Types of Crime - II

Date lesson-19

* Public order crimes, also known as victimless crimes,
* Victimless crimes => Prostitution, unlawful gambling, illegal drugs
* Public order crimes "disturb social order & moral values."
* Émile Durkheim said => Crime happens in every society.
* The 3 main parts of the criminal justice system in the US are:
  1) Law enforcment 2) Courts 3) Corrections
* Crime against person also called personal crimes include Murder / Rape.
* Aggravated assault => A violent attack meant to cause serious injury.
* Harrasment => Repeated, unwanted behaviour causes fear or stress.
* Property crimes are more common than violent crime
* Burglary: illegally entering place with intent to steal.
* Lariny-theft: Stealing items worth more than $100.
* motor vehicle theft: Stealing a car / vehicle
* Arson: Setting fire to property.

Date

* Cyber crime: Hacking, online fraud, spreading viruses.
* Organized crime done by grps (like mafia) to make illegal profit.
* Tech help organized crime plan & carry out crimes globally.

Formal Social control mechanisms — Lesson- 20

* Civil law: dealing with personal disputes.
* Pak legal system is a mix of British Common law & Islamic law.
* Customs & traditions was the earliest basis of law in human society history.
* Protecting rights & maintaining order are 2 major functions of law today.

Formal Social Control mechanisms — Lesson- 20

* The criminal justice system often faces debates & criticism about bias, fairness.

Sheet — 02 — No.

Date

* The power of state depends heavily on criminal justice system.
* Formal social control mechanisms are mostly found in complex societies.
* → are crucial for upholding social behaviour order & policing behaviour.
* Police officers are the main link b/w public & criminal justice system.
* 2 main duties of Police are:
  1) Catch criminals
  2) Maintain law & order (mostly do this duty)
* In 1990s, cities started using community policing.
* Community policing is building trust by walking beats & working with the public.
* Over 90% cases never reach trial.
* most cases are resolved through plea bargains.
* Ordinary ppl serve as jurors & are essential in trials.
* Plead bargain means the defendant pleads guilty to a lesser charge.
* Deterrence => to stop ppl from committing crimes.
* Main purposes of prisons are:
  1) Deterrence
  2) Rehabilitation
  3) Punishment

Signature _____ No. _____

* In Pak, prisons are managed by provincial govt.
* Types of prisons.
* Central, District, Women's jails
* The prison system in Pak faces. Overcrowding, poor conditions, Inhumane treatment
* Probation is common for minor crimes
* Offender lives in society but with rules & supervision
* Incarceration قید is for serious crimes (jail)
* Parole is early release with regular check-ins & freedom limits. (like probation)
* Capital punishment (execution) is most extreme form of "سزائے موت"
* Many prisoners are released before full sentence through parole.
* Causes of crimes are poverty, unemployment, social injustice, political unrest.
* Formal ways (like police & courts) & Informal ways (like conflict resolution methods) are used in Pak to fight crime.

Social Stratification Date Lesson-21

* Social stratification means dividing ppl into diff. grps or layers based on their wealth, status & power.
* Gender is an imp. reason for stratification as it affect ppl's access to benefits in every society.
* Strati... is a method of organizing big grps of individuals into a hierarchy based on the relative priviliges they possess.
* There are 4 major systems of social stratification.

1) Slavery
2) Caste
3) Status
4) Estate

* Slavery was a symbol of debt, criminality or military loss.
* Israelities freed slaves every 50 years.
* Some Roman slaves could buy freedom.
* Children of slaves born free in ancient Mexico.
* Slavery was prevalent in Greece about 2,500 years ago.
* Slaves lacked both power & property.

Signature _____ No. _____

of slavery

Date

* The prevalence of slavery was highest in argrarian communities & lowest among nomads, particularly hunters & gatherers.

* Caste is the 2nd type of social stratification.
* In Caste system status is fixed at birth. & cannot change throughout life.
* Endogamy (marriage within the same caste) are practiced.
* Contact b/w castes is restricted through rules. e.g. touching a lower caste person can "contaminate" a higher caste.
* Indian caste system is based on religion, not race, & is over 3000 years old.
* Caste system was officially abolished by Indian govt. in 1949. but still exits (births, marriage, funerals)
* Europeans of Dutch ancestry in South Africa Known as Afrikaners.
* Caste-like racial segregation run by Afrikaners Known as Apartheid.
* Apartheid ended in 1990s.
* Nelson Mandela (black man) was elected president in 1994.
* Ppl was categorized under the law into

Signature _____ 07 No. _____

Date

one of four groups: (1) Asians (2) Coloureds (mixed races), (3) Europeans (white) & (4) Blacks from Africa.)

* These divisions dictated where individuals might live, work & attend school.

* Status system is a type of social stratification based on social prestige (differences)
* Prestige can come from job, education, wealth, lifestyle or cultural capital (known as status)
* Status system are more common in modern, industrialized societies.
* Social mobility (moving up or down the social ladder) changing social status based on personal effort.
* In PaK, status plays a big role in urban areas, especially among middle & upper classes.
* Status is supported by institutions like edu, media & cultural practices.
* In modern societies, status is often linked to personal success & merit.
*
* Estate system was used in medieval Europe, dividing society into 3 states:

1) Nobles (2) Clergy (3) Commoners/ Serfs

Signature _____ No. _____

Date

1) Nobles (1st Estate): Owned land, didn't work, managed estates, lived with dignity.
2) Clergy (2nd Estate): Powerful due to the Roman Catholic Church, owned land, collected taxes, younger noble sons often joined clergy.
3) Commoners / Serfs (3rd Estate): Worked the land, tied to the land, couldn't easily change their status.

* Primogeniture: Only 1st born sons inherited land, keeping estates larger
* Rare escape: Knighthood or joining a monastery.
* Women's status linked to husband's estate.
* 1st estate women => Didn't work, managed home.
* 2nd " " => (Nuns) independent from husband.
* 3rd " " => Worked hard, often faced abuse from upper class men.
* Being Knighted or called into monastic life was a rare way for a man from 3rd estate to escape his position.

* Class system is a type of social stratification where ppl are grouped mostly based on money or material things they can achieve.

Share

Q2

No.

Date

* Class system is flexible.
* Ppl are born into their parent's class, but can move up or down the social ladder based on success or failure.
* The class system allows for social mobility, motivating ppl to work hard & study to improve their position in society.

Theoretical Perspectives on Social Stratification - I

Lesson - 22

* Functionalism explains that social stratification (inequality) exists bcz it is useful for society.
* Kingley Davis & Wilbert Moore proposed the functionalist theory on stratification.
* They came to conclusion that social stratification was inevitable.
* The most qualified individuals must fill the most critical roles.
* All societies need to make sure that imp. positions are filled.

Signature _____ No. _____

Date

Conflict Theory:

* Conflict theorists says that social stratification happens because of conflict.
* says in social stratification powerful grps use society's resources to keep themselves at top and exploit worker grps.
* Karl Marx strongly disagree with functionalists.
* Marx saw history as a story of class struggle - fight blw rich & poor.
* In Marx's theory "class consciousness" means realizing shared oppression.
* Modern conflict theorists study global power shifts, race, gender conflicts.
* Marx anticipated worker's uprising.

Symbolic Interactionism:

* Lifestyle means the special way a grp uses good & services & show its status.
* Veblen's book "Theory of the leisure Class" helped start the idea that stratification is linked to how ppl act in society
* Body language can also show class differences
* Working-class ppl & some ethnic grp tend to use hands/gesture more when giving directions.
* Thorstein Veblen (1899) said rich ppl show off

Signature _____ DZ No. _____

Date

their money by spending on flashy things (conspicuous consumption).

* Veblen => rich ppl enjoy free time in ways that show their high status (conspicuous leisure)
* Broad social network & associations helps middle & upper-class ppl move up in society.

* Feminist theory says that Patriarchy system causes gender inequality.

What Determines Social Class: (Max Weber)

~~Sociologists believe that~~

* ~~Acc. to Weber~~, property, power, & prestige make up social class.
* 3 P's of social class:- Property, power, Prestige.
* Weber used the phrase class, power & status.
* Weber agreed with Marx that Property is a significant source of power.
* Power can be attained through prestige.
* Prestige is frequently derived from wealth.
* Prestige might bring property, the relationship b/w the two is reciprocal.

Signature _____ No. _____

Karl Marx: Means of Production Date

* Karl marx said that social class is based solely on a person's relationship to the means of production.
* " " " => tools, factories, land & investment capital used to create wealth.
* Acc. to Marx, there are only 2 classes of ppl, the poletariat (workers) & the bourgeoisie (capitalists), who possess the means of production.
* Marx didn't see grps like farmers, beggars, small shop owners as proper classes bcz they didn't have class consciousness (didn't feel unted as a group).
* Marx focused only on ownership of production.
* False class consciousness stops workers from revolting. → workers mistaking themselves for capitalists.
* Lumpenproletariat (those on periphery of society, such as beggars, vagrants & criminals).

Theoretical Perspective on Social Stratification - II Lesson- 23

* Main focus of modernization theory is internal development & tech.

Sig. Date 07 No.

Modernization Theory : Date

Functionalist Approach

* Modernization theory explains why some countries are rich & others are poor.
* Mode... theory says that tech., industrialization & internal development are the key to progress.
* Mode.. theory follows a functionalist approach, meaning if every part of country works well, it will grow & develop.
* Poor countries are behind because of internal problems, like bad weather, poor land, political corruption or traditional customs.
* Theorists believed poor countries should adopt modern values like, individualism, hard work, practical thinking.
* Singapore showed that traditional values can also lead to success.
* External help like money & weapons from US & Britain also played a big role in development of countries like South Korea & Taiwan. (Geopolitical & external support)
* Later studies showed that modernization depends on both internal & external factors.

