

PAID VU LMS HANDLING by Mam Mehwish

03184148783

Past Papers for Mids./Finals are also Available

1. What two categories of dream content did Sigmund Freud describe?

- Poetic and realistic
- Delusional and hallucinatory
- Latent and manifest (Correct)
- Literal and symbolic

2. The place in the retina where the axons of all the ganglion cells come together to leave the eye is called as:

- Blind spot (Correct)
- Optic nerve
- Optic chiasm
- Fovea

3. Which of the following deafness may also be caused by damage to the auditory cortex?

- Nerve
- Conduction
- Central (Correct)
- Auditory pathway

4. If reinforcement is withheld, the response rate of the child declines, and finally, no response is shown by the child, this will be an example of which of the following?

- Acquisition
- Reward
- Extinction (Correct)

- Shaping

5. Outer walls of the eye are formed by a hard, white substance called:

- Cornea
- Sclera (Correct)
- Iris
- Retina

6. Which of the following sleep stages is the deepest stage of sleep?

- Stage-2
- 1
- 2
- 3
- 4 (Correct)

7. Who among the following talked about the “cognitive maps”?

- Tolman (Correct)
- Thorndike
- Maslow
- Skinner

8. Which of the following learning involves the practical application of the learned phenomena?

- Problem solving
- Verbal
- Visual
- Motor (Correct)

9. Which of the following binocular cues reflects that the greater the disparity between the two images the retinas receive of an object, the closer the object seems to us?

- Retinal disparity (Correct)
- Occlusion
- Accommodation
- Convergence

10. Giving 2 candies after 6 days and one after two days is the example of which of the following schedules of reinforcement?

- Fixed-Interval Schedule
- Variable-Interval Schedule (Correct)
- Variable-Amount Schedule
- Fixed-Ratio Schedule

1. Which of the following is defined as “mental processes” or the “faculty of knowing”?

- Option A: Illusion
- Option B: Perception
- Option C: Cognition
- Option D: Cognition
- Correct Option: Cognition

2. Shaping can best be used for all of the following EXCEPT:

- Option A: Appropriate classroom behavior
- Option B: Learning to play a musical instrument
- Option C: Make children happy by showing them their favorite pet
- Option D: Training mentally handicapped children
- Correct Option: Learning to play a musical instrument

3. Which of the following techniques starts reinforcing a behavior that is the first toward the final behavior and then gradually reinforces successively closer approximations to the final behavior?

- Option A: Shaping

- Option B: Assertion
- Option C: Aversive
- Option D: Modeling
- Correct Option: Shaping

4. Similarity is the tendency to perceive _____.

- Option A: Things that look similar as being part of the same group
- Option B: Objects that are close to each other as part of the same grouping
- Option C: Objects, or figures, on some background
- Option D: Things with a continuous pattern rather than with a complex, broken-up pattern
- Correct Option: Things that look similar as being part of the same group

5. Which of the following binocular cues reflects that the greater the disparity between the two images the retinas receive of an object, the closer the object seems to us?

- Option A: Accommodation
- Option B: Convergence
- Option C: Retinal disparity
- Option D: Occlusion
- Correct Option: Retinal disparity

6. Which of the following stages refers to the transition between wakefulness and sleep?

- Option A: Stage-3 Sleep
- Option B: Stage-4 Sleep
- Option C: Stage-1 Sleep
- Option D: Stage-2 Sleep
- Correct Option: Stage-1 Sleep

7. Studies show that the area near to _____ is more sensitive to low-frequency sounds.

- Option A: Oval window

- Option B: Anvil
- Option C: Ear drum
- Option D: Cochlea
- Correct Option: Oval window

8. In the theory of classical conditioning, the acronym UCR stands for which of the following?

- Option A: Unconditioned reflection
- Option B: Unconditioned reinforcement
- Option C: Unconditioned reflex
- Option D: Unconditioned response
- Correct Option: Unconditioned response

9. Which of the following refers to the process of perceiving a shape, pattern, object, or scene by attending to the individual elements making it up?

