table: Industrial vs Organizational Psychology

Aspect	Industrial Psychology	Organizational Psychology
Focus	Factory/labor workers	Employees in any organization
Key Concern	Efficiency, fatigue, productivity	Motivation, culture, leadership
Example	Shift planning in a factory	Team motivation in a school

Explanation (Plain English)

Think of I/O psychology as **“making work better for people and organizations.”**

- Industrial psychology = “how factory workers perform best”
- Organizational psychology = “how any employee works best and is happy at work”

Psychologists **study human behavior** and then apply techniques to **boost performance and well-being**.

Example: A psychologist introduces teamwork exercises in an office so employees communicate better, feel motivated, and meet targets.

Tips to Remember:

- Industrial = factories, Organizational = any workplace
- Stress, motivation, leadership are recurring topics
- Always link theory to workplace examples

Q2. Discuss the role of globalization and diversity in modern organizations.

Answer

Globalization:

- Definition: Globalization is the **interconnectedness of the world**, enabling free movement of ideas, goods, services, and workforce.
- **Impact on organizations:**
 - Workforce from multiple countries
 - Diverse cultures, languages, and work styles
 - Requires cross-cultural understanding

Diversity:

- Definition: Diversity refers to **differences among employees** in terms of culture, age, gender, religion, language, and abilities.
- **Importance:**
 - Enhances creativity and innovation
 - Prevents groupthink
 - Reflects global markets and customer bases

Challenges:

- Conflicts due to cultural misunderstandings
- Communication barriers
- Need for sensitivity training

Management Strategies:

- Cultural awareness programs
- Inclusive policies
- Diversity training and workshops

Example Table: Globalization & Diversity

Aspect	Explanation	Example
Globalization	Hiring across countries	Pakistani company employs staff from Germany, China, India
Diversity	Employees with different traits and backgrounds	Team with men, women, multiple religions, and ethnicities

Explanation

Globalization = "the world becomes one workplace." You might have **people from different countries working in the same office.**

Diversity = "people are different in multiple ways." Different ages, genders, or cultures bring **new ideas**, but also need careful management.

Tip: Always connect globalization with **workforce mobility** and diversity with **creativity + inclusion.**

Q3. What is Environmental Psychology? Discuss key concepts including personal space, territoriality, and environmental toxins.

Answer

Definition:

Environmental Psychology studies **how humans interact with their environment**, and how the environment affects behavior, mood, and well-being.

Key Concepts:

1. Personal Space

- The area around an individual considered their own
- Intrusion causes discomfort

2. Territoriality

- Defending a space or resource from others
- Can be individual or group-based

3. Environmental Toxins

- Harmful elements in the environment
- Includes noise, pollution, temperature changes

Applications:

- Workplace design
- Urban planning
- Stress reduction

Examples Table: Environmental Psychology Concepts

Concept	Description	Example
Personal Space	Invisible boundary around a person	Feeling uncomfortable when someone stands too close
Territoriality	Defending a space or territory	Protecting your office desk
Environmental Toxins	Harmful environmental factors	Noise pollution causing fatigue

Explanation

This branch is about **how environment and humans affect each other**.

- Personal space = “my bubble”
- Territoriality = “my area I protect”
- Environmental toxins = “bad surroundings that make me sick or tired”

Tip: Always link concepts with **real-life workplace or urban life examples**.

◆ LESSON 44 – CONSUMER AND HEALTH PSYCHOLOGY

Q4. Define Consumer Psychology and explain factors affecting consumer behavior.

Answer

Definition:

Consumer Psychology studies **how people think, feel, and behave when buying products or services**, and why they make certain choices.

Factors Affecting Consumer Behavior:

1. Cultural Factors

- Values learned from society
- Example: In Pakistan, food must be halal

2. Sub-Cultural Factors

- Smaller cultural groups within society
- Example: Sindhi vs Punjabi buying habits

3. Social Factors

- Influence of friends, peers, and social groups
- Example: Choosing a phone brand popular in your friend group

4. Familial Factors

- Family habits and preferences
- Example: Buying groceries based on family tradition

5. Personal Factors

- Age, personality, income
- Example: Young people spend more on gadgets; elderly spend more on medicine

6. Involvement Factors

- Importance of the purchase
- Example: Buying a car vs buying a pen

7. Memory Factors

- Retention of advertisements or brand recall
- Example: Remembering Coca-Cola ad jingles

8. Evaluation Factors

- How a person judges product quality
- Example: Comparing TV features before buying

9. Post-Purchase Behavior

- Actions after purchase (satisfaction, complaints, repeat buying)
 - Example: Returning a defective product
-

Explanation

Consumer psychology = “why people buy what they buy.”