Signature _____ No. _____

Date

* Now moder-- theory is a mix of internal efforts + external support + competition for power (close to conflict theory).

Dependency Theory:
Conflict Approach.

* Dependency theory based on the conflict approach.
* It explains why poor countries stay poor even after colonalism has officially ended.
* Rich countries & global institutions (IMF, World Bank, WTO) control & dominate poor countries.
* 3 ways: Trade, Industrial & investment dependency.

1) Trade Dependency: Rich countries buy raw materials (coffee, minerals) from poor countries at low prices, then sell back finished products at high prices. (unfair trade system)

2) Industrial Dependency: Big corporations build factories in poor countries to save labor costs & avoid taxes & rules.
- Profits mostly go back to rich countries.

3) Investment Dependency: Rich countries lend money to poor countries through World Bank, IMF.

* Poor countries spend most of their income repaying loans (Brazil, Mexico).
* Austerity policies (cutting spending to repay debt) hurt the poor, causing hunger & poverty to increase.

World System Theory:

* Immanuel Wallerstein introduced world system theory to explain global inequality.
* He said world economy is like a system made up of 4 diff. grps of countries. (Industrialization created)

1) Core nations, countries that industrialized first (like British, France, Germany).

* Became rich & powerful by controlling trade & production.

2) Semi periphery nations, countries near the core (around the Mediterranean).

* Trade with core nations but didn't grow as strong, so their economies stagnated (stopped growing) (Spain, Italy) historically

Date

3) Periphery Nations, less developed countries (like Eastern Europe)

* mainly sold cash crops (coffee, cotton etc) to core nations & didn't industrialize much. dependent on core.

4) External Area, countries (mostly in Africa & Asia) that were left out of early capitalism completely.

* Not part of main world eco for a long time.

* Globalization of Capitalism.

* Countries are interconnected through trade & production
* Most countries are linked through capitalism.
* All countries are part of one big global eco system, especially those with heavy trade links are strongly tied together.

Neo colonolism (new form of colonialism)

* Michael Harrington said when traditional colonolism ended after WW II, rich countries started controlling poor countries through economic means.
* Rich nations now lend goods & weapons to poor nations on credit, instead of sending armies,

Signature

Pg 2

No.

Date

* United Fruit Company in Central America controlled politics & used military to protect their interest
* Multinational ~~companies~~ corporations in global stratification often exploit poor countries & favor rich nations.
* Multinational corporations bribe elites with money & wapons to ensure political stability in poor countries.
* Bribes referred to as subsidies or offsets.
* Industrialized nations benefits most from multinational corporations' profits.

Social Mobility

Lesson-24

* Social mobility (Intergenerational) means the movement of ppl or groups up or down in social class. over time.
* Changes in things like edu, job, income, lifestyle.
* 3 main categories (Pattern) of social mobility:
1) ~~Integrational~~ 2) Structural 3) Exchange

* Intergenerational mobility refers to change in social status from one generation to next. (change in social position of children relative to their parents).
* Intra is Latin for within.

common in equal & democratic societies.

due to society-wide changes.

Date

2) Structural Mobility happens due to changes in society, not bcz of individual effort.

Societal changes like => tech advancement, eco depressions, political change

↳ ppl's social position

* Recession or automation => many ppl lose jobs & move downward.

3) Exchange Mobility: when many ppl move up & down b/w socioeconomic strata, but the overall class system remains same.

* Intra generational mobility means change in status within one's lifetime. (changes due to personal effort).

* Acc. to sociologist, structural mobility is the primary factor determining social mobility.

* Sociologists studied men said;

✓ Half of sons moved down the class ladder.

✓ One-third stayed the same

✓ one-sixth moved up.

* In 1992, sociologists Lynn Weber & Elizabeth Higginbotham studied 200

Signature 07 No.

Jay Zagorsky

Date

working class women in Memphis.

* Family support & edu help women rise in class.
* Divorce usually lowers social status.
* Acc. to Weitzman (1996) many divorced women face a big financial loss. (also health benefits)
* Acc. to Jay Zagorsky study, married couples more likely to gain wealth faster.

* Diff. communities & historical periods experience social mobility in diff. ways.
* Social mobility is a zero-sum game.
* Status-attainment mobility => person's social mobility is influenced by their edu, family, achievements & social networks.
* Exchange mobility => One person moves up & another moves down (like a zero-sum game)
* Individual mobility is often associated with merit-based societies.
* Education is a key factor in social mobility.
* Political instability, corruption & weak systems are barriers to social mobility in Pak.

Signature

No.

Lesson-25

e Family: Global Variety - I

Date

* In England from 1600s to 1800s, the avg family was about 4.75 ppl while today it is 2.4.
* Cohabitation (living together without marriage).
* Traditional families are still common in remote areas of Asia & Africa & Pacific Rim.
* In traditional societies, children often began working by age 7 or 8.
* In Premodern Europe, nuclear family was more common.
* Nuclear family (parents + Kids)
* Rates of morality (the num. of deaths per thousand of population in any one year).
* Western culture & migration, affect family patterns
* Descent Patterns help define family roles.
* Affinal Kins => connected by marriage. (in-laws)
* Consanguineal Kins => blood relatives
* Fictive Kin => chosen family (godparents, close friendship).

* Bilineal Descent (common western societies): Used in many modern societies, Ancestry is traced through both parents.

* Patrilineal Descent: Traces through father's side, common in patriarchal, traditional societies

Signature ____ male dominance

No.

uncle support children more than their fathers. Date

* Matrilineal Descent: Traces through mother's side, where women central to economy
* Matrilineal found in societies like Navajo.
* Traditional families in industrialized countries are usually bigger, younger & more functionally diverse than post-industrial societies
* Ethnocentrism => Belief that one's own culture is superior.
* Horticultural societies => Navajo Indians of Arizona
* Extended families (vertical or joint) live together & support each other materially & emotionally
* Two types of families=) Nuclear, Extended
* Extended families include grandparents, aunts, uncles, cousins, multigeneration
* Nuclear family is common in industrial societies
* Vertical extended family => Three or more generations (grand, parents, children) live together.
* Joint => Siblings with their ~~children~~ families.

* Kinship groups => Ppl connected by blood, marriage, adoption or ritual bonds (like godparents)
* In industrial societies, Kinship ties are usually weak & visits are rare.
* In ethnic & traditional communities, Kinship ties are strong (Mexican Americans)

Signature _____ No. _____

Date

* Incest taboo => forbidding marriage b/w close relatives like parents & siblings.
* Some ancient royal families allowed incest to preserve bloodlines (like ancient Egypt & the Inca of South America, Hawaiians).
* Decline in fertility & increase in migration, shrinking household sizes in both developed & developing nations.

* Exogamy => marrying outside your own group.
* Endogamy => " inside " " ".

* In industrial societies, ppl are free to choose their parents.

* Monogamy => one partner at a time most common in industrial societies.
* Serial monogamy => means marrying multiple times but one person at a time.

* Polygamy => having more than one spouse at same time.
2 main types of polygamy.
1) Polygyny: one man with many wives.
2) Polyandry: one woman with many husbands.
↳ most common in pre industrial societies.

Date

* Berdache marriages => among some Native American tribes, men could marry males who identified & lived as women.

Divorce

* In matrilineal societies (Zuni Indians), women can end marriages by putting husband's things outside the door.
* In patriarchial societies, men could divorce with a simple statement.
* Islamic nations => 3 times in front of 2 witness.

* Neolocal Residence: common in industrial societies, couples set up new independent home.
* Linked with egalitarian relationship, where both spouses share decision-making.

* Matrilocal Residence: Husband live with wife's family. hehe! گھر جوائی
* Found in Matrilineal cultures.

* Patrilocal Residence: Wife live with or near husband's family.
* Very common (67% in studied societies)
* Elderly men of family has power.
* Common in traditional societies.

Signature _____ No. _____

The Family - Global Variety - II

Date lesson 26

* Divorce is increasing in Pak, comma especially among educated, wealthy, urban families.
* Divorce still carries social stigma.

* Single-parent families is the fastest-growing family type.
* Not bcz of death, but 70% dvare from divorce or separation.
* Eco disadvantage, poverty causes stress in these families.

*

* Blended families => Both divorced ppl remarry & bring children from previous marriage.
* These families face adjustment challenges & unrealistic expetations.
* Support & patience are key for a successful blended family.

* Same-Sex families common in Western culture.
* In US (2019), 980,000 same-sex couple households were recorded.
* Atheist European societies, support autonomy in such relationships..

58% married, 42% not married

Sh. name _____ 92 No. _____

15% of preschoolers cared by their fathers while mother worked in 1980.

Date

* 70% mothers with school-age children wo.
* 50% mothers with preschool children work.
* Women are thought to spend 32.7 hours a week on housework, compared to 17 hours for men.
* Housework gap b/w men & women has shrunk from 29 to 9 hours per week.

~~* 3 b.~~

* 3 basic categories of family violence
  1) Spousal 2) Child 3) Elder

* Spousal abuse is one of the common forms of violence in US.
* In 1970s, spousal abuse reports ranged from 2 to 8 million per year.
* Actual rate of spouse assault has been estimated as high as 18 million incidents per year.

* Child abuse => 3 out of 4 parents beats children
  4 out of 100 report serious abuse (Kicking, punching, biting).

