

رَبِّ زِدْنِي عِلْمًا

STA301

**(STATISTICS AND PROBABILITY)
FINAL TERM**

**IMPORTANT LECTURES AND
TOPICS**

BY MASTERS

ALL PAID SERVICES AVAILABLE

- **Paid Assignments**
- **Paid Quiz**
- **Paid GBDs**

(Only for job holders)

- **LMS handling is also available for
job holders + overseas**

STA301 IMPORTANT LECTURES AND TOPICS FOR FINAL TERM

FINAL TERM PREPARATION BY MASTERS

LECTURE 20, 21, LECTURE 22, LECTURE 23, LECTURE 24

- *Independent and Dependent Events*
Multiplication Theorem of Probability for Independent Events
- *Discrete Random Variable*
Discrete Probability Distribution
- *Mean, Standard Deviation and Coefficient of Variation of a Discrete Probability Distribution*
Distribution Function of a Discrete Random Variable
- *Mathematical Expectation (lecture 23)*
Mean, Variance and Moments of a Discrete Probability Distribution
Properties of Expected Values
- *Concept of Continuous Probability Distribution*
Mathematical Expectation, Variance & Moments of a Continuous Probability Distribution

Mathematical Expectation, Variance & Moments of a Continuous Probability Distribution

BIVARIATE Probability Distribution (**LECTURE 25**)

BIVARIATE Probability Distributions (Discrete and Continuous) (**LECTURE 26**)

Covariance & Correlation (**LECTURE 27**)

Discrete Uniform Distribution **LECTURE 27**

Binomial Distribution (**LECTURE 28**)

Hyper geometric Distribution (**LECTURE 29**)

LECTURE NO. 30

Normal Distribution **PAGE 221 TO 224**

THE PROCESS OF STANDARDIZATION **PAGE 226**

LECTURE NO. 30, 31, 32 *imp*

Sampling Distribution **of all cases**

LECTURE NO. 33

Point Estimation

Desirable Qualities of a Good Point Estimator

LECTURE NO. 34

Methods of Point Estimation

Interval Estimation

LECTURE NO. 35 *imp*

Confidence Interval for μ

Confidence Interval for $\mu_1 - \mu_2$

LECTURE NO. 36

Large Sample Confidence Intervals for p and p_1-p_2
Determination of Sample Size (with reference to Interval Estimation)

Hypothesis-Testing (An Introduction)

Lecture 37 to 39 most important

Hypothesis-Testing all concepts

Lecture 40 to 45

- T-distribution
- F-distribution
- Chi-Square Test of Independence
- Randomized Complete Block Design
- The Least Significant Difference (LSD) Test
- Chi-Square Test of Goodness of Fit

Best of luck