- Culture + family + social group = influence on decisions
- Personal preferences and memory affect choice
- Post-purchase behavior shows satisfaction

Tip: Always **link factors to real shopping scenarios**.

Q5. Explain Health Psychology and its role in promoting well-being.

Answer

Definition:

Health Psychology studies **how psychological factors affect health, illness, and well-being**, focusing on disease prevention, stress management, and promoting healthy lifestyles.

Key Areas:

1. Stress Management

- Understanding stress causes

- Techniques: relaxation, meditation, counseling
2. **Pain Management**
 - Coping strategies for acute and chronic pain
 3. **Chronic Illness Management**
 - Psychological support for long-term diseases
 - Example: Diabetes or heart disease
 4. **Terminal Illness Care**
 - Helping terminally ill patients improve quality of life
 5. **Systems Studied**
 - Cardiovascular, nervous, endocrine, digestive, renal, reproductive
-

Explanation

Health psychology = "mind affects body."

- Stress, emotions, and behavior can make people sick or healthy
- Psychologists design **interventions to improve mental and physical well-being**

Tip: Always connect **psychology** → **health outcome**.

◆ LESSON 45 – SPORTS AND POSITIVE PSYCHOLOGY

Q6. What is Sports Psychology? Discuss its major components.

Answer

Definition:

Sports Psychology applies psychological principles to **sports performance and exercise**.

Major Components:

1. Motivation

- Drive to achieve goals
- Example: Athlete striving for a medal

2. Personality Factors

- Traits affecting performance
- Example: Confidence, discipline, resilience

3. Attention and Arousal

- Focus and mental alertness
- Example: Maintaining concentration during a match

4. Anxiety and Mood

- Emotions affecting performance
- Example: Pre-game nervousness affecting performance

Applications:

- Coaching athletes
 - Improving focus and motivation
 - Handling competition stress
-

Explanation

Sports psychology = "training the mind for better performance."

- Physical skill is important, but **mental strength often decides results**
 - Helps athletes **focus, stay motivated, and reduce anxiety**
-

Q7. Define Positive Psychology and explain its key areas.

Answer

Definition:

Positive Psychology is the scientific study of **happiness, strengths, and well-being**, focusing on what makes individuals and organizations thrive.

Key Areas:

1. Pleasant Life (Life of Enjoyment)

- Experiencing and savoring positive emotions
- Example: Enjoying hobbies or social activities

2. Good Life (Life of Engagement)

- Flow and immersion in meaningful activities
- Example: A teacher fully engaged in teaching

3. Meaningful Life (Life of Affiliation)

- Sense of purpose and contribution
- Example: Volunteering or being part of community work

Other Concepts:

- Optimism
- Hope
- Emotional Intelligence
- Self-Efficacy
- Happiness/Subjective Well-being

Applications:

- Personal development
- Coaching and counseling
- Organizational well-being programs

Explanation

Positive psychology = "focus on strengths and happiness instead of problems."

- Traditional psychology = "fix mental illness"
- Positive psychology = "increase well-being and life satisfaction"

Tip: Think in **3 layers: enjoy, engage, contribute.**

◆ MCQs – INDUSTRIAL & ORGANIZATIONAL PSYCHOLOGY

1. Simple MCQ

Question: Industrial psychology primarily focuses on:

- A) Leadership styles in schools
- B) Factory workers and labor efficiency
- C) Motivation of all employees
- D) Organizational culture

Answer: B) Factory workers and labor efficiency

Explanation: Industrial psychology is concerned with **labor force efficiency and productivity**, especially in industrial/factory settings.

2. Conceptual MCQ

Question: Which of the following is a primary concern of organizational psychology?

- A) Selection of employees based on aptitude
- B) Designing machines for factory efficiency
- C) Employee motivation and organizational culture
- D) Workplace lighting and ventilation

Answer: C) Employee motivation and organizational culture

Explanation: Organizational psychology focuses on **human behavior in organizations**, including motivation, culture, and leadership.

3. True/False

Question: Industrial and organizational psychology are the same and can be used interchangeably.

Answer: False

Explanation: While related, **industrial psychology focuses on efficiency and selection**, whereas **organizational psychology focuses on attitudes, culture, and motivation**.

4. Situational MCQ

Scenario: A multinational company employs staff from Pakistan, China, and Germany. Employees face communication issues due to cultural differences. Which branch of psychology would address this?