Signature

No.

lesson - 27

Date

Functions of Family

* Social norms & legal restrictions control how ppl reproduce & establish unions.
* Factors like race, religion & social status influence unions in many cultures.
* The process by which ppl choose their love relationships is called mate selection.
* Child-rearing is shaped by religion & culture.
* Extended family members often support parents in childcare.
* Nuclear family are said to fit well in modern industrial societies due to mobility.
* Exogamy extends social networks & reduces internal conflicts.
* Anthropologists claim that exogamy was especially helpful in tribal societies
* Family serves 6 fundamental requirements for the existence of society.
* Family is the basis of social order.
* Ascribed status => A social position given at birth.

Family & Marriage in Transition

Date Lesson-28

* Extended families are common in Pak.
* Major source of conflict b/w husbands & wives is Power.
* The symbolic interactionist approach is a theoretical school of sociology. focus on meanings & interactions
* The amount of time husband & wife spend on housekeeping has reduced from 38.9 to 29.1 hours per week.
* The likelihood of getting divorce again is higher for ppl who have children from a later marriage.
* Men are more likely than women to remarry, bcz they have access to wider range of potential spouses.
* Types of families: nuclear, extended, single-parent & blended families.

Health & Medicine - I

Lesson-29

* Non-biological factors that affect one's health & well-being are social class, cultural beliefs & way of life.

Signature

No.

Date

* The sociology of medicine is one of sociology's applied fields.
* Ppl are categorized as "crazy" or "normal" based on social conventions.
* Talcott Parsons (functionalist), defined 4 aspects of sick position.
* In Afghanistan, Nigeria & South Africa, the avg individual does not live to the age of 50.
* The avg person in industrialized world may expect to live to be around 75 years old.
* luxury disease: heart disease & cancer, only found in industrialized nations.
* Four major diseases of underdeveloped nation.
1). malaria 2) internal parasites
3) diarrohea 4) famine
* Sociology explores how medical care is structured as a profession, bureaucracy & business.
* Health is defined relative to cultural norms.
* Acc. to symbolic interactionists, socially & illness & health are socially & culturally defined.
* Talcott Parsons 4 aspects.
1) Person isn't blamed for being sick
2) excuse from duties 3) seek medical help
4) must want to get better

Sheet No.

Health & Medicine II Date Lesson-30

* Epidemology is the study of frequency & distribution of health & illness in a society. how often diseases occur in diff. grp & why
* (SIDS) Sudden Infant death syndrome happens while sleeping due to a respiratory illness in infants & young toddlers.
* Men diseases: Impotence, testicular cancer & prostate cancer.
* Women diseases: ovarian, fallopian, cervical & uterine cancers.
* Women's illnesses are more usually linked to morbidity (chronic debilitation)
* Men's illnesses are linked with mortality (death)
* White ppl may expect to live roughly 5 years longer than non-white ppl.
* Infant mortality is higher in => Native/African Americans, Mexican Americans, US.
* Alternative medicine refers to practise, therapies & treatments that fall outside the purview of conventional medicine.
* Alternative medicine has always been considered as quackery.
* Integrative medicine/healthcare => combines medical procedures with evidence-based complementary & alternative therapies.

Signature _____ No. _____

Date

* Combining best elements of complementary & conventional therapy, integrative medicine seeks to provide complete & tailored care.
* Medicalization means treating normal human behavior are or traits as medical problems. Eg: wrinkles, balding, acne, even bad behavior.
* Factors affecting health: Age, Sex / Gender, Race / Ethnicity, socioeco. status.
* Holistic medicine promotes prevention (healthy food, rest, prayer etc) not just treatment.
* Quackery => lacked scientific support.

Religion - I Lesson - 31

* Bread & wine two most potent religious symbols for christians.
* Religious rituals are collective actions with long-term objectives.
* Magical rituals are solitary actions with instant ends.
* Animatism holds that supernatural forces rather than beings (Gods) govern the cosmos.

Signature 92 No.

Date

* Animism is the belief that spirits exist in our world but exist on a diff. level than humans.
* Animistic religions are prevalent in preindustrial societies.
* Guardian angels are frequently invoked by Roman Catholics & ppl of various faiths.
* In 2004 Gallup poll, more than 50% respondents claimed to have a personal guardian angel, & 78% of Americans believed in angels.
* 70% respondents said they believed in demons.
* Hinduism, the 3rd most popular religion in the world with approx. 820 million followers.
* The 3 most dominant faiths in the world today are monotheistic religions.
* Judaism emerging earliest around 1500 BC.
* Around 33 AD, Christianity emerged as a branch of Judaism.
* more than 3 billion ppl worldwide identify as either Christians or Muslims.
* Sacred is what ppl consider holy
* Profane is everyday life.
* Religion uses symbols & rituals to connect ppl to the sacred.

Signature _____ No. _____

4 main types of Religion

Date

* Polytheism => Belief in many gods. (Hinduism)
* Animalism => Invisible forces (lucky charms) mana
* Animism => Spirits exist around us (angels)
* Monotheism => One God only.

* Emile Durkheim introduced the concepts of sacred & profound.
* Religion seeks help; magic control results.
* Magic is mostly used when risks are high.
* Religious cosmology explain universe & humans' role.
*

Religion - II

Lesson- 32

Religion

* Totemism, practised by Australian Aborigines & other preindustrial ppl.
* Karl Marx believed that world would be a better place if without religion.
* Conflict perspective => Religion tends to promote cohesion & benefit society as a whole.
* Functionalist => Religion has significant social & personal benefits such as psychological support.

→ Religion's two faces

Date

* Acc. to Dwight Billings, religion is a mediating variable, that can be used to support or challenge the status quo.
* The Protestant Ethic was published in 1904.
* Acc. to Durkheim => religion promotes unity, moral support & a sense of belonging in society.
* Acc. to Marx => Religion is a tool of oppression used by powerful to control the weak.
* Acc. to Weber => Religious & beliefs can drive major social & eco. change.
* Religion may conflict with dominant culture, causing isolation or resistance.
* Protestant values like discipline & hard work encouraged capitalist growth.
* Totem represent clan itself in Aboriginal religion, acc. to durkheim.
* Karl Marx call religion the opium of the ppl.
* Acc. to conflict theory, religion benefits elite by promoting submission.
* Max Weber famous work:
  - ✓ The Protestant Ethic
  - ✓ The Spirit of Capitalism

Signature _____ No. _____

Date

* Weber believed Protestantism helped encouraged capitalism.
* Acc. to webey, Calvinists, religious association grp helped develop capitalist values.
* Predestination made Calvinists anxious about salvation
* Amish withdraw from dominant society to handle cultural conflict.
* Branch Dravidian cult in 1993 was destroyed by police.
* The early Christians were persecuted by Romans.
* Mennonites broke away from the Amish in 1693.
* Durkheim study Totemism to understand religion in its purest form.
* Deurkheim believe religion does not provide eco. hierarchy.
* Weber believed Protestant values contributed to Rise of capitalism.
* Calvinists believed that material success was proof of divine favor.
* Mormons religious grp founded a Settlement in Utah in 1847.

Signature 92 No.

Date

* When a religious grp entirely separates from society, it forms a cult or society. sed.
* Rejecting certain elements is the 2nd pattern of religious conflict with society

Govt. & Eco. I : Lesson-33

* Acc. to Max Weber, Power is the ability to achieve one's goals despite the disapproval or opposition of others. exercise & maintain power.
* Politics is a social process by which ppl & grps acquire, exercise, maintain or lose authority over others naturally centers around power.
* Income & wealth are crucial sources of power.
* Power & coercion are two sides of the same coin.
* Coercion is the recognition of threat.
* " is an ineffective long-term method of control bcz obedience ends when force stops (Weber)
* Govt. functions:) Maintain order, well-being of citizen.
* Small elite (oligarchy).

Signature _____ No. _____

Date

* A political system in which one person rules exclusively arbitrarily is called dictatorship.
* Eg. of Totalitarian regime is from 20th century Hitler's Nazi regime, Stalin's communist regime, Khmer Rouge.
* Khmer Rouge turned Cambodia into a killing field in 1970s.
* Totalitarinism is the most extreme form of authoritarianism.
* Junta refers to military rule by a small elite.
* In authoritarian system, power is usually held by a single leader or elite.
* Iron law of oligarchy suggest that elite always form in large organization.
* Canada is an eg. of long-standing democracy. → Australia, New Zealand, US, Japan, India, => After WW2 turned into democracy
* Oligarchies usually replaces short-lived dictatorships.
* Military Junta => grp of military officials who take control via coups.
* Military Juntas most commonly found today in Asia, Africa, South America.

Signature

No.

Date

* Totalitarian regime seek to control all aspects of life.
* Totalitarian leaders typically use terror & propaganda to control society.
* Many authoritarian regimes now use democracy system.
* Democratic system => Govt. by ppl.
* Profit remains driving force behind a capitalistic eco. Seymour Martin Lipset
* Sociologist Lipset linked eco. development with stable democracy.
* Acc. to Higley & Burton, democracies also require elite agreements on political rules.
* Feature of capitalism: Profit motive, pvt ownership, market competition.
* Weber explored the link b/w religion & capitalism.
* Pure form of capitalism ideally supposed to follow Laissez-faire (hands-off)
* Acc to Lipset, advanced eco. development & widespread wealth supports stable demo.
* Edward Muller argue that Authoritarian leadership might replace democratic institutions in areas with high income inequality.

