MTH202 - Quiz No.3

Date: 01 January 2026

Q.1 Which of the following is not an irrational number?

A. √2

B. √4

C. √3

D. √5

Q.2 The quantity a - d · q equals the?

A. Divisor

B. Quotient

C. None

D. Remainder

Q.3 While proofing by contradiction the equivalence .....is used.

A. p →q ≡(~p□~q) →c

B. p →~q ≡(p□~q) →c

C. ~p →q ≡(p□~q) →c

D. p →q ≡(p□~q) →c

Q.4 Algorithm is a more general term in that the term ---- refers to a particular programming language.

A. None

B. Information

C. Program

D. Task

Q.5 If the sum of two integers is even then their difference would be .....

A. odd

B. even

Q.6 A proof by contraposition is based on the logical equivalence between a statement and its.....

A. none of these

B. converse

C. inverse

D. contrapositive

Q.7 Proof by Contradiction is a/an..... method of proof.

A. Indirect

B. Direct

Q.8 The sum of two irrational numbers in general .....

A. none of these

B. is always a rational number

C. may or may not be an irrational number

D. is always an irrational number

Q.9 For every prime number n, n + 2 is prime.
statement.
Which of the following prime number disproves the above

A. n=5

B. n=3

C. n=7

D. n=11

Q.10 The contrapositive of "5n + 2 is odd, then n is odd" is .....

A. " if n is not even then 5n + 2 is not even"

B. " if n is not even then 5n + 2 is even"

C. " if n is even then 5n + 2 is not even"

D. " if n is even then 5n + 2 is even"
