

Objective

21 MCQs came from the file "[ENG529 Finals IMP MCQs by Nimma Malik July–Aug 2K26 \(23 Pages\)](#)". The remaining 12 MCQs came from the handouts which are given below.

- 1) In terms of synchronous conferencing, both audiographic and video conferencing have become crucial components in many distance language courses. **True**
- 2) Susikaran (2013), basic changes have come in classes beside the teaching methods because the **chalk and talk teaching method is not sufficient** to effectively teach English.
- 3) Educators and students now have a **wide** array of VWs.
- 4) Hampel (2009) identifies a key challenge in **online distance synchronous** settings as addressing the tendency for tutors.
- 5) Artificial reality simulators (ARS) begins the shift from a 3D environment on a computer screen to —the idea of immersion— **using stereoscopy, gaze-tracking, and other technologies**.
- 6) If predictions of future technologies were accurate, contemporary humans would be travelling via personal air cars. **True**
- 7) The number of VWs has risen **dramatically**.

8) A prevailing concern has been how to assess the learning gains of distance language students in ways that are appropriate for the learning setting.

9) Language courseware goes back to the earliest days of CALL in the 1960s.

10) Baki yad ni.....

SUBJECTIVE

Short Questions:

The screenshot shows a PDF document titled "ENG529 Finals Compilations by Nimma mali...". The document content includes a list of socialization levels and a section on virtual worlds.

iii. Socialization level (low, mid, or high)
iv. Education focus (low, mid, or high)
v. Technical requirements (low, mid, or high)

How Does the Socialization Level Differ Among Virtual Worlds?

The socialization level differs because each virtual world provides a different amount of interaction among users.

- Some virtual worlds have **high socialization**, where users can chat, make friends, join groups, attend events, and work together.
- Others have **low socialization**, where users mainly play alone or have only limited interaction.

The screenshot shows a PDF document titled "Virtual classrooms" with a page number of 23/34. The document content includes a section titled "E- Assessment tools? And its examples....." followed by a definition: "E-Assessment tools are digital tools used to create, deliver, and grade tests or assignments online." Below this, under the heading "Examples:", there is a bulleted list of five items: Google Forms, Kahoot!, Quizizz, Moodle Quiz, and Microsoft Forms. The browser's address bar shows the file path "D:/ENG529%20Finals%20Compilations%20by%20Nimma%20malik%20Aug%202K26.pdf". The taskbar at the bottom displays various application icons and the system clock showing 12:44 PM on 8/6/2026.

Virtual classrooms

E- Assessment tools? And its examples.....

E-Assessment tools are digital tools used to create, deliver, and grade tests or assignments online.

Examples:

- Google Forms
- Kahoot!
- Quizizz
- Moodle Quiz
- Microsoft Forms

The screenshot shows the same PDF document at page 26/34. The content continues with two bullet points: "Saves and shares lesson notes." and "Supports internet access and educational software." This is followed by a section titled "True false from VWs" which contains three numbered items. Each item is a statement followed by a "False" label in a blue box and a "Correct:" explanation in parentheses. The statements are: 1) "VWs include only playing and do not include educational applications.", 2) "VWs have limited access and do not available 24/7.", and 3) "Users can not make any changings in their characters and environments." The browser and taskbar details are consistent with the previous screenshot.

Saves and shares lesson notes.

Supports internet access and educational software.

True false from VWs

- 1) VWs include only playing and do not include educational applications. **False** (Correct: Virtual Worlds (VWs) are used for both entertainment and educational applications.)
- 2) VWs have limited access and do not available 24/7. **False** (Correct: Virtual Worlds are available 24/7 and can be accessed from anywhere with an internet connection)
- 3) Users can not make any changings in their characters and environments. **False** (Correct: Users can customize their avatars (characters) and, in many virtual worlds, modify the environment.)

What are the Examples of Synchronous Technology? OR Give three examples of synchronous tools for distance language learning.

Synchronous = Learning happens at the same time (real-time).

Examples:

- Zoom
- Google Meet
- Microsoft Teams
- Skype
- Live webinars
- Live chat
- Virtual classrooms

Long Question #03:

True/False from VWs, Mud and CCA topics.....

See relevant topics (But there is no exact wording from handouts it was totally conceptual)

Remember me in your precious
prayers And best of luck!