Signature _____ No. _____

Date

* Acc. to Blau & Schwartz, democracies function best when power is diffused among various grps.
* Democracies thrive in political cultures that emphasize individual worth & tolerance.
* Civil liberties & citizen pailicipaton is vital for a thriving democracy, stated by Orum.
* Capitalist societies are marked by the put ownership of natural resources & businesses.
* In real-world capitalism, govt. often regulates distribution & consumption of goods.
* Competition in capitalism typically lead to dynamic eco. growth.
* Max Weber's work on capitalism is titled The Protestant Ethic & the Spirit of Capitalism.

Govt. & Eco. II Lesson-34

* 3 Key elements of socialism are:
1) Public ownership of means of production
2) Central planning
3) Distrubition of products without based on profit

Signature 97 No.

by setting fixed price & govt. control

Date

* Socialism is meant to eliminate competition.
* In socialist eco, every link in the eco. chain serves the govt.
* Socialism's philo. advocates for resources to be distributed acc. to need rather than ability to pay.
* Capitalism is based on short-term hedonism. & is bound to failure bcz ppl compete for their own financial gain.
* Socialism said that welfare of community comes before personal interests.
* Govt. planning & eco. collaboration are preferable ways to achieve the societal objectives as a whole. (Acc. to socialists)
* In socialist eco, the amount of production is determined by central committee.
* In socialism, prices are set by govt. regardless of cost or demand.
* Aim of socialism => produce goods for communal welfare.
* Central committees set production goals & pricing.
* Compared to capitalism, socialism promotes greater income equality.

Signature _____ No. _____

Date

* China is an eg. of partial transition from socialism to capitalism.
* Central planning => selling goods at fixed prices regardless of demand.
* Capitalist believe that free-market capitalism is the most effective system for resource allocation & eco. growth.
* Acc. to capitalist, market forces & competition drives efficiency & customer satisfaction.
* Profit is considered a major incentive in capitalism.
* Capitalists argue that socialism leads to inefficient resource allocation due to centralized planning.
* Risk & reward is closely associated with the capitalist idea of success & failure.
* Capitalists believe socialism reduces incentives due to income redistribution
* Capitalist critique that govt. ownership in socialism results in bureaucratic inefficiency.
* ~~Profit-driven incentives~~
* Democratic socialism is ~~another~~ also referred as welfare socialism.

Sign

No.

Date

* Democratic socialism aims to fix problems in both capitalism & socialism.
* Sweden & Denmark are eg. of democratic socialism.
* Democratic socialism aims to reduce the exploitation of capitalism & lack of freedom of socialism.
* In democratic socialism, both govt. & pvt citizens produces & distributes goods / services.
* Steel, mining, forestry, energy industries are typically govt-owned in democratic socialst countries.
* Manufacturing, farms & retail remain mostly pvtly owned in democratic - - - .
* Private individuals retains ownership of most service sectors in democratic - - - .
* Acts of disagreement or resistance to firmly established political powers are known as Rebellions.
* Armed uprisings & nonviolent demonstrations are both eg of rebellions.
* Acc. to Weber, 3 main categories of lawful power are:

1) Traditional 2) legal-rational
3) charismatic

Signature _____ No. _____

Date

* Expertise is the 4th main source of authority
* eg: King ruling by ancestral lineage
* Traditional authority is frequently inherited & based on ascriptive statuses.
* Traditional authority is rooted in long-gone custom & habits that is frequently appraved by religion.
* Legal-rational authority, also known as bureaucratic authority, based on specific laws, policies & procedures.
* Charismatic authority is founded on exceptional personal traits.
* Eg of charismatic authority is revolutionary leader with mass following.
* Traditional authority is commonly found in monarchies or tribal societies.
* Charismatic authority is often fragile, flimsy & temporary.

* Revolutions are characterized by large-scale & radical change.
* Revolutions usually arise due to grievances like inequality & oppression.

Signature

No.

Date

* Revolutions typically involves violent mass uprisings.
* Institutionalized political change typically involve legal & systematic processes.
* Constitutional amendment is an eg. of institutional political change.

Gender: Social Construction Lesson-35

* Gender is a social trait, not biological.
* Gender, like socioeco. class, is a structural aspect of society.
* Margaret Mead (Anthropologist)
* Mead investigated 3 New Guinean societies.
* Gender in sociology means => Cultural meanings attached to being male or female.
* Sex refers to biological differences b/w males & females.
* Gender is learned through socialization.
* Sex is biological, gender is social.
* Sociologist consider gender to be a tool of social control.
* Cultural norms & expectations determines gender roles in a society.

Signature _____ No. _____

Date

* Acc. to Mead's study, Arapesh society valued empathy & cooperatio traits in both men & women.
* Aggression & selfishness traits ~~show~~ seen in both men & women in the Mundugumor society.
* Tchambuli (Chambri) group studied by Mead had reversed gender roles compared to western societies.
* In Tchambuli culture, "females" was described as dominant & rational.
* Acc. to Mead, "Gender' is culturally constructed", not biological.
* Deborah Gewertz critique on Mead study was :> She exaggerated gender reversals.

* Social construction of gender :> Gender is created through cultural norms & social interaction.
* Barrie Thorne (sociologist) said masculinity & feminity are shaped by social perception & interaction.
* In American culture, Aggression & dominance are traditionally associated with masculinity.

Signature _____ 02 No.

Date

* In Pakistani culture, feminity is often linked with passivity, docility, fragility, emotsonality & subjugation to men.
* Acc. to Carol Gilligan, by the age of 4, children feel pressure to conform to gender norms.
* Giordano stated that by adolescence, gender roles are well established.
* Male aggression varies across cultures & social contexts.
* Acc. to Lieberson et al., parents reinforce gender identity by choosing gender-specific names.
* Sexism => one sex is inherently superior to or inferior to other.
* Sexism supports prejudices (attitudes) & discrimination (actions) both personally & institutionally.
* Sexism promotes unjust & unequal treatment of ppl based on their ascribed traits, similar to racism & ageism.
* Institutional sexism => unequal rules & policies based on stereotypes. => feminist scholar
* Carol Gilligan => both ~~sexist~~ sexes suffer when one is not understand. this is not a zero-sum game

Signature _____ No. _____

Lesson-31

Perspectives on Education & Date

Schooling I

* Manifest functions are the desired outcomes that ppl wish their activities to produce.
* Latent functions are the favorable effects they did not want to occur.
* The manifest goal of education is to impart info & skills,
* Sociologist Randal Collins claims that credential societies have developed in industrialized nations.
* Credential societies => Society that uses degrees & certificates to judge job qualifications.
* Main goal of education is to import knowledge & maintain social stability acc. to functionalist perspective.
* Cultural transmission of values => School transmit a society's fundamental ideas, core beliefs from one generation to next.
* In capitalism societies (schools) => individualism & completition are promoted.
* Schools help in social integration by building national identity & reducing chances of rebellion.

Share

02

No.

Date

* American schools promote political integration is the way that mainstream beliefs & values have been taught to tens of millions of immigrants
* A national identity cannot be established until the political system has been consolidated.
* Majority of social revolutions hail from the lower socioeco. classes.
* In Japan schools are legally required to teach respect for tradition & love for homeland.
* If ppl sees institutions as working in their favor, they are less likely to protest or revolt.
* Gatekeeping (credentialing) selecting who will enter the what profession.
* The merit-based gatekeepers were supported by functionalists Wilbert Moore, Kingsley Davis & Talcott Parsons.
* They developed Social Placement Theory
* Social Placement Theory :) placing ppl in jobs they're best suited for.
* Functionalist see education as a system that divides ppl into grps based on their abilities & goals for the good of society.

Acc to Hamlin

Signature _____ No. _____

(unintended) Date

* Childcare has always been a latent function of formal education. but now is a clear need.
* Schools now perform family-like roles, especially childcare.
* Schools serve as a hub for social networks.
* School help reduce unemployment by keeping young ppl in school longer.
* Countries like Japan & Britain, stick to traditions, so it's harder for schools to change quickly.
* Cambridge kept the same core curriculum for 300 years.
* American uni after change, altered 3 times in past 10 years.
* Some ppl postpone job hunting for edu. & skill development.
* Anticipatory socialization => teaching children the skills they'll need for their future roles.
* Parents helps in anticipatory socialization besides schools.
* In traditional or small societies, edu. focuses more on survival, gender roles & traditions - not on careers.

Signature

92

No.

Date

* In modern, industrialized societies, edu. tries to prepare students for many diff. jobs, especially bcz tech & job roles keep changing.
* Schools sometimes create shortcut of specialists bcz labour market change faster than schools can adapt.
* Employer expect cognitive & vocational skills from future employees.
* Specialized teachers usually controls edu in preindustrial societies.
* When schools can't meet industry needs then there are too few or too many experts in some fields.

* Latent function: hidden or unintended ~~function~~ benefits of something.
* In education, one latent function is that ppl who are educated tend to live longer.
* In America, acc. to research ppl who finish school live upto 82 years on avg.
* Ppl who drop out of school live upto 75 years.
* Meara et al. conducted the research on edu & life expectancy.

Signature _____ No. _____

Lesson: 37

Date

Functions of Schooling - II

Conflict Perspective

* Schools acts as social control.
* Formal edu maintains & reinforces existing social & power inequities.
* Schools teach values that support the current system, like obeying authority & accepting unfair system.
* Control of knowledge ⇒ School choose what to teach & not to teach.
* This info. control used to promote some ideas while marginalizing others.
* Place limitation on critical thinking.
* Social stratification in edu. lead to dividing ppl by class & bg & opportunity.
* School trains students to fit into the eco. often acc. to their social class.
* For eg: working class family children (opt for blue-collar jobs), while elite students prepared for leadership.
* Positive element may occur ⇒ Resistance & challenges to dominant ideas.
* Conclusion: Conflict perspective ⇒ emphasizes how edu contributes to inequality & the status quo.