- Option A: Top-down processing
- Option B: Feature analysis
- Option C: Bottom-up processing
- Option D: Phi phenomenon
- Correct Option: Bottom-up processing

10. Which of the following refers to the quality of sound that is being produced by the frequency of the sound wave?

- Option A: Volume
- Option B: Intensity
- Option C: Pitch
- Option D: Frequency
- Correct Option: Pitch

1. Which of the following refers to perceptual processes that organize the perceived world by filling gaps in stimulation?

Options:

- A) Symmetry
- B) Similarity
- C) Proximity
- D) Closure

Correct Option: D) Closure

2. Which of the following learning forms an association between two stimuli?

Options:

- A) Vicious learning
- B) Operant conditioning
- C) Latent learning
- D) Classical conditioning

Correct Option: D) Classical conditioning

3. Similarity is the tendency to perceive _____.

Options:

- A) Things with a continuous pattern rather than with a complex, broken-up pattern
- B) Things that look similar as being part of the same group
- C) Objects, or figures, on some background
- D) Objects that are close to each other as part of the same grouping

Correct Option: B) Things that look similar as being part of the same group

4. All of the followings are the stimulants EXCEPT:

Options:

- A) Amphetamines
- B) Benzedrine
- C) Barbiturates
- D) Cocaine

Correct Option: C) Barbiturates

5. Which of the following is NOT considered as the physiological change due to meditation?

Options:

- A) Lowered blood pressure
- B) Increased heart rate
- C) Changed brainwave pattern
- D) Lessened oxygen usage

Correct Option: B) Increased heart rate

6. Which of the following learning approach was supported by Albert Bandura?

Options:

- A) Social and situational
- B) Cognitive
- C) Humanistic
- D) Neurobiological

Correct Option: A) Social and situational

7. A child learns that whenever he eats all of his dinner he gets a cookie for dessert. This type of learning is the best example of which of the following?

Options:

- A) Social learning theory
- B) Classical conditioning
- C) Operant conditioning
- D) Operant conditioning

Correct Option: C) Operant conditioning

8. The place in the retina where the axons of all the ganglion cells come together to leave the eye is called as:

Options:

- A) Fovea
- B) Blind spot
- C) Optic nerve
- D) Optic chiasm

Correct Option: B) Blind spot

9. The organism is reinforced after a varying number of responses are made. It is known as _____ ratio schedule.

Options:

- A) Intermittent
- B) Fixed
- C) Variable
- D) Average

Correct Option: C) Variable ratio schedule

10. Which of the following laws states; responses which produce a satisfying effect in a particular situation are more likely to occur again in that situation?

Options:

- A) Law of Proximity
- B) Law of Effect
- C) Law of Absolute Threshold
- D) Law of Enclosure

Correct Option: B) Law of Effect

1. Which of the following constancy refers that object's brightness remains the same regardless of changes in illumination?

- A) Shape Constancy
- B) Lightness Constancy
- C) Size Constancy
- D) Color Constancy

Correct Answer: B) Lightness Constancy

2. Which of the following situations can NOT be considered as Operant conditioning?

- A) Usman earned profit to the organization and gets a bonus at the end of the year
- B) Teacher gives silver and golden stars on children's workbooks
- C) Horses gallop faster when the rider whips them
- D) Arsalan starts feeling bad at the thought of visiting the dentist

Correct Answer: D) Arsalan starts feeling bad at the thought of visiting the dentist

3. In which of the following types of learning, an association is formed between a behavior and a consequence?

- A) Observational learning
- B) Modeling
- C) Operant conditioning
- D) Classical conditioning

Correct Answer: C) Operant conditioning

4. Which of the following means "analyzing smaller features and building up to a complete perception"?

- A) Perceptual construction
- B) Hypothesis formation
- C) Top-down processing
- D) Bottom-up processing

Correct Answer: C) Top-down processing

5. Shaping can best be used for all of the followings EXCEPT:

- A) Training mentally handicapped children
- B) Appropriate classroom behavior
- C) Make children happy by showing them their favorite pet
- D) Learning to play a musical instrument

Correct Answer: C) Make children happy by showing them their favorite pet

6. In which of the following stages of sleep, a person is almost cut off from the external world and is least responsive to stimulation from outside?

