Art, craft and calligraphy (EDU403)

Assignment 1 (Fall 2023)

Total Marks: 20

Topic No. 1-25

Assignment solution prepared by LEO

Team Vu Global

Q 1: Differentiable between geometric and organic forms of the shapes? Write at least five differences. (2*5=10 Marks)

Solution:

Here are five key differences between geometric and organic forms of shapes:

Characteristic	Geometric Forms	Organic Forms
Definition	Perfect, man-made shapes with defined edges and angles.	Imperfect, naturally occurring shapes with curved edges and flowing lines.
Examples	Squares, circles, triangles, rectangles, pentagons, etc.	Clouds, leaves, flowers, trees, animals, etc.

Appearance		
	Uniform and consistent in size and shape.	Varied and irregular in size and shape.
Structure		
	Composed of straight lines and sharp angles.	Composed of curved lines and flowing forms.
Found in		
	Man-made objects, such as buildings, furniture, and machines.	Natural objects and living things.

Here are some additional examples of geometric and organic forms:

Geometric:

- Pyramid
- Cube
- Sphere
- Cone
- Cylinder
- Hexagon
- Octagon
- Dodecahedron
- Icosahedron **Organic:**

- Seashell
- Snowflake
- Mountain
- River
- Human body
- Animal fur
- Plant petals
- Spider web
- Cloud formation

Q 2: Define three main temperatures of colors. Explain each type with Examples

Solution:
The three main temperatures of colors are:

* **Warm colors: Red, orange, and yellow. These colors evoke feelings of warmth, excitement, and energy. Examples of warm colors in nature include sunsets, fire, and ripe fruit.
* **Cool colors:** Blue, green, and purple. These colors evoke feelings of calmness, relaxation, and peace. Examples of cool colors in nature include the sky, the ocean, and forests.
* **Neutral colors:** White, black, and gray. These colors are neither warm nor cool. Neutral colors can be used to balance out warm and cool colors in a design.

Here are some additional examples of each type:

Warm colors:

* Apricot
* Bronze
* Coral
* Gold
* Maroon
* Peach
* Pink
* Rose
* Salmon
* Sienna
* Terracotta

Cool colors:

* Aquamarine
* Azure
* Cobalt
* Cyan
* Emerald
* Indigo
* Lavender
* Navy
* Teal
* Turquoise
* Violet

Neutral colors:

* Beige
* Cream
* Dove gray

* Ecru
* Fawn
* Ivory
* Khaki
* Taupe
* Wheat

Artists and designers use color temperature to create different effects in their work. For example, a warm color scheme can be used to create a sense of warmth or intimacy, while a cool color scheme can be used to create a sense of spaciousness or calm. Neutral colors can be used to balance out warm and cool colors, or to create a sense of simplicity or sophistication.

Here are some examples of how color temperature can be used to create different effects:

* **Warm color scheme:** A warm color scheme can be used to create a cozy and inviting atmosphere in a living room. For example, you could paint the walls a warm color like peach or apricot, and then decorate with furniture and accessories in other warm colors, such as red, orange, and yellow.
* **Cool color scheme:** A cool color scheme can be used to create a calming and relaxing atmosphere in a bedroom. For example, you could paint the walls a cool color like blue or green, and then decorate with furniture and accessories in other cool colors, such as purple and silver.
* **Neutral color scheme:** A neutral color scheme can be used to create a sleek and sophisticated look in a kitchen or bathroom. For example, you could paint the walls a neutral color like white or gray, and then decorate with appliances and fixtures in other neutral colors, such as stainless steel or black.