معاشرے میں لوگوں کا درجہ بندی (امیر اور غریب) کے ذریعے مختلف طبقوں میں تقسیم ہونا۔ <= Social Stratification

Date

* Conflict view => Edu system in both capitalist & communist states actively promote & sustain inequality.
* Edu system enable schools to act as "screening devices" for society.
* Karl Marx & Friedrich Engels fought in favor of universal access to free edu.
* Japan did not adopt the concept of mass edu until after World War 2.
* Hidden curriculum => unwritten moral principles & attitudes that school teach in addition to formal curriculum.
* Eg: Deference to authority & adherence to social norms.
* Conflict theorists says that hidden curriculum helps keep societal inequities in place.
* Discrimination by IQ Even intelligence test help to keep the social class system intact.
* These tests reflect cultural bg, not just intelligence.
* Samuel Bowles & Herbert Gintis, conflict sociologist first used the term "correspondence principle" to describe how schools mirror society in 1976

Signature _____ No. _____

Date

* Acc. to correl. principle, country's social standards ought to be represented in the curriculum of its public schools.
* Educational credentials acts as a screening tool.
* Pygmallion Effect (type of self-fulfilling prophecy). If teacher expect success, student do well, If they expect failure, student often fail (student become what they are expected to be ↗ expectation affects student performance)
* Students labelled as smart, dull, troublemaker, gifted etc affects how teachers treat students.
* Non-academic traits (like appearance, personality, gender, class) also affect labels. (socioeco. bg)
* Symbolic interactionist focuses on daily interactions in school.
*

Population Study & its significance — Lesson-38

* The avg num of children that a woman has is known as fertility rate.

Signature _____ 87 No.

Date

* A woman has 2.6 children in her lifetime, acc. to avg global fertility rate of 2.6.
* American women have a substantially lower fertility rate at 2.1.
* Fertility & fecundity are used interchangeably.
* The world's highest fertility rate is found in Middle Africa. women give birth to 6.1 children on avg. -> Niger & Guinea-Bissau (7.1)
* Lowest fertility rate is found in Eastern & Southern Europe, women give birth to 1.4 children on avg. -> Asia too
* Macao has the lowest fertility rate in ~~A~~ entire globe, typically women give birth to just one kid.
* 5 of the countries with the lowest birth rates are from Asia.
* To ascertain a country's fertility rate, demographers look to the govt. birth registration records.
* Demographic elements:

1) Registration Records (Birth):
2) Mortality : Yearly crude mortality rate, or no. of deaths per 1,000 ppl.

* Highest death rate: Swaziland (Africa) (31 per 1,000)
* lowest death rate: Kuwait, Qatar, UAE (2 per 1,000)

Signature _____ No. _____

Demographics: Statistical data relating to population & particular grps within it.

Date

* Lowest death rate worldwide is 2.

3) Migration : 2 types of migration
Type 1 => inside country
Type 2 => across diff. countries

The Great Migration: millions of African Americans relocated from South to North during & after World War II

*Net migration rate: Difference between emigrants (ppl leaving nation) to immigrants (ppl entering nation), per 1,000 ppl.

* Push factors: Power, war, persecution
* Pull factors: Jobs, freedom, edu, better life.
* US accepts most immigrants than the rest of the world.
* About 38 million ppl living in the US
1 out of every 8, were born in another country.
* Demographers also study how characteristics like age, sex, race & ethnicity affect ppl's lives.
* 2 major aspects: Population Composition
" Density

Share

No.

how crowded a place is Date

* Population Density: Num. of ppl living per sq. mile in a given area.
  - Helps to understand: crowding, resource pressure & urban planning needs.

* Population Composition:
  Num. & diversity of ppl in a population.
  Kind of ppl like age, gender, race & ethnicity

* One basic measure is sex ratio.
* Sex ratio shows the proportion of males to females.
* Acc. to sex ratio, there are around 95 men for every 100 men in US.
* In US, ppl aged 65 & above are becoming the largest grp in population.
* Combining age & sex gives rich social & demographic info.
  Population can understand better using tool like age-sex pyramid (type of graph), which shows the num. of males & females in each age grp.
* More than 368,000 newborns born each day.
* World's population of over 6.7 billion ppl is growing by about 80 million every year.

Signature _____ No. _____

Date

* As population grows, quality of life declines.
* Population Growth rate => Annual %. b/w difference b/w the num of ppl who are added to or withdrawn from particular population
* Population growth rate in developed nations is less than 1%.
* Population growth rate in several emerging nations is over 3%.
* Population is growing at a rate of roughly 1.2 percent year. (WHO 2009)
* By the end of 21st century, the population of US will have doubled, reaching 600 million
* The population of 82 countries will double in 30 years or less if current trends continue.
* The world's population has doubled over past 40 years.
* 1% growth, dabling takes about 70 years.
* 2% growth, " " " 35 years.
* Doubling time => how many years it takes for a population to double.
* Consequences of overpopulation => Resource depletion, overcrowding, poverty & environmental damage.

Date

* Family planning improves gender equality.
* Ecosystems & natural resources maybe under stress as a result of population growth.
* Smaller families are typically connected with greater living standards.
* Family planning is crucial for: sustainable development, promoting public health, challenges empowering women, addressing environmental changes.

* Demographic variables of fertility, death & net migration are combined together to determine the growth rate of country.

Growth rate = Births - deaths + net migration

* Social factors that affects these are wars, eco, booms & busts, plagues & famines.
* Germany under Hitler.
Abortion banned, women get paid for having children especially "Aryan's.
* Russia => Population shrinking.
↳ Govt. offer cash rewards to pregnant women to encourage births

Signature

No.

Date

* China:- One couple, one child.
* After 1st childs, IUDs implanted
* On 2nd child, forced sterilization
* Unmarried pregnant women are jailed & forced to abort.
* In some areas, if 1st child is a girl, a second child is allowed.

* Uniform birthrates make forecasting easier.
* Social, political & govt. decisions make population growth forecasting harder.

Theories of Population Growth (Lesson-39)

* Malthusian Theory proposed by Thomas Malthus in 1798.
* Malthus observed that population grows geometrically (2 to 4 to 6 to 8 ---), while food supply increases arithmetically (1, 2, 3, 4, ----).
* This means population would eventually outpace food production.
* Malthus Book: Essay on the Principle of Population published in 1798.

Malthus Theory

Signature

No.

Potato

Date

* With more food, birth rates rose, death rates fell, Europe's population nearly doubled in the 1700s.

* Paul Ehrlich (Stanford biologist), published The Population Bomb in 1968.
* Ehrlich is considered "Modern-day Malthus", for reviving & updating Malthus's idea with scientific data.
* Acc. to Ehrlich, population is a number game.
* If trends continued, in 900 years, Earth would have 60 million billion ppl, or 100 ppl per sq. yard of land & sea.
* Ehlrich predicted that by 1990s, millions would die of starvation & malnutrition.

Book Cover Msg (Ehlrich's Book)
cover featured a baby in a glass bomb with a fuse, warning:
5 ppl have died of starvation & 40 more have been born (while u read this).

Signature

No.

Date

*Acc. to Demographic transition theory, 3 primary stages of population expansion

Stage 1: High Birth & Death rates

- Colonial America: women had many children (13, 14) but many died young.
- Population remained stable bcz deaths balanced births.
- Low life expectancy.

Stage 2: High Birth Rates, Low Death Rates

- Death rates dropped due to better health & lower infant mortality.
- Birth rates stayed high => rapid population growth

Eg: Early industrial US

Stage 3: Low Birth & Death Rates

Families have fewer children due to:

Birth control, changing values, high cost of raising kids

- Seen in modern, industrialized nations

Many poor countries are stuck in stage 2 => overpopulation, hunger & disease.

Unlike Malthusian, it sees modernization as the path to stability

Source

Lesson- 39 (continued) SOC-101

* The demographic perspective of Marx & Engels arose in reaction to Malthus.
* Malthus asserted that population growth typically outpaces resource availability.
* Marxists hold that each society has its own population law that control how population growth affects a society.
* Capitalism: Leads to overpopulation & poverty due to poor resource management.
* Socialism: Can absorb population growth without harmful consequences.
* Marx & Engel blamed capitalist mismanagement for poverty.
* They disagreed with Malthus that resources grow slowly
* Marxists believed that science & tech can increase resources as fast as population grows.

* (SDT) Second Demographic Transition often known as series of socioeco. changes, began in many western countries in the mid-20th century
* It refers to socioeco changes of:
✓ Lower birthrates ✓ delayed marriage & parenthood
✓ more individual lifestyle choices
✓ Greater acceptance of non-traditional relationship

* Causes of these socioeco shift are:
For Better contraceptive access, deferred parenthood, evolving cultural norms.
* SDT has impact on:
Family dynamics, social policy, labour markets & population ageing.
* SDT varies by region but has a wide influence globally.

* Neo-Malthusians are modern supporters of Malthus's theory.
* 20,000-40,000 children are born every few min.
* 224,000 new ppl are added daily.
* They believe growth is exponential (doubling quickly over time.
* New Malthus are persuaded that a war over food & population is close at hand.
* By 2050, India & China together may have more ppl than the rest of the world.
* Without controlling growth, famine & suffering may increase dramatically.

* Anti-Malthusians (disagree with malthus) => Positive demographers
* " " believed that population growth will stabilize naturally through demographic transition (3 stages) model.