- A) Health Psychology
- B) Environmental Psychology
- C) Industrial & Organizational Psychology
- D) Sports Psychology

Answer: C) Industrial & Organizational Psychology

Explanation: **Globalization and diversity** in workplaces are addressed by I/O psychology to manage **cross-cultural issues**.

MCQs – ENVIRONMENTAL PSYCHOLOGY

5. Simple MCQ

Question: Personal space refers to:

- A) The office assigned to an employee
- B) An invisible boundary around a person that should not be intruded
- C) Space for plants and decoration
- D) Areas allocated for meetings

Answer: B) An invisible boundary around a person that should not be intruded

Explanation: Personal space is **the area individuals consider their own**, intrusion leads to discomfort.

6. Conceptual MCQ

Question: Territoriality in environmental psychology is:

- A) Ownership of land
- B) Defending a space or resource against intrusion
- C) Personal hobbies
- D) Managing global resources

Answer: B) Defending a space or resource against intrusion

Explanation: Territoriality involves **protecting a personal or group space**, like a desk or room.

7. True/False

Question: Noise pollution and poor air quality are considered environmental toxins that can affect human psychology.

Answer: True

Explanation: Environmental toxins **negatively affect mental and physical health**, making people stressed, fatigued, or ill.

MCQs – CONSUMER PSYCHOLOGY

8. Simple MCQ

Question: Which of the following is NOT a factor affecting consumer behavior?

- A) Cultural factors
- B) Familial factors
- C) Zodiac sign
- D) Memory of advertisements

Answer: C) Zodiac sign

Explanation: Consumer behavior depends on **culture, family, personal factors, memory**, not astrology.

9. Conceptual MCQ

Question: Involvement factor in consumer behavior refers to:

- A) How involved a person is in work tasks
- B) The importance and engagement in a purchase decision
- C) The level of social media activity
- D) Peer pressure in a society

Answer: B) The importance and engagement in a purchase decision

Explanation: **Involvement** measures how much attention a consumer gives before buying a product (e.g., buying a car vs. buying a pen).

- D) Industrial psychology

Answer: B) Positive psychology

Explanation: Using **strengths to improve well-being and performance** is a hallmark of positive psychology.

CHEAT SHEET: PSYCHOLOGY IN THE 21st CENTURY

1 INDUSTRIAL & ORGANIZATIONAL PSYCHOLOGY (I/O Psychology)

Term	Definition (Plain English)	Example / Tip / Memory Hook
Industrial Psychology	Applies psychology to labor/workforce in factories	Factory worker efficiency, fatigue
Organizational Psychology	Studies behavior of people in any organization	Motivation of teachers, culture of office
Organizational Design	Structure of organization; tall vs flat	Startup = flat; Govt dept = tall
Organizational Culture	Shared values, beliefs, practices	Punctuality culture in office
Globalization	World interconnected; workers from different countries	Multinational teams
Diversity	Differences in age, gender, culture, abilities	Inclusive workplace
Motivation	Inner drive to work or achieve	Bonus as motivator
Leadership	Ability to guide, influence, and direct others	Democratic vs Authoritarian
Stress & Fatigue	Pressure + tiredness that reduces productivity	Long hours = burnout
Selection & Training	Choosing right person + improving skills	Aptitude test + soft skills training

Mnemonic for I/O Psychology Focus Areas:

"Do Great Diverse Motivated Leaders Stress Selection?"

- D = Design
- G = Globalization
- D = Diversity
- M = Motivation
- L = Leadership
- S = Stress
- S = Selection/Training

2 ENVIRONMENTAL PSYCHOLOGY

Term	Definition	Example / Tip
Personal Space	Invisible bubble around a person	Someone standing too close makes you uncomfortable
Territoriality	Defending a space or resource	Protecting your office desk
Environmental Toxins	Harmful factors in environment	Noise, air pollution, global warming

Memory Hook: "PTE – Protect The Environment"

- P = Personal space
- T = Territoriality
- E = Environmental toxins

3 CONSUMER PSYCHOLOGY

Term	Definition / Keywords	Example / Tip
Consumer Psychology	Study of why people buy things	Buying habits, preferences
Cultural Factors	Values from society affecting purchase	Halal food in Pakistan
Sub-Cultural Factors	Smaller cultural groups influencing buying	Sindhi vs Punjabi habits
Social Factors	Influence of friends and peers	Phone brand choice

Personal Factors	Age, personality, income	Youth buy gadgets, elderly buy medicine
Involvement Factors	Importance of the purchase	Car > Pen
Memory Factors	Retention of product info or ads	Remembering Coca-Cola ad
Evaluation Factors	How a product is judged	Comparing TV features
Post-Purchase Behavior	Satisfaction, complaints, or repeat purchase	Returning defective product

Mnemonic to Remember Factors:

"Can Some Smart People Invest Money Every Purchase?"