A) Stage 1

B) Stage 2

C) Stage 3

D) Stage 4

Correct Answer: D) Stage 4

7. REM is an abbreviation of which of the following?

A) Rapid eye movement

B) Restore eye movement

C) Remote eye movement

D) Rational eye movement

Correct Answer: A) Rapid eye movement

8. The amount of light entering the eye is controlled by which of the followings?

A) Retina

B) Lens

C) Cornea

D) Pupil

Correct Answer: D) Pupil

9. Studies show that the area near to _____ is more sensitive to low-frequency sounds.

A) Anvil

B) Oval window

C) Cochlea

D) Ear drum

Correct Answer: B) Oval window

10. Which part of the ear starts vibrating when sound waves strike/hit it?

- A) Outer
- B) Inner
- C) Middle
- D) Ear drum

Correct Answer: D) Ear drum

1. Which of the following constancy refers that object's brightness remains the same regardless of changes in illumination?

- a) Shape Constancy
- b) Size Constancy
- c) Color Constancy
- d) Color Constancy (Correct Answer)

2. Which of the following disease is an extremely rare hereditary condition which occurs due to the absence of cones in the eye?

- a) Anomalous trichromacy
- b) Anomalous trichromacy
- c) Tritanopia
- d) Rod monochromacy (Correct Answer)

3. Who among the following was the founder of operant conditioning?

- a) Albert Bandura
- b) B.F. Skinner (Correct Answer)
- c) Sigmund Freud
- d) William James

4. Which of the following technique starts reinforcing a behavior that is the first toward final behavior and then gradually reinforce successively closer approximations to the final behavior?

- a) Shaping (Correct Answer)
- b) Modeling
- c) Assertion
- d) Aversive

5. Which of the following cue is NOT considered the binocular cue?

- a) Linear perspective
- b) Convergence
- c) Retinal disparity
- d) Accommodation (Correct Answer)

6. Railroad tracks, highway tracks appear to be converging at some distance. This is an example of which of the following monocular cue?

- a) Interposition
- b) Motion parallax
- c) Linear perspective (Correct Answer)
- d) Texture gradient

7. Ali who was scared of neighbor's dog, became scared of all dogs and finally started screaming at the mere name of a dog. This is an example of what?

- a) Generalization (Correct Answer)
- b) Discrimination
- c) Higher order conditioning
- d) Extinction

8. Top- Down processing refers to the perceptual phenomenon guided by all of the followings EXCEPT:

- a) Motivation
- b) Expectation (Correct Answer)
- c) Memory

- d) Experience

9. The roots of cognitive learning can be traced in the work of:

- a) John B. Watson
- b) Abraham Maslow
- c) Wolfgang Kohler (Correct Answer)
- d) Sigmund Freud

10. Shaping can best be used for all of the followings EXCEPT:

- a) Make children happy by showing them their favorite pet
- b) Learning to play a musical instrument
- c) Training mentally handicapped children (Correct Answer)
- d) Training animals

1. Which of the following is NOT a founder of Gestalt psychology?

- a) Wolfgang Kohler
- b) Kurt Koffka
- c) Max Wertheimer
- d) William James
- Correct Answer: d) William James

2. Which type of hearing problem can be reduced with ordinary hearing aids?

- a) Conduction deafness
- b) Central deafness
- c) Auditory pathway deafness
- d) Sensory-neural deafness
- Correct Answer: a) Conduction deafness

3. Which type of learning approach was supported by Albert Bandura?

- a) Social and situational

- b) Humanistic
- c) Neurobiological
- d) Cognitive
- Correct Answer: d) Cognitive

4. Which of the following diseases is an extremely rare hereditary condition which occurs due to the absence of cones in the eye?