* They believe Least Industrialized Nations are now in Stage 2 & will enter Stage 3 soon.
* Capitalism is to blame for poverty through low wages, job cuts & replacement of workers by machines.
* Malthus' theory wrongly blames population instead of capitalist system.

Environment & Society — Lesson-40

branch of science related to sociology

* Ecology => Study of interactions b/w living things & their natural settings/environments.
* The word "Eco" is derived from the Greek word for "house".
* The global demand for beef in North America leads to deforestation in Latin America for cattle grazing; harming tropical forests that are crucial for Earth's atmosphere.

* Acc. to Dunlap & Catton, environmental sociology is a branch of sociology that focuses on interactions b/w human societies & environment.
* Ecological problems results from increased resource extraction.
* Eco. growth is physically limited since the world is finite

Environmental & Sociological Theory

* Structural-Functionalism: Focuses on how diff. parts of society (govt., eco, culture) work together & impact environmental stability or decline.
* Conflict Theory: Emphasizes how environmental problems are linked to power & inequality, struggles over resources & regulations (govt., corporations)
* Symbolic Interactionism: how ppl interpret & give meaning to environmental issues, how ppl's meanings, values & communication shape their behaviors toward environment.
* Ecological Modernization: Suggest that industrial societie can become environmentaly friendly through tech, laws & public awareness, without changing eco. system
* Human Ecology: How human population interact with their environment in terms of migration, urbanization & population growth.
* Environmental Sociology: how society affects & is affected by environment. includes, environmental attitudes, policies & movements.
* Risk Society Theory (Ulrich Beck): Argues that modern societies face new & unpredictable environmental risks due to industrialization & tech. How societies responds to these emerging threats.

* Environmental Ecology studies human harm to nature like global warming & rainforest destruction.
* The Club of Rome's "Limits to Growth" report (1970s) used computer models to show that if trends in population, pollution, industrial growth & resource use continued, they would lead to environmental collapse.
* Report concluded that endless growth is unsustainable due to the planet's finite resources & pollution limits.

* Sustainable development focuses on meeting present needs without compromising future generation's ability to meet their.
* -> concept was introduced in the 1987 UN report "Our Common Future".
* It promotes using renewable resources, recycling, minimizing pollution, and protecting biodiversity.
* The idea gained global attention through the 1992 Earth Summit (Rio de Janeiro) & 2002 World Summit (Johannesburg).
* It is part of the (MDGs) Millennium Development Goals adopted by 191 countries to combat poverty sustainably.

* 2 eg. of tech importance for environmental protection & general public => Early warning systems & renewable energy.

* Karachi & Lahore is notably affected by severe air pollution.
* Deforestation in Pak leads to => loss of biodiversity, soil erosion, urban expansion.
* Land degradation in directly linked to unsustainable farming & climate change in Pak.
* Pak's energy crisis has increased dependence of on fossil fuels.
* The illegal wildlife trade is especially common in border regions.
* Environmental stress & land misuse is a direct impact of rapid urbanization in Pak.

Social Change - I Lesson - 41

* Social change => Gradual alteration of social behavior & institutions.
* Pace of social change vary from society to society.
* Industrial era witnessed a major acceleration in Social change

* Wright Mills said that modern American society is experiencing "earthquakes of change".
* Macro change => Large scale, gradual change in society.
* Eg of macro-change => Modernization of society.
* Modernization involve transitioning to more complex social institutions.
* Micro-changes => Rapid, small changes from daily interactions.
* Ppl's everyday decisions is a source of micro-change.
* Ppl generally perceive the future in society as a mix of hope & Fear.
* Acc. to Clark Kerr's view, societies move toward the future based on their past, traditions & institutions.
* Barrett claimed when societies encounter novel situations, they respond within the context of preexisting sociocultural constraits.

* Turner & Killian stated that intense conflict & social upheaval can lead to novel ideas & worldviews.
* Industrial Revolution gave rise to a new scien

aimed at explaining rapid societal change.

* Acc. to early thinkers, sociology was expected to discover laws to explain & improve society.
* Cyclical notion's of social changes dominated most of human's thinking (history).
* Clock invention shifted human understanding of time & rhythms of life.
* Native Americans does not clearly separate the past & present as history repeat itself in cycle. (Inherent)
* Biological life span (metaphor) was often used in classical cyclical theories to describe societies.
* Oswald Spengler wrote The Decline of the West.
* Spengler predict an "inevitable decline" about western European culture.
* Acc. to Oswald, a new culture in its youth & prime replaces a declining society (Supported by Arnold Toynbee)
* Classical cyclical theory states => societies go thrugh stages of birth, growth & decay.
* Arnold Toynbee disagree that civilizations must decay to survive.
* Pitirim Sorokin developed a cyclical theory involving 3 types of mentalities.

1) Ideational 2) Sensate 3) Idealistic

* Ideational mentality focus on faith & spirituality.
* Sensate focus on practical & utilitarian thinking.
* Idealistic strikes a balance b/w the practical & transcendental.
* Acc. to Sorokin, ppl turn to ideational society when sensate society becomes overly hedonistic. & materialistic.
* Acc. to Sorokin, extremes in one method of thinking causes cultural systems to change.
* Theodore Caplow observe cyclical pattern in trends like fashion, pubic opinions, & fads in industrial / modern societies.
* Rise & fall of fashion trends reflects a contemporary cyclical pattern.
* New Age movements popularized the belief that "everything that goes around comes around".
* Modern sociologists argue that complex historical processes of change should also be studied besides development.

* Linear time perception became common during the industrial revolution.

* Unilineal evolution theory => All societies progress from simple to complex.
* Acc. to 19th century unilineal evolution, the 3 stages of societal development are,
  1) Savagery 2) Barbarism 3) Civilization
* August Comte (father of sociology) proposed the theological (مذہبی), metaphysical (فلسفی) & positivistic (سائنسی) stages.
* Herbert Spencer coined the phrase:
  "Survival of the fittest". جو society خود کو adapt کرتی ہیں وہ environment کے حساب سے survive کرتی ہیں۔
* Acc. to Spencer, western societies advance more bcz they were better adapted to change.
* Durkheim believed that change in society would lead to emergence to new solidarity.
* Mechanical solidarity is found in traditional societies acc. to durkheim.
  پرانی societies میں لوگ same کام کرتے تھے اس لیے unity ہوتی تھی۔
* In modern industrial societies, unity comes from organic solidarity. (Durkheim)
  new societies میں لوگ diff. roles اپناتے ہیں اور exchange system کی وجہ سے unity بنتی ہے۔
* Spencer used the idea of "progressive stages" influenced by biology.

* Evolutionary perspective view social change as a gradual & adaptive process similar to biological evolution.
* Acc. to classical evolutionary theorists, all societies eventually move toward scientific rationality
* Durkheim believe that shared values & beliefs held early (traditional) societies together
* Key difference b/w mechanical & organic solidarity in Durkheim's theory is:
✓ One is based on similarity
✓ " " " interdependence
* In linear models of time, the focus is on planning for the future.
* Emile Durkheim opposed the idea that eco. competition would cause chaos in society.
* European societies being in the latter stage & this stage was the highest & last stage of human progress.
*
* Karl Marx => founder of conflict perspective on social change.
* Acc. to Marx, class conflict drives the most significant social change.
* Marx believe that classless society would result from class struggle.

* Acc. to Marxists => globalization, transport & communication systems strengthened "capitalism".
* Modern conflict theorists focus on conflicts beyond class, such as ethnicity & gender.
* Revolutionary stall describes the failure of capitalist countries to experience Marxist revolutions.
* Theda Skocpol's research emphasized that revolutions were influenced by global & national pressures.
* Fall of the Soviet Union is an eg. of ethnic conflict affecting social change.
* Marx's theory is based on linear model of historical development.
* In conflict theory, alienation mean detachment from work & society.
* Core prediction of Marx's theory was violent revolution.
* Theda Skocpol investigated French, Russian & China revolutions & fo.
* Acc to Theda, national, political & eco elites failed to meet the needs of transmiti transnational or international relations, which helped shaped revolutionary struggles & outcomes

* Historical materialism → view that history progresses through conflict (Marx's view).
* Capitalist exploitation is the root cause of alienation among workers
* Modern conflict theory focuses on ethnic conflict, gender inequality, religious differences.
* → nowadays
* Process of change is understood by mix of, neo-evolutionary theory, stress adaptation, & eco. concerns.
* Sources of social change: physical environment (natural disaster, human activities), technology, population, cultural innovation, social conflict.
* Contemporary perspective explains changes using many internal & external causes.
* International trade spreads western culture globally.
* When elites lose legitimacy, social upheaval occ
* A one-way culture spread is called diffusion.
* Elites resist changes as they interest in maintaining status quo.
* The growth in population affects urbanization.
* Globalization increases cultural exchange.
* Cultural diffusion => spread of ideas across cultures.

* Social movements are coordinated, cooperative activities by individuals or groups.
* Social movements plays a significant role in defining the trajectory of human civilizations.
* Social movements like feminist or civil rights had a significant influence on American society.
* Social movements aimed to change society's social, political or cultural systems.
* Social movements are usually a response to injustice.
* Grassroots movement start from ordinary ppl.
* Sherry Cable's study shows that Leadership changed women's confidence.
* Poland's solidority movement eventually lead to Political change.
* Socral movements can set logic of reform.
* Acc. to Verta Taylor, local protests help build citizenship.
* Tannery pollution protest empowered rural women.
* The rise in food riots is linked with eco. competition.
* Lobbying method is used in Social movements.
* Socral movements influence society's structure.

challenge by movements.