- C = Cultural
- S = Sub-cultural
- S = Social
- P = Personal
- I = Involvement
- M = Memory
- E = Evaluation
- P = Post-purchase

4 HEALTH PSYCHOLOGY

Term	Definition / Keywords	Example / Tip
Health Psychology	Study of psychological influence on health	Stress management, chronic illness care
Stress Management	Techniques to reduce pressure	Relaxation, meditation
Pain Management	Strategies to cope with pain	Mindfulness, therapy
Chronic Illness Management	Supporting long-term diseases	Diabetes care, heart disease support
Terminal Illness Care	Improving quality of life for terminal patients	Hospice care, counseling
Body Systems Studied	Cardiovascular, Nervous, Endocrine, Digestive, Renal, Reproductive	Understand link: mind ↔ body

Memory Hook: "S.P.C.T.B" – Stay Physically & Cognitively Balanced

- S = Stress
- P = Pain
- C = Chronic illness
- T = Terminal illness

- B = Body systems

5 SPORTS PSYCHOLOGY

Term	Definition / Keywords	Example / Tip
Sports Psychology	Study of psychological factors affecting sports	Motivation, anxiety, focus
Motivation	Inner drive to perform	Training for medal
Personality Factors	Traits affecting performance	Confidence, discipline
Attention & Arousal	Focus and alertness	Maintaining concentration
Anxiety & Mood	Emotions affecting performance	Pre-match nervousness

Mnemonic: "MAPA" – Motivation, Attention, Personality, Anxiety

6 POSITIVE PSYCHOLOGY

Term	Definition / Keywords	Example / Tip
Positive Psychology	Study of happiness, strengths, and thriving	Optimism, flow, well-being
Pleasant Life	Experiencing positive emotions	Hobbies, relationships
Good Life	Engagement in meaningful activity	Teacher fully engaged in teaching
Meaningful Life	Purpose, affiliation, contribution	Volunteering, community work
Optimism	Expecting positive outcomes	"I can do this" mindset
Hope	Belief in a better future	Planning for growth
Emotional Intelligence	Managing emotions effectively	Controlling anger during conflict
Self-Efficacy	Belief in own abilities	Confidence to complete a project

Memory Hook: "POGS-HES"

- P = Pleasant Life
- O = Optimism
- G = Good Life
- S = Self-efficacy
- H = Hope
- E = Emotional intelligence
- S = Sense of meaning (Meaningful Life)

7 QUICK COMPARISON TABLE – ALL MODERN PSYCHOLOGY BRANCHES

Branch	Focus / Goal	Key Concept / Example
I/O Psychology	Work behavior and productivity	Motivation, leadership, selection
Environmental Psychology	Human ↔ environment interaction	Personal space, territoriality, toxins
Consumer Psychology	Buying behavior of individuals	Cultural influence, evaluation, post-purchase
Health Psychology	Psychological factors affecting health	Stress management, chronic illness
Sports Psychology	Mental aspects of sports performance	Motivation, focus, anxiety
Positive Psychology	Happiness, strengths, well-being	Optimism, pleasant life, meaningful life

8 MEMORY MNEMONICS FOR EXAMS

1. I/O Psychology Focus Areas:

“Do Great Diverse Motivated Leaders Stress Selection?”

(D = Design, G = Globalization, D = Diversity, M = Motivation, L = Leadership, S = Stress, S = Selection/Training)

2. **Consumer Psychology Factors:**

"Can Some Smart People Invest Money Every Purchase?"

(C = Cultural, S = Sub-cultural, S = Social, P = Personal, I = Involvement, M = Memory, E = Evaluation, P = Post-purchase)

3. **Health Psychology:**

"S.P.C.T.B – Stay Physically & Cognitively Balanced"

(S = Stress, P = Pain, C = Chronic illness, T = Terminal illness, B = Body systems)

4. **Sports Psychology: MAPA**

(M = Motivation, A = Attention, P = Personality, A = Anxiety)

5. **Positive Psychology: POGS-HES**

(P = Pleasant, O = Optimism, G = Good, S = Self-efficacy, H = Hope, E = Emotional intelligence, S = Sense of meaning)