- a) Color Blindness
- b) Anomalous trichromacy
- c) Rod monochromacy
- d) Tritanopia
- Correct Answer: c) Rod monochromacy

5. Which binocular cue reflects that the greater the disparity between the two images the retinas receive of an object, the closer the object seems to us?

- a) Convergence
- b) Accommodation
- c) Occlusion
- d) Retinal disparity
- Correct Answer: d) Retinal disparity

6. What are the hammer, anvil, and stirrup?

- a) Types of sound that most people can detect
- b) Tiny bones located in the middle ear
- c) Words often used by audiologists in testing for hearing difficulties
- d) Types of cones on the retina
- Correct Answer: b) Tiny bones located in the middle ear

7. Giving 2 candies after 6 days and one after two days is the example of which of the following schedules of reinforcement?

- a) Variable-Interval Schedule
- b) Fixed-Interval Schedule
- c) Fixed-Ratio Schedule
- d) Variable-Amount Schedule
- Correct Answer: a) Variable-Interval Schedule

8. Which part of the eye is a muscle that regulates the size of the pupil?

- a) Retina
- b) Iris
- c) Sclera
- d) Lens
- Correct Answer: b) Iris

9. All of the following statements concern with the concept of learning EXCEPT:

- a) Learning is another word for physical growth
- b) Learning involves changes in behavior
- c) Learning involves experiences
- d) Learning involves experiences
- Correct Answer: a) Learning is another word for physical growth

1. Ahmed is scared of neighbor's dog that barks every time the child passes by; but he loves his own dog. This is an example of what?

Options:

- A) Reinforcement
- B) Extinction
- C) Generalization
- D) Discrimination

Correct Answer: D) Discrimination

2. When pigeons carry messages from one place to another, which of the following strategy is being used by pigeons?

Options:

- A) Cognitive Maps
- B) Shaping
- C) Extinction
- D) Reinforcement

Correct Answer: A) Cognitive Maps

3. Anila touches a hot bowl and immediately moves away her hand. Hot bowl is an example of a/an:

Options:

- A) Reflex
- B) Response
- C) Stimulus
- D) Event

Correct Answer: C) Stimulus

4. Which of the following learning forms an association between two stimuli?

Options:

- A) Operant conditioning
- B) Latent learning
- C) Classical conditioning
- D) Vicious learning

Correct Answer: C) Classical conditioning

5. Which of the following refers to perceptual processes that organize the perceived world by filling gaps in stimulation?

Options:

- A) Similarity

- B) Symmetry
- C) Proximity
- D) Closure

Correct Answer: D) Closure

6. People do take drugs for all of the following reasons Except:

Options:

- A) Peer modeling
- B) Thrill or excitement
- C) Addiction
- D) Building relationships

Correct Answer: D) Building relationships

7. Which of the following type of memory is involved in recalling the features of the environment?

Options:

- A) Episodic
- B) Declarative
- C) Procedural
- D) Spatial

Correct Answer: D) Spatial

8. All of the following are stimulants EXCEPT:

Options:

- A) Amphetamines
- B) Cocaine
- C) Benzedrine
- D) Barbiturates

Correct Answer: D) Barbiturates

9. Which of the following cue is NOT considered the binocular cue?

Options:

A) Linear perspective

B) Convergence

C) Accommodation

D) Retinal disparity

Correct Answer: A) Linear perspective

10. All of the followings are parts of middle ear EXCEPT:

Options:

A) Anvil

B) Hammer

C) Stirrup

D) Cochlea

Correct Answer: D) Cochlea

MAM MEHWISH 03184148783

👤👤 Paid Vu Lms Handling 👤👤

♦ 1 GDB= Rs 100

♦ 1 Quiz= Rs 200

♦ 1 Assignment=Rs 250

♦ Agr complete handling krwatey hain 1 subject ki with all activities= Rs 500 (Half Semester) ♦

LECTURES Play Service Available In Very Low Price. 📄