* Status quo refers to existing system.
* One main cause of social movement is injustice.

Social Change II

lesson-42

* Global social change => how human behaviour, cultures & communities are evolving on a worldwide scale.
* causes of global social changes are => technology, eco. globalization, political movements, cultural exchange, environment, population shifts.
* Global social change encourages international cooperation.
* Civil rights movement is an eg. of political movement contributing to global social change.
* Change can lead to societal crises if it occurs too quickly or disruptively.
* Social change & social crisis are connected phenomena.
* Social crisis => a breakdown in normal social functioning.
* Arab Spring is an eg of political change leading to social unrest.
* Rapid industrialization can cause social crises due to poor working conditions.

* Resistance to civil right movements in US lead to protests & violence.
* Eco. recession often lead to unemployment & social unrest.
* Rapid eco. growth may have impact of widening income gap & social tension.
* Social change in Pak is multifaceted, ongoing process.
* Urbanization has contributed to lifestyle & employment changes in Pak.
* Women's empowerment in Pak has been supported by campaigns & legislation.
* Cultural traditions, eco. issues, & political dynamics adds complexity to Pak's social transition.
*. Globalization has influenced social infrastructure positively on Pak's society.
* Civil society activism in Pak has contributed to social development.
* Infrastructure development has improved social & healthcare services in Pak.
* Social transformation is influenced by 3 main variables.

3) Invention: new ideas, items & social conventions are created.

* Rocket propulsion research in 1940s led to space travel.

2) * Discovery => Using what is already presed in nature.

* Increased life expectancy in modern societies is a result of medical discoveries.

* 3) Diffusion => Spreading products, ppl & information.

* Acc. to Ralph Linton, clocks used worldwide were originally made in Europe.

* The materials used in our clothes were mainly sourced from Asia.

* Original coins (used today) made in Turkey.

* Material things changes faster than cultural ideas

* Scientific developments are progressing faster than our ability to judge them morally.

* Using European clocks in Asian countries is an eg. of Diffusion.

* A century ago, the avg household size was 4.8 persons.

* Factor of demographic change => immigration, urbanization, population aging, chage in birth rates

* B/w 1870 & 1930, millions of immigrants settle in Industrial centers in America.

* As a result of rural to urban migration in the US villages turned into cities.

* The U.S became a mainly urban society for the first time due to immigrants & rural migrants.
* Snowbelt & Sunbelt are two regions involved in internal migration in the U.S.
* Smaller household sizes trends reflects a major demographic shift in households.
* Migration to cities caused consolidation of farm villages.
* Immigrant settlement & rural migration contributed to the expansion of American metropolitan areas.
* The term demographic change mostly deals with population dynamics.
* The movement of ppl from Latin America & Asia to the US is called immigration.
* A major cause of ppl moving within or b/w societies is called immigration.
* Globalization (eco. force) affects social development.
* Political movements like civil rights campaign in the U.S led to repeal of segregation laws.
* Media influence social change by spreading culture & idea.
* Wars & pandemic crisis leads to social adaptation.
* Eco. crises impact society by changing employment patterns

* Environmental challenges promote sustainable behaviour.
* A key effect of globalization is cross-border cultural exchange.

* External sources causes social changes are: Technological advancements, Eco. forces, political movements & policies, cultural interchange & policies, environmental factors, demographic changes, international Relations, events of crisis, etc. Cultural diffusion, educational institutions,

he doesn't say conflict bring changes he focus on ideas.

* Max Weber said that ideas were the main driver of the majority of social growth.
* Weber believes that charismatic leaders could bring social change.
* Weber linked the rise of industrial capitalism with Protestant theological beliefs.
* Protestant ideas help grow capitalism in Western Europe, acc. to weber.
* Acc. to Weber, when ppl unite for a common goal social change occurs.
* Weber believed that ideas could influence history & society.
* Protestant work ethic is a belief system based on Religious values & hard work.

* Weber's perspective => Ideas & beliefs shape societies.

* Acc to Karl Marx, social conflict b/w classes drives historical changes in society.
* In Industrialist- capitalist societies, the main conflict is b/w capitalists & workers.
* Marx believe that socialism would replace capitalism.
* Marx believed that conflict arises due to social inequality.
* Criticism about Marx theory => it is oversimplified.
* Source of social conflict acc. to Marx are: Class conflict, race & gender conflict.
* Marx's ultimate god for society was: a classless society (socialism).

Collective Behaviour — Lesson-43

* Contagion theory is proposed by Gustav LeBon.
* Acc. to Contagion theory, ppl in crowds (acc. to group) leave their individuality & act emotionally.
* Anonymity & suggestions, makes emotions contagious in a crowd, acc. to LeBon.

* Ppl behave irrationally due to emotional spread etc. (Contagion theory).
* Turner & Killian agreed on with Contagion Theory on => The more uncertain the issue, the more people follow others suggestions.
* Convergence Theory => Crowds form when like-minded individuals come together with shared intentions.
* Convergence theory focuses mainly on emotional spread in crowds.
* Convergence theory suggest about that crowd partners already have similar attitudes before joining.
* Criticism => Participants & nonparticipants often have similar attitudes.
* Acc. to convergence theory, violent behavior in crowds happens bcz ppl are already inclined towards such actions.
* Convergence theory emphasizes on pre-existing attitudes of individuals in a crowd.
* Emergent norm theory => Ppl in crowds develop new norms by observing each other, not by blindly copying.
* Value-added theory (Neil Smelser): Collective behavior occurs through a series of steps that build up social pressure until a triggering

event causes action.

* Collective behaviors (protests, riots & social movements)

By Neil J. Smelser (simple)

* Value-added theory => Collective behavior happens when certain (multiple) social conditions build up & trigger people to act together.

Factors include:

1) Structural conduciveness: When society allows space for people to gather & talk, collective actions can grow.

2) Social control: If authorities (like govt. or police) are weak or supportive of protests, collective action is more likely to happen.

3) Structural Strain: Social problems like inequality or poverty that create pressure for change

4) Generalized Beliefs: Shared ideas among ppl about problem, who's responsible & suggest a plan of action.

5) Mobilization for action: When leaders gathers ppl for ~~action~~ a cause.

Shared belief about problem & its solution.

- Emergent norm theory suggests crowd behavior is based on new grp-created norms.

* Chinese authorities supported emergent norm theory bcz they believed violent crowd leaders spread dangerous norms.
* Emergent norm theory was introduced by Turner & Killian.

* The most extreme & dramatic kind of crowd behavior is mass suicide.
* Emotion & grp structure are 2 main features sociologists consider in collective behavior.
* Mass suicide of over 900 ppl happened in Jonestown in 1978.
* Media can either support or reduce collective action / behavior.
* Human interest stories => personal stories about ppl or animals in emotional situations.
* Eg of modern mass behavior include rumors, urban legends, fads & moral panic.
* Mass behavior happens when ppl are not physically together, but are influenced by media or msgs.
* Branch dividians was involved in Waco incident.
* In Waco siege (1993), over 90 members of a religious grp died during a conflict with govt. forces.

short-lived trends

* Fads => are passing social trends that are frivolous, odd & only enjoy by a small % of population. (green hair, pet ferrets, wii games)
* Fashions last longer & are more widely accepted by society.
* Fashion changes with social & eco. trends.
* Eg: clothing styles, hairstyles, home or car designs.
* Rumors are unconfirmed piece of info. that spread from person to person, usually during uncertain times
* Rumors reflect ppl's fears, biases, hopes & can be used by activist to support or oppose change.
* Tabloids & Trash TV, helps in spreading rumors.
* Social movements are organized grp actions to support or resist change.
* Unlike fads, riots or panics, social movements are planned, long-lasting & have leaders & structures.
* Social movements work outside official organization & political systems to bring attention to issues ignored by society.
* Groups part of social movements => protest organizers, environmental activist & human rights campaigners.

* Social movements often have new ideas about future & try to challenge the mainstream views.
* Acc. to Lofland & Meyer, social movements are non-institutional challenges to society.
* Social movements get their power from their organization & persistence.
* Relative Deprivation Theory => social movements starts when ppl feel inferior to other or earlier generations. McKharty & Zald
* Resource Mobilization Theory => Movements happen when grps successfully gather resources like money, leadership, media attention etc. ~~& ab~~
* Says that dissatisfaction is common, but collective action is rare.
* Framing Theory ~~ffra~~ (David Snow & Robert Benford) => Movements must align their goals & values with ppl's values & beliefs (called frame alignment)
* Acc. to framing theory, a movement gain more members by making their msg meaningful & relatable.
* ~~Social~~ Acc. to Robert Goldberg, movement leaders use creative & new methods to

fight for change bcz they lack formal power.

* Social movements are classified into 4 types based on their goals, methods & interaction with authority.

1) Reform movements => most common & accepted type.

* Aim to bring small or gradual changes within the existing political system for eg. Children's Rights Movement.

*

2) Utopian movements => want to build perfect societies.

* Focus on future possibilities & individual fulfillment.

3) Revolutionary Movements (want to completely change) => seek major & radical change by replacing old system with new ones

*Eg: American & French Revolutions.

=> have both Utopian objectives & specific plans for managing a society once they obtained power. (after getting power).

*

4) Resistance (or Counter) Movements: Aim to resist or reserve change

* Promote traditional values & oppose reform movements.
* Eg: Eagle Forum opposed to feminist group (NOW) National Organization for Women.
* Common in debates like abortion, civil rights, gun laws etc.
* Modern social movements spread their msgs & connect with ppl by websites & online platforms.

Life course of Social Movements: grow & fade

* Sociologist have identified 5 stages in the growth & maturity of social movements.

1) Intial unrest & agitation: most social movements fail at this stage.
* During this stage, ppl are worried about societal issue & want to see it changed.
* ~~Sociologist used~~
2) Resource Mobilization: Sociologist use this stage to describe management & utilization of resources like time, money, info, mailing lists & ppl's skills.
* Without resource mobilization, movement cannot succeed.

* Acc. to sociologists McCarthy & Zald, resource mobilization turns a grp of upset ppl into a movement.

3) Organization: Labor is divided & leadership makes decisions.

4) Institutionalization: In this stage movement becomes bureaucracy.

* The movement is led by carreer officials.
* Career officials may focus more on their own position than the cause
* Member excitement fades.

5) Decline & Death:

* Leaders now manage routine operations.
* Public interest has decreased.

* Sign of decline => daily operations continue but ~~no~~ public interest fades.
* Causes of death => Loss of funding & public interest.
* In final phases, a small core grp working without funds remains.

* Dispersed collective behavior refers to the behavior of large grps of ppl who are spread out geographically but share beliefs or actions without being organized.

Types:

1) * Fads or Fashions: Short-lived trends.
* Often cyclical (come & go).
* Influenced by social media, commercial or societal pressures.

2) * Rumors: Unverified or false info.
Can influence behavior or beliefs. +ve or -ve
Shaped by communication & discussion

3) Public Opinion: Collective thoughts or attitudes of ppl on issues like politics or culture.

4) Mass Hysteria: A shared emotional reaction (fear or anxiety) to a perceived threat. (real or imagined)
* Leads to panic & irrational behavior.

* Social tolerance => means respecting & accepting ppl who are different in terms of culture, religion, race, gender etc.

* It helps build inclusive, fair & united society.
* It allows freedom of expression & discourages discrimination & prejudice

* Social intelligence: critical skill ~~to~~ require in order to successfully negotiate social interactions.
* Social intelligent individual can have empathy, active listening, reading body language or tone.
* They are good at conflict resolution, making connections & influencing others positively.

Modernity & Past Modernity Lesson-44

* During Europe's history, traders, explorers, missionaries met diff. types of societies.
* Acc. to Marvin Harris, there are 3 main types of societies.

1) Hunter - Gatherer (Earliest Society): (1st human society)
* Ppl survived by hunting animals, fishing & ~~gathering~~ wild plants.
~~They~~ These societies still exist in some areas like Africa, Brazil & Guinea.
* Had very little inequality & did not try to collect wealth.

2) Pastoral & Agrarian Societies:

* About 20,000 years ago, some grps started farming & raising cattles.
* Pastoral society depends on domestic animal.
* Agrarian " " " growing crops.

many communities used both systems together

3) Nonindustrial or Traditional Civilization:

* Around 6,000 BCE, larged societies formed with cities, Kings & high inequality.
* These civilizations used writing & developed science & art. (refered as 5 C's of civilization) writing art.
* First civilizations developed in the fertile river valleys of Middle East.

also called advanced or developed societies

* Industrialized societies are modern, developed countries with strong tech, industries & services.
* Industrial & service based ~~societies~~ eco. replaces agrarian eco..
* Urbanization is a major feature of industrialization.
* Industrialized societies focus on skilled labor & knowledge.

* Political stability is essential for both eco. growth & social cohesion.
* In industrialized societies, political system are mostly stable & democratic.
* Main concern in industrialized societies is emotional damage.
* Cultural diversity is appreciated in industrialized societies.
* Rules of law & democracy promotes eco. growth in indu- societies.
* Social safety nets helps ppl in need in industrial societies.
* Managing einequality is challenging in industrial society.
* Globalization in industrialized societies means being part of world trade & politics.

* In past 200 years society has changed rapidly due to several key factors.

1) Cultural 2) Economical 3) Political

~~4) Cultural influence:~~

* Development of science & secularization of ideas are two cultural factor that influence societal change in modern times.

2. Eco. Influenced: (Type of eco)

* Industrial capitalism demands continuous growth & innovation
* Acc. to Giddens, modern societal change has been most influenced by culture, eco. & politics.
* Secularization reduces dependence on religious explanation in modern culture.
* Competition b/w govt. is a key political driver of change in modern societies.
* In ancient times, political chage was usually limited to elites.
* Modern production under capitalism aims for profit & wealth accumulation.
* Digital culture is a feature of late modern societies.
* Democratic system mostly affects ppl in everyday life.
* Govt acts as a major employer & regulator in modern eco.
* Tech advancements & identity diversity makes late modern society complex.
* Acc. to Giddens, traditional production was stagnant & customary.

* Modern society emphasizes rational & logical thinking.
* Public opinion in modern times is shaped by mass comm. & interaction.
* Challenges of late modern society: political polarization, consumerism & environmental difficulty.
* Revolutionary ideologies motivates constant lifestyle changes in modern culture.
* In modern societies, individualization refers to focus on personal choices & identity.

Modernity & Post Modernity - II (Lesson: 45)

* Foucalt (Michel) influence postmodern thought
* Foucalt enlighten how modern society developed systems like prisons, hospitals & schools, not just for help but also for controlling ppl.
* Foucalt Belieed that Enlightment ideals of freedom also linked with serveillance, order & control.
* Foucalt's method of analyzing historical ideas to understand the present is called Archaeology.
* Foucalt explored how modern society created & managed ideas of normal & abnormal behavior.

* Foucalt challenged the traditional view of scientific knowledge.
* Foucalt believe that concepts like sanity, sexuality & normal behavior were socially constructed over time.
* Foucalt's work focused on relationship b/w power, ideology & discourse.
* Foucalt's aim was to make the present visible by examining past beliefs & systems.

* Jürgen Habermas (German thinker) believes that inequality, prejudice & political crises (modern problems) can be solved through rational & respectful public disussion, which he calls communicative action.
* Habermas believes that reason should be used for Liberation & equality.
* Habermas supports Enlightenment values like reason & progress.
* Financial crises & inequality caused Habermas to shift his views on modernity.
* Habermas now see Religion as helpful for solving modern problems.

* Habermas fears that globalization is reducing democratic self-steering.
* Critisicm of his theory => He ignores power & emotion.
* Habermas believes that public reasoning should question values & assumptions.
* Habermas links the modern crisis to Loss of ethical direction & civic ~~management~~ engagement.
* Contrite modernity by Habermas => A modern era that regrets its mistake & seeks correction.
* Habermas views religion as a source of unity & guidance.
* Habermas used to reject religion in politics.
* Weber & Parsons thought that religion would vanish as societies modernized.
* Post-secular society means a modern society where religion hasn't disappeared & still affects pu public life despite ~~secula~~ secular trends
* Habermas introduced the idea of post-secular society.
  → like UK & France.
* The idea of post-secular society emerged after 2001.

* Habermas says the certainty that religion will vanish is "losing ground".

* Ulrich Beck (German sociologist), rejects the idea of post-secular.
* says we have entered second modernity.
* Second modernity => modern life is shaped by risks & managing these risks defines our current age.
* Risks (Globally) => disease, food, tech, health, pollution, nuclear weapons.
* Risk society => a society shaped by managing global dangers.
* Acc. to Beck, risk society has replaced industrial society.
* AIDS, SARS, swine flu are eg. of risks in Beck's theory.
* Beck says technology creates & manages new risks.
* Faster spread of disease is an effect of globalization mentioned by Beck.
* Genetic Profiling & WebMD technologies increase risk awareness.
* Giddens also agrees Beck on the rise of risk in modern times.

* Manuel Castells (Network society) where tech & electronic system now control many parts of life.
* Machines take over invisible systems
* Personal identity created through interaction with others not ~~with~~ by tradition
* Castell's automation => The new global eco. driven by digital systems.
* Acc. to Castells, family & gender roles is most affected by identity changes.
* Increase in bureaucracy would imprison us all in an iron cage.
* Iron cage (metaphor) Weber used that Castells agrees with.
* Acc. to Castells, technology control force in eco. & identity.
* Castells echo Weber in his concerns about control & systems.
* Family & gender roles is most affected by identity changes, acc. to castells.

* Acc. to Anthony Giddens, social reflexivity has increased as a result of info. era.
* Social reflexivity means ppl ~~think~~ about & question their lives rather than just follow traditions.

* Contraception technology gives ppl more control over reproduction today.
* Democracy of emotions => equality & respect within personal relationships. (Giddens)
* NGOs & social movements acts outside the formal political system. (Giddens)
* Democratic govt. must respond to many competing claims & opinions in sub-political sphere
* Nations have lost some control.
* mixing traditional & modern ideas
* Postmodernism is a modern thinking style that started in ~~mid-1900s~~.
* Pak has seen a variety of repercussions.
* Salman Rushdie is associated with postmodernism Literature in the context of Pak.
* => (Novel) Midnight's Children is an eg. of postmodern writing.
* Pak artist (Rashid Rana) is known for postmodern art. => Shazia Sikander
* A mix of traditional & modern styles is a common feature of postmodern architecture in Pak.
* Cultural studies in postmodernism focuses on issues like power, identity, gender, class & ethnicity.

* Media in Pakistan shown postmodern influence using visual storytelling & intertextuality in music & video.
* Philo & Social Studies are most directly impacted by post-- critical theory in Pak.
* Feature of postmodernism => Eclectism, intertextuality, ~~art~~ critique of power.
* Postmodernism emerged in the middle of 20th century.
